A. This chart is the difference between new orders and production. Now in the first half of 1920 new orders—or the first quarter—dropped off and production in the first quarter of 1920 was about at its peak. The difference between those two is unfilled orders, of course, do you see?

Q. Yes, I see that.

A. So that when you are producing at a high level and are making deliveries and your men are not filling new orders, as a matter of fact we had a very bad condition of railroad congestion and there was no use placing new orders in that particular period. There was a [fol. 1351] railroad strike on. The result of that situation would be that your unfilled orders in the face of mounting production would drop off, when your new orders do not come along, or for two reasons; things are just about ready to bust in business, and the next thing is that you have a congestion. Now the fact that you are going to get your bust in business—let me say that on the building situation you will find that building permits and building contracts awarded both dropped off very sharply.

Q. In 1920?

A. In the early part of 1920, which shows that the demand which makes itself felt in new orders began todrop off at the very beginning of the year. I mean that is the explanation for the phenomenon you have in mind.

Q. If the demand dropped off before 1920 or at the beginning of

1920 what is the explanation for the very slow dropping of the price? The price was high during the major portion or all of 1920.

Mr. Johnston: No, the price started to fall.

Mr. Benton: The chart shows it.

A. The price starts to go down in the middle. Really the precipitate downward movement starts at the middle of the year.

Q. But it was away above ordinary for four fifths of the year. It is clear on the chart that it started down, but it did not get very far——

A. What you mean by ordinary is a very difficult phrase, when you are coming into a period of crisis. Right in between 1916 and 1920 we had a price revolution and deflation. That is, the general [fol. 1352] level of prices was about we will say 220 as measured by the Bureau of Labor Statistics, and dropped down as low as say 140, and in 1913 it had been 100. So you had a tremendous price revolution in all the general level of prices. Now as to why that price did not immediately drop, I mean just like that, quick on the trigger, the answer to that would be that among these people that were in business during this period, business men in general, any business man who was in business in the first half of 1920, there was not general recognition of the fact that we were in for a period of bad business until fall. Now during that period the unfilled orders are still high, although the production rate is high and under those circumstances there is no particular reason why men should drop their prices. After all, no business man is going to drop his prices if he has got his mill output taken care of at the existing level.

Q. That is true, but all of your answers have been based upon the working of the law of supply and demand, that price usually follows the demand, and in this instance in 1920 it did not follow demand.

A. No, there is a slight lag.

Q. But there is a considerable lag, I think.

A. It depends on what you mean. I am speaking of lags in terms of months.

Q. Well, it is eight or nine months, I take it, from that chart.

A. No, you see what happens is this. In a period of this kind when men have orders it is not until stocks are accumulated and cancellations come in that there is any motive, particularly if you [fol. 1353] are doing business on borrowed money, which may be borrowed as it was in 1920, pretty much up the hill, to liquidate an inventory. Price liquidation comes after people realize that they are in for trouble. Now you do not get—the working of the law of supply and demand as evidenced here, and of which these are significant figures—figures of unfilled orders represent two different elements. I mean production is going on to cut that down—nobody I should say would expect that so quick on the trigger, as you have implied. I should expect if that happened within six months, if we found unfilled orders started dropping off over a period of six months and inventories to accumulate it would be at least six months before prices would break. And this is not an abnormally long lag.

Q. But do not those charts show that the lag in 1920 was considerably slower than it was theretofore?

A. No, I should say if you look at the chart for 1913, at the last business cycle, you will find unfilled orders came down here and your stocks began to accumulate and it was about the same time, it was not a great deal of difference, before the price even made the turn, which is comparable to that. It is about the same in 1913. Over here in 1917 it is about the same, the same as it was over here. The unfilled orders come down. Now those are the only ones for which we have figures. I would say that the lag was not significantly longer, if it was any longer, if it was as long in 1920 as it was in the others. You see what I mean?

Q. Yes, I believe I do now.

A. The lag is from the 1st of February, 1913—well, to the early [fol. 1354] fall of 1913, you have about the same length of time. You have your stocks on hand moving up. Here you get a similar situation. Now of course this was a very minor cycle. This cycle in 1913 was not of great intensity. If one were to compare the movement of the Harvard business curve for that cycle with the movement in 1907, which was the last time when we had a general break in business comparable to that which came in 1920, you will see that there is a considerable difference between the cycle which culminated in the spring of 1913 and that which culminated in 1907 or that which is shown on chart 1 of Exhibt 3, where the Harvard business curve for the post-war period is shown. In 1920 when the break came we had a very sharp break, the timing of which shows very close correlation with the movements of the curve for maple flooring, although on the recovery the maple flooring price seems to have been much slower.

By Mr. Johnston:

Q. Is not this true, Prof. Vanderblue, which may have confused counsel in reading these charts, that these charts are comparisons only insofar as they indicate the movement of the lines; that is to say, the space indicated between the curved lines and the straight lines on the chart are of no significance in these comparisons?

A. We were just speaking of the question of lag, that is all we were speaking of, the question of the time lag.

Q. That is indicated by the point at which the price starts to recede or advance?

A. Yes.

Q. And the extent to which the white line indicating the price of the product is above the other lines on the chart is of no significance in this comparison?

[fol. 1355] A. We were simply comparing the time element and the question was whether or not the lag behind the drop in unfilled orders in 1920 was anything extraordinary. By referring to other situations which are in any sense analogous we see that it is not, and I supplemented my statement by the fact that the other pre-war cycle for which we have figures here shows a much less violent movement of prices than that which came in 1920-21.

Mr. Benton: That is all."

[fol. 1356] Thereupon the following testimony was taken and the following proceedings were had in open Court:

Mr. Johnston: I would like to offer in evidence and ask to have marked as Defendants' next Exhibit a statement which I submitted to counsel for the Government concerning the standardization of grades and sizes.

(Said statement was marked Defendants' Exhibit BB and was received in evidence by agreement of counsel that the person making such statement would testify to the facts set forth therein if called upon the stand.)

"I should also like to offer as the next exhibit a statement prepared by the J. W. Wells Lumber Company showing the average prices of rough maple lumber during the period from 1918 up to 1922 inclusive or the first two or three months in 1923. This statement was prepared from all sources available including the prices paid by the J. W. Wells Lumber Company, the prices paid by other lumber companies wherever that data was available and the data available from the trade publications. There also is in here the price of labor too. This is the market upon rough maple lumber of the three grades employed in the manufacture of maple flooring as prepared by the Wells Lumber Company monthly, showing the average price weekly would be too detailed.

Mr. Fowler: We will not object to that being filed, not as absolutely accurate but that Mr. Wells testified to it.

(Said statement was marked Defendants' Exhibit CC½ and was received in evidence by agreement of counsel that the person making such statement would testify to the facts set forth therein if called upon the stand.)

[fol. 1357] GEORGE W. KEEHN, recalled to the stand, testified as follows:

Direct examination.

By Mr. Johnston:

Dr. George W. Earl, who was the president of the Wisconsin Land & Lumber Company, never signed the Articles of Association of the present defendant Association and never became connected with said Association as a member. At the time the present Association was being organized in the spring of 1922, Dr. Earl's health was very poor and he was not able to come to the meetings. Later he went to the Pacific Coast so we could never get from him a final decision as to whether or not his company would join the Association. His company, the Wisconsin Land & Lumber Company, contributed data to the Association during the year 1922. His Company also contributed statistical data in January and February of 1923, which were included in our reports to Association members. About the middle of March, 1923, they ceased to send in data to the

Association. The Wisconsin Land & Lumber Company paid its share of the expenses of the Association during the first quarter I think of 1922. They contributed nothing to the expenses of the Association after the first quarter of 1922. The reason they paid a share of the expenses of the Association for the first quarter of 1922 was that an extensive advertising campaign had been planned during December, 1921, and Dr. Earl felt that his Company should bear its share of this expense because he was very much interested in the advertising work of the Association. The document you hand me is a financial statement of the Association from January to June, 1923. That is the last financial statement issued.

[fol. 1358] (Said document marked Defendants' Exhibit BB-1 and received in evidence.)

I have made a study of the production capacity of the members of the Maple Flooring Manufacturers' Association; also of the production capacity of manufacturers of maple, beech and birch flooring in the United States who are not members of said Association.

"We got a list of all the non-member manufacturers in the United States of Maple, Beech and Birch flooring, so far as we could ascertain their identity. We got some of the names out of the lumber trade-papers; some of them we obtained through members of the Association; some of them we obtained through their selling representatives—really through the members—located in the Eastern markets and in the southern markets; others we obtained the names of through non-members who wrote to us giving us the names of other non-members manufacturers of Maple, Beech and Birch flooring in their vicinity, and we have compiled a list of them arranged in alphabetical order, and also arranged by states, and according to the best information we could get from all sources there seemed to be about 73 of them, and about 31 of them gave us data regarding their manufacturing capacity per year, and we also asked them for their production, we thought it might be interesting to know what their production was."

We addressed communications to the 73 firms above mentioned, asking for their production and capacity. The following letter addressed to the Keystone Manufacturing Company, Elkins, West [fol. 1359] Virginia, dated September 14th, 1923, is a form that was used for the purposes above mentioned. Said letter reads as follows:

Keystone Mfg. Co., Elkins, W. Va.:

"As you probably know, the Government has commenced suit to dissolve our Association, and it alleges, among other things, that we represent approximately 70% of the total manufacturing capacity of Maple, Beech and Birch flooring in the United States.

In order to refute the allegation, we are collecting and compiling data regarding the annual output and manufacturing capacity of flooring mills which do not belong to our Association, and we would like very much to have the following data from you and hope it will be agreeable to you to give us the data:

Year	Annual production in M ft.				Manuf'g capacity per year in M ft.
	Maple flooring	Beech flooring	Birch flooring	Total	
1922.....	M	M	M	M	M
1921.....	"	"	"	"	"
1920.....	"	"	"	"	"
1919.....	"	"	"	"	"

After we get these data compiled, we shall be glad to exchange them with you as we feel certain that you will be interested in knowing the annual production of Maple, Beech and Birch flooring and the manufacturing capacity of the flooring plants.

Hoping to hear from you soon and thanking you in advance for your assistance, we are,

Yours very truly, George W. Keehn, Secretary

To the 73 letters sent out we received 31 answers. The data contained in said answers were tabulated. We arranged the manufacturers in alphabetical order and by states in order to show what their production was, and what their manufacturing capacity was. [fol. 1360] We also took the year 1920 and showed the production of maple, beech and birch lumber in the different states and territories.

"Mr. Fowler: As I understand we have an agreement; they have a number of replies and we have a number of replies also, and we agreed that they shall use their replies, and they agree that we may use ours."

The Witness: "This tabulation shows the names and addresses of the manufacturers of Maple, Beech or Birch flooring who were not members of the Maple Flooring Manufacturers Association, and the one that I have before me shows the Maple, Beech and Birch flooring capacity in M feet for the year 1920, and the production in M feet for the year 1920, and we have arranged them by states. For instance, New Hampshire, Vermont, Massachusetts, New York, Michigan, Wisconsin, Minnesota, Illinois, Ohio, Tennessee, West Virginia, Virginia, and Arkansas. Some of the mills that gave their capacity stated that their capacity was used principally in the manufacture of Oak flooring, but it has been brought out in the testimony that the machines that manufacture Oak flooring can also manufacture Maple, Beech or Birch flooring and we have prepared another statement showing the cut of Maple, Beech and Birch lumber by states during the calendar year 1920, taken from the Government's report of Forest Service Bulletin, No. 1119, by which we wish to show that there was plenty of raw material available for the manufacture of Maple, Beech and Birch flooring—Maple and Beech principally—Maple towards the Atlantic Coast and some Beech and Maple in the South, by transporting it a distance of say two hundred to two hundred and fifty miles, such as is done by our members in [fol. 1361] the manufacture of flooring; in other words, many of our members located in lower Michigan bring in lumber from upper Michigan and Wisconsin to manufacture into flooring.

According to the data given us by those manufacturers, thirty-one of them, they show a capacity in 1920 of 173,550,000. Twenty-nine of them reported their production for the year 1920. That shows a total production of 34,722,000 feet, and we have that sub-footed by states and territories, etc., to correspond with the cut by states and geographical groups."

(Said tabulation marked Defendants' Exhibit CC and was received in evidence.)

We have compiled statistics regarding the manufacturing capacity in M feet and production in M feet of the members of the Maple Flooring Manufacturers Association. These statistics are arranged by states.

"I wish to state, in advance, that at the request of the Department of Commerce, Bureau of the Census, we collected this data regarding the normal capacity of the plants of the members of the Maple Flooring Manufacturers Association some time in 1922, but we have considered this as their capacity for 1920, although as a matter of fact their capacity in 1922 might be larger than in 1920, because some of them have improved the equipment in their plants and installed other machinery. This shows the capacity of those members amounted to 154,800,000 feet, assuming that their capacity in 1920 would be about the same as it was in 1922. And their production in 1920 was 129,523,000 feet. That takes in the twenty-one members of the present Association, because the Oval Wood Dish Corporation [fol. 1362] were not then members of the Association and they were not then manufacturing flooring."

(Paper last referred to by the witness was marked Defendants' Exhibit CC-1 and was received in evidence.)

"The next table we have is Production Statistics of members of the Defendant, Maple Flooring Manufacturers Association, going back as far as we could compare like with like, where the statistics were continuous. I will illustrate that: in the year 1913, fifteen members produced 104,919,000 feet; in 1914, 104,231,000 feet; in 1916 they produced 100,677,000 feet; in 1917 they produced 92,376,000 feet.

"Now we come to the statistics of sixteen members. Pardon me, I can go right straight through and give the statistics of the fifteen and then you have the comparison.

"In 1918 the same fifteen members produced 62,474,000 feet; in 1919, 74,681,000 feet; in 1920, 83,464,000 feet; in 1921, 67,776,000 feet; in 1922, 99,709,000 feet.

"The Court: Those are the fifteen members who have been members of the Association from 1913?

"A. Yes, whose statistics are continuous without a break. Now we skip to 1919, we can get a comparison:

In 1919	twenty-one	members,	119,451,000	feet
In 1920	"	"	"	129,523,000	"
In 1921	"	"	"	106,329,000	"
In 1922	"	"	"	144,862,000	"

"Then we come to the Oval Wood Dish Corporation, 1,390,000 in 1921 3,451,000 in 1922. The Oval Wood Dish Corporation figures [fol. 1363] for 1921 cover five months of manufacture.

"So the total production of the twenty-two members of the Association which are organized in 1922 amounts to 148,313,000 feet.

"Also as additional information is shown on the side the number of matchers each plant has installed for the manufacture of Maple, Beech and Birch flooring."

(Paper last referred to was marked Defendants' Exhibit CC-2 and was received in evidence.)

I might say there have been many vicissitudes in the manufacture of maple, beech and birch flooring. Take as an illustration, the T. Wilce Flooring Company, who in 1912 produced 14,733,000 feet of maple, beech and birch flooring. That company is not included in this tabulation. In 1920 said Company produced only 330,000 feet of maple flooring; in 1921, 551,000 feet of flooring; in other words, there was a reduction of about 98 per cent in the amount of flooring produced in 1920 as compared with the amount produced in 1912. We have another tabulation here, the data contained in which were taken principally from the Forest Service Reports. This is for the purpose of comparing the available supply of rough maple, beech and birch lumber with the manufactured product during the year 1920. We have used the year 1920 because that is the last year for which figures as to rough lumber are available. In this statement we have taken the stands of maple, beech and birch timber in the United States by regions according to a report of the Forest Service on Senate Resolution 311, which is known as the Capper Resolution, I think. This statement appears on page 34 of the re-
[fol. 1364] port. The table "Timber Depletion; Lumber prices; Lumber export; Concentration of timber ownership; report on Senate resolution 311 by the Forest Service, U. S. Department of Agriculture, June 1, 1920, issued by the Government Printing Office at Washington, in 1920." On page 34 of said report is said. "Oak is easily the leading hardwood of the country with a total stand of 157 billion board feet, followed by three Northern hardwoods, Birch, Beech and Maple having together 91 billion board feet. See Table 7 and 8." The report gives the stand of birch, beech and maple as 90,784 million feet, which is distributed as follows:

New England	8,143,000,000
Middle Atlantic States	16,897,000,000
Lake States	36,076,000,000
Central States	20,505,000,000
South Atlantic	4,522,000,000
And the lower Mississippi	4,611,000,000
Making a total of	90,784,000,000

That, of course, does not allow for the timber cut of 1920, 1921 and 1922, as we obtained from our members data of their ownership

of Maple, Beech and Birch stumpage as of January first, 1923. We endeavored to find out by correspondence with the Forest Service what the estimated reduction would be in this stand so as to have a comparison as of January 1st, 1923, with the stumpage owned by our people, so on June 29, 1923, we wrote to Mr. R. V. Reynolds, Forest Examiner, and to Mr. Albert H. Pierson, Statistician in forest products, Forest Service, U. S. Department of Agriculture, Washington, D. C., as follows:

[fol. 1365] "We are gathering data regarding the stand of Maple, Beech and Birch timber in the United States, and it occurs to us that perhaps you can give us the approximate cut of Maple, Beech and Birch lumber, each species separately for the year 1921, and possibly for the year 1922. Approximate quantities would answer our purpose, if the data has not yet been compiled.

According to the Forest Service report on Senate Resolution 311, dated June 1, 1920, entitled 'Timber Depletion, Lumber Prices, Lumber Exports, and Concentration of Timber Ownership' on page 34, the stand of Maple, Beech and Birch timber was estimated at 91 billion board feet.

According to bulletin 1119, dated April 25, 1923, entitled 'Lumber Cut of the United States 1870-1920', the following was the reported production in 1920 of:

Maple Lumber	(page 46, table 13)	875	million	feet.
Birch "	(page 48, table 19)	405	"	"
Beech "	(page 49, table 22)	325	"	"
Total		1605		

Would it be reasonably accurate to estimate the cut in 1921 and 1922 at about the same rate as the cut of 1920, which would make the total cut for the three years about 5 billion feet, which deducted from the estimate stumpage of 91 billion in June 1920, would leave about 86 billion feet as the estimated stand of Maple, Beech and Birch timber at the beginning of 1923?

In your opinion would it be reasonably accurate to estimate the cut of each wood by States during the years 1921 and 1922 in about the same percentages as during the year 1920, as shown in Bulletin No. 1119?

We shall greatly appreciate any information or estimates you can give us bearing on this subject. If you have any data regarding average values of Maple, Beech and Birch, f. o. b. mill, for the years [fol. 1366] 1921 and 1922, such as is given in Bulletin No. 1119 for the year 1920, we shall be glad to have it.

Thanking you in advance and with best wishes, we are,

Yours very truly, George W. Keehn, Secretary."

To which they replied as follows:

"Washington, July 10, 1923.

Mr. George W. Keehn, Sec. Maple Flooring Mfrs. Assn., 1045 Stock Exchange Building, Chicago, Ill.:

"In reply to your letter of June 29th:

We shall not be able to furnish you any figures for the year 1922 as the census for that period is now in course of compilation. The following tabulation shows the national production of the hardwoods that interest you for 1921:

	Value f. o. b. mill
Beech, 190,387 M feet	$26.99
Birch, 319,192 M "	31.53
Maple, 609,852 M "	30.34

(The total of 1,119,431 M feet in pencil is my addition.)

"The method which you propose for finding the present stand of Beech, Birch and Maple sounds reasonable enough, but it does not take into consideration the growth which has taken place; and 1922 figures, as stated above, cannot be furnished.

The only line we have on 1922 production is a recent statement by the Bureau of the Census which prepared a table comparing the cut of 712 identical mills in 1921 and 1922. Some of these mills were undoubtedly hardwood mills. The results seem to indicate a cut of 25.6 per cent greater in 1922 than in 1921, and the increase apparently took place in all regions except the far northeastern states. Nevertheless, this basis would be difficult to figure upon as the hardwoods form only one-fifth of the total cut, and there is no [fol. 1367] means of knowing to what extent they were represented in this partial exhibit.

The lumber of large mills compared is one-half or more in each of the Lake States, and as you may wish to make an estimate of 1922 production on this basis, a copy of the statement is enclosed. You could get the best available forecast of the State production in this way, but it would not be better than an intelligent guess, and of course it would not give production by species.

Very truly yours, R. W. Reynolds, Forest Examiner."

We concluded to estimate the cut as about 5% of the stand during those three years; not knowing anything about the growth we could not of course estimate that. If we allowed for the growth, then the total stand would be that much greater; then the percentage of the stand owned by our members would be that much less.

The Court: To one at all acquainted with the situation, it will be known that the accuracy of these statistics, whether gathered by the Government or some one else, is only approximate.

A. Yes, sir.

The Court: For many reasons. In the first place, as stated there, the growth is not taken into consideration. In the next place, there has been a steady increase as the years have gone by in the closeness of the cut; in other words, timber which a few years ago would not have been cut at all, is now estimate and cut. In the next place, there are growing up in certain sections of the state of Michigan, on pretty nearly every square mile, little portable mills, cutting a few thousand feet. That has not been taken into consideration at all nor attempted to be segregated. Those are matters that all tend to show that only an approximate estimate can be made.

A. Of course the Government does not get complete statistics from [fol. 1368] all the different mills in the United States. They represent only a portion of the output, the same as in our case, we have no complete statistics of production of Maple, Beech and Birch in the United States, because we have no way of knowing what the non-members produce.

The Court: As the timber grows scarcer, it has been the history, and to residents of Michigan it is common knowledge—it has been the history that the number of little portable mills has increased and the number of the large mills has decreased, and pretty nearly every farmer has his wood lot, and in the Beech and Maple section he has a few trees which are not taken into consideration by anyone until a little portable mill is set up in the neighborhood and the lumber is produced.

Q. What is the result of that tabulation then, using the figures as you have explained them?

A. We have made a tabulation here showing the Maple, Beech and Birch cut in 1920, according to the U. S. Department of Agriculture, Bulletin No. 1119, quantities in M feet, arranged in geographical groups, by regions, according to the stand of the timber, and also sub-divided into states. Then opposite we set the manufacturing capacity of the manufacturers who are not members of the Association, so far as we have been able to ascertain it, and the amount of their production by geographical groups. Then on the other side, we have shown the production of the members, you know, of the present Association, all compared on the 1920 basis.

Now, for example, the production of Maple lumber in the New England states,—it is hardly worth while to name them, we all know which they are—was 33,729,000 feet of Maple; 14,012,000 feet — [fol. 1369] Beech; 45,866,000 feet of Birch, a total production of 93,607,000 feet.

And according to the data we have regarding manufacturing capacity, the non-member mills who reported to us and who are located in that territory, have a manufacturing capacity of 13,100,000 feet. Their production was 2,797,000 feet.

The Court: Now, you are talking about flooring?

A. Flooring, yes. I have, however, said that this does not take into account any saw-mill production of lumber.

The next group, the middle Atlantic States, being New York, Pennsylvania, New Jersey, Delaware, and Maryland. I might say

that opposite this we have that New England is so much, but we read that before and we won't do it again. The production of Maple lumber in that territory was 112,993,000; of Beech lumber it was 78,879,000 feet; of Birch lumber it was 39,800,000 feet, a total of 231,672,000 feet.

The only report we have of capacity in the manufacture of flooring, Maple, Beech or Birch flooring, from that territory in the year 1920, 7,750,000 feet of flooring capacity, and 3,846,000 feet of flooring produced.

Now, we come to the Lake States, Michigan, Wisconsin and Minnesota. The production of Maple lumber in those three states was 468,708,000 feet; Beech lumber 43,673,000 feet; Birch lumber 242,598,000 feet, a total of 754,979,000 feet.

Now, the manufacturing capacity of non-members of flooring in that group reported to us is 49,700,000 feet, and the production in 1920 was 21,681,000 feet.

Now, I will give the figures for the Central states. Some Maple grows in Illinois but it is not used commercially, but it is included. The Central States are Illinois, Iowa, Indiana, Ohio, Kentucky, Ten-
[fol. 1370] nessee, West Virginia, Missouri. The cut according to this same bulletin was 129,441,000 of Maple; 106,866,000 if Beech; and 13,839,000 of Birch, a total of 250,146,000.

The manufacturing capacity of non-members reported to us from that territory was 70,000,000 feet and the production was 4,178,000 feet.

Now Fowler: That is flooring?

A. Yes, flooring.

Now, the South Atlantic states Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama. The Maple lumber output 13,871,000; Beech 6,930,000; Birch 4,206,000; a total of 25,007,000. The manufacturing capacity reported to us was 25,000,000 feet from that territory of flooring, and the flooring produced was 2,072,000. I want to say this capacity embraced Oak."

Then we come down to the other states, Arkansas, Mississippi, etc. They show same comparisons, and what I wish to state is that in reporting this capacity to us, some of them included their Oak capacity. Now, when we get the whole thing added up it shows a production of Maple, Beech and Birch lumber, according to the Government report of 768,345,000 Maple; 264,572,000 Beech; 346,577,000 of Birch, a total of 1,379,494,000.

Now, the Government estimate on the total production in the United States at that time is 875,000,000 of Maple, 325,000,000 of Beech, 405,000,000 of Birch, a total of 1,605,000,000.

Now, the manufacturing capacity in flooring reported to us by these non-members showed 173,550,000 feet, and the amount that they produced as 34,722,000 feet in 1920.

Now, we have gone on and shown by 21 members, or 22, members of the M. F. M. A., Maple, Beech and Birch flooring, quantity in M feet of capacity and production in M feet.

Q. Just give us the total. They are shown in detail, are they not?

[fol. 1371] A. Yes, they are shown in detail. The capacity we have is 154,800,000 feet; the production we have is 129,523,000 feet.

Now, we have figured that out as to the amount of rough lumber, required, about as Mr. Hughes did the other day. Now, if we take the total production of Maple, Beech and Birch lumber in the three Lake states in 1920, it was 755,000,000 feet in round figures; the capacity was 154,800,000 feet and the production was 129,523,000 feet.

Now, if we compare the rough lumber required, according to the total production of flooring, we estimate that it would require 168,211,000 feet of rough lumber to produce 129,523,000 feet of flooring, allowing 23% waste in the manufacture of flooring; in other words, out of 1,000 feet of rough lumber we estimate we get as an average 770 feet of flooring. On that basis, assuming the entire product of Maple, Beech and Birch lumber is considered available in the manufacture of flooring—and it is a fact some of our members do manufacture the entire product of the lumber into flooring—it would require twenty-two per cent of the total cut in the manufacture of flooring, meaning the total cut of Maple, Beech and Birch lumber.

Now, if we segregate our Maple flooring from our Beech and Birch flooring, if we estimate that the output of Beech and Birch flooring is about 10% of the total flooring output, and thus endeavor to ascertain what proportion of the Maple lumber cut would be required for the manufacture of Maple flooring, estimating the waste at 20%, we estimate the total quantity of Maple lumber required would be 151,390,000 feet, or 32% of the Maple lumber cut, considered by itself, in three Lake states.

(Paper above referred to was marked Defendants' Exhibit CC-3 and was received in evidence.)

[fol. 1372] We have compiled statistics regarding the manufacturing capacity and production of maple, beech and birch flooring, which we have obtained from non-member manufacturers of the association for the years 1922, 1921, 1920 and 1919. In this chart the non-members are arranged in alphabetical order. We show on the next page how many replies were received. The figures on said tabulation are correct. They have been checked and double checked.

(Said compilation marked Defendants' Exhibit CC-4, and received in evidence.)

"Here is a letter we received from the Peytona Lumber Company, Inc., Huntington, W. Va., that might perhaps shed a little light on the conditions in the maple flooring industry. This is dated September 14, 1923, addressed to George W. Keehn, Secretary, 1045 Stock Exchange Building, Chicago, Ill.:

'DEAR SIR: We have your letter of the 12th and wish to advise that we have not manufactured any flooring for several years, except occasional orders which we have disposed of locally.

We have been using our planing mill equipment for other purposes, as we did not find the flooring business to be profitable.'

Then the letters from other people to whom we wrote stating that they had given up the manufacture of flooring. The Cherry River Boom and Lumber Company, Scranton, Pa., we haven't manufactured any flooring during the time mentioned in your letter, or something to that effect. 'We took out our flooring machines and have gone out of the maple flooring business.'

Another one from Christian Flierl Co., Inc., Buffalo, N. Y., we have discontinued special orders——

Q. I don't think we will go into these letters.

A. There are a number of them like that where they have discontinued.

[fol. 1373] Q. Does that complete this exhibit of manufacturing capacity of members and non-members which we have been discussing?

A. I think that does."

I have prepared tables showing the stumpage owned by members of the Association and compared it with the total stumpage in the United States. The data with respect to the ownership of stumpage owned by members of the Association were procured by said members. According to the estimate that we finally used, derived largely from the Forest Service correspondence, the estimated stand in 1923 of maple, beech and birch stumpage in the United States was 86,000,000 M feet. According to reports received from members of the Association, the maple, beech and birch stumpage owned by them was 1,476,086 M ft. or 1.72 per cent of the total stand.

(Said tables above mentioned were marked Defendants' Exhibit DD and DD-1 and received in evidence.)

I have an average freight rate charge to 30 different points.

(Said freight rate chart marked Defendants' Exhibit EE and was received in evidence.)

"Q. Has there been made by you and under your direction a tabulation showing the actual sales by months made by all of the members of the Association from whom you were able to secure the data of 13/16 by 2¼ inch face maple flooring delivered in the representative markets, the larger markets of the United States?

A. Yes, sir.

[fol. 1374] This sheet is inserted as the reminder that there were two exhibits in the course of Mr. Keehn's testimony that did not appear to be numbered or show where they were introduced.

[fol. 1375] Q. How was this made up, from what data?

A. We requested the members of the Association to send us a statement showing the delivered prices obtained during different months and during different years for clear, number one and factory, 13/16ths by 2¼ inch face maple flooring so that we could compare like with like, that is, if each member sent in a report of the selling prices he obtained. For example, in the Boston market or the Chicago market in the month of January, 1922, then we would make

a tabulation all the way down showing all the reports that the different members made on that fact. Then the work became so voluminous and such a vast amount of detail that we were finally able to concentrate only on the year 1922 because in order to make a substantial showing and substantiate our statistics by cold facts and not theories we requested the members to send us the original orders showing the date when they were taken and in many cases the duplicate invoices. So this has been worked out as complete as it was possible to do it with so many people and in a short time since we undertook this work, and we have at the hotel a very large bulk of original orders and invoices and things like that to substantiate these statements which we will be glad to produce if desired.

Q. Those invoices have been checked against this statement by the same men who have been working for you for a good many years and are experienced in the preparation of figures of this kind?

A. Yes.

Q. And we have all of those original invoices to support this statement?

A. Yes. Some of these representative markets there were so few [fol. 1376] sales made, for instance, we might say Atlanta, Ga. or some remote point where we couldn't make any comparison, so the ones we have selected here and the others are available if anybody wants them are Boston, Buffalo, N. Y., Chicago, Ill., Cleveland, Ohio, Detroit, Michigan, Los Angeles, Calif., Mineapolis, Minn., New York, N. Y., Philadelphia, Pa., Pittsburg, Pa., and then some scattering ones in other towns where there are not enough sales to afford a very good basis of comparison. I might say that the members sent this in some time ago, made up sheets and sent them in to us and we found out afterwards by correspondence with them that instead of giving the date of the order they gave the time of shipment, while some other member would give the date of the order without regard to the time of shipment. For example, one member would sell a very large quantity of flooring in January to be shipped during the year and when he invoiced that stuff out in December he would have the January price. On the other hand, another member would have his December price, so we couldn't make any comparison, for that reason we have gone over and corrected these sheets as well as we could on the basis of the original orders which the members have supplied. We have a little memorandum here in explanation of these entries which I will give to his Honor with the carbon.

Statement of delivered selling prices obtained in thirty representative markets by members of the Maple Flooring Manufacturers Association, year 1922; all prices checked have been verified by comparison with prices on original orders and invoices which will be submitted as supporting data.

[fol. 1377] 2. All prices circled are without supporting orders or invoices but they were included in members' reports of delivered selling prices obtained in the thirty representative markets.

3. Members No. 2, 4, 34, 47 and 50 did not find time to select from their records their orders and invoices supporting their statements of delivered selling prices obtained.

The Witness: Shall we separate and give eight or ten as typical markets or do you want them all?

Q. Just the large markets. I take it where you have the members reports you put in all of the sales, you have left none out?

A. Whatever they sent to us, we have entered here.

Q. These reports represent the delivered prices in the respective markets?

A. Statement of delivered selling prices obtained by members of M. F. M. A. for 13/16ths inch by 2¼ inch face clear, number one and factory maple flooring delivered f. o. b. cars in the following representative markets—how many more do you want?

Q. Have we got all of the large markets now?

A. There are not many sales to St. Louis or Salt Lake City or Des Moines, we might as well give them all if you want them.

Mr. Johnston: We offer this exhibit in evidence as the next exhibit number and ask that it be so marked.

(Marked Ex. FF to FF-9 inc.)

The Witness: Suppose we find out about this supporting data, does the Government want them or doesn't it, the invoices—there might be a trunkful of them.

[fol. 1378] Mr. Fowler: We would never take time to look them over.

The Court: I can assure you that the Court won't read it.

Mr. Johnston: We merely want to show that we have them, your Honor.

Q. Have you also made a tabulation taken from your records of all f. o. b. mill prices?

A. Yes, sir.

Q. Which have been reported to you by members of the Association from time to time?

A. I was just about to answer. We have here a statement of all f. o. b. mill sales during the year 1922 which were made by the members of the Maple Flooring Manufacturers Association and which were reported to us by them and which we in turn included in the weekly sales reports during the year 1922, complete files of which I think the Department of Justice has.

Q. Those have been introduced in evidence, have they not?

A. Some of them may have been, I am not sure whether all of them were introduced or not, I think likely. This statement which we have here starts out with the year 1922, shows every f. o. b. mill price where the flooring was sold f. o. b. flooring mills. During the months of January to December inclusive 13/16ths x 2¼ inch face clear, number one and factory maple flooring standard grades and lengths clear, number one and factory. In this report we have indicated the identity of the member of the Association who made the sale by recording his Association membership number in red ink above the price. During January, February and March, 1922, identifying numbers of members who reported their sales were not [fol. 1379] disclosed in our weekly record of completed transactions

from which all the f. o. b. mill selling prices given on this statement were compiled. During that period of time no identifying numbers appear upon the weekly sales reports. Now we come to the other months beyond that and if you would like to pick out any particular month we will read the prices as to clear, number one and factory.

Q. I will ask you generally whether that tabulation of all f. o. b. mill prices reported to you by members of the Association, shows that at any time during any of those months there was a practical uniformity in those f. o. b. prices?

A. It proves the contrary, there are wide variations at all times. In some cases some price appears but very frequently or in nearly all cases that sale was made by the same member of the Association, for instance, in listing of the sales you might find a certain price would appear four or five times, take for instance the factory flooring for the month of May, 1922. We have a price here of $20.00, $20.00, $20.00; those three sales were made by No. 47.

Q. That is sufficiently identified from the exhibit itself, is it not, by looking at the number?

A. Yes, and we also have to support this statement of the weekly sales reports for the year 1922—there might be one or two of them missing, I don't know.

Mr. Johnston: It isn't necessary to reintroduce this.

The Court: There seems to be a variation of from one to three dollars by the same member?

[fol. 1380] A. Yes, members frequently vary their own prices during the month.

Mr. Johnston: We offer this in evidence as the next exhibit of the defendants. It will not be necessary to put those ink sales reports in evidence, they have already gone in by the Government.

(Paper referred to marked Def. Ex. GG and received in evidence.)

The Witness: It is correct to the best of our knowledge and belief, it has been checked back twice, there might be clerical errors in it, if there are any clerical errors in it, they could be corrected on the basis of these reports.

Q. Did you in the preparation of the files of this case request the members of this Association to submit to you their statements showing their profit and loss in the operation of their flooring mill?

The Witness: Pardon me, here is another that really goes with this.

Q. What is that?

A. That is Range of selling prices f. o. b. mills, the high and low price obtained by months, each grade of 13/16ths by 2¼" face from the year 1913 to the year 1922 inclusive. These statements were compiled from the reports issued to the members of the Association of current net values we called it at one time, Average Prices realized, etc., which are compiled and sent out each month with our monthly statistical report.

Q. This statement shows the range, does it, by showing the high and low for each month?

[fol. 1381] A. Yes sir, it shows the range by giving the high and low for each month. It is an extra set, I thought they might like to have it. The high and low each month, each grade from 1913, September up to December 1922, the range clear, number one and factory, that is, the high and low eastern lower Michigan mills, western lower Michigan mills, upper Michigan and Wisconsin mills, then all Michigan and Wisconsin mills. That has been checked back very carefully and compared and we have the monthly reports to support it and of course the monthly report shows many variations in prices between the high and the low; in other words, it is really a statement of cold facts rather than theories.

Mr. Johnston: We don't need those monthly reports I believe.

A. If you would like to have them, this is what actually happened.

Mr. Johnston: They have been put in evidence.

A. We could take out any one particular month, we could take March, 1922, we could take March 1920 and explain the spreads in prices that occurred during those months, and we also have a chart but I think that is in the economic defense exhibit.

Mr. Johnston: I will make reference to that later. There is just one of these sets, it isn't necessary to introduce two.

A. Oh no, I just gave you two.

Mr. Johnston: We will offer this exhibit in evidence, ask that it be marked the next exhibit number.

(Said document marked defendants' Exhibit H H, and received in evidence.)

The Witness: For example, the chart I speak of has attached to it in my file here the record of average prices realized in February and March 1920 for clear, number one and factory maple flooring by the different members located geographically and the total and the same thing in March and February 1922 showing very wide variations in prices, the difference being as high as 65% from the [fol. 1382] low price to the high price.

Q. You are now making reference to the chart which we prepared from the March 1920, February 1920, March 1922, February 1922 and August 1922 figures?

A. Yes, with a write-up of what actually happened in reference to the spreads and also the supporting statements that give it, those two months, I take it you don't want these.

Mr. Johnston: No, we will not need the monthly reports unless counsel wants them. We offer this chart showing comparison of f. o. b. mill prices together with the explanatory statement attached thereto and the record of average prices realized and ask that it be marked the next exhibit number.

Q. Will you explain briefly the nature of that chart, just what it shows?

A. This is a comparison of f. o. b. mill prices realized by reporting members of the Maple Flooring Manufacturers Association show the lack of uniformity as we term it clear, number one and factory; the prices obtained in March 1920 for the clear, March 1920 for the number one and February 1920 for the factory. The reason we took February 1920 for the factory instead of March is because there was only one sale made in one group of factory flooring during the month of March and there was no way of comparing it. This scale is drawn on dollars and cents basis I would say, the prices obtained for clear, in March 1920 by the mills in eastern lower Michigan being members 2, 24, 33 and 49 are shown; then in western lower Michigan are shown; upper Michigan and Wisconsin, that appears all the way through, the same method of comparison is made for March 1922, February 1922, I don't know what that other date was, I think August 1922. I think this is an old chart which is incorrect, that you have in the economic defense. I think we afterwards took March 1922 all the way through you know instead [fol. 1383] of using March 1922, February 1922 and August 1922, so this ought not to go in.

Mr. Johnston: The correct chart appears then as one of the exhibits to Mr. Grant Keehn's and Mr. Gordon's deposition?

A. Yes, it does, the Barr chart they call it. We have the corrected chart here, may we withdraw that so as not to cumber up the record.

Mr. Johnston: That is Ex. No. 28, is it not?

A. Exhibit 28, yes.

Q. Attached to the deposition of Gordon and Keehn?

A. Yes.

Q. That shows that on the lower half of the chart March 1922 was used in each case.

A. Yes, March 1922 is used in all cases and the upper part of the chart March 1920 is used for the clear, number one and February 1920 is used for the factory.

Mr. Johnston: We will withdraw this chart and offer only the explanatory statement of it and make reference to exhibit No. 28 attached to the exhibit of Grant Keehn and Edward V. Gordon as being the correct chart.

The Witness: Then pardon me, do you wish to leave this in to go with the chart?

Mr. Johnston: Yes, they are explanatory with the rest of the exhibits here. Mark them the same exhibit number you have here.

(Papers marked Def. Ex. II-1 and II-2 and received in evidence.)

Q. Will you go to the subject that I started to inquire about, namely the profit and loss of the members of the Association in the operation of their flooring mills. Did you request members [fol. 1384] of the Association to submit that data to you?

A. Yes sir, we did. We sent a request to all members of the Association to give us a statement of their hardwood flooring profit and loss accounts beginning with 1913 and coming up to 1922 in-

clusive and we used as a sample of the form of questionnaire a statement of profit and loss account as used by the I. Stephenson Company Trustees but we told them to make it up according to their books and records, and to have it as accurate as possible but to contain whatever elements were recognized as a part of that business, so as a result of that——

Q. Just a moment. Were many of the members willing to submit their profit and loss statement?

A. I think most of them were willing to do it. Some were not willing to do it and some of them said it was impossible for them to segregate their hardwood flooring business from the rest of their business, that things were so interwoven and intermingled, it wasn't possible to do it, they didn't keep their books that way. So as a result of that——

Q. How many did you get?

A. As a result of that we got the following—pardon me, as a result of that we got reports from the following members of the Association and we have consolidated them into one statement thinking perhaps it would not be necessary to give the individual profits of any individual member.

Q. You have those however?

A. We have those however, yes.

Q. In your file and with you?

A. So their reports were consolidated. I, Stephenson Company Trustees 1913-1922 inclusive; Osgood and Blodgett Manufacturing Company 1913-1922 inclusive. I think that may include some of [fol. 1385] their oak flooring, I am not certain about that, but my recollection is that their oak flooring embraced about 25 or 30 per cent of their hardwood flooring company business. A man selling maple flooring could not of course separate where their profit was on any particular item. West Michigan Flooring Company 1913-1922; J. W. Wells Lumber Company 1913-1921; and January, August 1922, their fiscal year ending September 1st instead of the end of the year, they having changed it.

Northwestern Cooperage and Lumber Company, 1913-1922, Grand Rapids Trust Co., Receiver for Wm. Horner, for the year 1922 only. That embraces what we call two members who own their own stumpage, two members who purchase their raw material on the open market, three members who own their own stumpage, pardon me, all of them sometimes purchase on the open market; two of them purchase exclusively their rough maple lumber on the open market and one who does both. I think the Grand Rapids Trust Company Receiver for William Horner have stumpage, I think also buy a large amount on the open market.

Q. Did you consider those who have submitted the data to you as representative of the members of this Association?

A. I think they really represent the different elements and types of membership in the Association.

Q. You have tabulated all that you have received?

A. I have tabulated all that I have received. This is headed

Profit and Loss Statements covering a period of years submitted by six members of the defendant Maple Flooring Manufacturers Association. In the first column we have the year, beginning with 1913 and running down to 1922 inclusive. In the next column we have the net sales.

In the next column we have the net profit or loss, the loss being [fol. 1386] in red.

The next column we have the per cent of profit on the sales.

Here is the consolidation reading it crosswise:

1913 the sales are $1,223,050.92.
The net profit is -98,931.60.
Per cent 8.09.
1914 the sales are $1,146,916.32.
-65,257.03.
Percent of profit 5.69 per cent.
1915, $1,092,459.73.
Profit $71,267.40.
Per cent of profit 6.52 per cent.
1916, $1,126,502.50.
Profit $46,889.29.
Per cent 4.16 per cent.
1917, $1,000,912.43.
Profit $67,005.27.
Per cent 6.69.
1918, $717,010.28.
Loss $30,414.49.
Per cent of loss on the sales 4.24 per cent.
1919, $1,563,021.84.
Profit $61,379.36.
3.93 per cent.
1920, $1,989,419.01.
Profit -393,919.42.
19.81 per cent. That was a runaway market.
1921, $1,269.178.09.
[fol. 1387] Loss $39,687.62.
Per cent of loss to sales 3.13 per cent.
1922, $3,785,925.48.
Profit, $431,134.75.
Per cent of profit 11.39.
Totals $14,914,396.60 of sales.
Profit $1,165,682.01.
Per cent of profit on sales 7.82 per cent.

Q. That 7.82 in other words, is the average for that ten year period?

A. Yes.

Q. Have you here the individual profit and loss statements which you can submit to the Court which we prefer not to make a part of the record. We have no objection to counsel looking at them, they

are accessible to you and also to the court if you desire to look at the individual statements.

Mr. Johnston: I offer that as an exhibit.

(Marked Def. Ex. JJ and received in evidence.)

A. The names of the six companies are on this sheet. I might say in reference to one statement of profit and loss one of the larger companies, that for the years 1920, 1921 and 1922 they did not include administrative expense, selling expense nor interest because that was charged into their general business.

Q. Thy made up their profit and loss though including those as deductions?

A. From the hardwood flooring department.

Mr. Fowler: That tabulation doesn't show anything about the amount of capital these concerns had invested?

A. No sir, it does not. The amount of capital they have invested might not be applicable to the hardwood flooring business anyway.

[fol. 1388] Q. On or about April 1922 you testified the other day that you had some correspondence with the Department of Commerce, Bureau of Census, regarding the submission of the data and reports sent by your Association to its members to various public agencies?

A. Yes, sir.

Q. I will ask you now whether there is the slightest objection on your part of the members of this Association to the widest distribution of all of the data sent to members, to any source that is willing to receive it?

A. No objections whatever.

Q. Are you and have you been perfectly willing that the trade papers should publish every statistical report, weekly, monthly, quarterly, semi-annually, or annually or whatever it may be that your Association puts out?

A. We are willing to have them do so.

Q. You have furnished them with everything that they would publish, they were willing to publish as news?

A. We furnish them the same material that the Department of Commerce, Bureau of the Census elected to publish in the survey of current business and we have told them about this other statistical data but none of them have ever asked for it. We frequently send them quarterly reports and things like that every week now and have been for some time, the average prices realized.

Q. From the sales from the weekly sales reports?

A. From the weekly sales report.

Q. Have you and have you had any objection to the full publication of everything which your office sends out to the members in these weekly or monthly publications or in any other source that will provide distribution of that data?

[fol. 389] A. We have no objection so far as I know either on my part or on the part of any of the members of the Association, we have had this up several times at Association meetings. They have

always told me to give the Lumber Trade Papers whatever information they wanted, to give the Department of Commerce, Bureau of the Census whatever information they wanted. We have certainly filed volumes of this stuff with the Federal Trade Commission and the Department of Justice at different times.

Q. I am talking now particularly *to* the distribution of these statistics through publications which will reach the public generally or at least that portion of the public which subscribes to and reads the trade papers.

A. Yes, we would be willing to do that. As far as that is concerned, if it should be thought that more of our statistical data should be published we would be willing to have it published in any trade paper which the Court might select, like the American Lumberman, and we would pay for it as an advertisement if the publication is not willing to accept it as news items.

Q. In other words, the publications are not interested in a great deal of this data?

A. It is too voluminous, it is too inconsequential. For instance, see how much space it would take to publish our weekly sales reports and all of these statistical reports, it would take about as many pages of the American Lumberman, as our reports consist of, ten or twelve pages sometimes.

Q. But they do publish and have been for some time publishing or averaging those?

A. They publish the Barometer and they publish the stock conditions from time to itme. You will find that in the American Lumberman and other papers and they also publish the prices which [fol. 1390] we send them not only in the lumber trade papers, we also send them to the Chicago Journal of Commerce which is a financial paper published in Chicago.

Q. This letter of April 19, 1922, I think you read that before, did you not?

A. No, I think not. After my return from Washington, I wrote the Department of Commerce, Bureau of the Census, a letter on April 25, outlining what we proposed to do. I don't think it was read. Then they replied on May 5, 1922.

Mr. Johnston: We will put that in evidence if it has not been.

The Witness: There is one thing I would like to call attention to about our normal capacity, productive capacity.

Q. What have you to say on that subject?

A. On May 13, 192, this is simply an extract from the letter to the attention of Dr. Frank M. Surface, Special Agent of the Department of Commerce, Bureau of the Census, regarding the approximate percentage of the maple flooring industry which is covered by our reports, it is our impression that our Association represents about 70% of the output. We of course have no data regarding the output of non-member mills, so we have no means of knowing what the total production of maple flooring is in the United States, so our

estimate of approximately 70% is based upon general information only.

Then at his request we started out to collect data regarding the normal manufacturing capacity of the members of the Association and here is a questionnaire which we sent to all the members June 9, 1922, on that sbject, and here is a typical reply, like the I. Ste- [fol. 1391] phenson Company where they said they estimated their normal capacity 700,000 feet per month and 8 million 400 thousand feet per year for 25 days running per month, 300 days running per year and ten hours' run per day. Then we tabulated that in a letter of July 20th, 1922, addressed to Dr. Frank M. Surface, Special Agent and etc., where we gave them the data regarding 20 mills one million capacity per year, 146,400 M per month; 12,200 M; average days' run per year 281 days. Average working hours per day 9.8 hours; and then regarding the 22 members which was our total membership at that time, normal capacity per year 158,- 400 M; per month 13,200 M. Average days run per year 181 days. Average working hours per day 9.8 hours; so the other two members did not affect anything but the capacity.

Mr. Johnston: We will offer that group of correspondence in evidence and ask it be marked the next exhibit number.

(Def. Ex. KK, KK-1 to KK-5 and received in evidence.)

Q. Under your atricles of Association, taking the operation of your thereunder, is any manufacturer of maple, beech or birch flooring in the United States eligible to membership?

A. Every manufacturer of maple, beech or birch flooring in the United States is eligible to membership, no requirements as to capacity, volume or anything else.

Q. You have never attempted to exclude or refuse membership in this Association——

A. No, on the contrary, we have tried to get them in so as to have our statistics more complete.

Q. You have I believe an example taken from the files of the [fol. 1392] Oval Wood Dish Company which was given back to you by Mr. Thompson, of the practical application made by members of the average cost chart showing the average cost of the manufacturers of the product and the various elements of that cost?

A. Yes, sir.

Q. What are those papers which you have?

A. I might say in this connection that a number of the members of the Association have testified they have made a careful comparison of their own costs with the average costs submitted through our office of the manufacturing and marketing of maple, beech and birsh flooring, and it so happens that three test runs which were made in 1921 by the North Branch Flooring Company of Chicago and the average manufacturing and marketing cost for the first quarter of 1922, were used in those manufacturing and marketing costs for the first quarter of 1922, we itemized the averages of the replies received on the basis of the questionnaire which we will show.

Then the Oval Wood Dish Company apparently received that and they made a very careful analysis of their own costs by items compared with the averages reported by the Association. They have here you know later taking lumber off of docks, etc. and to dry kilns, that means also to car pile and etc., the average reported $1.16; their average 1.04.

Cost of manufacturing including supplies in our questionnaire, the warehouse expense is included in that, our total 92 cents, their total 10.71.

Insurance and taxes 1.07; theirs 61 cents.

Interest 1.92; theirs $1.86.

Selling expense and cash discount we have not separated in our [fol. 1393] statement. The total is 4.55; theirs was 6.05.

Depreciation, ours is calculated at 1.37; theirs at 1.60.

Then the total per M feet, our 19.31; theirs 21.87.

Q. That is they were several dollars higher?

A. Yes. Then less amount received for waste material, that is wood and other little stuff that you couldn't sell, had to get rid of, 1.32 and theirs 65 cents.

Net cost 17.99 by our tabulation, $21.22 by theirs.

Q. What did the Oval Wood Dish do then in its next quarter after having this basis of comparison?

A. They appeared to have made a study of it and they appear to have reduced their manufacturing and marketing cost as the result of this information. Without reading the items all over again, the first item is a dollar in their statement dated June 17th.

Q. That is three months later?

A. Three months later. The next item—pardon me, I might read theirs anyway.

Q. Yes.

A. Their previous 1.04, this time $1.00. The next item 10.71, June 10.33. The next item 61 cents, 68 cents.

The next item 1.86; 1.76.

The next item 6.05; 2.98.

The next item 1.60; June 17th 1.52.

Their first total 21.87, their second total 18.27. The wood the same in both cases, 65 cents, leaving the net cost the first time $21.22, the second time $17.62.

The Court: Nearly the whole of that is in the one item?

[fol. 1394] A. In the selling expense, yes, sir. $3.60 reduction.

Q. It shows an effort, does it not, on the part of this member taking it as an example, to use that data supplied by the Association as to the average marketing cost for the purpose of correcting his own cost and bringing down the high items in his cost of production?

A. Yes, to analyze the costs and increase the efficiency in some branch of manufacture where he apparently has been lame in his efficiency.

Mr. Johnston: We will offer this exhibit in evidence and ask that it be marked the next exhibit number.

(Said document marked Def. Ex. LL and received in evidence.)

Q. You have made reference in your examination for the Government on behalf of the Government to the basis upon which you originally determined the elements to be taken into consideration in the manufacturing cost of maple flooring?

A. Yes, sir.

Q. From what source did you obtain this information which formed the basis of your original estimation or determination of these cost items and of the divisions that were to be made to the cost of manufacture.

A. What we call our survey of costs, manufacturing and marketing costs was developed quite a number of years ago and later on it was substantiated as a practical foundation for those elements of cost by Prospectus which we received from the U. S. Forestry regarding the sale of timber in Priest River Valley, Idaho. We have a letter here dated March 10, 1913, addressed to the Maple Flooring Mfg. Association and signed by H. S. Graves.

Q. Who is Mr. Graves, do you know?

[fol. 1395] A. The forester, United States Forester. In which they endeavored to arrive at a basis for the sale of their stumpage. The letter is rather short, perhaps it wouldn't take very long to read it. It tells the whole story instead of extracts.

United States Department of Agriculture

Forest Service

Washington, March 10, 1913.

Secretary Maple Flooring Mfg. Ass'n, 807 Stock Exchange Building, Chicago, Ill.

DEAR SIR: Because of the proposed sale of 267,000,000 board feet of timber in the Priest River Valley, Kaniksu National Forest, Idaho, the inclosed prospectus has been prepared. It shows how the forest service furnishes information to lumbermen who might be interested in bidding on National forest timber.

An unusual feature of this sale is the fact that on part of the area the forest will be destroyed. The object will be to clear this part of the area for agriculture instead of providing for forest renewal. Provision 8 of the "Sample Timber Sale Contract" and the provision regarding "Agricultural Land" under the head "Rules for Marking and Brush Disposal" illustrates how this will be done.

When the area has been cleared of timber and the slash burned the land will be opened to homesteading under the provisions of the "Forest Homestead Law." If the Forest Service did not sell off the timber before opening the land to entry, the value of the present stand of timber would cause the land to be held speculatively instead of being cleared for farms. But the land will be better employed growing farm crops than growing timber: and hence the Forest [fol. 1396] Service is preparing to put it into the hands of bona

fide settlers, under a procedure which will insure agricultural development.

The Federal Government will receive about $659,000 for the timber, of which $225,000. will go to the benefit of the state for public schools and good roads.

The minimum stumpage price of $5 specified for the white pine on these logging chances is unusually high, because this western white pine is the most valuable stumpage on the National forests. The timber is easily worth the price, and no difficulty is anticipated in securing bids on the basis named.

The 12 per cent profit to the lumbermen allowed for in calculating the stumpage rates to be charged is exclusive of interest on the investment, which was figured at 6%.

The minimum prices allow, therefore, for a profit of 12% on every thousand feet of timber sold, over and above interest on capital and all overhead costs. It must be remembered that the manufacture of lumber is a business which, because of the risks involved, requires a high return in order to induce operators to undertake a logging enterprise.

Very truly yours, H. S. Graves, Forester.

Now on page 5 of this prospectus there are certain elements we will consider in the cost of logging and manufacturing, and etc. There is no use to read them all in detail, but among the ones which are similar fundamentally to what we use, the Association uses "Administration and Supervision, depreciation of equipment, interest charges, taxes and insurance." That is all summed up as to certain chances there.

[fol. 1397] Then we come to another one on page 6: "Administration, supervision, sealing excepted, and railway operation, maintenance of way, unloading at pond—those are just items again—interest charges, depreciation of equipment, insurance and taxes. Then they deduct for salvage and etc.

Then we come over to page 7: "The stumpage rates appraised in the notice of sale were determined by deducting the cost of logging, milling and other expenses, plus approximately 12 per cent profit, from the present average selling prices of lumber."

Then they go on and give the stumpage prices. In other words, they appear to have taken the market value of lumber as realized from sales on the market as the foundation for arriving at the selling price of the timber. In other words, they work from there back to the stump and with us we take the market value of the rough maple lumber as ascertained by sales on the open market and we work from that foundation to arrive at the average cost of the finished flooring. It is the same fundamental principle but it is reversed in its application.

Mr. Johnston: We offer this letter and prospectus in evidence and ask it to be marked the next exhibit.

(Marked Def. Ex. MM and received in evidence.)

There are one or two questions which I should have covered on cross examination that I want to ask you. One is this:

Q. Referring to a typical set of exhibits, I am taking now those which are marked Gov. Ex. 40, and having particular reference to the percentage items which are shown on those exhibits, in order that that may be cleared up for the record, we ask you on what basis you arrive at those percentages.

[fol. 1398] A. They are statistical reports of corresponding membership for certain years. It is very simple, we can explain *in* in a second, I was trying to analyze about percentages.

For example, the average stocks on hand during 1912 in this statement were 36 million 619 thousand. The average stocks on hand in 1913 were 32 million 746 thousand. That shows a decrease of 3 million 873 thousand or 10.6 per cent which is arrived at by dividing 36 million 619 thousand into 3873. In other words, the year 1912 is the base.

The same price to the unfilled orders. That shows the average in 1912 was 24 million 576 thousand, 1913, 25 million 023 thousand, an increase of 447 thousand or 1.8 per cent. The shipments the same way, 1912, 176 million 791. 1913, 172 million 889. The decrease is 3 million 902 thousand or 2.25 per cent.

The production 160 million 244 thousand, in 1912. It is the same principle all the way through.

Q. In other words, the principle upon which those percentages are prepared is sufficiently clear, is it, from each exhibit?

A. Just a mathematical calculation, that is all.

Q. Taken from the figures which are on the exhibit itself?

A. Yes.

Q. And where there are comparisons with prior years comparing them on a percentage basis?

A. Yes.

Q. Those percentages in other words don't have any meaning other than as they are comparison of the figures themselves as they are shown upon the exhibits?

A. That is the only significance they have, the only significance they could have.

[fol. 1399] Q. In order that there may be no confusion, in your answer to the last question preceding this, you said that your method was the reverse of that adopted by the Forestry Service. Of course your present method of ascertaining costs does not involve any element of profit?

A. No, it doesn't involve any element of profit.

Q. And no element of profit is added in. There was reference made in some of the exhibits introduced by the Government to the suggestion made by some members or some committee that efforts be made to ascertain the L. C. L.—I take it that means "less than carload" shipments of maple lumber?

A. Yes.

Q. Was anything ever done about making such a survey of costs?

A. No, nothing ever happened in that respect. Some of the mem-

bers, only a few of them—well, perhaps quite a number of them at times sell less than carload lots of flooring, we call it L. C. L. For example, might haul it from their factory to the freight house in the City in which they are located, then they load it into cars, some are just delivered to the freight house, and I think one or two of the members thought we ought to make a survey as to what the average cost of handling that kind of business was but nothing was ever done in regard to it.

Q. No such survey was ever made?

A. No such survey was ever made and no report was ever made by this Committee on cost surveys. Pardon me, coming back to this cost business again, we have had a very great correspondence with Mr. Edward N. Hurley when he was Chairman and Vive Chairman of the Federal Trade Commission about industry study and its costs, and etc. but stating how they should do that in order to have [fol. 1400] some foundation for their selling prices and etc. Some of it was a personal correspondence. For example, he made quite a lengthy address before the Boston Commercial Club in March 1916. We had it reprinted. Mr. Hurley was very much pleased with us for having done so, he wanted us to supply him with 80 copies which we did and we gave it quite wide circulation.

Q. That is relating to the ascertainment by industries of their costs of manufacture?

A. Yes and how disastrous it is not to keep any track of those things.

Q. There were references made by Mr. Fowler to the fact that statistics of weekly sales were not sent out prior to January 21, there were weekly reports of weekly sales during 1920?

A. I think my memory was at fault there, it wasn't very clear at the time. I think I said that according to my recollection weekly sales reports were made in 1920 and that was prior to the time of the celebrated Nebecker correspondence.

Q. All statistical data was suspended for a time in 1920?

A. Yes, all statistical data was suspended for four months I think between April and August.

The Court: That was immediately following the decision of the lower Court——

A. In the Memphis case, in 1920, and I think if we look at our reports we will find some of our statistical reports were made not out until August.

Q. You didn't make out any of the weekly reports at all?

A. No, we didn't pick those up again because that would be like buying old newspapers four or five months old.

Q. Is there anything else there that you have? In order that we [fol. 1401] may be sure that there is in the record one of these recent average cost charts based upon composite result in five test runs, we would like to offer this cost chart.

(Paper referred to marked Def. Ex. NN and received in evidence.)

Mr. Johnston: I think that is all.

Mr. Fowler: I wish the record to show that L. S. Morse of Jeff-

ersonville, Vermont, is on the list, but has not reported to either of the parties, either the Government or the defendants.

Billings Lumber Company, Belvedere Center, Vermont, was on the list of manufacturers, has not reported to either the Government or the defendants, but that C. R. Phillips Company, North Tonowando, N. Y. as manufacturers——

Mr. Johnston: Are they on our list?

Mr. Fowler: No, you said a while ago they were not on your list, the one that you prepared.

The Witness: I think his Honor said they were not on our list.

Mr. Fowler: I don't care to ask him any questions.

Mr. Johnston: The defendants now offer in evidence the publication entitled "Trade Association Activities, published by the United States Department of Commerce and printed by the Government Printing Office in 1923, being the Department of Commerce publication under the general heading of Elimination of Waste Series. I don't care to have the publication copied of course but I desire to read a few excerpts from it and have them in the record so that either counsel may refer to them if they desire.

The Court: I suggest that you specify the pages of the report to which you call particular attention."

Mr. Johnston thereupon called the court's attention to pages 2, 3, 4, 7, 13, 14, 21, 22, 23 and 24.

(Said document was marked Def. Ex. NN-1 and received in evidence.)

[fol. 1402] Mr. Fowler: We wish to have an objection noted on the ground it is wholly immaterial.

The Court: It will be received subject to the objection.

Mr. Johnston: I will just read a few portions from it. The first is from the Foreword on the first page (reading) Reads from page 2, 3, and 4, also summary at the end of this article, page 7. On page 13 under the heading of Production Statistics, and on page 14.

Mr. Fowler: I would like to inquire whether that is being read as evidence or an argument.

Mr. Johnston: It is being read as the production of a Department of the Government which has to do directly with trade Associations.

Mr. Fowler: But not with the enforcement of the law.

Mr. Johnston: Maybe not with the enforcement of the law, nevertheless, it is from the same Department in which a portion of the statistical data is presented by the Government. (Reading from page 21, "Special Statistics." also page 22, page 23 and page 24.)

The Court: Really, Mr. Johnston, can this be of very much value?

Mr. Johnston: I think so.

The Court: In a decision of a case of this kind if these matters are desirable the remedy lies with Congress and not with the Courts.

Mr. Johnston: I think when you are considering it was signed by Mr. Hoover——

Mr. Fowler: It wasn't written by Mr. Hoover.

Mr. Johnston: In fact I have some of his letters in here which I would like to read, there can't be much doubt about those.

The Court: There isn't any doubt in the world but what eminent men and men who are capable of forming opinions differ as to the [fol. 1403] wisdom of the Sherman Anti-Trust Act and differ also as to what is prohibited and what is not prohibited, but matters of that kind are not very valuable in the decision of a case like this one.

Mr. Johnston: Let me state to the Court why I think they are valuable, in what respect they are valuable. This Court is a chancellor, sitting in chancery, it is his discretion under this Act as I construe it, and I construe the authorities, to enter the sort of a decree which the facts in this case justify.

The Court: Governed entirely by the rules of law.

Mr. Johnston: Certainly, of course a chancellor doesn't in that respect sit in any different situation than he does sitting in a court of law, but when he is framing a decree to cover a situation of this kind, one of the things which he must of necessity take into consideration in determining whether or not a particular thing which is done by the defendant association is in violaton of the Act, is to determine the aspect of that thing in its relation to the industry as a whole because, unless that view is taken, it is impossible to get the proper perspective upon, let us say, the subject of the distribution of trade statistics.

The Court: Of course, if this were a matter addressed to the legislative branch of the Government, it would be highly important, but as addressed to the court for the decision of a particular case, involving specific matters, to my mind, it is of very little importance.

Mr. Johnston: It seems to me to be very important, your Honor.

Mr. Fowler: I wish to call the court's attention to one statement in it, which shows the source of this matter:

[fol. 1404] "This investigation, undertaken jointly by the Bureau of the Census, Bureau of Foreign and Domestic Commerce, and Bureau of Standards, was guided and supervised by the following committee, representing the many phases of trade association activity and allied interest:

F. M. Felker, Chairman, Department of Commerce.
Hugh P. Baker, American Paper and Pulp Association.
Carl Hunt, Associated Advertising Club of the World.
E. W. McCullough, Chamber of Commerce of the United States.
S. L. Nicholson, Electrical Manufacturers' Council.
James O'Shaughnessy, American Association of Advertising Agencies.
L. B. Palmer, American Newspaper Publishers Association.
Alfred Reeves, National Automobile Chamber of Commerce.
O. B. Towne, Waxed Paper Manufacturers Association (secretary American Trade Association, Executives).
Nathan B. Williams, National Association of Manufacturers.
L. E. Warford, Secretary to the Committee.

[fol. 1405] "A. We prepared an index of wages showing 1913 as one hundred per cent, extending from the year 1912 to a part of the year 1923, inclusive, and some of the members referred to

this in their testimony and their statements were handed into the court. In this particular case, you know, we have reports from thirteen members of the Association, and they have made a report of the daily wages of four classes of workmen:

Labor costs per M feet of flooring;
Labor costs per M feet of flooring;
Daily wages thirty-two classes of workmen;
Daily wages six classes of workmen;
Hourly wage—classes of workmen;
Labor cost per M feet of flooring;
Daily wage eight classes of workmen;
Daily wages sixteen classes of workmen;
Daily wages eleven classes of workmen;
Daily wages twenty-nine classes of workmen;
Daily wages seven classes of workmen;
Daily wages of ten classes of workmen.

In all cases the same basis was used by the same member in each year, and we have extended that across, and using thirteen as a base, we found that the average of the percentages, 1909 is 99%; 1913, 100%, 1914, 102%; 1915, 99%; 1916, 108%; 1917, 124%; 1918, 151%; 1919, 190%; 1920, 249%; 1921, 205%; 1922, 184%; a part of 1923 from some of them 154%, using the year nineteen thirteen as a base.

Mr. Johnston: We offer in evidence this index and ask that it be marked with the next letter.

(Paper referred to marked defendant's exhibit 00 and received in evidence.)

[fol. 1406] The Court: That is quite interesting in this, that the curve from 1920 to 1921 corresponds with the other reductions, but from 1921 to 1923 inclusive, it seems to be the reverse of the other curves.

A. Yes, sir.

The Court: In other words, the curve here is downward from 1921 to 1923 instead of upward.

A. (Continuing:) Then we requested the members of the Association who buy rough Maple flooring lumber on the open market to send us a statement of their purchases during the various years, and of the grades, etc., and we have put that on an index basis, using 1913 as a 100%, and in the first column it shows the rough Maple flooring lumber purchased, by grades, during certain years. Of course, the grading of Maple flooring has changed somewhat, as everyone knows who is familiar with the business, and other grades have been injected into it, and it has been more highly classified.

We found, using 1913 as the basis, the index per cent of the average price of the rough Maple flooring lumber purchased in 1912, and reported to us by these various members of the Association, stood at 92%. In 1913, it stood at 100%; in 1914, 97%; in

1915, 90%; 1916, 96%; 1917, 125%; 1918, 149%; 1919, 191%; 1920, 358%. You will observe in that column that in some cases for the grade of lumber used that year as compared with the 1913 base of 100%, one stands at 524, another at 368, another at 488, another at 375; the simple average is 358. 1921, 179%; 1922, 187%; 1923, so far as we were able to get data, 233%.

Mr. Johnston: We will offer this chart in evidence and ask that it be marked with the next exhibit letter.

(Paper referred to was marked defendant's exhibit PP and received in evidence.)

The Court: That curve is closely coincident with the other curves, [fol. 1407] as I remember it?

A. Yes, sir, as I remember it too.

Q. That data for both of these charts which we have just introduced—the tabulations rather, were obtained from the membership of the Association?

A. Yes, sir, and we have the supporting data in case the Government wants it. If we could get back one of those copies at some future time, we would like it, as we intend to have it charted in the same regular way.

Mr. Johnston: That is all, Mr. Keehn, there is one other portion of this Government report that I would like to refer to without reading; that is the historical data contained in the appendix, showing the names of trade associations and the dates of their origin, as showing the age of them, pages 301 to 307 inclusive. Some go way back to the time of the Civil War.

I think the defendant will rest, except that we will put in through Mr. Keehn, after he has consulted the data, the Government has, as to the average percentage of production represented by this Association of the total Maple, Beech and Birch flooring."

[fl. 1408] Thereupon the Government introduced the following evidence in rebuttal:

W. C. Hughes, a witness called by the Government in its case in chief, resumed the stand and testified as follows:

Direct examination.

By Mr. Thompson:

"Q. Have you prepared certain data with reference to the production of Maple flooring, or Maple, Beech and Birch flooring in the United States?

A. I have.

Q. How was that data secured?

A. In response to an inquiry sent out by the Bureau of Investigation of the Department of Justice, October 29th, 1923.

Q. Will you read that inquiry?
A. —

Department of Justice, Bureau of Investigation

Washington, D. C., October 29, 1923.

'Will you kindly compile for the information of this Bureau a list showing the total number of feet of Maple, Beech and Birch flooring manufactured by you each year from 1918 to 1922, both inclusive. If your records are not kept in such a manner as to enable you to state separately the number of feet of Maple, Beech and Birch floorin*f*, will you kindly report your total production, and state which of these kinds of flooring are included therein. Any action to expedite this list will be greatly appreciated. Enclosed is a form on which the desired information can be tabulated, and a franked [fol. 1409] envelope for its return to this bureau.

Very truly yours, W. J. Burns, Director.'

Q. To whom was that inquiry sent?
A. It was sent to the names of 106 concerns appearing on the list introduced in the deposition of Edward B. Gordon at Chicago, Illinois.
Q. Does that represent all three of the lists that were there introduced?
A. It does.
Q. How many answers were received to that inquiry?
A. 103.
Q. How many were received from the producers who appear on the list introduced by Mr. Keehn, that is the first list?
A. 70.
Q. How many were on that list?
A. 72.
Q. Have you all the answers received there in that exhibit?
A. I have.
Q. Have you segregated according to states?
A. I have.
Q. Have you on the chart taken off the figures from the answers and set them out in the chart?
A. I have.
Q. So that you have a short brief statement showing the name of each company, the location and the production of Maple, Beech and Birch flooring, if any, for each year from 1918 to 1922?
A. Yes.
Q. Have you taken data from any other source than answers received to those inquiries?
A. The testimony adduced in this court.
Q. The 102 answers represent both answers to those inquiries, and the evidence given in court?
A. It does.
[fol. 1410] Q. From all that data have you made a tabulation showing the production of flooring in the entire country, and compared

that with the percentage of—made a percentage comparison of the production of Maple flooring by the members of the Maple Flooring Manuafcturers Association?

A. I have.

Q. Where did you obtain the figures as to the Association production?

A. From the Association annual barometer reports.

Q. Will you just read into the record the percentage of total production for each year represented by the production of the Association members for that year?

A. 1918, 78.1; 1919, 78.9; 1920, 75.2; 1921, 71; 1922, 70.

Q. Have you made a similar tabulation covering the states of Michigan and Wisconsin?

A. I have, separately and jointly.

Q. Will you read the percentages represented by the Association production to the entire production in those states?

A. 1918, 91.6; 1919, 89.3; 1920, 85.6; 1921, 82.7; 1922, 82.8.

Q. How many of the answers received from concerns on those lists stated that they did not or do not now manufacture such flooring, Maple, Beech and Birch?

A. The list prepared by the Association, nine reported they do not manufacture Maple, Beech or Birch flooring, and of the other two lists. 24 reported that they do not manufacture Maple, Beech or Birch flooring.

Mr. Thompson: The Government offers this as an exhibit.

[fol. 1411] (Paper referred to marked Gov't Exhibit 68 and received in evidence.)

Cross-examination.

By Mr. Johnston:

Q. Mr. Hughes, how many non-members of the Association reported to you figures of production which have been included in the exhibit which you just offered?

A. Are you speaking of the entire United States?

Q. Yes, I want to know the number of non-members who—reporting non-members, who show figures of production that have been included in your tabulation?

A. Well, there were 106 names on these lists.

Q. Yes?

A. And none of them are members of the Association.

Q. But how many of that 106 reported production figures, that is what I want to know.

The Court: Perhaps, I do not understand you. I understood the witness to say, that upon one list, I don't know whether it is this list or not, there were 24 reporting no production.

A. Thirty-three on the three lists report no manufacture of Maple, Beech or Birch flooring.

Q. Then that is to be deducted from the hundred and——

A. One hundred and six.

Q. So your non-member production figures are made up then from reports of seventy-three non-member mills?

A. Yes.

The Court: Just so I may not make a mistake in that regard, you have included in your figures all production that has been reported?

A. Yes, sir.

[fol. 1412] The Court: And the thirty-three who were not inclu-ed are concerns who reported they did not produce?

A. Yes, sir.

Mr. Johnston: That is as I understand it, I just wanted to have the number.

The Court: I simply wanted to get it straight.

Q. As I understand it, there were 73 non-members who did report some figures of production?

A. Some production.

Q. All of those have been included?

A. Yes, sir.

Q. In taking the member group did you include in your member group, the production of the Wisconsin Land and Lumber Co.?

A. I did not.

Q. They are included in the non-member group?

A. No, they are included in the Association production for those five years.

Q. Is there included in the Association production the Reed City plant also of the Horner Company, or what was formerly the Horner Co.?

A. Yes, sir.

Q. That is included in the Association?

A. In the Association production.

The Court: I do not know that it has developed here—if not it ought to—that the Reed City plant was sold to the Indiana Flooring Association on June 4th, as I remember.

Mr. Johnston: Mr. Ralston, I think testified to that.

The Court: But the receiver of the Horner estate operated that mill for a little more than two months after that time, so it would bring it up to August, at the end of August I think, or perhaps the [fol. 1413] end of July, I am not certain about that, 1923.

Q. Now, you did not request, I take it, from the inquiry which you read, figures as to the production capacity?

A. No, sir.

Q. Of any of these mills?

A. No, sir.

Q. So that you have no data as to what the production of non-member mills is?

A. I have not.

Q. Did you make any effort to determine the number of unlisted mills that are producing Maple flooring, Beech or Birch flooring, or perhaps all three?

A. We confined our inquiry to the list submitted in that deposition, but we did learn of the production of a mill in West Virginia, the West Virginia Pulp and Paper Company, and their production is included in the table for that state.

Q. They were not on the list?
A. They were not on your list, no.
Q. But, I mean, you did not yourself or through any governmental department attempt to make any inquiry as to other mills?
A. I called at the Forestry Service and asked them if they had such a list of manufacturers, and they replied that they did not. I made the same inquiry of the Bureau of the Census, and of the Department of Justice and received the same reply.
Q. Your source was the same, practically, as Mr. Gordon's if you recall his testimony?
A. Yes, sir, practically."

[fol. 1414] "Mr. Thompson: I will introduce a "Survey of Costs for the quarter ended September 30, 1917, M. P. P. basis, October 22, 1917," and ask that it be marked Government Exhibit 69.

(Paper referred to was so marked and received in evidence.)

"A table of concessions and additions, table of values, January 6th, 1921, two sheets, being dated January 6th, 1921.

(Said documents marked Gov. Ex. 70, and received in evidence.)

Mr. Newman: We assume they all came from us.
Mr. Thompson: These are all documents that came from you."

[fol. 1415] JOHN KNOX ARNOLD, being duly sworn, testified as follows:

Direct examination.

By Mr. Thompson:

Q. Where do you live?
A. I live in Washington, D. C.
Q. What is your occupation?
A. I am a special agent with the Federal Trade Commission.
Q. What college training have you had?
A. I was one year at Central University of Richmond, Ky.; three and one half years at Washington and Lee University of Lexington, Va.; two years in the school of political science at the George Washington University at Washington, D. C.
Q. What degrees do you hold?
A. Bachelor and Master from the Geo. Washington University.
Q. How long have you been with the Federal Trade Commission?
A. I have been with the Federal Trade Commission about 12 years.
Q. What did you do before that?
A. I was in the Philippine Islands four years.
Q. Were you ever in the Bureau of Corporations?
A. The twelve years I mentioned embraced my service with the Bureau of Corporations and the Federal Trade Commission, the

Federal Trade Commission succeeding the Bureau of Corporations in 1915.

Q. What has been the nature of your work, both in the Bureau of Corporations and in the Federal Trade Commission?

A. Investigation of industries, usually under Congressional resolution.

Q. Will you state briefly some of the more important investigations of that nature with which you have been connected?

[fol. 1416] A. Well, I was on the "Steel" investigation, principally of the United States Steel Corporation in 1911; investigation of the National Harvester Company in 1912 or 1913; investigation of the News Print Paper industry, and the book paper industry 1915 and '16; investigation of the Farm Implement industry in 1919 and '20; investigation of California Petroleum in 1920 and '21; investigation of Grain and Cotton, both cash and futures in 1922 and '23; also the Tobacco investigation involving the resale price fixing by the four successors of the American Tobacco Corporation, this investigation being made in 1921.

Q. Have you ever been connected with any investigation of the lumber industry?

A. I wrote several chapters of the old lumber report of the Bureau of Corporations about 1913, particularly chapters relating to association activities of lumber manufacturers, and of retail lumber dealers' associations in New York, the Pacific Coast and elsewhere.

Q. Will you explain a little more fully what the general nature of your work has been in these various investigations?

A. In the investigation of the Steel corporation and the National Harvester Corporation, it was in connection with writing a review of the report. In connection with the book and news print paper industries it was in the tabulation and writing the text of the chapters on prices.

Q. What I want to bring out a little more, not so much of the time covered, but as to the nature of it? Did you go into the costs?

A. It has been a studying of the—well, I can state the detail of one of the reports which really explains it. The Farm Implement [fol. 1417] report was called "the causes of the high prices of farm implements." In that, the evidence sought was statistical evidence of prices, the causes that affected prices, not merely statistical but also any Association activities. That was true of the Tobacco report and of the California Petroleum report, and of the Grain and Cotton reports.

Q. In these investigations and their effect on prices, then, do you consider both the factors within the industry and without the industry?

A. Sometimes, we compare the movement of price in the industry with the price of all commodities, merely because many people look for that, just like some people want to count the steps that would be covered by this testimony if it was placed end to end. We use that figure merely to satisfy the curiosity of the people that want it, that is all—that is, in the study of the causes of high prices. That does not relate to the study of scientific trends; that is another matter.

Q. Have you made such studies of cyclical trends?

A. A study of business trends and cyclical trends is not within the purview of the Federal Trade Commission. Cyclical trends are long time movements, up and down, of prices in the nature of a business forecast and is yet in its infancy, comparable to the weather reports, perhaps. The weather reports twenty-five or thirty years ago were not worth much, but by experience they are reasonably accurate now. If they see a storm coming out of Alaska they send out signals "cold wave." If the conditions act as they have usually in the past, that storm will take a certain path. Sometimes, however, it is diverted by other causes which originate later. These price [fol. 1418] trends are the same way. We do not attempt to forecast the future, and the price trend does not explain the past, but the chief purpose is to find out what will happen in the future if the factors do not change.

Q. What is the essential purpose of the Federal Trade Commission's investigations, such as you have been connected with?

A. Most of the Congressional resolutions ask for the cause of the high price, or in some cases it may be the low price, and we endeavor to find out, as far as we can, all the causes, both statistical and psychological.

Q. Have you made a study of the depositions introduced in this case of Mr. Edward Gordon and Mr. Grant Keehn?

A. Yes, sir.

Q. And the exhibits submitted therewith?

A. I have made such study as I have been able to make.

Q. I call your attention to exhibit number six in Mr. Gordon's deposition. State what factors are represented and compared there?

A. Chart 6 is a comparison of index of the prices of the product of the M. F. M. A. with U. S. Bureau of Labor Statistics indices of All Commodity prices, all building materials prices, and lumber prices monthly 1913-1923. It is on the logarithmic scale, with vertical index in index numbers. That chart reduces all the prices shown thereon to the same figure, 100% in 1913, and then shows the rate of trend through the succeeding years down to 1923. It does not indicate the magnitude.

Q. What is that compared with, general commodities?

A. It is compared with what is indicated in the table that I just read, lumber, building materials and all commodities.

Q. Is Maple flooring represented on there?

A. Maple flooring is represented on the chart by a White line.

Q. From the depositions introduced and the statement therein as to the method of preparing these charts, will you state whether you [fol. 1419] consider the comparisons, the methods of dotting the lines exactly comparable?

A. The wholesale price indices of the Bureau of Labor statistics are based mostly on market prices, which is shown in Bulletin 320 of the U. S. Bureau of Labor Statistics, pages 59 to 61, and Maple flooring index prices are based upon actual prices realized at the mill, as is indicated in Mr. Gordon's deposition, pages 54 and 55, and in other places. Therefore, the indices of the Bureau of Labor Statis-

tics, and the index of Maple flooring are not strictly comparable, because it is generally known among statisticians that actual prices realized tend to lag behind the market prices or quotations, both on increases and decreases. The reason for this lag being that a price is quoted, the quotation is taken and averaged up to that time; when the average price realized is taken, however, prices quoted, the man accepts the offer and sends in his acceptance, and later it is accepted, and that is the date of sale, but the quotation may have changed in the meantime. Ordinarily, the term, which is really an accounting term, "the price realized" means the price on shipments, not on sales. I don't know exactly how this price has been made, but whether it has been made on sales or shipments, there would be a lag behind the market quotations, as is explained in the bulletin of the Bureau of Labor Statistics. It is impossible for them to get them to get the prices realized, which they say, would be the best, if they could get them all on the same basis. But, to compare the market quotations, or market prices, with the prices realized, there is this lag which must be taken into consideration in any comparison of the chart. An inspection of the White line will show it has the appearance of having been shoved to the left. If you shove it back two months, it corresponds with the other lines. Then, using the [fol. 1420] second lag, referred to by Mr. Vanderblue in speaking of a lag which came, where there was a cause and effect, for example, the price of Maple lumber and the prices of Maple flooring, that lag is caused by the effect of one price on the other. In this table, none of these prices have any effect on each other in that meaning at all. None of the prices are component parts, that is, the price of none of these things is made up of the price of any other on this chart.

The Court: Is that true of Maple flooring and Maple lumber?

A. Maple lumber is not on this chart. I say, that lag would be accounted for by the fact that Maple lumber is a component part of Maple flooring.

Mr. Johnston: It is included in the term "lumber."

The Court: I probably was mistaken. I understood, so far as this first chart is concerned, that the term "lumber" meant "hardwood lumber."

Mr. Johnston: No, it is all lumber.

The Witness: It is all lumber, includes southern pine and western pine. On the yellow line reading "lumber" it does have Maple, but the White, all Maple, in that appears as very small.

The Court: Perhaps I am mistaken in another regard, my understanding was that so far as what is termed the "product," Maple floorng that the chart represented sales and not shipments. Am I right about that?

Mr. Johnston: That is correct.

The Court: In other words, if a sale were made in January for delivery during the year, the chart would represent the January sale and not the subsequent shipment.

That was my understanding.

Mr. Johnston: Yes.

Mr. Thompson: I understood it, as testifying that the Maple floor-
[fol. 1421] ing prices were made up from the monthly report of average prices realized; that is my understanding.

Mr. Johnston: Monthly sales.

Mr. Thompson: Those are not monthly sales reports, as I understand it.

Mr. Thompson: Those are not monthly sales reports, as I understand it; they could not be without a report of average prices realized, because from all the testimony in this court, their method of quoting is all delivered prices, and what was realized could not be determined until the shipment had been made, and the buyer received the invoice and deducted the actual freight paid. I fail to see how these average prices realized could be reports of sales.

The Witness: I merely take the term used here. However, I made two comparisons.

The Court: I suppose I can dig it out, but that was my understanding. How is that, Mr. Keehn?

Mr. Keehn: It is the average prices realized on new orders booked during the month.

Mr. Johnson: Sales during that month.

Mr. Thompson: I object to that statement and move to strike it out.

The Witness: Accepting that explanation, there would still be a certain lag, due to the fact that quotations are sent out and accepted and must be filled, and the date of sale would show a certain lag.

Q. Turn to Exhibit 7. I understand that chart is practically a subsidiary one, not very important. Will you just inspect it and state whether you agree with the conclusion of that line represented [fol. 1422] on there, fluctuating in similar manner at all times?

A. This chart is to explain the reason for using the price of three grades of the product on chart six in one line, the white line. Chart six, the vertical scale used in the index numbers, all the products started close together. This chart is on the dollars per thousand feet. As a matter of abstract statistical practice there is no objection to such a scale; in fact, it is preferable where it is possible to use it. But using these two charts together, unless it is kept in mind that one is on percentage scale or index number scale, and the other on the dollar scale, the eye is misled as shown by the fact that Mr. Gordon was misled by this into stating the movement of those lines was practically the same.

An inspection of the chart, however, shows the blue line starts at about seventeen dollars and fifty cents and goes up to one hundred and seventy dollars, something over, no, one hunderd and fifty some dollars, which is an increase of between six and seven times. The yellow line, however, starts up close to forty dollars, and only goes to $180.00, showing only about four and one-half times the increase. The red line starts about $30.00 and goes up to around $160.00 or $170.00, showing about five times increased. The mere inspection

of the chart, however, shows that the blue line fluctuates much more sharply, and rapidly than do the other lines; in fact, so much so as to indicate it to be almost a by-product. The other two lines, the yellow and the red line, the fluctuations are close enough together to consider them on a comparable basis.

The Court: Isn't that borne out—if counsel will pardon me if I [fol. 1423] ask a question—the charts or figures or tables which were introduced this morning, I noticed in examining them while the witness was testifying, that there is a much greater variation in the price of Factory at different periods than there is in the price of No. 1 and the Clear. That is represented, not by the multiple of increase, but the actual dollar difference?

A. Both would be true.

The Court: And that at times, there was a very much greater spread between Factory and the two higher grades than at other times?

A. Yes, sir.

The Court: And that is indicated by this chart, is it not, number seven?

Q. What is the purpose of the chart number seven?

Mr. Fowler: Let him answer the court's question.

A. The purpose of the chart, as stated in the depositions, is to show that all three grades fluctuate in about the same way.

Mr. Johnston: In quantities?

A. I used percentage. The only point in that is that the blue line did not move, either of dollars or percentage, in any relation to the other two lines, that is all. It is a subsidiary matter, but unless you inspect the chart, carefully, that would not be apparent, because the lines start at the left so far apart; they come about together up here at the high point. If you carry in mind that they probably started close together, as on the preceding chart, they are misleading, that is all. If this chart had been put on a percentage basis, the blue line would have been up two or three inches within the yellow or red line.

The Court: The mercury would have gone out of sight?

[fol. 1424] A. Yes, gone off this chart entirely. There are so many charts in there, subsidiary charts, that are made on different bases from the main chart, that I merely call attention to that, perhaps, for some assistance to you. Perhaps you noted it yourself, however.

Q. What is the purpose for which that chart is used in the deposition?

A. This chart is merely put in to show that the three lumbers moved at the same rate of change according to the depositions, which it does not show.

The Court: Therefore, they use the single line to represent the product?

A. They have used the white line on chart six and all others.

The Court: This chart is to justify that?

A. To justify the white line; but certain statements are made in connection with the chart that I am calling attention to.

Q. Turn next to Exhibit 12?

A. All right.

Q. State what that chart shows?

A. Chart number 12 shows the relation of new orders booked by the M. F. M. A. to the volume of new building contracts awarded in the United States. Indices corrected for seasonal variation, monthly 1913 to 1923. Index numbers logarithmic scale.

Q. That chart compares trends or quantity?

A. That chart is in index number, compares the rate of movement and not magnitude.

Q. For that purpose for which these depositions were introduced, do you consider that quantitive comparison, or the comparison of the trends, would be the more important?

A. I consider a comparison of trends in prices as justifiable in an economic state to make a forecast of what conditions will probably [fol. 1425] be. I consider it absolutely useless as explaining what were the causes of price changes, because it has no quantitive relation to prices, nor do they have any exact quantitive relation to each other. You cannot say that a certain increase in price was due to this cause or that cause, unless you have a quantitive relation, not merely a trend. A trend shows the direction. A cause shows the extent or magnitude of the change. For example, if prices go up five dollars, the fact that building increased ten per cent, would not show any quantitive relation to that. Sometimes when building increased ten per cent, prices might go down two dollars; and other times they might go up ten dollars.

Q. You are speaking of prices. That chart compares the new building contracts and the volume of new orders?

A. Oh, yes, this chart hasn't the prices on it. Of course, the building contracts awarded is not an index to the orders for Maple lumber except in a very remote degree, for the simple reason that the building index shows all kinds of building irrespective of the kind of lumber.

Q. Would it be true, though, that normally as building increased there would be more orders placed for Maple flooring?

A. It would.

Q. But is there such a close relationship between the two, that that would be any evidence of control of prices?

A. Absolutely no quantitive relation that could be measured at all.

Q. I take it then, you would not consider that the mere similarity of trend would be indicative of any such thing as control of prices or lack of control?

A. I would not.

Q. As a matter of fact, you consider that the two trends are very [fol. 1426] closely similar on that chart.

A. This has been corrected by seasonal variation. In 1917, for

example, the volume of new building decreased at a very high rate. I don't know what the extent was, because it doesn't show on here; it shows somewhere else perhaps. The new orders decreased at a smaller rate, a less rapid rate. Another time, in 1920, the construction decreased almost perpendicularly and the new orders decreased at a slant. Of course, there is a natural lag in this proposition because there is a relation between the new building and the new orders, but one that cannot be measured on the figures available, cannot be measured quantitively.

I would like to state at this point a general proposition that might be of some value. These charts are of three general kinds, scattered through first one kind and then the other: one, where prices of Maple flooring are compared with the prices of other products. This is a thing that I would not do in trying to ascertain the causes of the changes in price, because the relation is too remote; they are not the cause of each other, but both of them are caused by the process of the various commodity changes in that way, caused by an infinitude of business practices and causes too numerous to analyze. That is one series of the charts, comparing the prices of the products with the prices of other commodities. That, as I say, is used in the charts not only by the Harvard School, but also by Mr. Babson, I think; perhaps he does not use it, but he uses the figures to show the probable business trend, that sweep that goes on, disregarding the minor changes. They are of some value in that, perhaps.

The Court: I don't think I understand that, Mr. Arnold, your statement as to this chart number 12. Do you understand the line [fol. 1427] representing "new orders booked" is a price line or a volume line?

A. That is a volume line on this chart. The price line is on another chart, 14 I think.

The Court: And the volume of new building certainly is a volume line?

A. Yes sir.

The Court: You are comparing the two volume lines or a volume and trend?

A. Yes. But, in the index numbers you see, as an actual fact, the volume of building might have changed to any extent, and this line would not reveal the quantity at all; it only reveals the percentage of change in the volume.

Mr. Johnston: The rate of change?

A. The rate of change.

Mr. Johnston: That is all the chart tries to do?

A. All I said about this chart was that the lines show in themselves that there is no quantitive relation between the two factors. Even if you had them both in dollars there would not be.

The Court: If you start with a certain basis, and then represent the trend in percentages, why are you not getting a quantitive?

A. Not a quantitive cause and effect proposition. Of course, this is supplementary to chart 14, I think it is, which does show the price. The lines themselves, show that there is no exact relation

between the volume of new orders booked and the volume of new building, because the rate changes at varying slants. You see there are two propositions, What made the price change—or take this, what made the new orders change, or what made the volume of [fol. 1428] building change? And the other is, what are those factors?

The Court: Suppose the volume of new building increased fifty per cent within a given time, steadily increasing, for an illustration, and you find that the volume of new orders increased fifty per cent and steadily, isn't it fair to infer that there is a relation between two two?

A. Yes, sir; but as I said, this chart does not show that?

Mr. Fowler: The lines should run parallel.

Mr. Johnston: The slant of the line would be the same; it would not necessarily run parallel if they were both fifty per cent.

A. On a logarithmic chart when the change is the same, the slant is the same; you can turn the paper anyway you wish, you don't need this cross line; if the slant is the same the change is the same.

Mr. Johnston: It doesn't matter how long the slant is compared with the other?

A. But you must compare them for the same month; not a slant in this month and a slant in another month.

Mr. Johnston: Each one of those checks represents the month?

A. Yes, and I say this chart does not show that, because you can see how the line slants differently, like in 1920, the white line drops perpendicularly and the yellow line goes off this way. I do not say there is no quantitive relation; there is no exact quantitive relation on this chart.

Mr. Johnston: It isn't intended to express that. It expresses the rate of change just as you stated, not quantities.

A. All right; the rate of change is shown to be not the same on that chart by very casual inspection.

[fol. 1429] Mr. Johnston: Of course, I differ with you on that.

The Court: Very well.

A. The second charts included in here, besides price comparisons, are the comparisons of the price with its component parts, such as the price of Maple lumber and the manufacturing and selling cost.

Now, I may state that in our study of the causes of high prices, that is one of the main things, because it is the component parts which have an exact quantitive relation to price. In other words, the price of the hard lumber, the manufacturing and selling cost, and the profit, show the price. You can draw a chart and show them down to one millionth of one per cent. Those are the things we pay more attention to. The other statistics are of subsidiary importance.

In this study, charts 19 & 21 take up that particular phase of it in a very incomplete fashion.

The other class of charts is the one we have been just talking

about, the supply and demand comparisons, and in there even though there were an exact quantitive relation between supply and demand, I would still in my investigation attempt to find out what had affected supply and demand before it was put on that chart; in other words, supply and demand might run apparently all right, but if one of them, supply, has been affected first, I would want to know it. In other words, I would go behind the figures and find out the cause. Those are the three general types of charts. All of them, except 2 are on the comparison of prices which I call type one, interesting for your cyclical trend, but not of much importance when you are looking for the causes why the prices were there.

The third type, supply and demand, is very valuable in your [fol. 1430] business forecast, in forecasting what will probably happen within the next two or three months, or five or six months, if some other factor does not come in and change it; but it does not explain what the factors are.

The second type I mentioned, comparison of prices with the component parts, that is, the raw materials, manufacturing and selling expenses, and profit is the critical and important comparison.

In these charts, I have been able to find nothing on profits, which may be introduced somewhere else in the case, but I have not examined anything but these depositions of Messrs. Gordon, Keehn, Vanderblue and Hettinger.

Q. With reference to those charts on cost of product, what factors are covered?

A. Chart 19 and 21 are component charts; 20 is merely an explanation of 19, it is of no importance, but exhibits 19 and 21 are component charts. They should have been on the same chart, and profit also should have been included.

Exhibit 19 is a chart showing comparison of indices of the prices of the product of the M. F. M. A. and of the Michigan mill prices of raw material, rough Maple lumber, 1913-1923. It is index numbers on the logarithmic scale.

The chart 21 is a chart of the same nature, showing average manufacturing and marketing costs, but not including the raw material.

Q. What do you consider the effect of showing in that manner merely showing the two factors of average manufacturing and selling cost and the price of the raw material?

[fol. 1431] A. Both of those charts, 19 and 21, are on index number basis. Charts 19 and 21 show two of the three component parts of the prices of Maple flooring; chart 19 showing the price of the raw material, Maple lumber, and chart 21 showing the manufacturing and selling expense. The third component, which is not shown, is profits. If all three were shown there would be an exact quantitive measurement of the three factors of prices. The component parts in such comparison as this should be in dollars and all the component parts should be included, otherwise such charts are excessively misleading. For example, suppose in

chart 21 that Maple flooring prices averaged $72 per thousand; that Maple lumber cost averaged $48.00 per thousand feet, allowing for waste in sawing and manufacturing, and selling cost averaged $20 per thousand feet; suppose in 1922 the corresponding figures were $75, $45 and $19; then the percentage changes in Maple flooring prices, Maple lumber prices, and manufacturing and selling costs, would hardly be noticeable, especially if each were on a separate ten-year logarithmic chart, as there would be changes of only four per cent of Maple flooring prices, six per cent in Maple lumber prices, and five per cent in manufacturing and selling expenses. But, the effect on profits would be that in 1921 the average profit was $4.00 per thousand; that in 1922 the average profit was $11 per thousand feet, or an increase in net profits of 175%. It should be noted also that the mere fact that the price line, or Maple lumber on chart 19 is sometimes above the price of the product; also that the average manufacturing and selling cost line, which is on another chart, is sometimes above Maple flooring prices, does not necessarily indicate a loss. These lines are based on index numbers and not [fol. 1432] dollars; therefore, they do not show fully the levels, but only rates of change, although Mr. Keehn has apparently been misled in this regard. On page 39 he said, regarding chart 21, that practically through the whole of 1921, the two indices were upon approximately the same level, and both declined at the same rate. Nevertheless, for all the chart shows, the Maple lumber, manufacturing and selling cost might have been forty five dollars per thousand, the price of flooring sixty dollars per thousand, a decrease in the same proportion—as the chart shows proportion only—thus leaving quite a sizeable profit. These two charts are quite misleading in the way they have been used.

Chart 20, which is not a component part, is put on a dollar basis. A chart which shows the comparison between the price, f. o. b. mill price of Michigan and Wisconsin, and rough Maple lumber today is of no importance as a chart.

Mr. Johnston: That is for a special purpose, isn't it?

The Court: For practical purposes of this case, ought not charts 19 and 21 to be combined?

A. They ought to be combined.

The Court: In order to get any results?

A. Yes, sir.

The Court: That are valuable.

A. Yes, sir; for this reason, if I may use an illustration, these charts by reducing everything to the index number basis, of course reduces them all to a hundred, you are familiar with that. That means, in addition, what the magnitude of the number is for comparison of prices, and supply and demand factors as used in the [fol. 1433] other charts; there is no harm in that, because we don't care what the magnitude is, but for a comparison, to show whether or not there is control of price of what the causes of the price changes are, you want the component parts, which are of course—there are three main ones; they show two and the other is of course profits,

which is derived from adding these two together and subtracting it from the prices.

Now, Maple lumber is started here at a hundred; Maple flooring is started at a hundred. Even if they change exactly, if the red line and white line coincided, and on the other chart the two lines coincided for the other costs, the increase in actual profits would be about 400%, because rough lumber started on a lower basis, and there wasn't much per cent of change at a smaller amount of money. If all costs increased a hundred per cent and prices increased a hundred per cent, profits also increased a hundred per cent. The example that I have used may not be very clarifying, but it is short.

Mr. Johnston: Do you understand the purpose of those charts is to show profits?

A. I read the testimony on these charts and I am stating what the charts should show if they are to explain the cause of the change in prices, and also how these charts are deceiving, as they have been used in the testimony, to show not only rate of change, but they have sought to use a level of prices, frequently when they should have referred to only rate of change.

I may say in this particular connection that logarithmic charts were first used by engineers who deal with quantities having exact [fol. 1434] relations. For example, the beam in a bridge or building, the stress on it is proportionate to its length, breadth and the weight to be put on it. They were used for a long time by engineers and they expressed exact quantative relations. They were adopted some years back by economists and statisticians for the purpose of showing price comparisons, and in that respect they are all right, although the arithmetic chart in most cases is just as good. However, in using a chart of this kind, especially with a vertical range and index numbers, and trying to explain the causes of the change in prices where there are component parts, is not good practice. Such charts should show the actua price, or you can reduce the price to a dollar, if you want to, and say all component parts cost fifty dollars, profit was twenty-five dollars and price was a hundred dollars. Then in the next period, cost was thirty dollars, profit twenty dollars—manufacturing cost twenty dollars and profits fifty dollars, making a hundred dollars, and I want to call your attention particuarly to the fact that these two charts, 19 and 21, are made on that index, which is not correct. The vertical line is the index number. I want to call your especial attention to the fact that that is quite misleading to use a chart in that form and fashion.

Q. Some evidence was introduced this morning as to per cent of profits on yearly sales, would that supply any element that you think should be shown in order to have importance?

A. That was a very common business practice and also was used by the Government to certain extent prior to the war when prices did not change much and comparison between rate of profit on prices was a very fair comparison but the war increased prices so much that it became a comparison that was not only useless but misleading. The only fair comparison when you are trying to find out what are [fol. 1435] the causes of increase in prices is to take a yard stick that

does not change with the price, that is the capital invested, the rate of return on capital invested is the figure we use, and I may say in many investigations where a company or a series of companies make more than one product it is necessary to allocate the investment to that particular product as well as the costs and the prices as was done here this morning.

Q. Will you refer now to exhibit 15, table of commodities of relatively higher peaks?

A. Yes, sir, commodities which at a higher relative price peak than the product.

Q. How many commodities are shown in the tables from which those were taken at lower price peaks than maple flooring?

A. The commodities in this table were taken from the wholesale price bulletin of the United States Bureau of Labor Statistics. Now that volume has in it *to* series of commodities, it is 450 commodities for which it shows prices. It is 404 commodities which it combines to show the average index, the commodities selected in this table having been taken from the 450 commodities, except the last item, shoes, leather glazed kid, top grade from Brazilian skin. That is not in the Bureau of Labor Statistics Publication and so far as I could read in the carbon copy of Exhibit 8, in this Gordon-Keehn exhibits, it is not in there. Those are the 404 commodities which are combined into the index number. In making up this table he has used a table of 450 commodities for which detailed prices are shown, and another thing, quinine increased less than product and yet he includes it in table of ommitting quinine, therefore I think it is shoes which don't agree, that would leave 19 articles here with a [fol. 1436] higher peak which would be about 431 with lower peak.

Q. What can you say as to the comparative importance of some of these commodities having the higher peak price?

A. Some of the commodities in here are insignificant, one inch augers, door locks, iron steel butts, muriate of potash, potash caustic, bleaching powder, formaldehyde, quinine, which ought not to be in, and bed ticking.

Q. Are those given weights in the table?

A. In the publication of the Bureau of Labor Statistics each article is weighted in proportion to the value of all the 404 articles included in that index. I compared these articles such as occurred in those 404 and found that some of them had these percentages, muriate of potash, less than .01 of 1%. Potash caustic less than .01 of 1%. Bleaching powder .01 of 15. Formaldehyde .01 of 1%. Quinine .01 of 1%. Hops (Pacific Coast) .02 of 1%. Bed ticking .02 of 1%.

As I stated before, the items one inch augers, iron steel butts and door locks are not included in the weights, they are apparently too insignificant to include in the weighted index.

Q. Which of the commodities on that list, those having a higher peak price has the highest weight in the table?

A. There is only one of these 20 commodities here shown that has a weight greater than one-half of one per cent and that is California crude petroleum.

Q. What can you from your personal knowledge state as to the causes controlling the prices of that product?

A. The Federal Trade Commission issued a report on the California oil industry in 1921 covering the causes of the prices, increase in prices in California crude petroleum and that report will show [fol. 1437] what the results of that of that investigation were.

Q. Is that the report to which you refer?

A. Yes, sir.

Mr. Thompson: I will just introduce that in evidence and not stop to read from it, refer to the pages which show the conclusions.

A. In the letter of submittal sent by the Commission to the President of the Senate and in the summary of the report certain paragraphs show the results of the investigation, the details being shown over in the back, that is shown on pages Roman numerals IX and X, and pages 2 and 3.

Mr. Thompson: We offer those pages in evidence.

(Pages marked Gov. Ex. 70½ and received in evidence.)

Q. Turn to Ex. No. 16, what does that table show?

A. This table shows some wholesale commodities whose prices had a higher average level than the level of maple flooring prices during the period 1913-1922 inclusive.

Q. Do you consider such a comparison as of any importance in determining the causes for the prices of maple flooring?

A. It has absolutely no bearing on the question as far as any investigation I have made would be concerned.

Q. What is the source of the commodities appearing on that table?

A. The source of the commodities in this table in the wholesale price bulletin of the Bureau of Labor Statistics of the Department of Labor, United States Government, the number is not given of the Bulletin.

Q. How many commodities listed in that bulletin show prices [fol. 1438] lower, average prices lower than the price of maple flooring?

A. Well, 146 from 450 would leave 404—no, 346.

Q. Does the table as set out in that exhibit give 146 separate articles?

A. The title is commodities but the thing actually shown are different articles under general commodity heads. An inspection of page one will show what is meant by this. It will show that furniture is counted five times—well, on the first page wheat is counted five times, flour is counted five times, furniture is counted five times, boots and shoes counted nine times, woolen good counted fourteen times, cotton goods are counted twenty times, iron and steel products are counted 18 times. This accounts for about 76 commodities of the 146, 76 articles which are listed as 146 commodities.

The Court: For instance, we have on the first page as you say, five, wheat is counted five times?

A. Yes sir.

The Court: Giving the market prices at——

A. Different grades and different marks.

The Court: At four different places, or different grades, Chicago, No. 1, Chicago No. 2, Kansas City No. 2, Minneapolis No.1 spring wheat and Portand, Oregon.

A. Most of the other commodities are grouped according to varieties and grades and sizes rather than geographically.

The Court: You would expect those different quotations to run in parallel lines or nearly so, wouldn't you?

A. Yes, sir.

The Court: In a commodity like wheat.

A. And the use by the Bureau of Labor Statistics to properly [fol. 1439] weight the article, it is all right to use them, but I called attention to the fact the way they are grouped, 20 articles in cotton goods, I believe it was, naturaly they all moved about the same.

Q. Turn next to Keehn exhibit No. 28. State what that purports to represent.

A. Table 28 is a chart showing comparison of f. o. b. mill prices realized by reporting members of M. F. M. A. showing lack of uniformity in March 1920, March 1922. The table is a bar chart, arithmetic, dollars.

Q. Comparing with the previous chart, do you consider that those were normal months that were selected for that comparison?

A. A reference to chart 29 which shows one mill having the highest cost marked high, and the one mill having the lowest cost marked low. It is apparent that throughout most of the period 1913 to 1923 the high and low were almost the same distance apart and this is a dollar chart except in 1920 when there was a spread of $50.00 between the high and low and in October 1921 when there was quite a little spread and again in March 1922 when the spread broadened out again. The three greatest spreads are 1920, March 1920, or April, I can't tell from this chart, close to March, October 1921 and March 1922. The other months except for about three or four months in 1920, October 1921, and March 1922, show the spread between the highest and lowest mill to be only a few dollars and about the same, so I would consider that March 1920 and March 1922 were not selected, could not be selected as representative months for that ten year period, especially March 1920.

Q. Turn next to Ex. No. 29 and state what that represents and compares.

[fol. 1440] A. Well, that is the one I just described, I am describing them both together.

Q. That was 28, was it not?

A. I was describing 29 in connection with it.

Q. My numbering is wrong, which is the one in reference to the cost and the price?

A. You finished with the bar chart?

Q. Yes, that is all you had on that, was it?

A. Why, only one thing, on chart 18 in March 1920 mills 3, 5, 14 and 30 are the middle group of clear, show a variation of almost $25. from the high to low. If we take those same mills in March 1922, 3, 5, 14 and 30, omitting 26 which was not shown above, the

high can scarcely distinguish any difference in the height of 3, 5, 14 and 30, they are practically the same height, 26 was not shown in 1920.

By Mr. Johnston:

Q. You say that is true in March, 1922?

A. Yes.

The Court: That is to say, scarcely any difference between 3 and 5 and between 14 and 30 but as between 14 and 3 there is a distinct difference, is there not?

A. In the height?

The Court: Yes.

A. There is a slight difference, probably fifty cents, I can't tell on the chart exactly but it is very small. Maybe you haven't got the same chart I have.

The Court: Perhaps I am looking at the wrong chart.

A. The clear grade.

By Mr. Thompson:

Q. Of course, there is a difference in the heights, the principal [fol. 1441] thing there was the selection of the months?

A. Yes.

Q. In the other chart those months show greater differences than normal, 29 I think is the comparison of the average costs with the average prices realized.

A. I explained the white lines on 29. The red line is marked Average Cost.

Q. I will ask you whether the cost line on that chart shows any change in average cost corresponding to the statement of average cost put out by the Association under date of January 6, 1921, which is Gov. Ex. 34?

A. Table of values dated January 6, 1921, shows clear at $105. The chart has the red line on a continuous level from about February or March 1920 to about September 1921. There is no change in direction in January corresponding to this sheet you show me.

Q. I haven't the exhibit here, just before you took the stand there was produced an exhibit which gave a determination of average cost in November, 1920, is that shown on the cost line?

A. There is no change on the average cost line here in November, 1920.

Q. Or is there any change in the average cost line for the determination of average cost published by the Association under date of May 21, 1921, which is Gov. Ex. 34-A?

A. This shows the clear at $85.00. The chart shows it on the same date at $154. or $155. No change was made on the chart at that point.

Q. Turn to Ex. 18.

A. Yes, sir.

Q. Do you notice the difference in the trend of the several lines [fol. 1442] on that chart?

A. This chart compares the rate of change in the index numbers of oak, Arkansas soft pine, Southern yellow pine, Douglas fir and the products based on March 1919 to May 1923 as 100, in this case the basis has been changed from the basis ordinarily used heretofore for the 100, which was 1913 or the first year they used, and in this case the change of the base has a tendency to group the lines together from the middle of the chart to the end of the chart and to disperse them in the beginning of the chart from where the comparison starts to be made. One effect of that is to throw the white line down at a much lower point than the other four lines. Attention should be called to that so that it will be noted that the white line moves up much more rapidly than the other lines because it covers a greater space.

Q. Was there a lag in the movement of white line on that chart?

A. There is a distinct lag in the movement of white line as compared with the Arkansas soft pine and the Southern yellow pine and Douglas fir, the lag is not so apparent in regard to oak.

Q. To what might that lag be attributed?

A. That might be attributed to the same cause I stated before, because these are all prices not depending on each other, therefore it is not a cause of lag but apparently due to some difference in securing or tabulating the figures such as the product being average price realized and the Douglas fir, Southern Yellow pine and Arkansas soft pine perhaps being market quotations. I don't know, because it is not certain in the testimony what they are, although they are *set* to be taken from lumber publications which ordinarily show quotations.

[fol. 1443] Q. And the average price of sales for the manufacture being used for the white line you nevertheless consider that there would be a lag between the lines which were made from average quotations?

A. My experience in industries I have been in is that you must allow for that lag because of the fact that orders are accepted even if they are sent in a little late, if you have got a good customer at the prices you quote before the price changes.

Q. Turn to Ex. 24. One other question first on the previous exhibit in order to assume——

A. This is on chart 18?

Q. Yes, that is a comparison, is it not, with the other competing floorings in order to properly argue if it can be done at all with a similarity in the trends of those curves, proves that the price of maple flooring moved solely in response to the operation of law of supply and demand, what must be assumed with reference to the other commodities.

A. It must be assumed of course if that comparison is to be valid that the other commodities were not controlled.

Q. What can you state as to the control of the other commodities or any of them?

Mr. Johnston: That is objected to unless this witness is in position to state from actual knowledge as to the control of prices in

other commodities, I don't think that is a question upon which he could give opinion any more than he could express an opinion today that the price of maple flooring is controlled, clearly not a question for expert witnesses to testify upon.

Q. I will withdraw the question temporarily. Has investigation been made by the Federal Trade Commission which would cover that subject?

[fol. 1444] A. No investigation so far as I know has been made of flooring prices. The investigation was made of lumber prices of which the prices are shown in chart 6.

Q. Would flooring be included in the lumber prices shown?

A. Flooring is not included in the investigation so far as published, it was an investigation of lumber prices which are shown in chart 6 in this exhibit 6.

Q. What you said with reference to this exhibit also held true with reference to the comparison made in Exhibit 6?

A. Yes, it is perhaps a platitude to state that when one thing is to be compared with another to show that a certain thing does not exist, it must be assumed that that particular factor does not exist in the other commodity compared.

Q. Have you that report that you referred to here?

A. Well, this is a report of the Federal Trade Commission on lumber manufacturers, trade associations published in 1922 and covers the National Lumber Manufacturers Association, Southern Pine Association, Manufacturers of Southern yellow pine lumber; West Coast Lumbermens Association, Manufacturers of Douglas fir lumber; Western Pine Manufacturers Association, Manufacturers of Western White and Yellow Pine; Northern Hemlock and Hardwood Manufacturers Association, Manufacturers of Hemlock and Hardwoods in the lower peninsula of Michigan; Northern Pine Manufacturers Association, Manufacturers of Minnesota and Wisconsin Northern pine; North Carolina Association; Georgia-Florida Sawmill Association; Southern Cypress Manufacturers Association, manufacturers of cypress lumber; California Sugar and White Pine Manufacturers Association; Redwood Manufacturers Association, manufacturers of California redwood.

[fol. 1445] Mr. Thompson: I offer that in evidence.

Mr. Johnston: We object to it as incompetent, irrelevant and immaterial to any issues presented in this case.

The Court: It may be received subject to the objection.

(Marked Gov. Ex. 71 and 72, and received in evidence.)

Mr. Thompson: We objected to all of this so-called economic defense as being immaterial. One reason for that is in order to carry it out to arrive at any logical conclusion it would be necessary to try a multitude of law suits in the one lawsuit; the whole theory of that is based on the comparison and movements of the prices of this product with the movements and prices of other products, in order to combat that of course it is necessary to introduce evidence

showing that the prices of some of the other is perhaps or certainly were controlled also by combinations.

Q. Turn now to Ex. 24.

A. Yes, sir.

Q. State briefly what that chart shows and what effect should be given to it in your opinion.

A. Exhibit 24 is a chart showing the relation of the prices to the demand and supply of the products of M. F. M. A. indices of unfilled orders and stocks on hand, of identical 15 members of M. F. M. A. Corrected for seasonal variations and index of the prices of the product of the M. F. M. A., corrected for decrease in the value of the dollar. Monthly 1912-1923. Index numbers. Logarithmic scale.

Q. What is the effect of this deflating of the value of the dollar?

A. Deflating the value of the dollar is permissible in comparison of volumes where you want to measure the volume of sales of the product, the quantity of the sales of the product and you have only [fol. 1446] the sales in dollars, but this is the first time that I have ever seen it done, that is a commodity under examination reduced on any such basis and it is not necessary statistically speaking that it should be done, if anything is to be deflated the other two items on here could be changed because the price is what is being examined, not necessary to change that, if you want to put the other two items on the same basis you can inflate or deflate the supply and the unfilled orders, when you can inflate or deflate a thousand feet just as well as you can inflate or deflate a dollar.

Q. What does that deflation of the value of a dollar presuppose in such a charge?

A. That presupposes that if the price of the product under consideration increases or decreases in proportion to the general index number, that that commodity is justified in being sold at those prices irrespective of conditions in that particular industry. In other words, tires at the present time, automobile tires and automobiles are selling at much less price both relatively and absolutely than they did in 1913 and 1914 in some cases or at least in 1915 and 1916. Now if they were to combine and increase the price of tires to the price of all commodities index number then the same argument would prove that those prices were not controlled because they were the old commodity or at least that it was justifiable to control them to that extent, it was reasonable to control them to that extent. Deflating value of the dollar of a commodity under examination is a dangerous practice, especially when the chart could have been made by deflating or inflating the other items and main- [fol. 1447] taining the absolute comparison of the price of the product.

Q. State briefly whether you think any argument can be adduced from the similarity of the lines in this chart.

A. Now this says, the relation of prices to demand and supply, and I want to point out again that that of course is only a relation, where there is any relation, is a relation of rapidity of movement and

not a quantitative relation that would have any exact effect on price, however, it is apparent that the lines don't always move in conformity to the relation in any case. For example, usually prices went up when unfilled orders exceeded the stocks, but they didn't always come down in any proportion certainly when stocks exceeded unfilled orders, for example, during the last half of 1918.

Q. I think that covers the charts now. Is there any that I have omitted?

A. I have them listed here, that is all that I have of any importance on these charts and on Messrs. Gordon and Keehn's testimony.

Q. By way of summary of this matter, will you state briefly your ideas as to the factors that should be considered in such an investigation as this and those which have been considered and covered by these charts and other exhibits and your opinion as to the validity of any arguments based on them.

A. The information that has been used in general in these charts to ascertain whether or not there was any control of price have been price relations with other commodities and two of the factors and [fol. 1448] two of component parts of the price of maple flooring, and then also certain supply and demand factors such as building construction, new orders, stocks and supplies on hand and production. No study in this deposition apparently was made as to the production costs and profits of the individual mills, or even an average cost for all mills, although an average for all mills is of little importance; nor has any study been made as to whether or not any price agreements, curtailment of production agreements, division of customers' agreements and so forth have been made, and yet all these things are essential to any study of the causes of the movement of prices. Supply and demand are merely the trail that has been left by these causes and do not explain what the causes were.

Q. With reference to these price charts in general, what do they show and what can they not show?

A. With the exception of 1921, which were a stab in the right direction but were not made on the right basis nor did not include the right figures, the other charts are such charts as are used in general study of business trend over long periods of time, as I said before, to forecast, such as the Harvard Business School and Mr. Babson and others in the country get out, you see the charts in the papers sometimes.

The Court: Let me ask you this question: From your experience in research work is it not true that unless there is an absolute monopoly and thus an absolute control, will not the general trend of prices of any commodity be in accordance with the law of supply and demand—now I mean by that the trend?

A. The trend will be, yes, sir. Do you want me to state the reason?

[fol. 1449] The Court: Yes; I have in mind my own reason.

A. Perhaps it is not necessary.

The Court: I will ask you to state it.

A. The reason as I see it is the impossibility of making a quanti-

tative measurement of the effects of the various causes. In some industries, as sales go up, that is, the demand goes up, the price goes up the price goes down, Henry Ford's automobiles, for example. In others it goes up. You can't measure it by a mere study of the figures on the same proposition, if the price goes up ten dollars the day after a price agreement was made to put it up ten dollars, you can't prove that all the ten dollars was due to the price agreement, because it might have gone up some anyway, it might have gone up all of it anyway, it might have gone up more anyway. You can't tell quantitatively and it is a psychological factor that cannot be measured with mere figures. There is a psychological proposition both on the demand and on the supply of different factors connected. I have somewhat of an answer to that here, do you want me to put it in?

Q. You might just read that into the record.

A. First I will say that it has been taken as granted all through these charts in argument that if you show supply and demand moved in the same direction and at somewhat the same rate of prices, that shows there could be no control. There has been a sufficient attempt to analyze the forces behind supply and demand. Price charts are merely maps to find your way about or to pick out where the roads lead, will show the course, prices and so forth have taken, but they do not show the proportion, the various causes bear to each other, [fol. 1450] or to the prices. The one task is to analyze the various causes for the prices, taking that particular course that they did take, and to ascertain how much effect each cause had on that force, that is the price charts. Now supply demand charts do indicate why prices change at particular times, but they do not show the reason for the extent of the change due to particular factors of supply and demand. In other words, the phrase, "Supply and demand" means nothing until analyzed. It is merely a convenient phrase to describe the algebraic equation of business where in the long run supply X plus price Y always equals demand Z, and makes it so because sales and purchases in the long run must equal. On analyzing supply it is found that it may contain both natural and artificial factors. The more important factors of supply are available, quantities of raw material, prices of raw material purchased, wages, expenses, freight and competition. The more important artificial factors are concerted price agreements, agreements to curtail production, agreements to apportion sales, agreement not to sell to price cutters, agreements to pool profits, and unfair methods of competition of various and numerous kinds. In other words, to restrict or prevent the natural factor of free competition. If any of these artificial factors be present, supply and demand may still function according to the economic theory of cyclic trend, but the supply has first been artific-ally affected, and the result of this artificial factor runs into and becomes mingled with the natural factors of supply and cannot be disentangled or unscrambled any more than a bad egg in an omelet can be separated, especially after the omelet has not only been stirred but has also been cooked.

[fol. 1451] It has been my experience in the Bureau of Corporations and the Federal Trade Commission, that it is impossible as a practical matter to show by statistics alone whether certain price changes have or have not resulted from combinations or price agreements.

The important thing because supply and demand can be affected by artificial forces of course in conspiracy as well as by natural forces in competition and of course in an opposite direction; in regard to using index numbers it cannot be too strongly urged that using these charts to illustrate the effect of supply and demand upon prices. It must be kept constantly in mind that such charts merely show the direction and rate of the change and not the extent or magnitude of the change.

An attempt has been made by means of various charts indicated as exhibits in the testimony of Messrs. Gordon and Keehn to show that other causes than concerted action or control, have been responsible for the extent or magnitude of changes that have occurred in the prices, production and stocks of maple flooring. To do this it would of course be necessary to account for one hundred per cent of all changes in prices, production and stocks as being due to other causes so as to leave nothing for the control cause to effect, but this has not been done, no such exact quantitative effect is shown by any of the charts, only trends and especially cyclical trends are shown which is attempted to disprove control by ignoring it, by the same method it could be shown that costs of production have no effect upon prices of maple flooring. Merely omit costs and state that the other factors show the same trend of movement as the prices show, [fol. 1452] which would probably be true, and it would be proven that cost don't affect prices. The only statistical statement that would be of much value in regard to whether prices of maple flooring are controlled or not, would be a comparison of the actual net profits of each individual member of the Association under consideration and of course even this would not be absolutely conclusive one way or the other, but would be indicative of the probable effectiveness or noneffectiveness of such control. Of course in securing such figures for profits and investments and the costs upon which they are based, it would be necessary to have them audited by independent accountants, otherwise they would be of little value, as the mills keep their books doubtless in different forms and many of them not corresponding to the best accounting practices, it appearing that certain elements which are ordinarily considered profits are included as costs in many cases.

Q. Just one other question——

A. I have just one more paragraph to read and then I am through. I read the one about Jack Dempsey, didn't I?

These charts used in these exhibits do show roughly that stocks and production and unfilled orders at somewhat the same trend of movement, but as so often stated, no exact quantitative relation is shown between them. Supply and demand must be equal of course in the long run, which merely means that if supply is curtailed in

any manner, demand will also be curtailed eventually by reason of increasing prices, or if prices are increased through artificial means, then demand will eventually be curtailed also because of the high prices. Supply and demand could be equal in the long run in an [fol. 1453] industry controlled by an absolute monopoly. It is inconceivable that an absolute monopoly would not vary production from time to time to correspond with prospective demand, especially where there was a wide fluctuation in business conditions as between 1916 and 1920, and that their stocks, production, and shipments would not trend in the same direction as the various elements on these charts trend. This of course is elementary. The important question, to reiterate, is whether prices, production and stocks, or any of them, are controlled by artificial means, and this cannot be proved or disproved by the general trend or movements of index number or percentage charts, or even by quantity charts which do not show the component parts. In connection with the use of the index chart and the logarithmic charts, I might say that in connection with the example I gave before about engineers having used these charts first for exact quantitative relations when economists and statisticians produce unequal masses—no, cut that out. Unequal masses moving at the same speed don't have the same momentum, and these index number charts compare unequal masses by their speed, the trend, and not by their momentum, quantitative relation, by reducing every factor to the same mass index number 100 there is produced the illusion of exact quantitative relation but not the reality. By reducing Jack Dempsey and the fast featherweight champion to the basis of 100 index numbers and counting the rate of the number of blows struck but not the power behind them, it could be proved that the featherweight could whip Dempsey, if you show merely the rate of increase of the number of blows and not the quantitative relation, which would be the speed of the blow multiplied by the weight behind it.

[fol. 1454] In connection with what you have just stated, your Honor, I might add this, that in describing these charts and these trends, and so forth, I have not been criticising their use in connection with this so-called cyclical trend which merely is a guess, and something that is necessary, however, in the business, because it is a little better guess than a guess based on nothing. It has not been perfected up to this time, however, to any considerable extent. What I am basing my remarks on is solely whether these charts and the comment on them, prove that there was not control. I do not argue on the other side that the charts prove there was control, because you cannot prove that by charts, you can't prove it either way. I wanted to bring out the point that I was not criticising the use of these charts for the general move and forecast of business in this cyclical trend. Neither am I proving it. I am just leaving that to one side because I think it has no bearing on the question of control to which I am testifying.

The Court: There is one more question: Is it true or is it not true that price levels may be lifted by artificial control and at the same time the general trend not be affected? Perhaps I don't make my-

self plain. That price levels may be lifted over a considerable period of time by artificial means and at the same time the trend remain the same, the general trend?

A. The rate of trend?

The Court: Yes.

A. Yes, sir; the rate may be due either to the control, partly to control, partly to natural factors, or entirely to control, if that is what you had in mind.

[fol. 1455] The Court: In a number of these charts that have been introduced as Exhibits, the lifting of prices under such circumstances as I have stated, would not appear would it?

A. It would not cause a change in the line necessarily, no, if that is what you mean.

The Court: That is what I mean.

A. It would not cause a bend, that would mean if that control had not come in the line would have bent down or would have bent the other direction.

The Court: No, if control were removed there would be a bend in the line?

A. Yes.

The Court: But if the control is maintained, there wouldn't be any bent in the line, would there?

A. No, it would continue, the law of physics, I believe, is that it would continue in the same direction indefinitely, until operated upon by new forces it would not change the direction.

The Court: That does not quite answer my question because I have not quite made myself plain. If the same force artifically applied——

A. You mean the control is continuous?

The Court: When the control is continuous then the line would bend according to natural laws, would it not, natural economic laws?

A. There would be one constant factor and the movement would then respond entirely to the other changing factors.

The Court: And thus, there would not be any change in the trend line, would there?

[fol. 1456] A. There would not. Also I might state that for the period taken as the base, 1913, if there were control in that period, and it starts on an artificial basis, of course then the line could move in response to the other factors without showing any effect of this control. If the control was about as effective in one period as the other, if one force didn't change, the direction would be changed entirely by the other forces. I don't know whether I get your point exactly on that or not.

The Court: I think you do.

The Witness: But I have been through a good many of these things and have been bumped on the head by a good many of those things cropping up.

The Court: In other words, this would be true, would it not, the price level is raised and the same artificial force is applied continuously, you would expect then that that line of price trend would be influenced by the other causes, natural causes and not——

A. Exactly, and in an exact quantitative relation which, however, could not be proved. You can only show the effect of the total causes in figures. The other must be estimated. However, if the control element were constant, it wouldn't show at all, either in the increases or decreases or the rapidity of the trend of the line. Of course in projecting these lines for the study of business cycles, they assume that the factors remain constant, that is not true, but when they unite many commodities or lack of competition in one overbalance—or balance the combination in the other, speaking of any one commodity, however, of course that is not true. I think I have [fol. 1457] something here on that control.

The Court: I think the question has been answered.

Mr. Johnston: Shall I proceed, your Honor?

The Court: If Mr. Thompson is through.

Mr. Thompson: Yes.

Cross-examination.

By Mr. Johnston:

Q. Just what is your connection with the Federal Trade Commission?

A. My title is special agent.

Q. That work, I assume, involves investigations of various corporations and associations or individuals who are under investigation by the Federal Trade Commission?

A. It covers that, yes.

Q. That is the major portion of your work, is it not?

A. It covers, of course, investigations into published sources, we use the figures of other government departments that are applicable to the case rather than collecting them all independently. Such general figures as are available we use. Then we go and get the figures and the other information which is not available, elsewhere.

Q. In other words, you make, do you, a personal examination of these different corporations or associations that you are inquiring into, examine the witnesses as well examine the documentary evidence?

A. In regard to the investigations, made by the commission there is no examination of witnesses.

Q. I mean your investigation, just what do you do?

A. My work has been of three kinds, you might say, one is the [fol. 1458] study and preparation of statistical data, the other is the preparation and writing of reports, the other is the collection in the offices of associations and companies of various kinds of data.

Q. In other words, you are engaged in just such work as would be involved in an examination of a concern such as the Maple Flooring Association, by your department?

A. Yes, sir.

Q. You have been doing that for about twelve years?

A. Yes.

Q. I suppose when you have an investigation of this kind, you quite normally start off expecting to find some evidence of control of prices?

A. No, I found cases where there was no control.

Q. You are looking for that, of course?

A. We are looking for whether or not there is control, yes.

Q. You are shaping, in other words, your investigation along those lines?

A. Congress calls on us to report to them whether prices of oil, for example, have been increased by reason of combination, and naturally we attempt to answer that resolution.

Q. You attempt to find a combination?

A. We attempt to find whether prices were raised by a combination.

Q. You say that you prepare these price indices, such as the price indices which are used in Mr. Gordon and Mr. Keehn's report?

A. I said nothing of the kind. I might explain there that the [fol. 1459] Federal Trade Commission, the division of labor is carried out to some extent; I do not do the computations.

Q. You have seen them prepared?

A. All I do is to superintend the work and give instructions as to how it is to be done.

Q. Do you personally prepare any of these charts, or logarithmic scales, which are used by your department and the Department of Labor?

A. I may say, the Federal Trade Commission, so far as I know, up to the present, has not used logarithmic charts.

Q. You are aware other departments of the Government have in their statistical work?

A. The Federal Trade Commission may have used them. I say I am not ware of it up to this time. I will say this, that we make logarithmic charts, I have made them myself, in order to study the material; but when it comes to making a report, our reports are not intended for statisical experts, so we usually use tables, and perhaps some small charts.

Q. The Bureau of Labor Statistics have used those charts to a considerable extent?

A. The logarithmic chart is perfectly all right.

Q. Answer my question if you will.

A. All right. They use the logarithmic chart.

Q. You say the comparisons which you make between the prices of commodities, the all commodity index, lumber indices, is just to satisfy the curiosity of people, is that it?

A. I had reference to the fact that our reports are not mere economic trend development reports, but are specific.

Q. Whose curiosity are you attempting to satisfy in the whole report?

A. We are attempting to answer the resolution which Congress has passed.

[fol. 1460] Q. Then do you make these comparisons of price trends in various groups of commodities for Congress' information?

A. I think they have been made and put in reports, but not by me.

Q. Is it your view that these comparisons of price trends which are made to form a part of your reports, mean nothing?

A. If they are in a report in answer to a resolution asking for the causes of the increase of high prices, in a particular commodity, they have little value.

Q. They do show this, do they not, that one group of commodities has not decreased in its prices more rapidly than another group?

A. Yes, it shows—

Q. Or, where there have been advances in the price, I will say, of commodities which in this instance embraced four hundred and four different commodities, that if a single commodity moved along the same general line, it would show that the price of that commodity, so far as its advances and retirements were concerned, moved along the same line of trend, wouldn't it?

A. Yes.

Q. It would not show the quan-tative advance of that commodity, or any other commodity?

A. Nor the causes.

Q. The quan-tative advance would be of no significance?

A. The fact that——

Q. Just answer that; that quan-tative advance would be of no significance in determining anything about the fixation of price, in itself?

A. Yes, it is.

Q. Does the fact that the price of Maple flooring is higher in quantity per thousand feet than the price of a dozen shoes mean [fol. 1461] anything?

A. Not in comparison with shoes, but in comparison with costs.

Q. We are talking now about commodity comparisons; we haven't got to the question of costs. Does the quan-tative comparison of the prices of commodities have any significance? Would that amount to anything?

A. Personally, I like to see both the table showing the quan-tative and the chart showing the percentage, where you must have a percentage.

Q. Of what value is it to compare shoes and Maple flooring so far as the quan-tative advance is concerned?

A. I would not compare shoes and Maple Flooring so far as the quan-tative advance is concerned; I would not compare them in percentage.

Q. You would not compare them in percentages? Would you admit that the evidence shows in the specific instance the commodity which in this instance is Maple flooring, moved in the general line, upward or downward movement of all commodities?

A. It shows that; yes, sir.

Q. Whether that means anything or not, in the ultimate determination of the question of price fixation, it does show that relationship, doesn't it?

A. Perhaps I can shorten this some, if you wish, by making this statement:

Q. No, just answer my question, and do not enter into a speech.

A. I am not criticizing the use of the percentage chart.

Q. I don't care what you criticise; just answer my question, and we will get through.

A. All right.

Q. That is true of chart 6, then, which is the first chart that [fol. 1462] you considered, that that chart shows the movement of the price of Maple flooring in emparison with all commodity movements and is a correct comparison so far as showing the rate of change?

A. I think I claimed it was not correct, due to the fact that the prices were made on a different basis.

Q. You are assuming that the prices are different, upon a different basis. Did you prepare or secure the prices which go to make up the prices of the four hundred and four articles in the commodity index?

A. No.

Q. Those prices were taken from market prices, were they not?

A. I said most of them were.

Q. Those market prices were taken from trade publications showing actual sales,—that is to say, they were the sales during the preceding week of the given commodity on that market, to wit; lumber, isn't that so?

A. They were not average sales.

Q. Do you mean to say trade publications which show the quoted prices being received for various commodities do not represent actual sales?

A. It represents what the reporter considers the market price in many cases.

Q. Are you in a position to say that those trade publications do not publish the record of actual sales?

A. I base my remarks on monthly bulletins of the Bureau of Labor statistics, which has been put in, and the average market which discusses that particular question.

Q. Does it state where these prices are obtained?

A. It states in a certain place that if it could secure the average prices realized, that would be a better figure to use.

[fol. 1463] Q. Yes? But does that publication at the page which you have marked, purport to say that the prices which it has secured from the trade publications are mere guesses, or estimates as to the market, rather than market prices?

A. The comparison I made was this: irrespective of whether the average prices received or the quotations is the base figure to use, a comparison of them will show a lag.

Q. I understand perfectly what you said.

A. All right.

Q. What I am trying to get at is, how you know that the all-commodities index prices are made up of quotations and not of the records from trade publications of actual sales, as, for instance, the prices received by the Maple Flooring Association will be published

in a trade paper. That will not represent what you term a quotation, but it will represent a sale, will it not?

A. I used the expression "most"; I did not say all, because I had in mind that they do use the average net prices for a few commodities where they can get them.

Q. How many of those 404 commodities are represented by prices which are taken from actual quotations of sales, and how many from so-called quotations or offers?

A. The monthly bulletin does not contain that information.

Q. You are guessing at it then, that the proportion of them are taken from quotations, and not from records?

A. I didn't name any proportion.

Q. I understood you name no proportion, but you said that a few of them were taken from actual sales. How do you arrive at the conclusion that only a few of these prices were taken from actual sales?

A. From the description of the process given in the monthly [fol. 1464] bulletin.

Q. That process is described in the monthly bulletin, and is that they have taken these prices from various trade publications?

A. They have secured them not only from the trade publications, but also from the Board of trade, also business institutions, associations.

Q. Board of Trade, as you understand it, publish their actual sales?

A. They do not; they publish quotations.

Q. The grain exchange, for instance, do they not publish a record of actual sales?

A. They publish quotations.

Q. Do you call it a quotation when they record so many thousands of bushels of May wheat sold at so much?

A. They do not so record them.

Q. They do not?

A. They do not. I was down on the Board of Trade—

Q. I have had a good deal of experience with that, and I understand they do publish them?

A. The prices quoted, but not the quantity. I was down on the Board of Trade several months last year.

Q. In other words, what you are doing here, is to say that without any knowledge of the subject, except as you have read it from the bulletin, and except as you have read the general statement from the price bulletin referred to, that the majority of the prices embraced in the all-commodity index are prices which are taken from quotations and not from actual sales, that is my conclusion.

Q. Your guess. With respect to the lumber items, the Bureau of Labor statistics obtained most of their data as to lumber prices, from [fol. 1465] the lumber trade Associations, doesn't it? Isn't that so, that that is the source? In other words, the principal source of their prices for lumber which they use in their lumber price index is obtained from the Associations themselves?

A. Are you speaking about chart 6 now?

Q. Yes, about the item which is taken from the Bureau of Labor statistics, and entitled "Lumber."

A. I have no detailed knowledge as to how it is made up.

Q. Then you don't know whether those lumber prices are prices which represent just exactly the same thing which the product represents, namely, the prices realized for the month or not, do you?

A. No, I don't know what the prices realized represent.

Q. So, for aught you know the comparison between the product and the line representing lumber, which is lumber prices as they are taken from that price bulletin, may be upon exactly the same comparison, and if they are obtained from trade associations, they probably are, because that is the usual way to make them up?

A. If you put the word "if" in, I would answer yes.

Q. You don't know anything to the contrary, do you?

A. No.

Q. When you make an assumption that a converse state of facts exists, you are merely assuming that without any information to base your assumption upon?

A. No, I had such information as is contained in this wholesale price bulletin.

Q. Yes, but if doesn't say anything with respect to lumber there, which indicates that those lumber prices are not obtained from the [fol. 1466] trade associations, showing their average delivered prices during the month, does it?

A. Not that I recollect.

Q. Now, how long have you spent, how much time have you spent in the study of this particular subject of the movement of prices of Maple flooring?

A. Since November 22nd.

Q. November 22nd, 1923?

A. Thirteen days, I think it is.

Q. Have you spent all of your time on this subject since November 22nd, or have you been doing other things?

A. I think I have spent my time pretty much on this one subject.

Q. Have you ever heard of Professor Hettinger, know his work at all?

A. No.

Q. You don't know him as a statistician?

A. No.

Q. Have you ever heard of Professor Homer Vanderblue?

A. No, sir.

Q. Have you ever read any of his books on Economic subjects?

A. No, sir.

Q. Ever hear of his work on railroads—you have had something to do with them? Did you have anything to do with the investigation of railroad costs, or is that with the Interstate Commerce Commission?

A. That is with the Inter-state Commerce Commission; we have nothing to do with that.

[fol. 1467] Q. You have never had any occasion to investigate any of his books on general economics?

A. No.

Q. Or, railroad transportation?

A. No.

Q. Do you know any of the economists connected with the Harvard school of business—school of administration?

A. I know some Harvard economists, whether they are connected with that particular school or not, I could not say.

Q. I gathered from your remarks that you do not think much of the economists connected with that school, so far as their ascertainment of existing facts are concerned? You rather look upon them as prognosticators of future movements?

A. I made a careful distinction there.

Q. In other words, you are rather of the opinion, that the economists connected with Harvard University, particularly with the school of business administration, that their opinions are not worth very much on the question of economics and statistics economics generally?

A. I distinguished very clearly that I made no criticism of their economic studies of price trend. True, I said, I have very little opinion of their ability to investigate and report on an industry to ascertain whether there has been price control or not.

Q. Or to make comparisons between price trends and price movements?

A. I noted in the testimony of Mr. Gordon and Mr. Keehn a very careless discussion of the charts.

[fol. 1468] Q. Did you notice their discussion of the question of the law of supply and demand, or did you read that?

A. I read it.

Q. Did you agree with that, or did you find fault with their statement of the economic principles involved?

A. I found no fault with it.

Q. That is about correct?

A. No, I don't say that. I found no fault with it.

Q. What do you mean when you say you find no fault with it?

A. It does not apply to the subject under discussion?

Q. That is, the question of supply and demand have nothing to do with the question in this case?

A. The mere bald question of supply and demand does not amount to anything unless you analyze the factors of supply and demand; that is what I mean, and the correct factors.

Q. None of these charts which compare price indices are charts which tend to show differences in fixed relationships are they, or volume?

A. The ones in dollars it is easy to ascertain approximately.

Q. They are used for that purpose?

A. There is at least one arithmetic chart.

Q. I am not talking about the arithmetic chart; I am talking about the logarithmic?

A. Logarithmic charts are intended to show rapidity of movement.

Q. And similarity of movement?

A. If it is similar.

Q. By similarity of movement is meant, so far as these charts are concerned, the slant of the line, does it not?

[fol. 1469] A. Yes.

Q. The heighth of the line or the length to which the line goes down has nothing to do with the question of the movement,—that is, of similarity of the movement?

A. Of course, if it goes up high, while the other does not, it makes a difference. If the slant is the same, then it makes no difference.

Q. Where you are comparing things that may have an entirely different price level, the fact that one of these lines moves upon a higher range than the other, has no significance in a logarithmic chart, does it?

A. Except it shows that since the starting point, if they started together, it has risen at a more rapid rate.

Q. That is principally due to a greater percentage of rise, although it may not be more rapid at any given point?

A. Oh, at any given point?

Q. At some point in the comparison of those two price movements, one line has moved more rapidly, that is, its upward or downward movement has been more rapid than the other?

A. Yes, unless they are parallel all the time.

Q. Would you expect to find in the comparison—when any such comparisons are made as made in these logarithmic charts, would there be an absolute movement of the lines directly parallel?

A. If all the causes were the same, they would move parallel.

Q. Have you ever found a situation where that exists?

A. No, because I have never found all the causes the same.

Q. In other words, the coordination which is shown upon these charts, is for the most part a very close coordination, is it not?

[fol. 1470] A. It is not. In many cases there is a very remarkable difference which has been slurred over on this chart 6, where there are five lines; there is a possibility of hundreds of variations. You can compare each month with each succeeding month and each line with the other.

Q. Take these months, if you take the months upon that chart and the years?

A. Of course, the movement with the month is very infinitesimal; it does not show on here.

Q. Nothing in it when you cover a ten year period?

A. It is a month chart, so it wouldn't show.

Q. Each month has been platted upon that chart when the chart is drawn, isn't that so?

A. Yes.

Q. That is the way it is drawn?

A. Yes, sir.

Q. In other words, there are twelve lines between each major

line, and upon each line is indicated by means of a dot, the months' movement, is it not?

A. Yes.

Q. Or haven't you read the testimony?

A. Yes.

Q. That is the way they prepare them?

A. That is the way it is said to have been prepared?

Q. Can you see anything about these charts to indicate they were not so prepared?

A. No, I think they look all right from that point of view.

Q. You haven't found that the figures indicated on these tables are not correctly platted upon these tables?

A. I haven't had occasion to make that comparison except in one case.

[fol. 1471] Q. Have you found they were not correctly platted?

A. I found on chart 29 there seemed to be one line not platted according to the facts.

Q. Have you checked up any of the others?

A. No, I—had no time to do that.

Q. Have you any reason to believe the figures are not platted on there according to the facts?

A. No, I must accept those without comparison, because I haven't the time.

Q. Now, taking chart number six, what is meant by coordination in the movement of lines, showing price trend, or any other trend movement, is that the lines move in the same general direction at about the same time, is that not true?

A. I think that time is considered important in that respect.

Q. In other words, one of the important things to consider, is whether or not at about the same time the lines all tend upwards, or at about the same time the lines all tend upward?

A. Did you say whether that is important?

Q. Yes.

A. All depends upon the purpose for which you are to use the chart.

Q. If the purpose is to show whether or not price movements were of a similar nature, so far as trend was concerned, and that is what we are interested in here, now do you mean to say, without looking at that chart, you would not say that there was a general movement during those periods of time of all those lines in the same general direction, and at about the same time?

A. If you look at the chart, covering over 120 months, at a glance [fol. 1472] you see the lines go up and down and swing around over each other in the same general line.

Q. You understand that this is an attempt to show the minute fluctuations between the prices of these commodities during a given month? You could not do that with a chart of this kind, could you?

A. That would not be possible to do except on a very much more detailed chart. Even if you did it would not make any difference in the trend.

Q. Now, when you came to this chart 12, which has to do with the

comparison of new orders booked, by members of the Association to the volume of new building contracts awarded, you made some criticism of the use, I believe, of new orders booked as data for the preparation of such an index, did you not? Do you know of any other data that is available over a period of from 1913 to 1923?

A. For what purpose?

Q. For the purpose of showing the volume of building construction. Is there any other data than the data that was used in this case, of new orders booked, I mean, statistical data?

A. I know of none.

Q. In other words, these gentlemen have used for the purpose of making this comparison the only statistical data that is available, is that not so?

A. On this particular chart.

Q. I mean, to represent the volume of building construction?

A. All right.

Q. They have. Now, you agree, I believe, that the volume of new building construction has something to do with the demand, or lack of demand for Maple flooring?

A. Yes.

[fol. 1473] Q. You know the uses to which Maple flooring is put, do you?

A. Some of them.

Q. You know that Maple flooring is used almost exclusively in buildings, either factory, commercial or residence—that is, that is its exclusive use? It has no use in manufacture or in the making of any other products, but is confined solely to use in floors in buildings, commercial, factory or residence. Now that being so, would you expect to find the demand for that product quite closely connected with the volume or extent of building construction?

A. Why, I would expect it to follow generally that direction, of course, but not exactly.

Q. Not exactly?

A. No.

Q. Looking at chart 12, is not that movement as portrayed upon that chart of comparison of volumes—the indices of volume just about the sort of a movement that you would expect to find when you are comparing new business with the volume of building construction, by "new business" I mean in this product?

A. It seems to be the exact response, yes, that is what would happen.

Q. Now, we come over to the chart 19 and 21, which will be a comparison of the prices of the product with the rough lumber. Now, I believe you said that you thought such comparison was of con-
[fol. 1474] siderable significance, that is, the comparison of a product with its factors of production?

A. Yes.

Q. Of course, if you had been making this comparison, you would have compared the profit, if you had it, wouldn't you?

A. Yes.

Q. Of course it is very evident Mr. Keehn and Mr. Gordon did not have the profits, and that they were not available and are not

available except in a very limited degree. Do you find that individuals and firms very gladly give up their information as to profits to you?

A. They never refused me yet.

Q. Never refused you?

A. Just have to request them and they hand them in. That has been my experience. There have been some other experiences that I could not speak for.

Q. You don't take their statements, of course, when they hand them in. You send an order out from your department to go to each factory and check up and see whether they keep the books the way your department thinks they ought to keep their books in order to correctly show their profits, is that correct?

A. Yes.

Q. Then you make up a new profit and loss statement for them after you audit their books and have corrected their method of keeping their accounts?

A. If it is found necessary their method of keeping the books is revised.

Q. Then when you have gone into that phase of the matter, you tabulate those profits, but you don't even believe that you can average [fol. 1475] them up and get anything?

A. Oh, we average them sometimes.

Q. The average don't express anything, as I understood you, of any importance?

A. It doesn't express as much as the individual figures. The reason for not publishing individual figures is the same as for not putting them in court. We do not want, if we can help it, to reveal individual transactions of particular companies. We have, however, used them with numbers where it would not reveal them, or we have grouped them.

Q. Just how do profits show anything more with reference to the fixation of prices than a comparison between the movement of the price of the raw materials, where there is only rough lumber, in this case, which is the only raw material, and the price of the product?

A. Because there is an exact quan-tative relation between profits and capital invested which can be measured down to the one millionths of one per cent, if you want to do it.

Q. Aren't there a great many other factors besides the price of the product that enter into the question of whether or not at the end of the year, the manufacturer has or has not a net profit?

A. A great many factors?

Q. Yes, a great many factors.

A. Yes.

Q. In other words, two manufacturers side by side in the same city, having approximately the same invested capital, and getting for their product identically the same amount of money, one may show a profit and one may show a loss. You find that situation very frequently, don't you?

[fol. 1476] A. Well, yes.

Q. Due to management, due to many of the other incidents of the operation of the business, the managerial end of it plays a large factor in the question of profits or lack of profits, does it not? Now, suppose you have that situation and you find "A", manufacturer made 10% and "B" manufacturer in the same situation lost 10%, would the fact of the profit by "A" and the loss by "B" show anything to you, as to whether or not "A" and "B" were selling at a fixed price or one which was not in response to the law of supply and demand?

A. I have answered before that I would not deduce such a conclusion from mere figures.

Q. That is what I want to know. Then the profits would not show anything to you under those circumstances?

A. Oh, yes, they might show a great deal.

Q. I mean they would not show anything to you as to whether or not "A" and "B" were selling their product at a fixed price, or at what the market dictated?

A. If I had the profit alone for one year, no.

Q. Now, if you found "A" and "B" and "C" and "D" all manufacturers of the same product, all selling their product at identically the same price, that would mean something to you, wouldn't it? I mean, over a period of time, let us take a year?

A. It might mean something, but what do you mean—specify.

Q. I mean it would indicate and be a strong indication to you of a fixation of that price?

A. No, in some of the most competitive conditions is where there is the least fluctuation in price.

Q. I am talking about no fluctuation in price, a uniform price, doesn't that indicate anything to you at all, as to whether or not [fol. 1477] that price is regulated by agreement, or conspiracy, to use your language, or whether it is regulated by supply and demand.

A. I might think it was peculiar and I would look into the matter.

Q. I am not asking you what you would do; I ask you what effect it would have upon you?

A. It would have the affect to make me look further. I wouldn't come to any conclusion on inconclusive data.

Q. Wouldn't that be of much more significance to you in forming your judgment as to whether or not during a given period of time, one year or two years or any other period that you might take, the prices of those products by different manufacturers, had been the same; wouldn't that be a greater factor in determining in your mind that the price had been regulated or controlled by artificial means than any other factor?

A. If they had been the same over a considerable period of time, it would be a suspicious circumstance.

Q. A very strong factor in determining your judgment, is not that true?

A. Sure.

Q. And would cause a presumption in your mind which you would have to have rebutted by sufficient evidence that there had been no fixation?

A. No, we make no conclusions until the report is finished and

all the evidence is in, and then our conclusions are from all the testimony. I never have come to conclusions on these little isolated facts.

Q. You never start out in any of these cases with any preconceived ideas of what you are going to find?

[fol. 1478] A. No, I am greatly surprised sometimes at what I find one way or the other.

The Court: You would make an ideal judge.

A. Well, you understand I am assigned to this merely as a matter of course. It doesn't make much difference whether I am assigned to one or another.

Q. Quite an anomaly in my experience in the investigating department. I see that you refer here to the report of the Federal Trade Commission upon lumber and trade associations, I assume for the purpose of indicating that the prices of lumber as contained in the Bureau of Labor Statistics, represents the prices of an industry where there are a great many associations, and you named quite a number of them.

A. I named the ones it has covered there.

Q. All those associations you named, are still operating, aren't they?

A. That I couldn't tell you.

Q. So far as you know those associations are still all functioning in all these various lumber industries?

A. So far as I know they are.

Q. Whatever the recommendations were of your Bureau,—and I don't know because there are 150 pages, I suppose I would have to read all of that to find out, wouldn't I—these seven or eight or nine associations that are referred to in the title page of the investigation are still functioning as associations?

A. I don't know that they are not.

Q. Now, if you desire to compare the two charts 19 and 21, one which compares the price of the product with the rough lumber, the cost of the rough lumber, and one which compares the price of [fol. 1479] the product with the other marketing and manufacturing costs, that can be done by placing the two charts together?

A. No, because they are on percentage basis and start out one hundred, whereas they should be component part charts, they should show the parts. The Barr chart is what you want.

Q. You are talking about a chart which shows quantities for the purpose of showing what the difference is between the price of the product and the costs of manufacture in order to see what the margin is which represents profit, that is what you are talking about, isn't it?

A. Yes.

Q. These charts are not designed for the purpose of determining what the margin of profit is.

A. I understood they were designed to show that the price of Maple flooring was not controlled.

Q. Precisely, but they are not designed to show whether the margin of profit at sometimes existed and at other times did not exist?

A. They don't show any such thing.

Q. They are not intended to show that, are they?

A. No.

Q. That could only be shown by a quantitive chart which would show as to each manufacturer his cost of manufacture, including his cost of rough lumber, the price he received at a given time and the margin between those two?

A. It could be shown that way, or as the average.

Q. Or as the average of all compared with the average of all prices, and what would be left would be his profit over a given time, or over a period of months?

A. Yes.

[foy. 1480] Q. This chart 19, however, does show a very close co-relation between the amount of the price of the rough material and the price of the product, and that is what you would expect to find, isn't it?

A. If you mean by close co-relation——

Q. I mean that when the price of the product, when the price of the rough material went up, moved upwards, showing an advance to a higher percentage of price, that the price of the product moved upward?

A. That is generally true, the trend.

Q. The trend?

A. The direction.

Q. Now, you have criticized the chart upon which Mr. Gordon and Mr. Keehn have made an allowance for the purchasing price of the dollar, or the purchasing level of the dollar. It is true, isn't it, that a dollar today does not purchase what it purchased in 1913? That is recognized by everyone?

A. Yes.

Q. You don't have to be an economist to know that?

A. No.

Q. It is for the purpose of correcting these figures to represent that difference that this so-called correction for the purchasing power of the dollar or level, is made?

A. That is so stated.

Q. Now, there is, however, just preceding this chart another chart on which the same identical figures are platted?

A. What number is that?

Q. The chart which you were talking about is 24, but will you look at 23; there is the same chart without the correction for the purchasing power of the dollar, or the level of the purchasing power of the dollar, and I will ask you if you do not get exactly the same [fol. 1481] idea and the same co-relation from reading chart 23 that you do from reading chart 24?

A. Yes, you do for this reason: Chart 23 runs from one to five hundred for the space, and chart 24 runs from 1 to 300.

Q. That is the effect, in other words, of the correction?

A. Yes, as far as the space is concerned, you get the same effect.

Q. I am talking about the movement of the line, which is the

only thing we are interested in; we are not interested in anything else.

A. You mean the time they change?

Q. Yes.

A. Not the direction.

Q. Yes.

A. Do you mean the rapidity of movement?

Q. Yes.

A. They don't show the same rapidity.

Q. Where is there a substantial difference in the movement of the lines on those two charts?

A. No, that is right; they are substantially similar.

Q. So, you can disregard all this talk about the purchasing power of the dollar—I mean the correction for the purchasing power, and I mean you can disregard this statistical correction for the purchasing power of the dollar, and you can get the same result by reading chart 23 that you can by reading 24?

A. If you don't compare them with the other lines, the height or anything like that.

Q. We are talking about the movement?

A. The rapidity of trend?

Q. Yes, both rapidity and time?

A. Yes, I mean the exact time the change in direction occurred.

Q. You testified in looking at these exhibits 15 and 16, that exhibit 16 did not mean anything where you took a comparison of prices of the product, the index of the product price over a period [fol. 1482] of ten years; that the comparison of the index price of a large number of other commodities showed that the index price of the product was lower for the average of ten years than those other prices; that doesn't mean anything as you look at it?

A. As far as determining whether there is a fixed price or not—as far as determining whether there is control or not, it does not amount to anything.

Q. The same is true of 15?

A. Yes, sir.

Q. In other words, if one does not mean anything, the other does not?

A. Yes, sir.

Q. Isn't that exactly what Mr. Gordon and Mr. Keehn testified, that in their opinion it had no significance?

A. They did state it had no significance, but they were put in and so I commented on them.

Q. In other words, the price level of a given commodity as compared with the level of other commodities.—by that I mean the quantative difference between two commodities, where one is not the product of the other, can have no significance in determining the fixation of price, the quantative difference?

A. To me a chart of that description merely means where price changes occur in what direction they go, and we know where to look then to find out what made them.

Q. Yes, but where price changes occur and where they go is shown definitely by comparison of the index prices showing the trend?

A. Yes.

Q. Now you made some criticism of table eighteen because the comparison there, tables seventeen and eighteen, because the comparison was started at 1918. Mr. Gordon and Mr. Keehn explained, [fol. 1483] did they not, in their depositions, that it was impossible to start that comparison at an earlier date because the data was not available?

A. Which chart are you talking about?

Q. Seventeen and eighteen.

A. I made no criticism as to when they started out, no.

Q. You suggested that these charts differed from the others in that they did not start back to 1913?

A. Oh, no, what I said was they did not start at the same point in 1918. I might have said "1913" thinking that was the first year on this chart. If I did it was an inadvertance.

Q. That was because, as they explained in their depositions, the data was not available at the earlier period?

A. I am sure I did not make any criticism of the time.

Q. Of course you have got to have adequate data for two indices that you are going to compare, otherwise the comparison means nothing; you agree to that?

A. Yes.

Q. Now you indicated that taking chart 24 it did not show what Mr. Keehn and Mr. Gordon testified it showed, because during 1918, the latter half of 1918, the line indicating the price of the product levelled out instead of dropping, as it naturally had expected to do in response to a falling demand and increasing stocks. Do you recalled the explanation of that made in the testimony of Mr. Gordon and Mr. Keehn?

A. Oh, yes. Another reason is assigned, but that reason is not shown on the chart.

Q. Isn't it a fact that during the period in question there was a restriction upon building construction which practically eliminated during that period any substantial demand?

A. Are you speaking of 1918, 1919 or 1917?

Q. The latter part of 1918, yes, which eliminated practically all [fol. 1484] demand for a product such as Maple flooring. Are you familiar with that restriction?

A. Generally familiar with it, not the exact time it started.

Q. As an economist and statistician, what would you say the effect of such building restrictions would have upon the demand?

A. Decrease it.

Q. Decrease the demand. Now has it ever come to your notice as being a normal movement in business that where demand is very light, and there is practically, therefore, no movement of a given product, that there is no incentive to the manufacturer, particularly where that demand or lack of demand is caused by an artificial restriction such as a limitation upon building, which cannot be stimu-

lated, in other words, by new offerings at lower prices—is there or is there not a tendency for the price to level out and not to drop?

A. I recall no particular circumstances fitting all those descriptions.

Q. In other words, what causes ordinarily the manufacturer of a product, which is competitive, to lower his prices?

A. He needs the money.

Q. He wants to get the business, isn't that it?

A. There are a thousand reasons for lowering the prices.

Q. But the ordinary reason, I mean the reason which usually actuates a man in business, not special circumstances, such as financial distress or something, but we are assuming a normal business condition so far as the individual is concerned. He ordinarily lowers his price for the purpose of getting business, doesn't he, stimulating demand?

A. Are you speaking now of competition among a group of people, or are you speaking of them as one group?

Q. I am speaking about the ordinary situation.

A. I would say that as far as any one particular man is concerned, if there is more demand than the mills can supply, if he cuts the price he will get the demand. As a group it would be of no advantage to cut price, but to the individual it would.

[fol. 1485] Q. I am talking about the individual. If by cutting his price he sees he cannot stimulate the demand, his tendency is not to cut his price, is it?

A. He would take business away from the other mills if they did not cut their price.

Q. But if there is practically no business to be had by reason of artificial restriction?

A. Do you assume there was no business? Unfilled orders show quite a bit of business.

Q. I am assuming what is testified as being the fact, forty per cent against 100 per cent, when there was artificial restriction upon building, that the demand was at a low ebb and so shown upon the chart?

A. Yes.

Q. That coupled with the fact of this restriction, if in existence, would or would that not have the tendency to cause a man not to lower his prices in order to sell his product unless he was in need of money or for other special circumstances had to sell?

A. I really can't see any difference whether the supply was forty per cent or fifty per cent, as to whether he should lower his price, if he wants to sell his stock.

Q. In other words, you think it would make no difference in that situation that there was the artificial restriction upon building which cut off the major portion of the demand?

A. Why, I would expect the prices to fall under those conditions, certainly, not to keep a straight line.

Q. Have you prepared any charts to show how this product was affected, maple flooring, by the various elements which you feel enter into and are controlled in the determination of the fixation of the free movement of the price?

[fol. 1486] A. No.

Q. Or any tables?

A. No.

Q. In other words, as I sum up your testimony, it is practically to this effect: that the only way that you can determine whether or not prices have been fixed is to find out who fixed them and when they fixed and how they fixed them, is that it?

A. That is right.

Q. You have got to find the existence of that fixation agreement, either express or implied?

A. Well, I wouldn't like to go into the legal proof required, of course.

Q. I am getting at your ideas as an economist, as to how you would ascertain these things?

A. Yes, sir.

Q. That is your judgment?

A. Yes, sir.

Q. And that all of these other comparisons may be disregarded?

A. Now there is a peculiar twist in this, if I may state it.

Q. No, just answer that if you will.

A. State it again.

Q. All these other comparisons may be disregarded, so far as you are concerned, in ascertaining——

A. What comparisons do you refer to?

Q. I refer to the comparisons of the prices of the product with other prices, with different factors of production, with different costs of production, with production itself, with competing products?

A. No, I would not disregard them. As I stated before, I would investigate those, investigate the whole field, and at the end I would try to find out what had happened. I would not be a slave for these charts. These charts would merely be an indication.

[fol. 1487] Q. Sort of guide?

A. That is it, as to what to do—not what conclusion to come to.

Q. You wouldn't attach any conclusions to them?

A. I would not with these charts merely, no.

Q. Would you to any chart—that is, you are sort of against this sort of method of charting, and method of determining whether there has been an artificial price or not?

A. I think it has been greatly misused. I think it is permissible if correctly used, yes, and compares the correct elements in the correct way.

Q. Now, in answer to his Honor's question, you said that if there was an element of fixation which brought the price of a given product which was the subject of that fixation agreement or understanding to a higher level, that thereafter, other conditions being the same, you might expect that price to fluctuate in response to supply and demand, but upon this so-called higher level, as I understood it?

A. Well, I don't think that correctly represents what was said.

Q. That would assume, would it not, that there was a constant level of price which was above at all times what the price would be if it were controlled solely by the law of supply and demand?

A. His Honor asked that if it were constant. I answered that question.

Q. That is what I am getting at, your answer to that question of that constant advance or increase or increment above the level at which supply and demand would have otherwise fixed it. Now has such a situation come to your knowledge in the investigation of any of these industries, where any price at any time over a period of ten years was maintained at a constant level above supply and [fol. 1488] demand or the price which would be fixed by supply and demand?

A. I think I told you I never had been able to measure the exact part of the price due to different causes, and it would be impossible as a matter of fact.

Q. So that there was no such measure of constant advance, because it is impossible to measure in dollars and cents just the price which would be fixed by the law of supply and demand, is it not? I mean, looking back over the history of an industry you were not able to say at what price the product would have sold had it responded to the law of supply and demand?

A. Not in dollars and cents; we know whether it was higher or lower.

Q. Its relative position, but not its position in dollars and cents.

A. Oh, yes, measured in advance, whether you call it dollars and cents; I wouldn't name the exact——

Q. I mean, you couldn't look back over the prices charged in any given industry and say the price of fifty dollars per thousand contained in it, and all subsequent prices contained in it an element of ten dollars which was an artificial increment or advance in price, and that if the law of supply and demand had operated that price would have been forty dollars.

A. I will say we have never been able to do that.

Mr. Johnston: That is all.

Mr. Thompson: That is all.

Mr. Thompson: I thought these books had been marked but I see they were not.

Mr. Johnston: I took them away. Are you putting the whole books in evidence?

[fol. 1489] Mr. Thompson: No, certain pages; they have been given to the stenographer.

Mr. Johnston: You have the pages on there?

Mr. Thompson: It is marked in the back.

Mr. Johnston: Referring to the Barr chart may it be agreed without the necessity of putting anybody on the stand that number three and five are copies of Mitchell and Mitchell Brothers, who are the same concern, that is, owned by the same people and operated practically as one concern, the same sales manager.

Mr. Thompson: Yes. I offer in evidence next and ask to have marked as an exhibit, specimens of exchange of quotations reports of the Maple Flooring Manufacturers Association.

Mr. Johnston: Over what period?

Mr. Thompson: The first dated, September 16, 1914, and the last one May 17, 1916.

(Papers referred to were marked Government Exhibit 73 and received in evidence.)

Mr. Thompson: Also circular letter to members from the Secretary, dated July 13th, 1916, with reference to I. C. C., docket number 8131, and attached to that "Statement of the position of the Maple Flooring Manufacturers Association" in that matter pending before the Commission.

Also attached to it, transcripts of evidence given before the Interstate Commerce Commission in Re-I. C. C. number 8131, the evidence being that of Charles R. Abbott, and George Strable.

Mr. Darby: I think that was offered before and we objected to it. The statement made by Mr. Abbott would not be binding upon this Association, and is incompetent.

Mr. Thompson: I am offering these as having been circularized by the Association among the members.

Mr. Fowler: It is stated in the communication that it is from [fol. 1490] the secretary of the Association.

Mr. Thompson: It is sent out as a circular letter of the secretary.

Mr. Darby: It is wholly irrelevant and immaterial. If the secretary of the Association transmitted some portions of the testimony of someone to different members of the Association it would not be binding upon the Association or make it competent testimony or relevant here.

Mr. Fowler: I think that matter was presented before.

The Court: It may be received subject to the objection.

Mr. Darby: It says, "Enclosed please find copies of testimony of Mr. Abbott and Mr. Strable before the Interstate Commerce Commission at the hearing now in progress in Chicago regarding reclassification of lumber and lumber products," and was not adopted.

The Court: I understand. It will be received subject to the objection.

(Papers referred to were marked Government Exhibit 74 and received in evidence.)

Mr. Thompson: I offer a number of documents sent out from the office of the Association, documents and letters of various dates.

Mr. Darby: Are any documents in evidence merely because they were sent out by the secretary of the Association regardless of what they may be?

The Court: I don't know the materiality of these particular ones, of course, but it is true that the activities of this Association as represented by the distribution of literature and other matters may be important and may be material. Of course I know nothing about the substance of those.

Mr. Darby: These documents which range from 1916 to 1921 will be subject to the objection made in the earlier stages of the case.

[fols. 1491-1496] The Court: Certainly.

(Papers referred to were marked Government Exhibit 75 and received in evidence.)

Mr. Thompson: And a financial statement of the Association dated July 15, 1922.

(Paper referred to marked Government Exhibit 76 and received in evidence. Other letters were marked Gov. Ex. 76A, and were received in evidence.)

Mr. Thompson: The next exhibit is correspondence between the secretary of the Association and various members, and dates between September 1st, 1916 and July 16th, 1923.

Mr. Johnston: We object to that on the ground that it represents prior transactions between members of the Association and not in relation to the Association or its functions, and it is therefore incompetent, irrelevant and immaterial.

The Court: It will be received subject to the objection. The same ruling has been made before.

(Letters referred to were marked Government Exhibit 77 and received in evidence.)

Mr. Thompson: The next will be some correspondence between various members of the Association.

Mr. Johnston: That will be subject to the same objection that we have made before.

The Court: Very well.

(Letters referred to marked Government Exhibit 78 and received in evidence.)

[fol. 1497] "Mr. Thompson: I, by error yesterday included in the exhibits one statement which I had previously told counsel we would not include. It has matters in it that have no bearing in the case, which they did not want to have in the record. I will withdraw Ex. No. 76 and there are a couple of other-, one annual Secretary's report and one letter which had not been introduced previously. I will ask that they be marked Ex. 76 so as to keep the sequence.

Mr. Johnston: The letter will be subject to the same objection, that is, as passing between individuals.

(Papers referred to marked Ex. 76 and 76-A.")

Horace A. Lewis, being duly sworn testified on direct examination as follows:

Direct examination by Mr. Thompson:

I am a special agent of the Bureau of Investigation of the United States Department of Justice and have been since April, 1918. I have been connected with an investigation by the Department of the Maple Flooring Manufacturers Association and have been doing work recently in the preparation of data for presentation here. Here are tabulations that have been made from the weekly sales reports of the

Association which are entitled Completed Transactions, Record of Completed Transactions, from which I have taken off the date, the name of the mill, the quantity of the lumber shipped, the delivered price, the average freight rate from which I have figured the actual freight allowance showing the net price of flooring f. o. b. cars at mill. The tabulations also show the commission and the deduction [fol. 1498] of the commission or the net price of flooring at the cars, for 13/16th by 2¼ inch in the three grades, clear, number one and factory, standard lengths. In making the tabulations we have used all reports that were in our possession for 1920 with a few scattering dates at the latter end of the year; practically a complete set of 1921 reports, with possibly six or seven omissions and practically the entire year of 1922 and the first six months of 1923. For 1920 I tabulated the weeks ending February 28, March 13, April 17, August 7, August 28, September 25 and December 25. For 1921 there were omissions of May 15, October 15, December 24 and December 31. For 1922 there was missing the report of January the 7th. There was a complete set of reports for the first six months of 1923, namely, until and including the week*ing* ending June 30, 1923. In making these tabulations I made the freight deductions by taking the freight rate through, decoded by their freight rate code and checked up by a multiple of two thousand pounds to the thousand feet and thus arrived at the actual freight allowance. This method reduces the prices not to a strictly f. o. b. mill basis for the individual lumber but f. o. b. actual basis using the rates given in the Association rate book. For the year 1922 and one or two dates in 1921 and a few of the earlier dates in 1923 such records as were in possession of the Government prior to the Grand Rapids proceedings here were figured in the three grades, factory, number one and clear, and such records as have come into the possession of the Government since this trial we figured in the clear grade only because of lack of time. On all the records I have mentioned, we have made a reception tabulation [fol. 1499] on the grade of clear 13/16th by 2¼ showing the number of sales at each given price, the total number of feet above the base price as advertised by the Association to its members with amount at the base price or average cost and the total amount of feet above the average cost, above and below and at the cost. The base price—possibly I have used the wrong word—we have figured the price as that which has been at intervals through bulletin letters and notification of the Association forwarded to members as the average cost of certain quarters, having an average cost for the first quarter, second quarter, third quarter, fourth quarter and so on. I did not make all these tabulations myself, they were all made either by me or under my supervision. I have checked them over and am satisfied that they are as reasonably correct and as correct as it was possible to get them. You told me that I had made one error this morning. In addition to that, there is confusion between the price on some sales reports as a mill sale and some as an A. I had figured rate A or rather had interpreted rate A as one dollar actual freight rate for the reason that there was no interpretation in their code books of A; F decoded as being a dollar and a quarter actual freight, I rather

guessed at the A as one dollar. I have since found out that A means f. o. b. mill or Cadillac base and there are a very few cases, I should say not more than a dozen, where I have deducted a dollar where I shoud not have done so.

Mr. Thompson: We offer these in evidence.

Mr. Johnston: We object to them on the ground of their competency, materiality and relevancy, further upon the ground that they are not shown to be correct tabulations of the documents them-[fol. 1500] selves which are in evidence and which speak for themselves but are the computations of this witness after making what he conceived to be an allowance or proper allowance for the actual freight and not the actual freight as it was shown by any records.

The Court: As I understood the situation they will be received subject to the objection.

(Marked Gov. Ex. 79.)

Cross-examination.

By Mr. Johnston:

"Q. As I understand you, you have taken the weekly sales reports and do those weekly sales reports show the quantity sold by each member separately?

A. They show the individual sale.

Q. There were at times during the period that you made this investigation there was nothing to indicate the individual sales, was there, that is, the individual who made the sales?

A. Yes, there was, I think there were a few copies where they were made by maps, at such times I have grouped them as groups.

Q. The attaching of the index numbers did not occur during all of that period?

A. With very few exceptions.

The Court: Is that true, Mr. Johnston?

Mr. Johnston: Yes, your Honor.

The Court: I understood that the index numbers were attached up to July this year.

Mr. Johnston: No, not continuously, the index numbers were not put on until some time in 1921.

Mr. Keehn: They were omitted I think in January, February, [fol. 1501] and March, 1921 or '2, I forget which.

Mr. Johnston: There was a hiatus there?

A. I can give you the actual number if you care to that were not tabulated by the individual number."

All the weekly reports from which these tabulations were made are in evidence so that my tabulations can be checked as to accuracy.

"Q. We will take the first one that appears here, you have said dated March 23, quantity one thousand, delivered price $170, that is, you got that item of $170 from the weekly sales report?

A. Yes, sir.

Q. Then you say Average Freight Rate 31 cents?
A. Yes, sir.
Q. That is the Cadillac rate?
A. It was the rate that was published on the weekly report.
Q. Freight allowance $6.25?
A. Yes.
Q. That is figuring at the Cadillac rate?
A. Yes, sir.
Q. Have you heard the testimony here during the course of this examination?
A. No, sir.
Q. Did you know, as a matter of fact, that every member of this Association when he sells his product f. o. b. point of destination as most shipments are made in that way, receives from the customer only the amount of the price less the actual freight from point of shipment less the commissions, if any there be?
A. Yes, sir.
[fol. 1502] Q. So that the actual amount under those circumstances which the shipper would receive would be somewhat different from the amount which you have here, would it not?
A. You mean there would be a difference between what the shipper would receive or what the buyer would actually pay on that Michigan base, Cadillac base?
Q. I mean there would be a difference between the amount which the shipper, the owner of the flooring, would receive and the amount which you have here as his theoretical net receipt which as I understand with that rate as I figured it out there is practically f. o. b. Cadillac. Many times the rate of the actual shipment differs from the Cadillac rate.
A. I understand that.
Q. You have taken no account of that?
A. Not at all. I have given you f. o. b. Cadillac base price.
Q. Or of the price that the shipper under no circumstances would receive substantially less represented by the difference between the actual base rate and the actual freight rate?
A. Those figures refer to f. o. b. Cadillac base.
Q. Only to Cadillac base?
A. Yes, sir.
Q. In that respect they don't represent then what the shipper actually received unless the actual freight happened to be the Cadillac price?
A. That of course I have no knowledge of, I am simply going into freight rate books here and giving you f. o. b. Cadillac, Michigan price.
[fol. 1503] Q. That would be true if there is a variation in freight rate?
A. I should say that would be true.
Q. The commission that you have taken off is the commission that is shown upon the sale?
A. It is.

Q. That is the only basis you have of knowing whether commission was allowed or not?

A. Yes, sir.

Q. So under the last column you have put the heading, net f. o. b. cars at mill, that means the net price after deducting the so-called Cadillac base rate plus the commission?

A. Absolutely.

Q. And not the net price after deducting the actual freight plus the commission?

A. Cadillac base less the commission.

Q. Is the so-called summary which you have made, is that what appears at the bottom of each one of these sheets or is that on a separate sheet?

A. The recaption sheet shows on the top of each date.

The Court: When you say recaption, do you mean recapitulation?

A. Yes.

Q. I show you one of these sheets, to be sure we are talking about the same thing. That is one of the recaption sheets, is it?

A. Yes.

Q. For how many sales did you make these recaption sheets?

A. They were made—I can give you those that are eliminated or I can tell you in an abstract way.

Q. For what portion of the period that you have covered by your compilations taken from the sales report did you make these recaption sheets, the same period?

[fol. 1504] A. There were a few of the periods in the early part of 1921 where the figures were so few it didn't seem necessary to make the recaption sheet, that they were not made, but from June, 1921 to date they are complete and there are a few prior to that date, perhaps a half dozen all told.

Q. You say you have taken of course the clear?

A. The clear in all cases, factory and number one in others.

Q. I suppose you took that because you discovered that the variation in clear was not so good as the variation in number one and factory?

A. No, sir, that was not the reason.

Q. Did you just happen to take clear, was that just an accident?

A. No, that wasn't the reason, I took clear because I believed it to show greater percentage than the other two grades of maple and shows 13/16ths by 2¼ because I believed that to show the major part of the flooring manufacture.

Q. You didn't have in mind the fact that the clear grade varied less than the other grades?

A. Absolutely not.

Q. Or than the other sizes in clear?

A. Absolutely not.

Q. Taking one of these recaption sheets as an example, you say 13/16ths by 2¼ was 90 f. o. b. cars at flooring mills as shown by average cost chart dated 5/21/21. That price of 90 is the average

cost shown in the average cost chart, you took that from the rate book?

A. Yes, sir.

Q. Where the average cost chart then appeared? Then you compiled from the record of completed transactions report of sales [fol. 1505] made the week ending July 30th, 1921, you have attempted there to take each sale and the price, at what price the net f. o. b. delivered price as shown by the record of completed transactions issued by the Association weekly; this price which you put in here is not the net f. o. b.?

A. The first price as show on that tabulation there is the price as shown by the weekly transactions of the Association Bulletin.

Q. I am referring now to this recaption sheet.

A. I beg your pardon.

Q. We have passed that other, look at that again.

A. I thought you were talking from the second sheet. These prices here are f. o. b. Cadillac minus the freight rate, the actual freight paid or charged by the Association as shown by their freight rate of average.

Q. In other words, they are the net prices arrived at in the same way you have arrived at them in the other tabulation?

A. Absolutely.

Q. And is deducting the Cadillac base rate?

A. Yes.

Q. And deducting commission?

A. No.

Q. You haven't deducted the commission?

A. Those are not deducted.

Q. The commission is not deducted from the statement?

A. No.

Q. Then they are the price?

A. You turn to your second page you will see although we have deducted the commission it is after we arrived at the factory f. o. b. [fol. 1506] mill price, the price f. o. b. cars at mill, then the commission and the net prices f. o. b. mill is minus the commission.

Q. But on this first sheet of this recaption—I want to get this straight——

A. I am telling you where I derive those figures from.

Q. The first sheet of this recaption you have the delivered price less the Cadillac base rate?

A. Yes.

Q. That is all?

A. That is all.

Q. That is how that figure is arrived at?

A. Yes, sir.

Q. Then you have put the total footings out there?

A. Yes, sir.

Q. Then in the first group you have put those prices which were above?

A. Above the average.

Q. Above the average cost price?
A. That is less money.
Q. Which were below then?
A. Below? I put them on the sheet above, but the lower prices were above.
Q. The first group in the recap contains the prices which were below the base or the average cost price?
A. That is right.
Q. You called it base, it is called in the book the average cost price.
A. The average cost.
[fol. 1507] Q. That you expressed in a percentage?
A. Yes, sir, total number of feet and percentage.
Q. By total of feet you have taken the total number of feet in each week's report of sale and then the percentage that was above and the percentage that was below you carried that percentage out to the side, that is it?
A. Yes.
Q. And then you have shown on the lower group those prices which were above?
A. Yes, sir.
Q. So that you show on this group for instance which I picked up at randum for the week ending July 30, 1921, that the sales ranged in prices from $81.50 to $112.50 covering that week of July 30th, 1921?
A. Yes, sir.
Q. And on this particular sheet 25% of the sales, 25.6 of the actual sales were at prices below the cost?
A. Average cost.
Q. The average cost and 8 and 6 were above?
A. 65.8.
Q. You say you have personally checked over the accuracy of all of these percentages and all of these figures?
A. Yes, sir.
Q. How long have you been at it?
A. The making of these reports?
Q. Yes.
A. I started in the early part of November after the Grand Jury proceedings in this Court, I think the 6th of November, the Grand Jury proceeding here, was that on the 6th?
[fol. 1508] Q. Some time in November.
A. It was the early part of November.
Q. And you have been at work at that since?
A. Yes, sir.

Examination by Mr. Thomson:

Q. You made a tabulation from the 23 sales reports of the total amount of sales of the three grades?
A. I did, yes, sir.
Q. Up to October 5. Will you state what the amounts sold dur-

ing that period of each grade are respectively and the percentage to the total represented by each?

A. You want the individual sales or the total?

Q. No, just the total for the period, of the amount to each grade sold and the percentage that is of the total sales for this period?

A. There was 69,942,673 feet sold of flooring. Of this amount there was 52,667 thousand feet of 13/16ths; in the clear there were 28 thousand; in the number one 14 thousand and in the factory 9 thousand feet showing percentage of the clear of 54.6, of the number one of 27.2 and of the factory 18.2.

Q. Did you read those figures correctly?

A. Yes, sir.

Q. It should be millions instead of thousands?

A. Yes, 28 millions clear. I had them figures in thousands.

Q. Were your instructions to make these tabulations covering all three grades?

A. They were.

Q. Was there any other reason except the lack of time why you didn't make them for all?

[fol. 1509] A. None at all.

Recross by Mr. Johnston.

Q. Did you find from examining these weekly and monthly sales reports that the proportion between clear and number one and factory varied quite considerably during different periods and different years.

A. Their average was practically as I have given it although there were of course variations by weeks.

Q. There were periods of time during which the factory ran considerably more than at other times, number one ran considerably more than at other times?

A. They varied every single week.

Q. Did you make the compilation for other years as to those percentages?

A. No, sir.

The Court: I think that I noticed from the exhibits that were introduced yesterday that as the price rose the amount of factory sold increased.

Mr. Johnston: That is true.

The Court: The lower priced lumber was moving more readily than the higher price?

Mr. Johnston: That is only natural of course.

The Court: And as the prices decreased the opposite is true.

Q. You didn't make this calculation for other years than the first six months of 1923?

A. The first six months of 1923, that is all we had time for.

The Court: If you have copies of those, I wish you would let me [fol. 1510] have them and then I want the witness to just take a sample of each one and explain it so that I may understand it.

Mr. Fowler: Mr. Thompson was going to do that.

The Court: Very well, so that I am going to get it, that is all I want. Of course it is utterly impossible for me to comprehend it not having the figures before me.

Mr. Thompson: The method taken on the sheet was to take the sales report and do down, following each item, and as soon as an item was found of 13/16 x 2-¼ Clear that item was taken for transference onto the compilation sheet, and on the compilation sheet showed all of the data that appears on the sales report; that is, the date of the sale; the number of the mill making the sale; the quantity sold; and the delivered price and the freight rate, all being taken directly from the sales report. Then on the basis of the freight rate shown on the sales report and the freight rate books, the freight allowance Cadillac, the freight allowance was computed and was put in the column entitled "Freight charge." Then was shown the commission, which was taken directly from the sales report. Then it shows the Factory price, which was the delivered price, less the freight charge.

Mr. Johnston: And less the commission.

Mr. Thompson: No, I think the commission was deducted, but that was not the method desired with the great majority of them. What is shown as net factory price is the delivered price less only the freight allowance from Cadillac. That is what is shown under net factory price, but on most of these, it is the net.

The Court: Why is that?

[fol. 1511] Mr. Thompson: Because in all the Minimum Price Plans and basis, and in the freight rate books is shown that the commission could be allowed from the minimum price established; that is, if under the minimum price plan or basis there was an average cost or a minimum price of $100, f. o. b. Cadillac, if the sale was made say, at $104, and the delivered price to that point was $4.00, they could deduct the $4.00 freight, which would leave the $100. That would be in accordance with such minimum price plan.

Mr. Johnston: The commission would be allowed from that.

The Court: I understand.

Mr. Thompson: The purpose of this compilation is not, of course, to show——

The Court: That would be a proper computation if we were arriving at what the minimum price was, but in arriving at the price at which this commodity was sold, it would not be a correct computation, would it?

Mr. Thompson: Not the actual realization, of course.

The Court: If your purpose is to show whether or not there was a uniformity of price, or prices charged, by the members of this Association, your computation would not be correct, would it?

Mr. Thompson: I think it would, your Honor, as to the delivered prices charged.

Mr. Fowler: Let me explain our theory. Our contention is that this tends to prove that they had in mind all the time this supposed average cost valuation, they call it, or trend. Now, under their regu-

[fol. 1512] lations, that is, under that Minimum Price Plan, under

the minimum price basis, they were permitted to deduct the commission if they wanted to, that was optional with them. If they saw fit to allow a commission, that constituted the basis, and these estimates were made with reference to that basis, they were permitted to deduct the commission if they wanted to, that was optional with them. If they saw fit to allow a commission, they constituted the basis, and these estimates were made with reference to that basis, our contention being that that was the thing they had in mind, and tried to observe; some allowed a commission, some did not. That was a computation they made themselves. It is upon that theory that all these calculations are made.

The Court: Is not this the situation under the theory of the Government: that when the minimum price plan or minimum price basis was in operation and in force, competition was not eliminated, but was limited to prices above that minimum so fixed?

Mr. Fowler: Yes, and including also the commission if they saw fit to allow it.

The Court: I understand but you arrive at the minimum price which is allowed under either the minimum price plan or the minimum price basis by taking into consideration the commission which might be allowed, less that commission would be the actual minimum price.

Mr. Thompson: No, your Honor, that is not the way it is calculated.

Mr. Fowler: That was not the theory of the minimum price plan. The theory was to fix that as a minimum basis, theoretically, but they could even go two dollars below that, if they saw fit, but this [fol. 1513] was optional. The real basis they were looking for under that plan was the amount computed.

The Court: To illustrate, suppose at any given time it is found that a hundred dollars per thousand would be the minimum price,——

Mr. Fowler: The average cost as they call it.

The Court: I understand. I don't care what you call it—if a hundred dollars would be the minimum price at which the members of this Association were expected to sell their lumber, then any addition to that, or any deduction from that the members of this Association were permitted under that plan to pay a commission of $2.00 per thousand; that would make the minimum price which was allowed or permitted $98.00, wouldn't it?

Mr. Fowler: That is, it was optional.

The Court: Certainly. Any amount above that was unlimited at all times.

Mr. Fowler: That is correct.

Mr. Thompson: I think if your Honor will turn to the record for January 8th, 1921, you will see what we had in mind and why. Your Honor will remember three sales reports were introduced in evidence which showed, in addition to the other data, the minimum price basis, price, on these tabulations made from that, that is also included. You will notice the first sale, the delivered price was at $108.50. The Cadillac freight rate computed was $8.50, leaving as

the Cadillac price $100.00. Now, $100 is the minimum price established f. o. b. Cadillac, under that January 6th plan. We note also that $108.50 is the delivered minimum price. So, it appears [fol. 1514] clearly from that that the minimum price was established regardless of any allowance that might be made for the commission, so that it would not be proper to deduct the commission and say that $98.00 was the price for that sale under the Minimum Price Plan. The Minimum Price Plan was $100 irrespective of whether or not the commission was allowed.

The Court: I confess I can't follow you. If this plan allowed a minimum price of $100 per M feet, and in addition to that the member was permitted to sell and pay a commission of $2.00, which is set forth in the plan itself, I cannot see why then the net minimum price at which a member would be permitted to sell, would not be $98.00.

Mr. Fowler: I believe your Honor is absolutely correct about that, when you go to compute and determine whether or not they had in mind a special line, that ought not to be considered, because that was left entirely optional. It might apply to one fellow and would not apply to the next.

Mr. Thompson: As a matter of fact, it would make very little difference whether it was computed the other way or not, because practically all the sales allow commission, and practically all the commissions are uniform.

Mr. Darby: That is not the fact. There are some dollar and a half, some two dollars and some even three, I believe.

The Court: Take this first item upon this January 8th statement, and not taking into consideration the commission you find that the actual sale was made at a price lower than the minimum price permitted, but if you take into consideration the commission, it was a price realized above the minimum price.

Mr. Thompson: Is your Honor correct on that? I thought the [fol. 1515] first sale was just the minimum price.

The Court: I have it here, December 31st, mill number 24, 4 M feet, the delivered price $108.50; average freight rate 42¢; actual freight rate allowed $8.50, price f. o. b. car at the mill $100.

Mr. Thompson: That was f. o. b. that made the minimum price.

The Court: Then you follow the minimum price basis, $108.50 is figured the delivered price.

Mr. Thompson: It was just the same as the delivered price of the sale.

The Court: Sure. Then the commission allowed was $1.00, which reduced by $1.00 the amount received by this mill.

Mr. Fowler: According to your Honor's theory, the minimum would be $98.00, they were selling a dollar above it.

The Court: They were selling a dollar above the minimum. That is not my theory or anything of the kind, but what the actual figures show in this case, if they show anything along that theory. Taking the second item, where no commission was allowed you would have a sale at the minimum price, where as in fact the actual sale on the first item, was at a dollar below the minimum price.

Mr. Thompson: Well, it would be if the minimum price were computed that way, your Honor, but we have merely taken that method followed in the computation. As I say, it is my impression it would make very little difference in the record whether one method or the other were followed. We started out first deducting the com-
[fol. 1516] mission, and then showing the net factory price, less the commission. We found from these minimum price plan statements that that was not the method they followed, so we changed.

The Court: Very well. Mathematics is an exact science.

Mr. Fowler: I wish to call your Honor's attention to this Minimum Price Basis.

Mr. Johnston: Which one, The one in force about two weeks?

Mr. Fowler: Yes, reading from Article IV:

"The following Minimum Price Basis is hereby established, subject to change from time to time in accordance with Article II and III. "This specified under "Commissions:"

"A commission not exceeding two dollars may be allowed to your own registered special representative, or a commission not exceeding one dollar and fifty cents may be allowed to registered wholesalers and commission men. That is purely optional. Our idea is that what they really had in mind was the basis; every man making a sale had in mind first the basis, and then he determined whether he would allow the commission or not, and the only way we can compare it is to compare it with the basis.

Mr. Thompson: In other words, it seemed to us the theory was that the commission was practically absorbed as a part of the selling expense.

The Court: I don't know that it makes very much difference except in this: that in any event it is against the Government. This method of computation is against the Government.

Mr. Johnston: On one theory, but in their favor in another. It is against them on the theory of the Minimum Price, but it is in
[fol. 1517] their favor on the theory of variation, because the prices show greater variation if you take off the commission.

Mr. Fowler: We are not insisting on uniformity.

Mr. Johnston: Well, you couldn't on those figures.

The Court: Let us proceed.

Mr. Thompson: You wanted me to explain how the recap. sheet was made. I have one here of December 30, 1922. Now, at the top of each one of the recap. sheets, is a statement of the last termination of average cost put out by the Association for the 13/16 x 2¼ Clear Maple flooring. On this one, it was $95.00 f. o. b. cars at flooring mills, as shown by Association report dated October 25, 1922, captioned "Average Cost, Based upon three test runs of 1921." Then follows the computation made from the other computation. They merely went through and drew off the number of sales and the total feet of those sales at each price. So, this shows that during that week there was one sale of this time at $93.00 a total of 78,000 feet;

One sale at $94.00, a total of 15,000 feet;
One sale at $95.25, a total of 7,000 "

One sale at $94.50, a total of 14,000 " .

The total average cost established was $95.00. This constituted a total of 104,000 feet or 11.4% of feet sold that week—the total feetage of that item.

Then it appeared that there were 33 sales at $94.00, the average cost price; that represented 668,619 feet or 73.6% of total.

Then follows the tabulation of the sales above $95.00 costs:

[fol. 1518] One sale at $95.25.

Four sales at 95.50.

One sale at $95.75.

Two sales at $96.00.

One sale at $98.00.

One sale at $100.25.

One sale at $100.50.

One sale at 104.00.

The total feetage was 135,300 feet or 15%.

The Court: These sales, above and below have not been averaged as to price.

Mr. Thompson: No, sir.

The Court: As to the average price, either above or below.

Mr. Thompson: No, sir; that would require another computation; there are many elements entering in. For instance, many sales are shown as mill sales, which would be practically retail sales made at the mill, and those were all kept out of the tabulation. And no attempt was made to differentiate between the prices obtained by some of these mills, which the evidence shows normally obtained higher prices that others, because of superior quality. We merely took every price for those items appearing on the sales report and made a comparison on that basis without going into other controverted matters.

The Court: Now, if you had taken into account, commissions in arriving at the minimum price, which would be permitted, you would have probably on this sheet—I am simply stating probably,—on this sheet practically no sales, perhaps no sales below the minimum price.

Mr. Thompson: No, considering that all of those at $93.00 had the commission deducted, of course, all the sales would have been at least equal to the minimum price.

The Court: Every sale that was made which you have figured [fol. 1519] at $93.00, there was an allowance of $2.00 commission.

Mr. Johnston: The net receipt was $93.00, if it was $2.00. Of course it shows on this list that some were $1.50, some $2.00 and some only $1.00.

Mr. Thompson: Those where the commission was deducted, those would have all been $95.00.

Mr. Johnston: How can you tell whether they were or were not?

The Court: This sheet, as I understand it, the first page of this series of sheets, is the recapitulation, or the computation of the percentages?

Mr. Thompson: Yes, sir.

The Court: The subsequent sheets show the actual sales?

Mr. Thompson: Yes, your Honor, that is the one that is taken directly off the sales reports. That one you have in your hand contains tabulations from the sales reports in the No. 1 and the Factory also, but as I stated, on account of the lack of time—this was a greater task than anticipated—we were not able to complete that.

The Court: Have you any other recapitulation of the entire period?

Mr. Thompson: Merely in rough form, your Honor, merely of percentages.

The Court: Of course this is not of very much value unless you complete it; you have left the Keystone out of your arch.

Mr. Lewis: We did not have time for that, your Honor, as to No. 1 and Factory.

[fol. 1520] The Court: I mean the Clear. Have you a recapitulation of the entire period for Clear?

Mr. Lewis: Yes, sir.

Mr. Thompson: Perhaps we had better introduce this in evidence. That is a recapitulation of the percentages of percentages at, above and below.

Mr. Johnston: Over what period?

Mr. Thompson: The entire period.

Mr. Newman: What year?

Mr. Thompson: 1921 and 1923—only the first half of 1923.

Mr. Fowler: You better have that marked.

Mr. Johnston: I would like to know something about it.

Mr. Thompson: We will put on Mr. Harris and ask him about it.

A. P. Harris, being sworn on behalf of the Government testified as follows:

Direct examination.

By Mr. Thompson:

Q. What is your occupation?

A. Special Agent for the United States, Department of Justice.

Q. Have you taken part in the calculation and tabulation of this exhibit which has been introduced as Sales Reports?

A. Yes, sir, I have.

Q. I will ask you to state what that chart is, and what it shows and how it was prepared?

A. A table prepared from record of completed transactions of weekly sales reports reflecting Association's average cost chart f. o. b. [fol. 1521] flooring mills. Also table of weekly sales of 13/16 x 2¼ Clear Maple Flooring and the percentages of the total sales as sold below, at and above the average cost charts. This table shows the record beginning with January 1st, 1921, running through 1921, 1922 and the first six months of 1923, and it shows the base or

average cost chart numbers, and at the end of each week during this period it shows the percent of the feetage as sold below this average cost chart price, the percentage sold at, and the percentage sold above. It also shows the total feetage in thousand feet only of 13/16 x 2¼ Clear that was sold during that week. It gives that data for each week during that period.

Q. No average of those percentages has been made?

A. No, no average.

Q. It merely shows for each week?

A. It shows for each week. There are a few of the weeks during 1921 that we did not have time to complete in the average percentage—that is, the percentage at, above and below is not shown.

The Court: Then this is nothing more or less than what is shown here.

Mr. Thompson: Yes, your Honor, merely tabulated.

Mr. Fowler: A resume.

The Court: It does not seem to be even a resume; it is merely a tabulation of each week.

Mr. Johnston: A tabulated percent.

The Court: But it is all contained here, contained exactly as you [fol. 1522] have it there, except that this is all put on sheet.

The Witness: Yes, it is kind of a chart so you can get at it at one glance.

The Court: What I inquired was, whether you had made a computation or was this; whether you have then summarized these weekly tabulations so as to get the percentage of the whole during the entire period?

Mr. Thompson: No, your Honor, that has not been done. Then this does not cover what your Honor desired?

Mr. Fowler: We will put it in.

Mr. Thompson: I don't think it shows in full.

Mr. Fowler: That shows it in a moment instead of going through these things.

Mr. Thompson: I will offer it then.

The Court: Very well.

(Paper referred to was marked Gov't Exhibit 79.)

Mr. Thompson: The Government rests.

Mr. Johnston: I would like to recall Mr. Keehn for one or two questions that have been brought out in the rebuttal.

The Court: Very well.

Thereupon the defendants introduced the following testimony, and the following proceedings were had.

GEORGE W. KEEHN again on the stand.

Direct examination.

By Mr. Johnston:

Q. In one of the letters read this morning, written by you I think some time in 1921, reference was made to audits being made by one of the members of your office staff of the weekly sales reports, or the [fol. 1523] record of the members as to weekly sales reports at their various factories?

A. Yes, sir.

Q. Have any such audits been made, and are any such audits made under the present Articles of Association, those adopted January 1, 1922?

A. No, sir; no audits of any kind are made of the books of the members of the Association, or of their reports of weekly sales, shipments or any other data.

Q. Nothing of that kind has been done or is contemplated under the present organization, of January 1, 1922?

A. Nothing of that kind is done, or is contemplated to be done.

Mr. Johnston: I think that is all.

The Court: I take it there is nothing further on either side, if not, the proofs are closed.

Mr. Johnston: There are some exhibits, if the court please, that were introduced that do not seem to have been marked, I assume there will be no difficulty in having them marked.

The Court: They should be marked.

Mr. Johnston: One of our exhibits has evidently been misplaced, we cannot locate it. Mr. Keehn wants to compare those figures, I had forgotten that, with respect to production capacity, if the court will remember.

Mr. Fowler: Did he find some mistakes?

Mr. Johnston: Yes, he found some mistakes, several hundred thousand feet, two different weeks, in your calculation.

The Court: One offsetting the other?

Mr. Johnston: No, but they are not material, a couple of hundred thousand feet.

[fol. 1524] Further Examination of Mr. Keehn.

By Mr. Johnston:

Q. What have you found as a result of your compilation of the figures which you have and which the Government obtained as to the production of non-member mills?

A. We have made a complete statement of the production and manufacturing capacity of the members of the defendant Maple Flooring Manufacturers Association, and of the non-member manufacturers of Mable, Beech and Birch flooring, and the data regarding production has been compiled from the statements made by the De-

partment of Justice, and we have added to that one or two other reports which came in to us, which were not submitted to the Department of Justice, with a view of getting a complete tabulation of the whole thing. Then, we have a statement of the manufacturing capacity of the members and the non-members, which is compiled from data furnished to us by non-member manufacturers, because the Government's questionnaire did not go into the supplying of data regarding manufacturing capacity.

Q. How many non-members did you secure that data from?

A. I think, if I read that, it would be very simple.

Q. Very well.

A. The year 1922. We have columns of "Production, Members, Non-members." Twenty-two members produced of Maple, Beech and Birch flooring 148,313,000 feet; 58 non-members who reported produced 61,317,000 feet. The percentage produced by the members of the Association is 70.7%; by the non-members 29.3%, the total being 209,630,000 feet. The manufacturing capacity of the 22 members of the Association 158,400,000 feet; 38 non-members who re-
[fol. 1525] ported their manufacturing capacity 238,610,000 feet, making a total capacity of 397,010,000 feet, of which the Association represents 39.9% and the non-members 60.1%.

For the year 1921, our 22 members produced 107 million—

The Court: It is hardly necessary to repeat.

Mr. Johnson: No.

The Witness: We did not endeavor to compile data for the year 1918, because it was somewhat incomplete and we could not get a very careful analysis of it, but this manufacturing capacity is taken from the letters which the non-members wrote to us and which we have entered in our statement just as reported to us.

Mr. Johnston: We will offer these tables. They are comprised of three sheets and we will offer them as one exhibit. (Papers referred to were marked Defendant's exhibit QQ.)

The Witness: In Mr. Hughes' tabulation, we found one or two slight clerical errors, which would not of course affect the percentage.

Mr. Johnston: Is that all, Mr. Keehn?

Mr. Keehn: Yes, that is all.

The Court: Now, is that all, gentlemen?

Mr. Thompson: I believe so, your Honor.

Whereupon both plaintiff and the defendants rested, the evidence was closed, and the cause, after argument, was submitted to and taken under advisement by the court.

[fol. 1526] ORDER SETTLING STATEMENT OF EVIDENCE

Be it further remembered that the foregoing was all the evidence and testimony offered, admitted or excluded, and all the proceedings had on the hearing of said cause, which do not already appear of record herein, with the exception of those certain exhibits therein

mentioned but not incorporated therein; that the said exhibits mentioned but not incorporated in the foregoing were omitted pursuant to stipulation of the solicitors for the respective parties, and this court has, by order entered on the 10th day of March, A. D., 1924, directed that the exhibits mentioned but not incorporated in the foregoing be transmitted to the Supreme Court of the United States, along with the transcript of record herein.

Be it further remembered and certified that the foregoing statement of evidence was lodged in due time with the Clerk of this court, and that due and regular notice of such lodgment and of the time of the proposed settlement thereof was given to the solicitors for plaintiff; and it appearing that the said statement, supplemented by the exhibits which this court has ordered to be transmitted to the Supreme Court of the United States, is true, complete and properly prepared, it is hereby approved, settled and allowed as a true, complete and correct statement of the evidence introduced in said cause in narrative form, with the exception of parts of the testimony of certain witnesses and the entire testimony of other witnesses, which by agreement of the parties and the direction of this court, were reproduced in the exact words of said witnesses.

[fol. 1527] Inasmuch as the matters above set forth do not fully appear of record in this suit and the defendants pray that the same may be certified under the hand of the Judge of this court and thereby made a part of the record in said cause, it is certified accordingly this 10th day of March, A. D. 1924.

C. W. Sessions, Judge of the District Court of the United States for the Western District of Michigan, Southern Division.

Notice of Lodgment—Filed Mar. 10, 1924

Please take notice, that a copy of the statement of evidence prepared by the defendants to be used on the appeal in the above cause was duly lodged with the Clerk of the District Court of the United States for the Western District of Michigan, Southern Division, pursuant to Rule 75 of the Equity Rules of practice, on the 26th day of February, 1924, and that defendants will, on the 10th day of March, 1924, at 9:30 A. M. before his Honor Judge Sessions, at Grand Rapids, Michigan, ask the Court to approve the statement of evidence in order that it may be filed and become a part of the record for the purposes of the appeal.

Travis, Merrick, Warner & Johnson, Attorneys for Defendants.

Service of a copy of the above notice accepted and acknowledged this 27th day of February, 1924.

Edward J. Bowman, Attorney for Plaintiff.

[Title omitted]

MOTION RE TESTIMONY—Filed Mar. 10, 1924

Come now the appellants in the above entitled cause, by their solicitors Travis, Merrick, Warner & Johnson, and Newman, Poppenhusen, Stern & Johnston, and present their motion to the court and show that in the preparation of the statement of the evidence and of the record in the appeal of this cause, counsel for appellants and appellee have agreed that certain portions of the testimony of various witnesses, and all the testimony of certain other witnesses should be reproduced in the exact words of the respective witnesses in order that a proper presentation of the case may be made to the Supreme Court of the United States. That accordingly the appellants have prepared, with the assistance and approval of the appellee, a statement of the evidence herein, wherein most of the testimony is set forth in narrative form, and those portions which counsel have [fol. 1530] deemed essential to set out in the exact words of the witnesses are so set forth in each case.

Therefore appellants pray the court to grant this motion and to direct that said testimony be set forth in the record as prepared by the appellants with the advice and approval of the appellee.

This the 10 day of March, A. D. 1924.

Travis, Merrick, Warner & Johnston, Newman, Poppenhusen, Stern & Johnston, Attorneys for Appellants.

[fol. 1531] IN UNITED STATES DISTRICT COURT

[Title omitted]

ORDER RE TESTIMONY—Filed Mar. 10, 1924

On motion of appellants made to this court and the consent of the appellee, it is hereby ordered that so much of the testimony as has been reproduced in the exact words of the witnesses in the statement of evidence prepared by appellants, with the advice and consent of the appellee, be reproduced in the record in the exact words of the witnesses—the court being satisfied that such request is reasonable, and that the reproduction of said testimony in the exact words of the witnesses is necessary to a correct and complete understanding of the record.

This the 10 day of March A. D. 1924.

C. W. Sessions, Judge of the United States District Court for the Western District of Michigan.

[Title omitted]

MOTION THAT CERTAIN EXHIBITS BE SENT TO THE SUPREME COURT OF THE UNITED STATES—Filed Mar. 10, 1924

Come now the appellants in the above entitled cause by their solicitors, Travis, Merrick, Warner & Johnson, and Newman, Poppenhusen, Stern & Johnston, and present their motion to the court and show that during the hearing of said cause several hundred exhibits were introduced in evidence; that it will be necessary that some of these exhibits be inspected by the Supreme Court of the United States; that in the preparation of the statement of evidence it was impossible, in a great number of instances, and impracticable in others, to state the substance of said exhibits or otherwise describe or summarize them so as to give the Judges of the Supreme Court an adequate idea thereof; that owing to the nature, number, form and multiplicity of said exhibits, as well as their diversity of size and the length of some of them, counsel for appellants and appellees [fol. 1533] have agreed that certain exhibits should be incorporated in the statement of evidence, either by stating the substance thereof or by means of copies thereof, and that this agreement has been executed; that counsel for appellants and appellees have agreed that it would be more practicable if all the other exhibits should be transmitted by the Clerk of this court to the Supreme Court of the United States, and that said counsel should thereafter enter into a stipulation with respect to the printing thereof; that the exhibits which have not been incorporated in the statement of evidence as above described are as follows:

Government Exhibits Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 14A to 14 L inclusive, 15, 15A to 15-3F inclusive (with the exception of 15T, because through inadvertence of the Court Reporter there was no Gov. Ex. 15T), 17, 18, 18A to 18X inclusive, 19, 20, 20A, 21, 22, 23, 24, 24A to 24R inclusive, 25, 25A, 25B, 26, 27, 27A, 28, 28A, to 28T inclusive, 29, 29A, 29B, 29C, 30, 30A to 30F inclusive, 31, 31A to 31R inclusive, 32, 33, 34, 34A to 34P inclusive, 35, 36, 36A, 37, 38, 38A to 38K inclusive, 39 39A to 39D inclusive, 40, 40A to 40-5R inclusive, 41, 41A to 41-2Y inclusive, 42, 42A to 42C inclusive, extra 43 to extra 43F inclusive, 43A to 43-6 N inclusive, 44, 45, 46, 46A, 46B, 47, 48, 49, 50, 51, 51A to 51-2W inclusive, 52, 52A to 52-3G inclusive, 53, 53A, extra 54, 56, 56A to 56H inclusive, 57, 57A, 58, 58A, 59, 59A, 60 60A to 60P inclusive, 61, 61A, 62, 62A to 62N inclusive, 63, 63A to 63G inclusive, 64, 65, 65A to 65-3L inclusive, 66, 67, 68, 69, 70, 70½, 71, 72, 73, 74, 75, 76, 76A, 77, 78, 79, and Defendants' Ex- [fol. 1534] hibits A, B, B1, C to C11 inclusive (through inadvertence of the Court Reporter there was no Defendants' Exhibit D), E, F, F1, G, G1, H, H1, H2, I, J, K, L, P, Q, (through inadvert-

ence of the Court Reporter there was no Defendants' Exhibit S), T, T1, V4, V5, V6, V7, V24, W, Y, BB, BB1, CC½, CC, CC1, CC2, CC3, CC4, DD, DD1, EE, FF to FF9 inclusive, GG, HH, II1, II2, JJ, KK, KK1 to KK5 inclusive, LL, MM, NN, NN-1, OO, PP, QQ; Defendants' Keehn Exhibits Nos. 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, (through inadvertence of the Court Reporter there was no Defendants' Keehn Exhibit 16), 17, 18, 19, 20, 21 and 22; Defendants' Robertson Exhibits 1 to 31 inclusive; Defendants' Bacon Exhibit 1; Defendants' Brown Exhibit 4; Defendants' Gordon Exhibits Nos. 1 to 16 inclusive; Defendants' Grant Keehn Exhibits Nos. 17 to 30 inclusive; Defendants' Vanderblue Exhibits Nos. 1 to 4 inclusive.

Wherefore, the appellants pray that this court enter an order that the exhibits above mentioned be certified by the Clerk of this court and transmitted by him to the Supreme Court of the United States, along with the transcript of the record herein.

This the 10 day of March, A. D. 1924.

Travis, Merrick, Warner & Johnson, Newman, Poppenhusen, Stern & Johnson, Solicitors for Appellants.

ORDER DIRECTING THAT CERTAIN EXHIBITS BE CERTIFIED BY THE CLERK AND TRANSMITTED BY HIM TO THE SUPREME COURT OF THE UNITED STATES

On motion of appellants made to this court and the consent of the appellee, It is hereby ordered that the following exhibits:

Government Exhibits Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 14A to 14L inclusive, 15, 15A, to 15-3F inclusive (with the exception of 15T, because through inadvertence of the Court Reporter there was no Gov. Ex. 15T), 17, 18, 18A to 18X inclusive, 19, 20, 20A, 21, 22, 23, 24, 24A to 24R inclusive, 25, 25A, 25B, 26, 27, 27A, 28, 28A to 28T inclusive, 29, 29A, 29B, 29C, 30, 30A to 30F inclusive, 31, 31A to 31R inclusive, 32, 33, 34, 34A to 34P inclusive, 35, 36, 36A, 37, 38, 38A to 38K inclusive, 39, 39A to 39D inclusive, 40, 40A to 40-5R inclusive, 41, 41A to 41-2Y inclusive, 42, [fol. 1536] 42A to 42C inclusive, extra 43 to extra 43F inclusive, 43A to 43-6N inclusive, 44, 45, 46, 46A, 46B, 47, 48, 49, 50, 51, 51A to 51-2W inclusive, 52, 52A to 52-3G inclusive, 53, 53A, extra 54, 56, 56A to 56H inclusive, 57, 57A, 58, 58A, 59, 59A, 60, 60A to 60P inclusive, 61, 61A, 62, 62A to 62N inclusive, 63, 63A to 63G inclusive, 64, 65, 65A to 65-3L inclusive, 66, 67, 68, 69, 70, 70½, 71, 72, 73, 74, 75, 76, 76A, 77, 78, 79, and Defendants' Exhibits A, B, B1, C to C11 inclusive (through inadvertence of the Court Reporter there was no Defendants' Exhibit D), E, F, F1, G, G1, H,

H1, H2, I, J, K, L, P, Q, (through inadvertence of the Court Reporter there was no Defendants' Exhibit S), T, T1, V4, V5, V6, V7, V24, W, Y, BB, BB1, CC½, CC, CC1, CC2, CC3, CC4, DD, DD1, EE, FF, to FF9 inclusive, GG, HH, II1, II2, JJ, KK, KK1 to KK5 inclusive, LL, MM, NN, NN1, OO, PP, QQ; Defendants' Keehn Exhibits Nos. 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, (through inadvertence of the Court Reporter there was no Defendants' Keehn Exhibit 16), 17, 18, 19, 20, 21 and 22; Defendants' Robertson Exhibits 1 to 31 inclusive; Defendants' Bacon Exhibit 1; Defendants' Brown Exhibit 4; Defendants' Gordon Exhibits Nos. 1 to 16 inclusive; Defendants' Grant Keehn Exhibits Nos. 17 to 30 inclusive; Defendants' Vanderblue Exhibits Nos. 1 to 4 inclusive, be certified by the Clerk of this Court and transmitted by him to the Supreme Court of the United States, this court being of opinion that said action is necessary for the due and proper presentation of the appeal herein to the Supreme Court of the United States and the expedition of said [fol. 1537] appeal.

This the 10 day of March, A. D. 1924.

—— ——, Judge.

[fol. 1] GOVERNMENT'S EXHIBIT No. 1

Maple Flooring Manufacturers' Association

Articles of Association

Jany. 1, 1913—Jany. 1, 1916

Extended from Jany. 1, 1916, to Jany. 1, 1919

[fol. 2] In consideration of the mutual agreements in the following Articles of Association contained, and the advantages and benefits to be derived therefrom, we, whose names are hereunto subscribed, do hereby make, enter into and bind ourselves and our respective successors and assigns by the following

Articles of Association

Article I

Name

The name of this Association shall be the Maple Flooring Manufacturers' Association, and its duration shall be for the period of three years from the 1st day of ——, 191- to the 1st day of ——, 191-

Article II

Objects

The objects of this Association shall be as follows: to promote the mutual interests of its members; to establish and maintain uniformity in trade usages; to encourage and increase the use of Maple, Beech and Birch Flooring in the United States and foreign countries; to adopt uniform standards of grading and manufacture; to exchange information; to collect and disseminate statistics concerning the flooring industry, and to adopt lawful plans for the general development and improvement of that industry.

But this Association shall not fix, regulate or control the price, output, purchase or sale of flooring.

[fol. 3] Article III

Headquarters

The headquarters of this Association shall be located at Chicago, Illinois.

Article IV

Membership

Any individual, firm or corporation regularly engaged in the manufacture of Maple, Beech, or Birch Flooring in the United States

may be a member of this Association. Each member shall be entitled to only one vote and shall have the right to sit in executive session. All applications for membership shall be made in writing to the Secretary, and approved by the Board of Trustees.

New members may be admitted to this Association at any regular or special meeting by a majority vote of the members present, but before being admitted to actual membership such candidate must sign these Articles and make the contribution hereinafter required.

Article V

Officers

The officers of this Association shall consist of a President, two Vice-Presidents, a Secretary, a Treasurer, and a Board of Trustees. The Board of Trustees shall consist of nine members, and the President, the two Vice-Presidents, and the Treasurer shall be members of the Board of Trustees by virtue of their office. The officers and the remaining five members of the Board of Trustees shall be elected by the members of the Association.

[fol. 4] The Board of Trustees shall elect the Secretary of the Association and fix his compensation. The Secretary need not be a member of the Association.

Article VI

Duties and Powers of Officers and Board of Trustees

President

The President shall preside at all meetings of the Association and shall be ex-officio Chairman of the Board of Trustees and ex-officio member of all standing Committees, and shall call meetings of the Board of Trustees whenever requested in writing to do so by a majority of the Board.

Vice-Presidents

In the absence of the President the first Vice-President shall perform the duties of the President, and in the absence of both President and first Vice-President, the second Vice-President shall perform the duties of the President.

Treasurer

The Treasurer shall keep account of all moneys received and expended for the use of the Association, and shall make disbursements only upon vouchers issued by the Secretary and approved by the President. When his term of office expires, he shall deliver to his successor all moneys, books, papers, and other property

belonging to the Association in his possession; and in the absence of such successor he shall deliver the same to the President.

Secretary

It shall be the duty of the Secretary to give notice of and attend [fol. 5] all meetings of the Association and of the Board of Trustees; to keep a record of all their doings; to keep a list of all the members of the Association; collect all assessments and pay them over to the Treasurer; to prepare under the direction of the Board of Trustees a semi-annual report of its transactions and the condition of the Association; and perform any and all duties which shall be required of him by the Board, and generally to devote his best efforts to forward the interests of the Association.

Board of Trustees

The Board of Trustees shall have the power to hold meetings at such times and places as it may deem proper; to appoint committees from the membership of the Board of Trustees, or of the Association; to print and circulate documents, raise funds and disburse the same, and to devise and carry into effect such measures not in conflict with these Articles, as it may deem proper and expedient to promote the objects of the Association, and the Secretary shall at all times be subject to its direction.

The Board of Trustees shall have power to make By-Laws and Regulations for the conduct of its own business and meetings; and for the conduct of the business and meetings of the Association, and for the furthering of the interests confided to its care.

The Board of Trustees shall act as a Board of Arbitration, to hear and determine any complaints and grievances arising between the members of the Association and its decision shall be final, conclusive and binding in each case, subject only to the right of appeal to the Association by written petition, if the amount involved be $250.00 or more, and such appeal shall be decided by the Association as speedily as possible.

[fol. 6]

Article VII

Election of Officers

The President, the two Vice-Presidents, the Treasurer and five members of the Board of Trustees shall be elected by ballot at the annual meeting of the Association, and they shall continue in office for the term of one year, and until their successors are elected and have qualified. A vote of the majority of the members of the Association shall be necessary to an election.

Article VIII

Vacancies

In case of a vacancy in the Board of Trustees or in any office, the same shall be filled by the Board of Trustees for the unexpired term of the trustee or officer whose vacancy is so filled.

Article IX

General Meetings

There shall be an annual meeting of the Association for the election of officers and members of the Board of Trustees and the transaction of other business on the fourth Wednesday in January of each year, and notice of such meeting shall be mailed to each member of the Association at least ten days prior to the holding thereof.

Regular meetings of the Association for the transaction of general business shall be held on the third Wednesday in March, May, July, September and November of each year, and notice of such meetings shall be given in the same manner as notice is given for the annual meeting of the Association.

[fol. 7]

Special

Special meetings of the Association may be called by the President or by a majority of the Board of Trustees and notice of such meeting shall be given ten days prior to the holding thereof.

Trustees.

There shall be at least two meetings of the Board of Trustees per annum, and time and place of such meetings shall be fixed by the Trustees.

Voting by Mail

When the President shall deem it inexpedient to call a special meeting of the Association, or when the Chairman shall deem it inexpedient to call a special meeting of the Trustees, the President, or Chairman, as the case may be, may request a vote by mail on any question on which an expression is deemed necessary, and the vote of each member of the Association or Trustee, as the case may be, so given by mail shall have the same force as if given at a regularly convened meeting.

Article X

Salaries and Expenses

All officers and trustees of the Association shall serve without compensation, except the Secretary, whose compensation shall be fixed by the Board of Trustees.

[fol. 8]

Article XI

Bureau of Inspection

The Board of Trustees may employ for the Association an Inspector, who shall be located centrally as regards the Flooring Market. No one shall be eligible to the position of Inspector who is directly or indirectly engaged in the profits of the Flooring Trade. The Inspector shall be under the general control of the Board of Trustees and immediately under the direction of the Secretary.

Article XII

Quorum

Five trustees shall constitute a quorum of the Board of Trustees for the transaction of any and all business. A majority of the members of the Association shall constitute a quorum for the transaction of the business of the Association.

Members of the Association not present at any meeting may be represented and vote by proxy given in writing to any other member of the Association, or to any employee of any individual, firm or corporation member of the Association, provided that no person shall vote more than one proxy.

Article XIII

Special Fund

A fund is hereby established, to be called the Special Fund, and shall consist of the contributions to be made to such Special Fund by the members of the Association, together with the increase and gains thereof. And the contribution of each member to said Special Fund shall be the amount set opposite the signature of such member [fol. 9] to these Articles of Association.

Said Special Fund shall be deposited with a Trust Company, to be chosen by the Association at the first meeting in the month of ——, 191—, and held by such Trust Company subject to the order of the Association. In case of the resignation or inability to act of such Trust Company, the Board of Trustees shall select another Trust Company to fill the unexpired term.

It is expressly agreed by each member of the Association that his share of the Special Fund is deposited as a guarantee that he will carry out all his obligations under these Articles of Association, and that if he shall fail, refuse or neglect to do so, or to pay any dues or assessments as provided in these Articles, then his share of the Special Fund and his interest in any and all other moneys owned or held by the Association, or held by anyone for the Association, shall be forfeited forever to the Association for the use and benefit of its members then in good standing.

Article XIV

General Fund

A fund is hereby established to be called the General Fund and all moneys received by the Association, except the moneys to be paid into the Special Fund, as provided for in Article XIII hereof, shall go into and become a part of the General Fund.

[For the purpose of securing moneys for the General Fund, an assessment of Three ($3.00) Dollars per thousand feet shall be levied each month on all shipments during that month in excess of the allotted percentage set opposite the signature of each member.

From this General Fund each member who has shipped during [fol. 10] that month less than his allotted percentage shall be paid Three ($3.00) Dollars per thousand feet on the quantity undershipped down to 75% of his allotment for that month.] If a member ship less than 75% of his allotment during any one month, he shall receive Three ($3.00) Dollars per thousand feet on only 25% of his allotment for that month, and the balance shall be held in abeyance until the end of the year, and if at the end of the year he shall have shipped 75% of his allotment for that year the amount so held in abeyance shall then be paid to him. For example, if a member's allotment for any given month is 400,000 feet and his shipments be 250.000 feet, he would have undersold 150,000 feet and his credit balance would be $450.00. Under this Article he would be expected to ship not less than 300,000 feet, or 75% of his allotment, and consequently he would be paid on only 100,000 feet of his undersales, or $300.00, and the remainder of his credit balance, $150.00, would be held in abeyance until the end of the year, and it would then be paid to him provided his shipments for the year equal 75% of his allotment for the year, but if his shipments for the year should fall below the required 75% of his allotment, then this $150.00, or any other amounts that may accrue under this Article, would belong to the entire Association. The term year as used in this Article shall mean the period between —— 1st of one year to —— 1st of the following year.

All assessments for the General Fund shall be paid to the Secretary within Five (5) days after such assessment has been made and due notice given. Should any member fail, neglect or refuse to pay the assessment so levied against him within thirty (30) days after such assessment is made, the Trustees shall then draw upon the share of such member in the Special Fund and remit the amount so drawn to the Secretary to pay such assessment and unless the share of such member in said Special Fund shall be restored by such member to its original amount within ten days after notice to [fol. 11] him by mail, he shall on the expiration of said ten days' notice cease to be a member of the Association and his share in all the funds, moneys and property of the Association shall be forfeited to the Association for the use and benefit of its members then in good standing, without any further or other notice or action whatever on the part of the Association, or any of its officers or members; provided, however, that such member of the Association may be

reinstated if the Board of Trustees in its sole and absolute discretion shall deem such reinstatement just and proper, and the Board of Trustees shall have the right to impose such terms and conditions in causing such reinstatement, as it may deem just and equitable.

Article XV

Daily Reports

Daily reports shall be made by each member of the Association to the Secretary at the close of business each day of all deliveries and shipments of all kinds of Maple, Beech and Birch Flooring, regardless of length, width, thickness or grade, for use within the United States, except Maple, Beech and Birch Flooring purchased from other members of this Association. These reports shall give the number of feet and the kind of wood, and shall be made upon blank forms to be provided by the Association, and, when furnished, shall be subject to verification by the Secretary, in such way and manner as the Board of Trustees may deem best. These daily reports shall include all Maple, Beech and Birch Flooring purchased by members from non-members of the Association, and also any Maple, Beech and Birch Flooring manufactured by members from rough lumber belonging to non-members, the same as if shipped or manufactured from the member's own stock. And the Secretary may and shall ascertain and determine whether such statements, so [fol. 12] furnished, are true, full and correct, and for that purpose may examine the books, papers and documents of the member furnishing such statements, and also examine and question the officers, members and employees of such member with respect to the matters and things in such statements contained, or the matters and things such statements should contain.

A record shall be kept of the daily reports, and a sworn statement showing the total deliveries and shipments for each month shall be rendered on or before the 5th of the following month.

Article XVI

Expense Fund

An Expense Fund to provide for the current running expenses of the Association shall be established and maintained by the payment, as often as required by the Board of Trustees, of assessments levied upon the members of the Association of Twenty-Five ($25.00) Dollars for each one (1%) per cent allotted to each member.

Article XVII

Fire

In the event of loss or damage by fire or other interference of any kind in the operation of the mill or business of any member of the Association, the question of the continuance or discontinuance

of his allotment in the Association during that time shall be determined by the Board of Trustees, and its decision shall be final, conclusive and binding upon each and every member of the Association, subject to the right of appeal, as provided in Article VI of these Articles of Association.

[fol. 13] Article XVIII

Discontinuance of Manufacture

Should any member of the Association cease manufacturing Maple, Beech and Birch Flooring during the life of these Articles of Association his allotment shall thereupon terminate and be at an end, and his portion of the moneys of the Association shall be returned to him six (6) months thereafter, less any unpaid dues or assessments, and his proportion of the expenses of the Association shall terminate at the time he ceases the manufacture of such Flooring.

Article XIX

Final Settlement

Immediately after the expiration of these Articles of Association on the 1st day of ——, 191—, the Special Fund, with the increase and gains thereof, and all other moneys and funds of the Association, shall be divided among the members of the Association then in good standing in the ratio of their respective allotments.

It is expressly understood and agreed that the statistics heretofore furnished to the Association, which have been used in arriving at these allotments, are subject to verification and to revision to include all shipments of flooring as classified in Article XV hereof, and that proportionate adjustment shall be made to cover any differences which may be found.

[fol. 19] GOVERNMENT EXHIBIT No. 2

Maple Flooring Manufacturers' Association

Articles of Association

Continued for 6 Months from Jan., 1919 according to Mr. Keehn

[fol. 20] Maple Flooring Manufacturers Association, 801 Stock Exchange Bldg., Chicago

April 23, 1919.

Memorandum for Mr. McKeag of Federal Trade Commission

This is the only sample copy we now have of the Articles of Association of the Maple Flooring Manufacturers Association.

The figures in pencil "1913" "1916," etc., are inserted so this copy will correspond with the copy filed with the Department of Justice, Washington, D. C., December 31, 1912.

The figures in ink "1916" "1919," etc., indicate the extension of the duration of the Articles for three years, from January 1, 1916, as per our letter to the Department of Justice under date of June 27, 1916.

Geo. W. Keehn, Secretary.

[fol. 21] In consideration of the mutual agreements in the following Articles of Association contained, and the advantages and benefits to be derived therefrom, we, whose names are hereunto subscribed, do hereby make, enter into and bind ourselves and our respective successors and assigns by the following

Articles of Association

Article I

Name

The name of this Association shall be the Maple Flooring Manufacturers' Association, and its duration shall be for the period of three years from the 1st day of January, 1916 to the 1st day of January, 1919. 1913*
1916*

Article II

Objects

The objects of this Association shall be as follows: to promote the mutual interests of its members; to establish and maintain uniformity

[*In pencil in copy.]

in trade usages; to encourage and increase the use of Maple, Beech and Birch Flooring in the United States and foreign countries; to adopt uniform standards of grading and manufacture; to exchange information; to collect and disseminate statistics concerning the flooring industry, and to adopt lawful plans for the general development and improvement of that industry.

But this Association shall not fix, regulate or control the price, output, purchase or sale of flooring.

[fol. 22]

Article III

Headquarters

The headquarters of this Association shall be located at Chicago, Illinois.

Article IV

Membership

Any individual, firm or corporation regularly engaged in the manufacture of Maple, Beech, or Birch Flooring in the United States may be a member of this Association. Each member shall be entitled to only one vote and shall have the right to sit in executive session. All applications for membership shall be made in writing to the Secretary, and approved by the Board of Trustees.

New members may be admitted to this Association at any regular or special meeting by a majority vote of the members present, but before being admitted to actual membership such candidate must sign these Articles and make the contribution hereinafter required.

Article V

Officers

The officers of this Association shall consist of a President, two Vice-Presidents, a Secretary, a Treasurer, and a Board of Trustees. The Board of Trustees shall consist of nine members, and the President, the two Vice-Presidents, and the Treasurer shall be members of the Board of Trustees by virtue of their office. The officers and the remaining five members of the Board of Trustees shall be elected by the members of the Association.

[fol. 23] The Board of Trustees shall elect the Secretary of the Association and fix his compensation. The Secretary need not be a member of the Association.

Article VI

Duties and Powers of Officers and Board of Trustees

President

The President shall preside at all meetings of the Association and shall be ex-officio Chairman of the Board of Trustees and ex-officio

member of all standing Committees, and shall call meetings of the Board of Trustees whenever requested in writing to do so by a majority of the Board.

Vice-Presidents

In the absence of the President the first Vice-President shall perform the duties of the President, and in the absence of both President and first Vice-President, the second Vice-President shall perform the duties of the President.

Treasurer

The Treasurer shall keep account of all moneys received and expended for the use of the Association, and shall make disbursements only upon vouchers issued by the Secretary and approved by the President. When his term of office expires, he shall deliver to his successor all moneys, books, papers, and other property belonging to the Association in his possession; and in the absence of such successor he shall deliver the same to the President.

Secretary

It shall be the duty of the Secretary to give notice of and attend all [fol. 24] meetings of the Association and of the Board of Trustees; to keep a record of all their doings; to keep a list of all the members of the Association; collect all assessments and pay them over to the Treasurer; to prepare under the direction of the Board of Trustees a semi-annual report of its transactions and the condition of the Association; and perform any and all duties which shall be required of him by the Board, and generally to devote his best efforts to forward the interests of the Association.

Board of Trustees

The Board of Trustees shall have the power to hold meetings at such times and places as it may deem proper; to appoint committees from the membership of the Board of Trustees, or of the Association; to print and circulate documents, raise funds and disburse the same, and to devise and carry into effect such measures not in conflict with these Articles, as it may deem proper and expedient to promote the objects of the Association, and the Secretary shall at all times be subject to its direction.

The Board of Trustees shall have power to make By-Laws and Regulations for the conduct of its own business and meetings; and for the conduct of the business and meetings of the Association, and for the furthering of the interests confided to its care.

The Board of Trustees shall act as a Board of Arbitration, to hear and determine any complaints and grievances arising between the members of the Association and its decision shall be final, conclusive and binding in each case, subject only to the right of appeal to the

Association by written petition, if the amount involved be $250.00 or more, and such appeal shall be decided by the Association as speedily as possible.

[fol. 25]

Article VII

Election of Officers

The President, the two Vice-Presidents, the Treasurer and five members of the Board of Trustees shall be elected by ballot at the annual meeting of the Association, and they shall continue in office for the term of one year, and until their successors are elected and have qualified. A vote of the majority of the members of the Association shall be necessary to an election.

Article VIII

Vacancies

In case of a vacancy in the Board of Trustees or in any office, the same shall be filled by the Board of Trustees for the unexpired term of the Trustee or officer whose vacancy is so filled.

Article IX

General Meetings

There shall be an annual meeting of the Association for the election of officers and members of the Board of Trustees and the transaction of other business on the fourth Wednesday in January of each year, and notice of such meeting shall be mailed to each member of the Association at least ten days prior to the holding thereof.

Regular meetings of the Association for the transaction of general business shall be held on the third Wednesday in April, July, and October of each year, and notice of such meetings shall be given in the same manner as notice is given for the annual meeting of the Association.

[fol. 26]

Special

Special meetings of the Association may be called by the President or by a majority of the Board of Trustees and notice of such meeting shall be given ten days prior to the holding thereof.

Trustees

There shall be at least two meetings of the Board of Trustees per annum, and time and place of such meetings shall be fixed by the Trustees.

Voting by Mail

When the President shall deem it inexpedient to call a special meeting of the Association, or when the Chairman shall deem it inexpendient to call a special meeting of the Trustees, the President, or

Chairman, as the case may be, may request a vote by mail on any question on which an expression is deemed necessary, and the vote of each member of the Association or Trustee, as the case may be, so given by mail shall have the same force as if given at a regularly convened meeting.

Article X

Salaries and Expenses

All officers and trustees of the Association shall serve without compensation, except the Secretary, whose compensation shall be fixed by the Board of Trustees.

[fol. 27]

Article XI

Bureau of Inspection

The Board of Trustees may employ for the Association an Inspector, who shall be located centrally as regards the Flooring Market. No one shall be eligible to the position of Inspector who is directly or indirectly engaged in the profits of the Flooring Trade. The Inspector shall be under the general control of the Board of Trustees and immediately under the direction of the Secretary.

Article XII

Quorum

Five trustees shall constitute a quorum of the Board of Trustees for the transaction of any and all business. A majority of the members of the Association shall constitute a quorum for the transaction of the business of the Association.

Members of the Association not present at any meeting may be represented and vote by proxy given in writing to any other member of the Association, or to any employee of any individual, firm or corporation member of the Association, provided that no person shall vote more than one proxy.

Article XIII

Special Fund

A fund is hereby established, to be called the Special Fund, and shall consist of the contributions to be made to such Special Fund by the members of the Association, together with the increase and gains thereof. And the contribution of each member to said Special [fol. 28] Fund shall be the amount set opposite the signature of such members to these Articles of Association.

Said Special Fund shall be deposited with a Trust Company, to be chosen by the Association at the first meeting in the month of March, 1916, and held by such Trust Company subject to the joint

signatures of the President, Treasurer and Secretary of the Association. In case of the resignation or inability to act of such Trust Company, the Board of Trustees shall select another Trust Company to fill the unexpired term.

It is expressly agreed by each member of the Association that his share of the Special Fund is deposited as a guarantee that he will carry out all his obligations under these Articles of Association, and that if he shall fail, refuse or neglect to do so, or to pay any dues or assessments as provided in these Articles, then his share of the Special Fund and his interest in any and all other moneys owned or held by the Association, or held by anyone for the Association, shall be forfeited forever to the Association for the use and benefit of its members then in good standing.

Article XIV

General Fund

A fund is hereby established to be called the General Fund and all moneys received by the Association, except the moneys to be paid into the Special Fund, as provided for in Article XIII hereof, shall go into and become a part of the General Fund.

For the purpose of securing moneys for the General Fund, an assessment of Three ($3.00) Dollars per thousand feet shall be levied each month on all shipments during that month in excess of the allotted percentage set opposite the signature of each member.

From this General Fund each member who has shipped during [fol. 29] that month less than his allotted percentage shall be paid Three ($3.00) Dollars per thousand feet on the quantity undershipped down to 75% of his allotment for that month. If a member ship less than 75% of his allotment during any one month, he shall receive Three ($3.00) Dollars per thousand feet on only 25% of his allotment for that month, and the balance shall be held in abeyance until the end of the year, and if at the end of the year he shall have shipped 75% of his allotment for that year the amount so held in abeyance shall then be paid to him. For example, if a member's allotment for any given month is 400,000 feet and his shipments be 250,000 feet, he would have undersold 150,000 feet and his credit balance would be $450.00. Under this Article he would be expected to ship not less than 300,000 feet, or 75% of his allotment, and consequently he would be paid on only 100,000 feet of his undersales, or $300.00, and the remainder of his credit balance, $150.00, would be held in abeyance until the end of the year, and it would then be paid to him provided his shipments for the year equal 75% of his allotment for the year, but if his shipments for the year should fall below the required 75% of his allotment, then this $150.00, or any other amounts that may accrue under this Article, would belong to the entire Association. The term year as used in this Article shall mean the period between January 1st of one year to January 1st of the following year.

All assessments for the General Fund shall be paid to the Secretary

within Five (5) days after such assessment has been made and due notice given. Should any member fail, neglect or refuse to pay the assessment so levied against him within thirty (30) days after such assessment is made, the Trustees shall then draw upon the share of such member in the Special Fund and remit the amount so drawn to the Secretary to pay such assessment and unless the share of such member in said Special Fund shall be restored by such member to its original amount within ten days after notice to him by mail, he [fol. 30] shall on the expiration of said ten days' notice cease to be a member of the Association and his share in all the funds, moneys and property of the Association shall be forfeited to the Association for the use and benefit of its members then in good standing, without any further or other notice or action whatever on the part of the Association, or any of its officers or members; provided, however, that such member of the Association may be reinstated if the Board of Trustees in its sole and absolute discretion shall deem such reinstatement just and proper, and the Board of Trustees shall have the right to impose such terms and conditions in causing such reinstatement, as it may deem just and equitable.

Article XV

Daily Reports

(NOTE.—June 29, 1917.) Narrower than 6" wide, No. 3 Common and poorer, not kiln-dried or end matched is exempt, if used in U. S. Government cantonment work.

Daily reports shall be made by each member of the Association to the Secretary at the close of business each day of all deliveries and shipments of all kinds of Maple, Beech and Birch Flooring, regardless of length, width, thickness or grade, for use within the United States, except six inches and wider No. 3 common and poorer not Klin-dried or end matched, and except Maple, Beech and Birch Flooring purchased from other members of this Association. These reports shall give the number of feet and the kind of wood, and shall be made upon blank forms to be provided by the Association, and, when furnished, shall be subject to verification by the Secretary, in such way and manner as the Board of Trustees may deem best. These daily reports shall include all Maple, Beech and Birch Flooring purchased by members from non-members of the Association, and also any Maple, Beech and Birch Flooring manufactured by members from rough lumber belonging to non-members, the same as if shipped or manufactured from the member's own stock. And the Secretary may and shall ascertain and determine whether [fol. 31] such statements, so furnished, are true, full and correct, and for that purpose may examine the books, papers and documents of the member furnishing such statements, and also examine and question the officers, members and employees of such member with respect to the matters and things in such statements contained, or the matters and things such statements should contain.

A record shall be kept of the daily reports, and a sworn statement showing the total deliveries and shipments for each month shall be rendered on or before the 5th of the following month.

Article XVI

Expense Fund

An Expense Fund to provide for the current running expenses of the Association shall be established and maintained by the payment, as often as required by the Board of Trustees, of assessments levied upon the members of the Association of Twenty-Five ($25.00) Dollars for each one (1%) per cent allotted to each member.

Article XVII

Fire

In the event of loss or damage by fire or other interference of any kind in the operation of the mill or business of any member of the Association, the question of the continuance or discontinuance of his allotment in the Association during that time shall be determined by the Board of Trustees, and its decision shall be final, conclusive and binding upon each and every member of the Association, subject to the right of appeal, as provided in Article VI of these Articles of Association.

[fol. 32]

Article XVIII

Discontinuance of Manufacture

Should any member of the Association cease manufacturing Maple, Beech and Birch Flooring during the life of these Articles of Association his allotment shall thereupon terminate and be at an end, and his portion of the moneys of the Association shall be returned to him six (6) months thereafter, less any unpaid dues or assessments, and his proportion of the expenses of the Association shall terminate at the time he ceases the manufacture of such Flooring.

Article XIX

Final Settlement

Immediately after the expiration of these Articles of Association on the 1st day or January, 1919, the Special Fund, with the increase and gains thereof, and all other moneys and funds of the Association, shall be divided among the members of the Association then in good standing in the ratio of their respective allotments.

It is expressly understood and agreed that the statistics heretofore furnished to the Association, which have been used in arriving at these allotments, are subject to verification and to revision to include all shipments of flooring as classified in Article XV hereof, and that proportionate adjustment shall be made to cover any differences which may be found.

[fol. 36] GOVERNMENT'S EXHIBIT No. 3

Maple Flooring Manufacturers Association

Articles of Association

Jany. 1, 1919, to July 1, 1919

[fol. 37] In consideration of the mutual agreements in the following Articles of Association contained, and the advantages and benefits to be derived therefrom, we, whose names are hereunto subscribed, do hereby make, enter into and bind ourselves and our respective successors and assigns by the following

Articles of Association

Article I

Name

The name of this Association shall be the Maple Flooring Manufacturers Association, and its duration shall be from the 1st day of January, 1919, to the 1st day of July, 1919.

Article II

Objects

The objects of this Association shall be as follows: to promote the mutual interests of its members; to establish and maintain uniformity in trade usages; to encourage and increase the use of Maple, Beech and Birch Flooring in the United States and foreign countries; to adopt uniform standards of grading and manufacture; to exchange information; to collect and disseminate statistics concerning the flooring industry, and to adopt lawful plans for the general development and improvement of that industry.

But this Association shall not fix, regulate or control the price, output, purchase or sale of flooring.

Article III

Headquarters

The headquarters of this Association shall be located at Chicago, Illinois.

Article IV

Membership

Any individual, firm or corporation regularly engaged in the manufacture of Maple, Beech, or Birch Flooring in the United States

[fol. 38] may be a member of this Association. Each member shall be entitled to only one vote and shall have the right to sit in executive session. All applications for membership shall be made in writing to the Secretary, and approved by the Board of Trustees.

New members may be admitted to this Association at any regular or special meeting by a majority vote of the members present, but before being admitted to actual membership such candidate must sign these Articles and make the contribution hereinafter required.

Article V

Officers

The officers of this Association shall consist of a President, two Vice-Presidents, a Secretary, a Treasurer, and a Board of Trustees. The Board of Trustees shall consist of nine members, and the President, two Vice-Presidents, and the Treasurer shall be members of the Board of Trustees by virtue of their office. The officers and the remaining five members of the Board of Trustees shall be elected by the members of the Association.

The Board of Trustees shall elect the Secretary of the Association and fix his compensation. The Secretary need not be a member of the Association.

Article VI

Duties and Powers of Officers and Board of Trustees

President

The President shall preside at all meetings of the Association and shall be ex-officio Chairman of the Board of Trustees and ex-officio member of all standing Committees, and shall call meetings of the Board of Trustees whenever requested in writing to do so by a majority of the Board.

Vice-Presidents

In the absence of the President the first Vice-President shall perform the duties of the President, and in the absence of both Presi-
[fol. 39] dent and first Vice-President, the second Vice-President shall perform the duties of the President.

Treasurer

The Treasurer shall keep account of all moneys received and expended for the use of the Association, and shall make disbursements only upon vouchers issued by the Secretary and approved by the President. When his term of office expires, he shall deliver to his successor all moneys, books, papers, and other property belonging to the Association in his possession; and in the absence of such successor he shall deliver the same to the President.

Secretary

It shall be the duty of the Secretary to give notice of and attend all meetings of the Association and of the Board of Trustees; to keep a record of all their doings; to keep a list of all members of the Association; collect all assessments and pay them over to the Treasurer; to prepare under the direction of the Board of Trustees a semi-annual report of its transactions and the condition of the Association; and perform any and all duties which shall be required of him by the Board, and generally to devote his best efforts to forward the interests of the Association.

Board of Trustees

The Board of Trustees shall have the power to hold meetings at such times and places as it may deem proper; to appoint committees from the membership of the Board of Trustees, or of the Association; to print and circulate documents, raise funds and disburse the same, and to devise and carry into effect such measures not in conflict with these Articles, as it may deem proper and expedient to promote the objects of the Association, and the Secretary shall at all times be subject to its direction.

The Board of Trustees shall have power to make By-Laws and Regulations for the conduct of its own business and meetings; [fol. 40] and for the conduct of the business and meetings of the Association, and for the furthering of the interests confided to its care.

The Board of Trustees shall act as a Board of Arbitration, to hear and determine any complaints and grievances arising between the members of the Association and its decision shall be final, conclusive and binding in each case, subject only to the right of appeal to the Association by written petition, if the amount involved be $250.00 or more, and such appeal shall be decided by the Association as speedily as possible.

Article VII

Election of Officers

The President, the two Vice-Presidents, the Treasurer and five members of the Board of Trustees shall be elected by ballot at the annual meeting of the Association, and they shall continue in office for the term of one year, and until their successors are elected and have qualified. A vote of the majority of the members of the Association shall be necessary to an election.

Article VIII

Vacancies

In case of a vacancy in the Board of Trustees or in any office, the same shall be filled by the Board of Trustees for the unexpired term of the trustee or officer whose vacancy is so filled.

Article IX

General Meetings

There shall be an annual meeting of the Association for the election of officers and members of the Board of Trustees and the transaction of other business on the fourth Wednesday in January of each year, and notice of such meeting shall be mailed to each member of the Association at least ten days prior to the holding thereof.

[fol. 41] Regular meetings of the Association for the transaction of general business shall be held on the third Wednesday in April, July and October of each year, and notice of such meetings shall be given in the same manner as notice is given for the annual meeting of the Association.

Special

Special meetings of the Association may be called by the President or by a majority of the Board of Trustees and notice of such meeting shall be given ten days prior to the holding thereof.

Trustees

There shall be at least two meetings of the Board of Trustees per annum, and time and place of such meetings shall be fixed by the Trustees.

Voting by Mail

When the President shall deem it inexpedient to call a special meeting of the Association, or when the Chairman shall deem it inexpedient to call a special meeting of the Trustees, the President, or Chairman, as the case may be, may request a vote by mail on any question on which an expression is deemed necessary, and the vote of each member of the Association or Trustees, as the case may be, so given by mail shall have the same force as if given at a regularly convened meeting.

Article X

Salaries and Expenses

All officers and trustees of the Association shall serve without compensation, except the Secretary, whose compensation shall be fixed by the Board of Trustees.

Article XI

Bureau of Inspection

The Board of Trustees may employ for the Association an Inspector, who shall be located centrally as regards the Flooring [fol. 42] Market. No one shall be eligible to the position of Inspec-

tor who is directly or indirectly engaged in the profits of the Flooring Trade. The Inspector shall be under the general control of the Board of Trustees and immediately under the direction of the Secretary.

Article XII

Quorum

Five trustees shall constitute a quorum of the Board of Trustees for the transaction of any and all business. A majority of the members of the Association shall constitute a quorum for the transaction of the business of the Association.

Members of the Association not present at any meeting may be represented and vote by proxy given in writing to any other member of the Association, or to any employee of any individual, firm or corporation member of the Association, provided that no person shall vote more than one proxy.

Article XIII

Special Fund

A fund is hereby established, to be called the Special Fund, and shall consist of the contributions to be made to such Special Fund by the members of the Association, together with the increase and gains thereof. And the contribution of each member to said Special Fund shall be at the rate of two hundred and fifty dollars ($250.00) per each one per cent (1%) allotted to him under these Articles of Association.

Said Special Fund shall be deposited with a Trust Company, chosen by the Association, and shall be held by such Trust Company subject to the joint signatures of the President, Treasurer and Secretary of the Association. In case of the resignation or inability to act of such Trust Company, the Board of Trustees shall select another Trust Company to fill the unexpired term.

[fol. 43] It is expressly agreed by each member of the Association that his share of the Special Fund is deposited as a guarantee that he will carry out all his obligations under these Articles of Association, and that if he shall fail, refuse or neglect to do so, or to pay any dues or assessments as provided in these Articles, then his share of the Special Fund and his interest in any and all other moneys owned or held by the Association, or held by anyone for the Association, shall be forfeited forever to the Association for the use and benefit of its members then in good standing.

Article XIV

General Fund

A fund is hereby established to be called the General Fund and all moneys received by the Association, except the moneys to be paid into the Special Fund, as provided for in Article XIII hereof, shall go into and become a part of the General Fund.

For the purpose of securing moneys for the General Fund, an assessment of Three ($3.00) Dollars per thousand feet shall be levied each month on all shipments during that month in excess of the allotted percentage of each member.

From this General Fund each member who has shipped during that month less than his allotted percentage shall be paid Three ($3.00) Dollars per thousand feet on the quantity undershipped down to 75% of his allotment for that month. If a member ship less than 75% of his allotment during any one month, he shall receive Three ($3.00) Dollars per thousand feet on only 25% of his allotment for that month, and the balance shall be held in abeyance until the termination of this agreement on July 1, 1919, and if by July 1, 1919, he shall have shipped of flooring of his own manufacture 75% of his allotment up to July 1, 1919, the amount so held in abeyance shall then be paid to him. For example, if a member's allotment for any given month is 400,000 feet and his shipments be [fol. 44] 250,000 feet, he would have undersold 150,000 feet and his credit balance would be $450.00. Under this Article he would be expected to ship not less than 300,000 feet, or 75% of his allotment, and consequently he would be paid on only 100,000 feet of his undersales, or $300.00, and the remainder of his credit balance, $150.00, would be held in abeyance until July 1, 1919, and it would then be paid to him provided his shipments up to July 1, 1919, of flooring of his own manufacture equal 75% of his allotment up to July 1, 1919, but if his shipments up to July 1, 1919, of flooring of his own manufacture should fall below the required 75% of his allotment, up to July 1, 1919, then this $150.00, or any other amounts that may accrue under this Article, would belong to the entire Association.

All assessments for the General Fund shall be paid to the Secretary within Five (5) days after such assessment has been made and due notice given. Should any member fail, neglect or refuse to pay the assessment so levied against him within thirty (30) days after such assessment is made, the Trustees shall then draw upon the share of such member in the Special Fund and remit the amount so drawn to the Secretary to pay such assessment and unless the share of such member in said Special Fund shall be restored by such member to its original amount within ten days after notice to him by mail, he shall on the expiration of said ten days' notice cease to be a member of the Association and his share in all the funds, moneys and property of the Association shall be forfeited to the Association for the use and benefit of its members then in good standing, without any further or other notice or action whatever on the part of the Association, or any of its officers or members; provided, however, that such member of the Association may be reinstated if the Board of Trustees in its sole and absolute discretion shall deem such reinstatement just and proper, and the Board of Trustees shall have the right to impose such terms and conditions in causing such reinstatement, as it may deem just and equitable.

[fol. 45]

Article XV

Daily Reports

Daily reports shall be made by each member of the Association to the Secretary at the close of business each day of all deliveries and shipments of all kinds of Maple, Beech and Birch Flooring, regardless of length, width, thickness or grade, for use within the United States, except six inches and wider No. 3 Common and poorer not kiln dried or end matched, and except Maple, Beech and Birch Flooring purchased from other members of this Association. These reports shall give the number of feet and the kind of wood, and shall be made upon blank forms to be provided by the Association, and, when furnished, shall be subject to verification by the Secretary, in such way and manner as the Board of Trustees may deem best. These daily reports shall include all Maple, Beech and Birch Flooring Purchased by members from non-members of the Association, and also any Maple, Beech and Birch Fooring manufactured by members from rough lumber belonging to non-members, the same as if shipped or manufactured from the members' own stock. And the Secretary or his assistants may and shall ascertain and determine whether such statements, so furnished, are true, full and correct, and for that purpose may examine the books, papers and documents of the member furnishing such statements, and also examine and question the officers, members and employees of such member with respect to the matters and things in such statements contained, or the matters and things such statements should contain.

A record shall be kept of the daily reports, and a statement showing the total deliveries and shipments for each month shall be rendered on or before the 5th of the following month.

Article XVI

Expense Fund

An Expense Fund to provide for the current running expenses of the Association shall be established and maintained by the payment, [fol. 46] as often as required by the Board of Trustees, of assessments levied upon the members of the Association of Twenty-five ($25.00) Dollars per each one (1%) per cent. allotted to each member under these Articles of Association.

Article XVII

Fire

In the event of loss or damage by fire or other interference of any kind in the operation of the mill or business of any member of the Association, the question of the continuance or discontinuance of his allotment in the Association during that time shall be determined

by the Board of Trustees, and its decision shall be final, conclusive and binding upon each and every member of the Association, subject to the right of appeal, as provided in Article VI of these Articles of Association.

Article XVIII

Discontinuance of Manufacture

Should any member of the Association cease manufacturing Maple, Beech and Birch Flooring during the life of these Articles of Association his allotment shall thereupon terminate and be at an end, and his portion of the moneys of the Association shall be returned to him six (6) months thereafter, less any unpaid dues or assessments, and his proportion of the expenses of the Association shall terminate at the time he ceases the manufacture of such Flooring.

Article XIX

Final Settlement

Immediately after the expiration of these Articles of Association on the 1st day of July, 1919, the Special Fund, with the increase and gains thereof, and all other moneys and funds of the Association, shall be divided among the members of the Association then in good standing and in the ratio of their respective allotments.

[fol. 51] GOVERNMENT'S EXHIBIT No. 4

Maple Flooring Manufacturers' Association

Articles of Association

July 1, 1919, to July 1, 1922

Article XIV Discontinued March 31, 1920

[fol. 52] In consideration of the mutual agreements in the following Articles of Association contained, and the advantages and benefits to be derived therefrom, we, whose names are hereunto subscribed, do hereby make, enter into and bind ourselves and our respective successors and assigns by the following

Articles of Association

Article I

Name

The name of this Association shall be the Maple Flooring Manufacturers' Association, and its duration shall be from the 1st day of July, 1919, to the 1st day of July, 1922.

Article II

Objects

The objects of this Association shall be as follows: to promote the mutual interests of its members; to establish and maintain uniformity in trade usages; to encourage and increase the use of Maple, Beech and Birch Flooring in the United States and foreign countries; to adopt uniform standards of grading and manufacture; to exchange information; to collect and disseminate statistics concerning the flooring industry, and to adopt lawful plans for the general development and improvement of that industry.

But this Association shall not fix, regulate or control the price, output, purchase or sale of flooring.

Article III

Headquarters

The headquarters of this Association shall be located at Chicago, Illinois.

Article IV

Membership

Any individual, firm or corporation regularly engaged in the manufacture of Maple, Beech, or Birch Flooring in the United States

may be a member of this Association. Each member shall be entitled [fol. 53] to only one vote and shall have the right to sit in executive session. All applications for membership shall be made in writing to the Secretary, and approved by the Board of Trustees.

New members may be admitted to this Association at any regular or special meeting by a majority vote of the members present, but before being admitted to actual membership such candidate must sign these Articles and make the contribution hereinafter required.

Article V

Officers

The officers of this Association shall consist of a President, two Vice-Presidents, a Secretary, a Treasurer, and a Board of Trustees. The Board of Trustees shall consist of nine members, and the President, the two Vice-Presidents, and the Treasurer shall be members of the Board of Trustees by virtue of their office. The officers and the remaining five members of the Board of Trustees shall be elected by the members of the Association.

The Board of Trustees shall elect the Secretary of the Association and fix his compensation. The Secretary need not be a member of the Association.

Article VI

Duties and Powers of Officers and Board of Trustees

President

The President shall preside at all meetings of the Association and shall be ex-officio Chairman of the Board of Trustees and ex-officio member of all standing Committees, and shall call meetings of the Board of Trustees whenever requested in writing to do so by a majority of the Board.

Vice-Presidents

In the absence of the President the first Vice-President shall perform the duties of the President, and in the absence of both [fol. 54] President and first Vice-President, the second Vice-President shall perform the duties of the President.

Treasurer

The Treasurer shall keep account of all moneys received and expended for the use of the Association, and shall make disbursements only upon vouchers issued by the Secretary and approved by the President. When his term of office expires, he shall deliver to his successor all moneys, books, papers, and other property belonging to the Association in his possession; and in the absence of such successor he shall deliver the same to the President.

Secretary

It shall be the duty of the Secretary to give notice of and attend all meetings of the Association and of the Board of Trustees; to keep a record of all their doings; to keep a list of all the members of the Association; collect all assessments and pay them over to the Treasurer; to prepare under the direction of the Board of Trustees a semi-annual report of its transactions and the condition of the Association; and perform any and all duties which shall be required of him by the Board and generally to devote his best efforts to forward the interests of the Association.

Board of Trustees

The Board of Trustees shall have the power to hold meetings at such times and places as it may deem proper; to appoint committees from the membership of the Board of Trustees, or of the Association; to print and circulate documents, raise funds and disburse the same, and to devise and carry into effect such measures not in conflict with these Articles, as it may deem proper and expedient to promote the objects of the Association, and the Secretary shall at all times be subject to its direction.

The Board of Trustees shall have power to make By-Laws and Regulations for the conduct of its own business and meetings; and [fol. 55] for the conduct of the business and meetings of the Association, and for the furthering of the interests confided to its care.

The Board of Trustees shall act as a Board of Arbitration, to hear and determine any complaints and grievances arising between the members of the Association and its decision shall be final, conclusive and binding in each case, subject only to the right of appeal to the Association by written petition, if the amount involved be $250.00 or more, and such appeal shall be decided by the Association as speedily as possible.

Article VII

Election of Officers

The President, the two Vice-Presidents, the Treasurer and five members of the Board of Trustees shall be elected by ballot at the annual meeting of the Association, and they shall continue in office for the term of one year, and until their successors are elected and have qualified. A vote of the majority of the members of the Association shall be necessary to an election.

Article VIII

Vacancies

In case of a vacancy in the Board of Trustees or in any office, the same shall be filled by the Board of Trustees for the unexpired term of the trustee or officer whose vacancy is so filled.

Article IX

General Meetings

There shall be an annual meeting of the Association for the election of officers and members of the Board of Trustees and the transaction of other business on the fourth Wednesday in January of each year, and notice of such meeting shall be mailed to each member of the Association at least ten days prior to the holding thereof.

[fol. 56] Regular meetings of the Association for the transaction of general business shall be held on the third Wednesday in April, July and October of each year, and notice of such meeting shall be given in the same manner as notice is given for the annual meeting of the Association.

Special

Special meetings of the Association may be called by the President or by a majority of the Board of Trustees and notice of such meeting shall be given ten days prior to the holding thereof.

Trustees

There shall be at least two meetings of the Board of Trustees per annum, and time and place of such meetings shall be fixed by the Trustees.

Voting by Mail

When the President shall deem it inexpedient to call a special meeting of the Association, or when the Chairman shall deem it inexpedient to call a special meeting of the Trustees, the President, or Chairman, as the case may be, may request a vote by mail on any question on which an expression is deemed necessary, and the vote of each member of the Association or Trustees, as the case may be, so given by mail shall have the same force as if given at a regularly convened meeting.

Article X

Salaries and Expenses

All officers and trustees of the Association shall serve without compensation, except the Secretary, whose compensation shall be fixed by the Board of Trustees.

Article XI

Bureau of Inspection

The Board of Trustees may employ for the Association an Inspector, who shall be located centrally as regards the Flooring Mar-

[fol. 57] ket. No one shall be eligible to the position of Inspector who is directly or indirectly engaged in the profits of the Flooring Trade. The Inspector shall be under the general control of the Board of Trustees and immediately under the direction of the Secretary.

Article XII

Quorum

Five trustees shall constitute a quorum of the Board of Trustees for the transaction of any and all business. A majority of the members of the Association shall constitute a quorum for the transaction of the business of the Association.

Members of the Asssociation not present at any meeting may be represented and vote by proxy given in writing to any other member of the Association, or to any employee of any individual, firm or corporation member of the Association, provided that no person shall vote more than one proxy.

Article XIII

Special Fund

A fund is hereby established, to be called the Special Fund, and shall consist of the contributions to be made to such Special Fund by the members of the Association, together with the increase and gains thereof. And the contribution of each member to said Special Fund shall be at the rate of two hundred and fifty dollars ($250.00) per each one per cent (1%) allotted to him under these Articles of Association.

Said Special Fund shall be deposited with a Trust Company, chosen by the Association, and shall be held by such Trust Company subject to the joint signatures of the President, Treasurer and Secretary of the Association. In case of the resignation or inability to act of such Trust Company, the Board of Trustees shall select another Trust Company to fill the unexpired term.

[fol. 58] It is expressly agreed by each member of the Association that his share of the Special Fund is deposited as a guarantee that he will carry out all his obligations under these Articles of Association, and that if he shall fail, refuse or neglect to do so, or to pay any dues or assessments as provided in these Articles, then his share of the Special Fund and his interest in any and all other moneys owned or held by the Association, or held by anyone for the Association, shall be forfeited forever to the Association for the use and benefit of its members then in good standing.

Article XIV

General Fund

Discontinued March 31, 1920

A fund is hereby esetablished to be called the General Fund and all moneys received by the Association, except the moneys to be paid into the Special Fund, as provided for in Article XIII hereof, shall go into and become a part of the General Fund.

For the purpose of securing moneys for the General Fund, an assessment of Three ($3.00) Dollars per thousand feet shall be levied each month on all shipments during that month in excess of the allotted percentage of each member.

From this General Fund each member who has shipped during that month less than his allotted percentage shall be paid Three ($3.00) Dollars per thousand feet on the quantity undershipped down to 75% of his allotment for that month. If a member ship less than 75% of his allotment during any one month, he shall receive Three ($3.00) Dollars per thousand feet on only 25% of his allotment for that month, and the balance shall be held in abeyance until the end of the year, and if at the end of the year he shall have shipped of flooring of his own manufacture 75% of his allotment for that year, the amount so held in abeyance shall then be paid to him. For example, if a member's allotment for any given month is 400,000 feet and his shipments be 250,000 feet, he would have [fol. 59] undersold 150,000 feet and his credit balance would be $450.00. Under this Article he would be expected to ship not less than 300,000 feet, or 75% of his allotment, and consequently he would be paid on only 100,000 feet of his undersales, or $300.00, and the remainder of his credit balance, $150.00, would be held in abeyance until the end of the year, and it would then be paid to him provided his shipments for the year, of flooring of his own manufacture equal 75% of his allotment for the year, but if his shipments for the year of flooring of his own manufacture should fall below the required 75% of his allotment, for the year, then this $150.00, or any other amounts that may accrue under this Article, would belong to the entire Association. The term year as used in this Article shall mean the period between July 1st of one year to July 1st of the following year.

All assessments for the General Fund shall be paid to the Secretary within Five (5) days after such assessment has been made and due notice given. Should any member fail, neglect or refuse to pay the assessment so levied against him within thirty (30) days after such assessment is made, the Trustees shall then draw upon the share of such member in the Special Fund and remit the amount so drawn to the Secretary to pay such assessment and unless the share of such member in said Special Fund shall be restored by such member to its original amount within ten days after notice to him by mail, he shall on the expiration of said ten days' notice cease

to be a member of the Association and his share in all the funds, moneys and property of the Association shall be forfeited to the Association for the use and benefit of its members then in good standing, without any further or other notice or action whatever on the part of the Association, or any of its officers or members; provided, however, that such member of the Association may be reinstated if the Board of Trustees in its sole and absolute discretion shall deem such reinstatement just and proper, and the Board of Trustees shall have the right to impose such terms and conditions in causing such reinstatement, as it may deem just and equitable.

[fol. 60]

Article XV

Daily Reports

Daily reports shall be made by each member of the Association to the Secretary at the close of business each day of all deliveries and shipments of all kinds of Maple, Beech and Birch Flooring, regardless of length, width, thickness or grade, for use within the United States, except six inches and wider No. 3 Common and poorer not kiln dried or end matched, and except Maple, Beech and Birch Flooring purchased from other members of this Association. These reports shall give the number of feet and the kind of wood, and shall be made upon blank forms to be provided by the Association, and, when furnished, shall be subject to verification by the Secretary, in such way and manner as the Board of Trustees may deem best. These daily reports shall include all Maple, Beech and Birch Flooring Purchased by members from non-members of the Association, and also any Maple, Beech and Birch Flooring manufactured by members from rough lumber belonging to non-members, the same as if shipped or manufactured from the member's own stock. And the Secretary or his assistants may and shall ascertain and determine whether such statements, so furnished, are true, full and correct, and for that purpose may examine the books, papers and documents of the member furnishing such statements, and also examine and question the officers, members and employees of such member with respect to the matters and things in such statements contained, or the matters and things such statements should contain.

A record shall be kept of the daily reports, and a statement showing the total deliveries and shipments for each month shall be rendered on or before the 5th of the following month.

Article XVI

Expense Fund

An Expense Fund to provide for the current running expenses of the Association shall be established and maintained by the payment, [fol. 61] as often as required by the Board of Trustees, of assessments levied upon the members of the Association of Twenty-Five

($25.00) Dollars per each one (1%) per cent. allotted to each member under these Articles of Association.

Article XVII

Fire

In the event of loss or damage by fire or other interference of any kind in the operation of the mill or business of any member of the Association, the qusetion of the continuance or discontinuance of his allotment in the Association during that time shall be determined by the Board of Trustees, and its decision shall be final, conclusive and binding upon each and every member of the Association, subject to the right of appeal, as provided in Article VI of these Articles of Association.

Article XVIII

Discontinuance of Manufacture

Should any member of the Association discontinue the manufacture of Maple, Beech and Birch flooring during four (4) consecutive months, or if he does not manufacture fifty per cent or more of his allotted ratio of shipments during four (4) consecutive months, his allotment shall thereupon be automatically suspended and held in abeyance until he resumes the manufacture of Maple, Beech and Birch flooring to an extent equal to fifty per cent or more of his allotted ratio of shipments, whereupon his allotment shall then be restored to him. And should any member cease altogether the manufacture of Maple, Beech and Birch flooring, his allotment shall thereupon terminate and be at an end, and his portion of the moneys of the Association shall be returned to him (6) months thereafter, less any unpaid dues and assessments, and his proportion of the expenses of the Association shall terminate at the time he ceases altogether the manufacture of such flooring.

Article XIX

Final Settlement

Immediately after the expiration of these Articles of Association on the 1st day of July, 1922, the Special Fund, with the increase and gains thereof, and all other moneys and funds of the Association, shall be divided among the members of the Association then in good standing and in the ratio of their respective allotments.

[fol. 66] GOVERNMENT'S EXHIBIT No. 5

Maple Flooring Manufacturers Association

Articles of Association

October 1, 1921, to July 1, 1922

[fol. 67] We, the undersigned, manufacturers of Maple, Beech and Birch flooring, hereby form an Association and adopt and agree to be bound by the following

Articles of Association

Article I

Name

The name of this Association shall be the Maple Flooring Manufacturers Association, and its duration shall be from the 1st day of October, 1921, to the 1st day of July, 1922.

Article II

Objects

Section 1. The objects of this Association shall be as follows: To promote the mutual interests of its members; to establish and maintain uniformity in trade usages; to encourage and increase the use of Maple, Beech and Birch flooring in the United States and foreign countries; to exchange information concerning the character and nature of actually completed and closed business transactions of its members; to collect and disseminate statistics concerning the flooring industry; to establish and enforce uniform grades and standards of products; to constantly improve methods of manufacture; to provide architect, dealer and builder with an organized and always available guarantee of quality; to protect the integrity of the product and stimulate its more intelligent and economical use, and to adopt lawful plans for the general development and improvement of the industry.

Section 2. But this Association shall not fix, regulate or control the price, output, purchase or sale of flooring.

[fol. 68] Article III

Headquarters

The headquarters of this Association shall be located at Chicago, Illinois.

Article IV

Membership

Section 1. Any individual, firm or corporation regularly engaged in the manufacture of Maple, Beech, or Birch flooring in the United States may be a member of this Association. Each member shall be entitled to only one vote and shall have the right to sit in executive session. All applications for membership shall be made in writing to the Secretary, and approved by the Board of Trustees.

Section 2. New members may be admitted to this Association at any regular or special meeting by a majority vote of the members present, but before being admitted to actual membership such candidate must sign these Articles and make the contribution to the Special Fund as hereinafter required.

Article V

Officers

Section 1. The officers of this Association shall consist of a President, two Vice Presidents, a Treasurer, a Secretary, and a Board of Trustees. The Board of Trustees shall consist of nine members, and the President, the two Vice Presidents, and the Treasurer shall be members of the Board of Trustees by virtue of their office. The officers and the remaining five members of the Board of Trustees shall be elected by the members of the Association.

[fol. 69] Section 2. The Board of Trustees shall elect the Secretary of the Association and fix his compensation. The Secretary need not be a member of the Association.

Article VI

Duties and Powers of Officers and Board of Trustees.

President

Section 1. The President shall preside at all meetings of the Association and shall be ex officio member of all standing committees, and shall call meetings of the Board of Trustees whenever requested in writing to do so by a majority of the Board.

Vice Presidents

Section 2. In the absence of the President the First Vice President shall perform the duties of the President, and in the absence of both President and First Vice President, the Second Vice President shall perform the duties of the President.

Treasurer

Section 3. The Treasurer shall keep account of all moneys received and expended for the use of the Association, and shall

make disbursements only upon vouchers issued by the Secretary and approved by the President. When his term of office expires, he shall deliver to his successor all moneys, books, papers, and other property belonging to the Association in his possession; and in the absence of such successor he shall deliver the same to the President.

Secretary

Section 4. It shall be the duty of the Secretary to give notice of and attend all meetings of the Association and of the Board of [fol. 70] Trustees; to keep a record of all their doings; to keep a list of all the members of the Association; collect all assessments and pay them over to the Treasurer; to prepare under the direction of the Board of Trustees a semi-annual report of its transactions and the conditions of the Association; and perform any and all duties which shall be required of him by the Board and generally to devote his best efforts to forward the interests of the Association.

Board of Trustees

Section 5. The Board of Trustees shall have the power to hold meetings at such times and places as it may deem proper; to appoint committees from the membership of the Board of Trustees, or of the Association; to print and circulate documents, raise funds and disburse the same, and to devise and carry into effect such measures not in conflict with these Articles, or the law of the land, as it may deem proper and expedient to promote the objects of the Association, and the Secretary shall at all times be subject to its direction.

Section 6. The Board of Trustees shall have power to make By-Laws and Regulations for the conduct of its own business and meetings; and for the conduct of the business and meetings of the Association, and for the furthering of the interests confided to its care.

Section 7. The Board of Trustees shall act as a Board of Arbitration, to hear and determine any complaints and grievances arising between the members of the Association, or between the Association and any of its members, and the decision of the Board of Trustees shall be final, conclusive and binding in each case, subject only to the right of appeal to the Association by written petition to be submitted to the Association within thirty days from the time the decision of the Board of Trustees is rendered, and such appeal shall be decided by the Association as speedily as possible.

[fol. 71]

Article VII

Election of Officers

The President, the two Vice Presidents, the Treasurer and five members of the Board of Trustees shall be elected by ballot at the first meeting of the Association, and they shall continue in office until the expiration of these Articles of Association. A vote of the majority of the members of the Association shall be necessary to an election.

Article VIII

Vacancies

In case of a vacancy in the Board of Trustees or in any office, the same shall be filled by the Board of Trustees for the unexpired term of the trustee or officer whose vacancy is so filled.

Article IX

Meetings

Section 1. Regular meetings of the Association for the transaction of general business shall be held on the third Wednesday in November, 1921, and in February, April and June, 1922, and notice of such meetings shall be given at least five days prior to the holding thereof.

Section 2. Special meetings of the Association may be called by the President or by a majority of the Board of Trustees and notice of such meeting shall be given at least five days prior to the holding thereof.

Section 3. Meetings of the Board of Trustees shall be held at any time whenever called by the President or by a majority of the Board. The time and place of such meeting shall be fixed by the Trustees.

[fol. 72]

Voting by Mail

Section 4. When the President shall deem it inexpedient to call a meeting of the Association, or of the Board of Trustees, he may request a vote by mail on any question on which an expression is deemed necessary, and the vote of each member of the Association or of the Board of Trustees, as the case may be, so given by mail shall have the same force as if given at a regularly convened meeting.

Article X

Quorum

Section 1. Five trustees shall constitute a quorum of the Board of Trustees for the transaction of any and all business. A majority of the members of the Association shall constitute a quorum for the transaction of the business of the Association.

Section 2. Members of the Association not present at any meeting may be represented and vote by proxy given in writing to any other member of the Association, or to any employee of any individual, firm or corporation member of the Association, provided that no person shall vote for more than one proxy.

Article XI

Salaries and Expenses

All officers and trustees of the Association shall serve without compensation, except the Secretary, whose compensation shall be fixed by the Board of Trustees.

[fol. 73]

Article XII

Bureau of Inspection

The Board of Trustees may employ for the Association an Inspector, who shall be located centrally as regards the flooring market. No one shall be eligible to the position of Inspector who is directly or indirectly engaged in the profits of the flooring trade. The Inspector shall be under the general control of the Committee on Grades and immediately under the direction of the Secretary.

Article XIII

Special Fund

Section 1. A fund is hereby established, to be called the Special Fund, and shall consist of the contributions to be made to such Special Fund by the members of the Association, together with the increase and gains thereof. And the contribution of each member to said Special Fund shall be at the rate of two hundred and fifty dollars ($250) per each one per cent (1%) allotted to him under these Articles of Association.

Section 2. Said Special Fund shall be deposited with a trust company, chosen by the Board of Trustees, and shall be held by such trust company subject to the joint signatures of the President, Treasurer and Secretary of the Association. In case of the resignation or inability to act of such trust company, the Board of Trustees shall select another trust company to fill the unexpired term.

Section 3. It is expressly agreed by each member of the Association that his share of the Special Fund is deposited as a guarantee that he will carry out all his obligations under these Articles of Association, and that if he shall fail, refuse or neglect to do so, or to [fol. 74] pay any dues or assessments as provided in these Articles, then his share of the Special Fund and his interest in any and all other moneys owned or held by the Association, or held by anyone for the Association, shall be forfeited forever to the Association for the use and benefit of its remaining members then in good standing. See #XX.

Article XIV

Determining Average Cost

Section 1. The sound business principle advocated by the Federal Trade Commission that manufacturers should carefully consider the

question of cost in manufacturing and selling their product is recognized by the Association and is hereby adopted as the only scientific method of conducting the business of manufacturing and marketing Maple, Beech and Birch flooring.

Section 2. For the purpose of furnishing to its members information regarding the average cost of manufacturing and marketing Maple, Beech and Birch flooring, Surveys of Costs to ascertain such average cost shall be made from time to time by the Association and such Surveys of Costs shall be filed with the Federal Trade Commission at Washington, D. C., if the Commission so desires.

Section 3. In the judgment of the Association the following fundamental elements constitute the basis of ascertaining the average cost of Maple, Beech and Birch flooring to the manufacturers when manufactured, sold and delivered f. o. b. cars at the flooring plant:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling flooring and loading it in cars at the flooring plant;

(c) Interest on the capital actually invested in the flooring busi- [fol. 75] ness at the rate of six per centum per annum;

(d) Annual depreciation of plant as allowed by the government;

(e) The usual overhead charges incurred in carrying on the flooring business; and

(f) A reasonable allowance to provide for contingencies and unforeseen hazards incident to manufacturing operations. This allowance is estimated at five per cent of the average cost f. o. b. cars at the flooring plant.

Article XV

General Fund

Section 1. A fund is hereby established to be called the General Fund, and all moneys received by the Association, except the moneys to be paid into the Special Fund, as provided for in Article XIII hereof, shall go into and become a part of the General Fund.

Section 2. For the purpose of securing moneys for the General Fund, an assessment of Four ($4) Dollars per thousand feet shall be levied each month on all shipments during that month in excess of the allotted percentage of each member.

Section 3. From this General Fund each member who has shipped during that month less than his allotted percentage shall be paid Four ($4) Dollars per thousand feet on the quantity undershipped down to 75 per cent of his allotment for that month. If a member ships less than 75 per cent of his allotment during any one month, he shall receive Four ($4) Dollars per thousand feet on only 25

per cent of his allotment for that month, and the balance shall be held in abeyance until the termination of this agreement on July 1, 1922, and if by July 1, 1922, he shall have shipped of flooring of his own manufacture 75 per cent of his allotment up to July 1, 1922, the amount so held in abeyance shall then be paid to him. For [fol. 76] example, if a member's allotment for any given month is 400,000 feet and his shipments be 250,000 feet, he would have undersold 150,000 feet and his credit balance would be $600. Under the provisions of this Article he would be expected to ship not less than 300,000 feet, or 75 per cent of his allotment, and consequently he would be paid on only 100,000 feet of his undersales, or $400, and the remainder of his credit balance, $200, would be held in abeyance until July 1, 1922, and it would then be paid to him provided his shipments up to July 1, 1922, of flooring of his own manufacture equal 75 per cent of his allotment up to July 1, 1922, but if his shipments up to July 1, 1922, of flooring of his own manufacture should fall below the required 75 per cent of his allotment up to July 1, 1922, then this $200 or any other amounts that may accrue under this Article, shall belong to the entire Association.

Article XVI

Daily Reports

Section 1. Daily reports shall be made by each member of the Association to the Secretary at the close of business each day of all deliveries and shipments of all kinds of Maple, Beech and Birch flooring, regardless of length, width, thickness or grade, for use within the United States, except six inches and wider No. 3 common and poorer not kiln dried or end matched, and except Maple, Beech and Birch flooring purchased from other members of this Association.

Section 2. These daily reports shall include all Maple, Beech and Birch flooring purchased by members from non-members of the Association, and also any Maple, Beech and Birch flooring manufactured by members from rough lumber belonging to non-members, the same as if shipped or manufactured from the member's own stock.

Section 3. These daily reports shall give the number of feet and [fol. 77] the kind of wood, and shall be made upon blank forms to be provided by the Association, and, when furnished, shall be subject to verification by the Secretary, in such way and manner as the Board of Trustees may deem best. And the Secretary or his assistants may and shall ascertain and determine whether such reports so furnished are true, full and correct, and for that purpose may examine the books, papers and documents of the member furnishing such reports, and also examine and question the officers and employees of such members with respect to the matters and things in such reports contained, or the matters and things such reports should contain.

Section 4. A record shall be kept of the daily reports, and a statement showing the total deliveries and shipments for the month shall be rendered on or before the 5th of the following month.

Article XVII

Expense Fund

An Expense Fund to provide for the current running expenses of the Association shall be established and maintained by the payment, as often as required by the Board of Trustees, of assessments levied upon the members of the Association of Twenty-five ($25) Dollars per each one (1%) per cent allotted to each member under these Articles of Association.

Article XVIII

Fire or Other Interference

In the event of loss or damage by fire or other interference of any kind in the operation of the mill or business of any member of the Association, the question of the continuance or discontinuance of his [fol. 78] allotment in the Association during that time shall be determined by the Board of Trustees, and its decision shall be final, conclusive and binding upon each and every member of the Association, subject to the right of appeal, as provided in Section 7 of Article VI of these Articles of Association.

Article XIX

Discontinuance of Manufacture

Should any member of the Association cease manufacturing Maple, Beech and Birch flooring during the life of these Articles of Association his allotment shall thereupon terminate and be at an end, and his portion of the moneys of the Association shall be returned to him six (6) months thereafter, less any unpaid dues or assessments, and his proportion of the expenses of the Association shall terminate at the time he ceases the manufacture of such flooring.

Article XX

Final Settlement

Immediately after the expiration of these Articles of Association on the 1st day of July, 1922, the Special Fund, with the increase and gains thereof, and all other moneys and funds of the Association, shall be divided among the members of the Association then in good standing and in the ratio of their then respective allotments.

[fol. 83] GOVERNMENT'S EXHIBIT No. 6

Maple Flooring, Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

September 16, 1921.

To members.

GENTLEMEN: In accordance with your instructions at the last general meeting of the Association, the proposed revision of the Articles of Association has been drafted and in order that you may have an opportunity to study them before the next meeting is held, we are enclosing a copy which, for your greater convenience, is in printed form. The printer is holding the type set up so that further revisions can be made, if desired.

Several changes are suggested in this proposed revision, namely:

Article II "Objects"—have been made more general and include "the exchange of information concerning the character and nature of actually completed and closed business transactions of its members." This refers to the Weekly Sales Reports, etc.

Article XIV "Determining Average Cost" is entirely new.

Article XIX is modified so that a member would not be compelled to manufacture at least 50% of his allotment during consecutive periods of four months in order to retain his allotment. This modification is in accord with all of our previous Articles of Association, excepting the present one, which was adopted to run from July 1, 1919 to July 1, 1922.

It would seem that the allotments as agreed upon in our present Articles of Association, which allotments were to be in force from July 1, 1919 to July 1, 1922, should govern from October 1, 1921 to July 1, 1922, because each member has already agreed to his allotment to run to July 1, 1922, and if we begin changing allotments, there will be no end to it. Inasmuch as the allotments were suspended from April 1, 1920 to October 1, 1921, a period of 18 months or one-half of the three-year period originally agreed upon, there should be no particular hardship on any member to reinstate his allotment from October 1, 1921 to July 1, 1922, being the nine months remaining of the three years originally agreed upon.

The following is a schedule of the allotted ratios in M feet and in percentages as agreed upon as at July 1, 1919 to run for three years:

No.	Member	Ratio in M feet	Per cent
2.	Young	8,802	6.58
3.	Mitchell	8,020	5.99
4.	Wis. L. & L. Co.	9,115	6.81
5.	Cobbs & Mitchell	9,952	7.44
7.	Stephenson	6,786	5.07
14.	Cummer-Diggins	2,451	1.83
22.	Osgood & Blodgett	644	.48
23.	Holt Hardwood	4,281	3.20
24.	Kerry & Hanson	5,744	4.29
26.	East Jordan	3,911	2.92
30.	Nichols & Cox	4,312	3.22
33.	Strable	6,559	4.90
34.	Foster-Latimer	2,517	1.88
37.	West Michigan	3,713	2.77
42.	J. W. Wells L. Co.	4,387	3.28
44.	Cooperage	7,290	5.45
45.	Flanner-Steger	4,319	3.23
47.	Wm. Horner	31,189	23.31
48.	North Branch	2,843	2.12
49.	Bigelow-Cooper	5,726	4.28
50.	Kneeland-McLurg	1,260	.95
		133,830	100%

[fol. 84] If it is thought desirable that the form of membership should be the same for all members, allotments would have to be arranged for the Wilce Flooring Company, John Schroeder Lumber Company and the Oval Wood Dish Corporation. This would be a simple matter and if allotments are arranged for them, it would not disturb the ratios in M feet but would, of course, change the allotted percentages, but the allotted percentages would be of the same relative value, practically speaking, because, while the percentages themselves would be smaller, they would apply to a larger volume of shipments.

It is now expected that a general meeting of the Association will be held on Friday, the 23d, and that a meeting of the Special Committee will be held on Thursday, the 22d, in order to draft some simple memorandum along the lines suggested at the last meeting and submit same to the general meeting on the 23d.

Conditions in the industry as reflected in the Weekly Sales Reports are greatly demoralized, as all of you, of course, know, and if any progress whatever is to be made in the work of the Association, it is absolutely necessary that every member be represented at the next meeting, with full power to act, so that definite conclusions can be arrived at then and there.

As soon as Dr. Earle, as President of the Association, fixes the date of the next general meeting, we will advise you promptly and we will also request the Special Committee to hold a meeting on the day previous.

Yours very truly, George W. Keehn, Secretary.

[fol. 85] GOVERNMENT'S EXHIBIT No. 7

Maple Flooring, Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

October 24, 1921.

To members.

GENTLEMEN: We regret to advise you that two of the members upon whom I called last week, namely Nichols & Cox Lumber Company and Holt Hardwood Company, in regard to the adoption of the proposed new Articles of Association which include the reinstatement of the allotment feature from October 1, 1921 to July 1, 1922, could not see their way clear to join with the other members who have already expressed themselves in the affirmative.

Nichols & Cox Lumber Company feel that it would work a hardship upon them to reinstate the allotment feature without increasing their allotted ratio in M feet to be more consistent, as they see it, with their volume of production and shipments under their new conditions and in view of their increased facilities in the flooring business.

Mr. Dewey of Bigelow-Cooper Company says that we can count them in on the same basis and under the same conditions as the other members who have expressed their willingness to reinstate the allotment plan and while they do not feel that their allotment is as much as they think it should be, they will not raise that question at all, but will go along with the other members from October 1st to July 1st next.

Mr. Flanner of Flanner-Steger Land & Lumber Company called at the office to see us before I left Chicago on this trip, and said they would wait to see what the Holt Hardwood Company would do before giving a definite answer one way or the other.

Mr. Holt and Mr. W. L. De Witt of the Holt Hardwood Company had gone over this subject very fully by my arrival at Oconto on the 22d, and after a long talk with Mr. De Witt and also with Mr. Holt and Mr. De Witt together, their final decision was not to join with the other members in the reinstatement of the allotment plan unless, in the opinion of Mr. Holt's own attorney, the allotment plan is not illegal, and also that their allotment be readjusted to be more in harmony with present conditions with them as reflected in the volume of their production and shipments of flooring during a more recent period than the one used in basing the allotted percentages. They feel that the 27 months used in their case of the 42 months' period, from January 1916—June 1919, taken as the basis of the allotted ratios, does not work out equitably with them because during the 27 months period their flooring business was not as much developed as it has been during the past year or two, and that more recent conditions with them should be considered in arriving at their allotment. Mr. Holt expressed himself as being heartily in favor of carrying on the statistical and other work of the Association along the lines of the Michigan Hardwood Manufacturers Association and the Northern Hemlock and Hard-

wood Manufacturers Association without the allotment feature in case it fails of adoption.

Regretting that we cannot make a more favorable report at this time, we are,

Yours very truly, George W. Keehn, Secretary.

[fol. 86] GOVERNMENT'S EXHIBIT No. 8

Maple Flooring Manufacturers Association

Articles of Association

January 1, 1922, to January 1, 1925

[fol. 87] We, the undersigned manufacturers of Maple, Beech and Birch flooring, hereby form an Association and adopt and agree to be bound by the following

Articles of Association

Article I

Name

The name of this Association shall be the Maple Flooring Manufacturers Association, and its duration shall be from the 1st day of January, 1922, to the 1st day of January, 1925.

Article II

Objects

Section 1. The objects of this Association shall be as follows: To encourage and increase the use of Maple, Beech and Birch flooring in the United States by co-operative advertising; to establish and maintain all such lawful trade customs and usages for the protection of the members as the Association may deem advisable; to exchange information concerning the character and nature of actually completed and closed business transactions of its members; to collect and disseminate statistics concerning the flooring industry; to establish uniform grades and standards of products; to constantly improve methods of manufacture; to provide architects, dealers and builders with an organized and always available guarantee of quality; to protect the integrity of the product and stimulate its more intelligent and economical use, and to adopt lawful plans for the general development and improvement of the industry.

Section 2. But this Association shall not, either directly or indirectly, fix, regulate or control the price, output, purchase or sale of flooring, or attempt so to do.

[fol. 88] Article III

Headquarters

The headquarters of this Association shall be located at Chicago, Illinois.

Article IV

Membership

Section 1. Any individual, firm or corporation regularly engaged in the Manufacture of Maple, Beech, or Birch flooring in the United States may be a member of this Association. Each member shall be entitled to only one vote. All applications for membership shall be made in writing to the Secretary.

Section 2. New members may be admitted to this Association at any regular or special meeting by a majority vote of the members present, but before being admitted to actual membership, such candidate must sign these Articles of Association and pay into the Membership Fee Fund the membership fee as required in Article XIII.

Section 3. New members admitted to membership after the 1st day of May, 1922, shall pay into the Treasury of the Association, for the benefits which they will enjoy from the Association Trademark M. F. M. A., the additional sum of $100 for each Matcher installed for the manufacture of Maple, Beech and Birch Flooring, and all such payments shall become a part of the Advertising Fund hereinafter mentioned in Articles XVII and XVIII.

Article V

Officers

Section 1. The officers of this Association shall consist of a Presi-
[fol. 89] dent, a Vice President, a Treasurer, a Secretary, and a Board of Trustees. The Board of Trustees shall consist of seven members, and the President, the Vice President and the Treasurer shall be members of the Board of Trustees by virtue of their office. The officers and the remaining four members of the Board of Trustees shall be elected by the members of the Association at its annual meeting.

Section 2. The Board of Trustees shall elect the Secretary of the Association and fix his compensation. The Secretary need not be a member of the Association.

Article VI

Duties and Powers of Officers and Board of Trustees

President

Section 1. The President shall preside at all meetings of the Association and shall be ex officio member of all standing committees,

and shall call meetings of the Board of Trustees whenever requested in writing to do so by a majority of the Board.

Vice President

Section 2. In the absence of the President the Vice President shall perform the duties of the President, and in the absence of both President and Vice President, the Treasurer shall perform the duties of the President.

Treasurer

Section 3. The Treasurer shall keep account of all moneys received and expended for the use of the Association, and shall make disbursements only upon vouchers issued by the Secretary and approved by the President. When his term of office expires, he shall deliver to his successor all moneys, books, papers, and other property [fol. 90] belonging to the Association in his possession; and in the absence of such successor he shall deliver the same to the President.

Secretary

Section 4. It shall be the duty of the Secretary to give notice of and attend all meetings of the Association and of the Board of Trustees; to keep a record of such meetings; collect all assessments and pay them over to the Treasurer; to prepare under the direction of the Board of Trustees a semi-annual report of the business transactions and financial condition of the Association; and perform any and all duties which shall be required of him by the Board and generally to devote his best efforts to promote the interests of the Association.

Board of Trustees

Section 5. The Board of Trustees may hold its meetings at such times and places as it may deem proper; may appoint committees from the membership of the Board of Trustees, or of the Association; may print and circulate documents, raise funds and disburse the same, and may devise and carry into effect such measures, not in conflict with these Articles, or the law of the land, as it may deem proper and expedient to promote the objects of the Association; and the Secretary shall at all times be subject to the direction of the Board of Trustees.

Section 6. The Board of Trustees shall have power to make By-Laws for the conduct of its own business and meetings; and for the conduct of the business and meetings of the Association, and for advancing the interests of the Association.

Section 7. The Board of Trustees shall act as a Board of Arbitration, to hear and determine all complaints and grievances which may arise between the members of the Association, or be- [fol. 91] tween the Association and any of its members, and the decision of the Board of Trustees shall be final, conclusive and binding in each case, subject only to the right of appeal to the Association by

written petition to be submitted to the Association within thirty days from the time the decision of the Board of Trustees is rendered, and such appeal shall be decided by the Association as speedily as possible.

Article VII

Election of Officers

The President, the Vice President, the Treasurer and four members of the Board of Trustees shall be elected by ballot at the annual meeting of the Association, to serve for the term of one year and until their successors are elected and have qualified. The affirmative vote of the majority of the members of the Association shall be necessary to an election.

Article VIII

Vacancies

In case of a vacancy in the Board of Trustees or in any office, the same shall be filled by the Board of Trustees for the unexpired term of the trustee or officer whose vacancy is to be so filled.

Article IX

Meetings

Section 1. The annual meeting of the Association for the election of officers and trustees and the transaction of such business as may be presented to the meeting, shall be held on the third Wednesday in January of each year. Regular meetings of the Association for the [fol. 92] transaction of business shall be held on the third Wednesday in April, July and October of each year. Due notice of all annual and regular meetings shall be given not less than five days before the meeting is to be held.

Section 2. Special meetings of the Association may be called by the President or by a majority of the Board of Trustees and notice of such meeting shall be given not less than five days prior to the holding of the same.

Section 3. Meetings of the Board of Trustees shall be held at any time whenever called by the President or by a majority of the Board. The time and place of holding such meetings shall be fixed by the Trustees, and such notice of the meeting shall be given as the President, or a majority of the Board, may direct.

Voting by Mail

Section 4. When the President shall deem it inexpedient to call a meeting of the Association, or of the Board of Trustees, he may request a vote by mail on any question on which an expression is deemed necessary, and the vote of each member of the Association or of the Board of Trustees, as the case may be, so given by mail shall

have the same force and effect as if given at a meeting duly convened and held.

Article X

Quorum

Section 1. Four trustees shall constitute a quorum of the Board of Trustees for the transaction of any and all business. A majority of the members of the Association shall constitute a quorum for the transaction of the business of the Association.

Section 2. Members of the Association not present at any meeting may be represented and vote by proxy given in writing to any [fol. 93] other member of the Association, or to any employee of any individual, firm or corporation member of the Association, provided that no person shall vote more than two proxies.

Article XI

Salaries and Expenses

All officers and trustees of the Association shall serve without compensation, except the Secretary, whose compensation shall be fixed by the Board of Trustees.

Article XII

Official Inspection and Standardization of Grades

Section 1. The Board of Trustees may employ Official Inspectors for the Association, who shall be located centrally with respect to the flooring market, and shall fix their compensation. No one shall be eligible to the position of Official Inspector who is directly or indirectly interested in the profits of the flooring trade. The Official Inspectors shall be under the general control of the Committee on Grades and under the immediate direction of the Secretary.

Section 2. The Official Inspectors shall visit from time to time the flooring mills of the members of the Association for the purpose of inspecting the manufacture and grading of their flooring product in order to see that it conforms to the standard grades as established by the Association, so that architects, dealers and builders may be fully protected as to quality and grade when specifying, selling or using Maple, Beech and Birch flooring bearing the Association Trademark M. F. M. A.

[fol. 94] Article XIII

Membership Fee Fund

Section 1. A fund is hereby established called the Membership Fee Fund, and each member shall pay into said fund as a membership fee the sum of $200 for each Matcher installed for the manufacture of Maple, Beech or Birch Flooring.

Section 2. All moneys paid into the Membership Fee Fund shall be deposited with a trust company, chosen by the Board of Trustees, and shall be paid out by such trust company only upon the joint signatures of the President, Treasurer and Secretary of the Association. In case of the resignation or inability to act of any trust company hereunder, then the Board of Trustees shall name another trust company to take its place.

Article XIV

Determining Average Cost

Section 1. The sound business principle advocated by the Federal Trade Commission that manufacturers should carefully consider the question of cost in manufacturing and selling their product is recognized by the Association as the only scientific method of conducting the business of manufacturing and marketing Maple, Beech and Birch flooring.

Section 2. For the purpose of furnishing to its members information regarding the average cost of manufacturing and marketing Maple, Beech and Birch flooring, Surveys of Costs to ascertain such average cost shall be made from time to time by the Association and such Surveys of Costs shall be filed with the Federal Trade Commission at Washington, D. C.

Section 3. In the judgment of the Association the following [fol. 95] fundamental elements enter into and determine the average cost of Maple, Beech and Birch flooring to the manufacturers when manufactured, sold and delivered F. O. B. cars at the flooring plant:

(a) The actual market value of the raw material, as established from time to time by current sales of rough flooring lumber on the open market.

(b) The average cost and expense of manufacturing, selling and delivering flooring F. O. B. cars at the flooring plant;

(c) Interest on the capital actually invested in the flooring business at the rate of six per cent per annum;

(d) Annual depreciation of plant as is usually allowed by the United States Government;

(e) The usual overhead charges in carrying on the flooring business; and

(f) A reasonable allowance to provide for contingencies and unforeseen hazards incident to manufacturing operations. This allowance is estimated at five per cent of the average total cost of Maple, Beech and Birch flooring when delivered F. O. B. cars at the flooring plant.

Article XV

Statistical Reports

Section 1. In order that the relations of supply and demand and the statistical conditions existing from time to time in the Maple flooring industry may be known, the fellowing statistical monthly reports shall be made to the Secretary by each member of the Association on or before the 5th day of each month:

(a) Report of Stocks on Hand of Maple, Beech and Birch Flooring at the end of the previous month.

(b) Report of Unfilled Orders on Hand for Maple Beech and Birch Flooring at the end of the previous month.

(c) Report of the amount in feet of Shipments made during the previous month of all kinds of Maple, Beech and Birch Floor-[fol. 96] ing for use within the United States, except Maple, Beech and Birch Flooring purchased from other members of this Association.

(d) Report of Production of Maple, Beech and Birch Flooring during the previous month.

(e) Report of New Orders Booked for Maple, Beech and Birch Flooring during the previous month.

(f) Report of Average Prices Realized F. O. B. flooring plant, after deducting freight, for 13/16" x 2¼" face Clear, No. 1 and Factory Maple Flooring, standard grades and lengths, sold during the previous month.

Section 2. In addition to the foregoing monthly reports, each member of the Association shall send to the Secretary promptly at the end of each week a report of all sales made during that week of Maple, Beech and Birch Flooring. These weekly sales reports shall state the quantity, kind and grade of flooring sold, the delivered price sold at, the average freight rate to destination of shipment, and the commissions paid, if any.

Section 3. All the foregoing statistical reports shall be made upon blank forms furnished by the Association and shall relate wholly and entirely to past and completed transactions. Said reports shall be mailed by the members to the Secretary, who shall report the same to the members. Said statistics shall be filed by the Association with the Department of Commerce, Washington, D. C., and shall also be made known to the public, in such form and manner as the Department of Commerce may approve.

Article XVI

Expense Fund

Section 1. A fund is hereby established called the Expense Fund to provide for the current running expenses of the Association. Each member shall pay into the Expense Fund an assessment of 25 cents per M feet on his shipments of all kinds of Maple, Beech [fol. 97] and Birch Flooring for use within the United States, except Maple, Beech and Birch flooring purchased from other members of this Association.

Section 2. The first assessment for said Expense Fund shall be made for the quarter commencing on the first day of January, 1922, and shall be levied quarterly thereafter, and each quarterly assessment shall be due and payable on or before the 25th day of the first month following the end of the quarter of the year for which the assessment is levied.

Article XVII

Advertising Fund

Section 1. A fund is hereby established called the Advertising Fund to provide moneys for co-operative advertising in order to promote and increase the use of Maple, Beech and Birch Flooring.

Each member shall pay into the Advertising Fund an assessment of 10 cents per M feet on his shipments of all kinds of Maple, Beech and Birch Flooring for use within the United States, except Maple, Beech and Birch Flooring purchased from other members of this Association.

Section 2. The first assessment for said Advertising Fund shall be made for the quarter commencing on the 1st day of January, 1922, and shall be levied quarterly thereafter, and each quarterly assessment shall be due and payable on or before the 25th day of the first month following the end of the quarter of the year for which the assessment is levied.

Section 3. The advertising work and all expenditures in connection therewith shall be under the control and management of a committee consisting of five members of the Association, to be appointed by the Board of Trustees, and to be known as the Advertising Committee.

[fol. 98]

Article XVIII

Trademark License

Section 1. Each member of the Association shall have and is hereby given the right and license (but not exclusive) to use on flooring of his own manufacture the Trademark MFMA adopted by this Association, subject to such rules, regulations, terms and condi-

tions as the Association may adopt from time to time governing the use of said Trademark, and the Association may require each member to enter into a written contract setting forth the rules, regulations, terms and conditions under which the member may use said Trademark and said Trademark Contract shall form a part of these Articles of Association but it shall not be subject to amendment under the provisions of Article XXII.

Section 2. Each member shall pay to the Association the sum of $50 per annum, payable on or before the end of each calendar year, as a license fee for the right to use said Trademark and such license fee shall become a part of the Advertising Fund of the Association.

Article XIX

Obligations of Members

Members of the Association shall pay all dues and assessments as provided in these Articles of Association and if any member neglects to do so for the period of sixty days after the same are due and payable, then such member shall automatically cease to be a member of the Association and his right and license to use the Trademark of the Association shall at the same time automatically terminate, and the interest of such member in and to the funds and property of the Association shall be at an end forever and from that time on such interest shall be held by the Association for the sole use and benefit of its other members then in good standing.

[fol 99] Maple Flooring Manufacturers' Association, 1045 Stock Exchange Bldg., Chicago

Trademark Agreement

GENTLEMEN: Referring to the tradmark MFMA, which has been adopted by the Maple Flooring Manufacturers' Association for the purpose of identifying the flooring manufactured by its members, the Association hereby gives you the right and license (but not exclusive) to use said trademark, under and subject to the following terms and conditions:

1. You are hereby given the right and license to use said trademark on the flooring of your own manufacture, but only while you are a member in good standing of the Association; and in case your membership in the Association is terminated for any reason whatever, then your right and license to use said trademark shall thereupon immediately cease and be at an end. The said trademark when used by you shall be followed by the No. — to indicate the identity of your plant, so that the trademark as used by you will be as follows: MFMA —. Each member of the Association using the trademark has his own special number affixed to the trademark to indicate the identity of his plant.

2. You shall maintain the standard grades of flooring which the Association may from time to time establish, and the official

inspector of the Association shall have the right to visit your plant, whenever sent by the Association, to see that such standard grades are properly maintained.

3. You shall protect the Association and its members from any and all damages and losses which any purchaser may have sustained by reason of the fact that the flooring sold by you to such purchaser and bearing the trademark of the Association is not up to the standard grades established by the Association. In case of a dispute you shall consent to a reinspection by the Association Official Inspector, if demanded in writing by the purchaser.

4. You are to pay to the Association the sum of Fifty Dollars ($50.00) per annum, payable on or before the end of each calendar year, beginning with the calendar year 1922, as a license fee for the right to use said trademark, and such license shall become a part of the Advertising Fund of the Association.

5. The Association reserves the right to revoke at any time your right and license to use said trademark, if the foregoing conditions are not complied with to the satisfaction of the Association.

Yours very truly, Maple Flooring Manufacturers' Association, by —— ——, Secretary.

The foregoing is hereby accepted under the terms and conditions therein named: —— ——, by —— ——.

(In duplicate.)

[fol. 100] Article XX

Discontinuance of Manufacture

Should any member of the Association cease manufacturing Maple, Beech and Birch flooring during the life of these Articles, his membership in the Association shall thereupon terminate and be at an end, and his portion of the moneys of the Association shall be returned to him six months thereafter, less any unpaid dues and assessments which may be due or owing to the Association up to the time he ceases the manufacture of Maple, Beech and Birch flooring.

Article XXI

Final Settlement

Immediately upon the expiration of these Articles of Association on the first day of January, 1925, all moneys and funds of the Association remaining on hand after all its indebtedness and obligations shall have been paid or provided for, shall be divided among the then members of the Association, in the proportions of their respective payments into the Membership Fee Fund.

Article XXII

Amendments

These Articles of Association may be amended at any regular or special meeting of the Association by the affirmative vote of two-thirds in number of all the members of the Association, but no amendment shall be made which may, either directly or indirectly, be in violation of, or in conflict with, any law of the land. Notice of any proposed amendment shall be given by mail addressed to each member at least ten days prior to the date of holding the meeting at which the proposed amendment is to be voted upon.

[fol. 101] GOVERNMENT'S EXHIBIT No. 9

January 24, 1922.

Proposed New Articles of Association

To Members.

GENTLEMEN: As instructed at the last general meeting of the Association proposed new Articles of Association have been drafted and after several conferences with Mr. Newman, our counsel, the draft has been completed and we are submitting it to you in printed form for your convenience. The printer will hold the form set up so that changes can be made if desired.

It was thought best to define in the Articles themselves such forms and methods of Association work and statistical reports as will come within the scope of the work of the Association under these proposed new Articles if adopted. Their duration is set at three years in accordance with previous custom.

The Articles speak for themselves, but perhaps we should make a few comments regarding some of them:

Article II. The objects of the Association are defined more broadly than in our present Articles of Association.

Article IV. Section 2, provides for a Membership Fee Fund which will take the place of our Special Fund and the Membership Fee as stated in Article XIII is placed at $250.00 for each matcher instead of $250.00 for each 1%.

Article IV. Section 3, provides that new members admitted to membership after the 1st day of April, 1922, shall pay for the benefits which they will enjoy from the Association Trademark the additional sum of $100.00 for each matcher. As you all know, the present members of the Association have paid out considerable money in advertising Maple, Beech and Birch Flooring and in advertising the Association Trademark and this additional payment from new members of $100.00 for each matcher is intended to equal-

ize that condition and to have new members pay for these benefits in proportion to capacity the same as the present members have done, all of whom have paid their respective shares of our advertising expenses, etc. in proportion to their shipments which, of course, represent their capacity in a general way.

Article XII. Section 2, makes mention of the Official Inspector's visits to the Association mills to inspect the manufacture and grading of MFMA flooring.

Article XIII. Sections 1 and 2, goes into further details regarding to Membership Fee of $250.00 for each matcher installed for the manufacture of Maple, Beech and Birch Flooring.

Article XIV. Determining Average Cost, goes into this subject very fully.

Article XV. Statistical Reports, gives in detail the various statistical reports to be made under the new Articles if adopted.

Article XVI. Expense Fund, provides for an Expense Fund of 25¢ per M ft. on Shipments to be paid quarterly, etc. This takes the place of our present method of levying assessments from time to time at the rate of $25.00 per each 1%.

Article XVII. Advertising Fund.—As our advertising is becoming a more and more important feature in the work of the Association it seems desirable to make specific mention of the advertising. The assessment is mentioned at the present rate of 10¢ per M ft. on Shipments to be assessed quarterly, etc.

Article XVIII. Trademark License.—It seems important and desirable to mention the Trademark feature and a form of Trademark contract should be adopted at the first meeting held under the new Articles. The Trademark contract now in use will answer every purpose and needs no revision it seems to me. The Trademark License Fee is set at $100.00 per annum instead of $25.00 per annum to give it more dignity, and as it becomes a part of the Advertising Fund you can depend upon the Advertising Committee to spend it judiciously.

Articles XIX and XX are self-explanatory.

Article XXI. Amendments.—It was thought desirable to provide for the opportunity to make amendments.

[fol.102] Kindly let us know within a few days if the Articles as submitted meet with your approval so that arrangements can be made to hold another general meeting of the Association as soon as possible—sometime during the second week in February, after the Annual Automobile Show is over, would be a good time to hold our meeting.

Very truly yours, George W. Keehn, Secretary.

[fol. 103] GOVERNMENT'S EXHIBIT No. 10

Petition of the Members of the Maple Flooring Manufacturers' Association to the Honorable Federal Trade Commission, Washington, D. C.

July 14, 1915

[fol. 104] To the Honorable Federal Trade Commission, Washington, District of Columbia.

GENTLEMEN: We, the undersigned, members of the Maple Flooring Manufacturers' Association, engaged in the business of manufacturing and selling maple, beech and birch flooring, respectfully petition you to investigate and pass on the following plan under which we propose to conduct our flooring business. This plan will allow us a legitimate return for the capital, skill and energy devoted to the business, abolish unfair competition, and furnish the consumer with an adequate supply of flooring at fair and reasonable prices.

We represent about seventy per cent. of the industry and about 50,000 people are dependent upon this industry for a living. Our manufacturing plants are located principally in the states of Michigan and Wisconsin, where the raw material is chiefly produced, and also in Chicago, where the raw material is transported for manufacture into flooring.

Firmly believing that the plan we submit is in harmony with a constructive business policy and is not detrimental but helpful to the public welfare, and is not in violation of the law, we respectfully ask the Commission to approve our plan, which is as follows:

[fol. 105] Plan

I

That a comprehensive survey of the maple, beech and birch flooring industry shall be made by the Federal Trade Commission, with or without the co-operation and supervision of the United States Forest Service (as the Commission may deem best), at the expense of the Maple Flooring Manufacturers' Association, for the purpose of determining scientifically the actual average cost of maple, beech and birch flooring at the plants of the members of said Association. Such actual average cost to be based upon the following fundamental elements, viz.:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling maple, beech and birch flooring;

(c) Interest on the capital invested at the rate of five (5) per cent. per annum;

(d) Annual depreciation of plants;

(e) Usual overhead charges.

II

When the actual average cost has been so determined, the members of said Association shall be permitted to sell their flooring on a basis which will give them a profit of twelve (12) per cent., reckoned on the selling price.

III

The books of the members of said Association shall be open at all times to examination by the Federal Trade Commission, or any [fol. 106] other United States Governmental Agency. In that way the Federal Government may, at all times, know that the actual average cost of producing and placing on the market maple, beech and birch flooring has been determined in the manner hereinbefore provided, in paragraph I of this Plan, and that the public is paying only a fair and reasonable price for its flooring.

Suggestions in Support of the Foregoing Plan

We respectfully submit that the foregoing Plan will result in the conservation of forest resources that cannot be replaced during our lifetime. The stand of maple, beech and birch stumpage is limited and is becoming rapidly depleted, and every reasonable effort should be made to avoid unnecessary waste and loss in its use. If agreeable to the Commission and with the object in view of practical conservation, we will secure the advice and co-operation of the Forest Products Laboratory, at Madison, Wisconsin, with respect to improved methods that will eliminate all unnecessary waste in the manufacture of flooring.

That a profit of twelve (12) per cent. on sales is a reasonable percentage of profit, is recognized by the United States Government in the sale of its own standing timber. The Government, in arriving at the stumpage value of its timber, allows to the purchaser a profit of twelve (12) per cent. on the selling price of lumber over and above six (6) per cent. per annum interest on the capital employed together with all overhead charges. The foregoing facts are shown in a communication from Mr. H. S. Graves, United States Forester, under date of March 10, 1913, accompanying a Prospectus in which the United States Government offers to sell its standing timber in [fol. 107] Kaniksu National Forest in the State of Idaho; the foregoing communication and Prospectus will be found in the records of the Forest Service of the United States.

Under said Plan, consumers and the same classes of trade in the same market will be treated exactly alike, without any discrimination whatever.

The prosperity of the flooring industry is essential to the communities in which the plants are located, because in many communities that industry is the only source of livelihood and unless the industry prospers labor cannot be employed at a living wage.

Unfair and ruinous competition, which leads to disaster in an industry, is hurtful to the public welfare, because it results in the loss of capital, the closing up of plants and unemployment of labor.

Under a system of standardized values such as our Plan contemplates, always however, subject to the supervision and direction of the Federal Trade Commission, or other governmental agencies, uniformity in manufacture, quality and measurement can be established and maintained, thus assuring to the public reliable goods at fair and reasonable prices.

Chicago, July fourteenth (14th), 1915.

(Here follows reproduction of signatures to foregoing document, side folio pages bottom of 107, 108, 109, and 110)

[fol. 111] GOVERNMENT'S EXHIBIT No. 11

Minimum Price Plan

Maple Flooring Manufacturers' Association

July 1, 1916

[fol. 112] The Undersigned members of the Maple Flooring Manufacturers' Association hereby amend the Articles of the Association by the following Minimum Price Plan which amendment shall be in force and binding upon each member for and during the period from July 1, 1916 to November 1, 1917.

Article I

Pursuant to the petition dated July 14, 1915, which the Maple Flooring Manufacturers' Association submitted to the Federal Trade Commission at Washington, D. C., on or about the 27th day of August, 1915 (a copy of which petition follows this supplemental agreement), the members of the Maple Flooring Manufacturers' Association hereby agree to establish minimum prices for the sale of Maple, Beech and Birch Flooring, and agree not to sell any Maple, Beech or Birch Flooring during the period beginning July 1, 1916 and ending November 1, 1917, below such minimum prices.

Article II

In order that the minimum prices which may be established from time to time under this agreement shall be fair and reasonable to the consumer as well as to the manufacturer, the actual average cost of Maple, Beech and Birch Flooring shall be based upon and determined by the following fundamental elements, viz.:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling flooring;

(c) Interest on the capital actually invested in the flooring business at the rate of five (5) per centum per annum;

[fol. 113] Article III

Minimum prices for which Maple, Beech and Birch Flooring may be sold by the members of the Association shall from time to time be established under this agreement, but such minimum prices shall not exceed an amount which will give the members an average net profit (over the average actual cost to be so determined) in excess of ten (10) per cent., reckoned upon such minimum selling prices.

Article IV

The following Minimum Prices are hereby established, and shall be in force on and after July 1, 1916, and until altered as hereinafter provided, viz.:

For Maple, Beech and Birch Flooring, Clear, No. 1 and Factory standard grades and lengths, the said Minimum Prices shall be the delivered prices in the Table of Values of May 15, 1916, in the Association Rate Book and Index of Towns, less the following concessions from the said delivered prices; and the concessions named in each and every case shall include any and all commissions which may be incurred in marketing the flooring.

No. 1	3.00	6.00	4.00
Factory	4.50	7.50	4.50

[fol. 114] Terms of sale shall be 60 days net from date of invoice, and not more than 2% discount for cash shall be allowed after deducting freight.

The foregoing minimum prices may from time to time be increased or decreased by the affirmative vote of not less than three-fourths in number of the members of the Association, and such increased and decreased minimum prices shall be binding upon the members as fully as if such prices had been specifically named in this agreement at the time the same was executed by each of them; but such minimum prices shall not be increased to an amount which will give the members an average net profit of over ten (10) per cent, as provided in Article III of this Agreement.

Article V

The members of the Association shall not sell any Maple, Beech or Birch Flooring for the period beginning on the 1st day of July, 1916 and ending on the 1st day of November, 1917, for less than the minimum prices which may from time to time be established and in force under this agreement. In case any member shall sell any Maple, Beech or Birch Flooring at less than the minimum prices which may from time to time be established and in force under this agreement, then such member shall pay to the Maple Flooring Manufacturers' Association (to be placed in its Expense Fund Account) a sum of money equal to ten (10) per cent, reckoned upon the prices at which any such flooring is sold in violation of this Article.

Article VI

The members of the Association shall furnish to its Secretary in writing, a full and complete report whenever requested by him, showing all sales of flooring, to whom made and the prices at which the same was sold; and the Secretary of the Association shall have the right for the purpose of verifying such reports to examine or cause to be examined the books, papers, records and documents of each of its members.

[fol. 115] Article VII

In case any member of the Association shall have on hand any Maple, Beech or Birch Flooring which he is unable to market at the minimum price at that time in force under this agreement, or is unable to sell the same to any other member of the Association without regard to such minimum price, then he shall offer such flooring to the members of the Association through its Secretary,

stating the quantity and kind and the price at which he is willing to sell such flooring, which price may be less than such minimum price; and in case such flooring is bought by any member of the Association, then the member buying the same shall not sell such flooring at any price less than the minimum price then in force under this agreement; but in case such flooring is not bought by any member of the Association within thirty days after the same has been so offered to the members of the Association through its Secretary then the member so offering to sell such flooring may sell the same in the open market at any price, provided such price be not less than the price at which he offered to sell the same to the members of the Association through its Secretary.

In case any member of the Association sells any flooring in violation of this Article VII, then he shall pay to the Maple Flooring Manufacturers' Association (to be placed in its Expense Fund Account) a sum of money equal to ten (10) per cent, reckoned upon the price at which he sells such flooring in violation of the provisions of this Article.

Article VIII

In case any member of the Association shall fail, neglect or refuse to pay the ten (10) per cent provided for in Article V of the ten (10) per cent provided for in Article VII of this agreement, then the Secretary or Treasurer of the Maple Flooring Manufacturers' Association shall cause the same to be paid by withdrawing from any fund or moneys standing to the credit of such member on the books of the Association a sum of money equal to the amount which [fol. 116] he has so failed, neglected or refused to pay, and place the money so withdrawn in the Expense Fund Account of the Association.

Article IX

Each member of the Maple Flooring Manufacturers' Association who signs this agreement, hereby assures his fellow members that he enters into this agreement in good faith and that he will not, either directly or indirectly, by any secret rebate or in any other way defeat the letter or spirit of this agreement.

We sign this Memorandum of Minimum Price Plan Agreement with the understanding that the signatures of all the members of the Association will be obtained and that the document when completed will be filed with the Federal Trade Commission and Department of Justice, Washington, D. C.

June 21st, 1916.

(Here follows reproduction of signatures to foregoing document, side folio pages bottom of 116, 117, and 118.)

[fol. 119] Petition of the Members of the Maple Flooring Manufacturers' Association to the Honorable Federal Trade Commission, Washington, D. C.

To the Honorable Federal Trade Commission, Washington, District of Columbia.

GENTLEMEN: We, the undersigned, members of the Maple Flooring Manufacturers' Association, engaged in the business of manufacturing and selling maple, beech and birch flooring, respectfully petition you to investigate and pass on the following plan under which we propose to conduct our flooring business. This plan will allow us a legitimate return for the capital, skill and energy devoted to the business, abolish unfair competition, and furnish the consumer with an adequate supply of flooring at fair and reasonable prices.

We represent about seventy per cent. of the industry and about 50,000 people are dependent upon this industry for a living. Our manufacturing plants are located principally in the states of Michigan and Wisconsin, where the raw material is chiefly produced, and also in Chicago, where the raw material is transported for manufacture into flooring.

Firmly believing that the plan we submit is in harmony with a constructive business policy and is not detrimental but helpful to the public welfare, and is not in violation of the law, we respectfully ask the Commission to approve our plan, which is as follows:

[fol. 120] Plan

I

That a comprehensive survey of the maple, beech and birch flooring industry shall be made by the Federal Trade Commission, with or without he co-operation and supervision of the United States Forest Service (as the Commission may deem best), at the expense of the Maple Flooring Manufacturers' Association, for the purpose of determining scientifically the actual average cost of maple, beech and birch flooring at the plants of the members of said Association. Such actual average cost to be based upon the following fundamental elements, viz.:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling maple, beech and birch flooring;

(c) Interest on the capital invested at the rate of five (5) per cent. per annum;

(d) Annual depreciation of plants;

(e) Usual overhead charges.

II

When the actual average cost has been so determined, the members of said Association shall be permitted to sell their flooring on a basis which will give them a profit of twelve (12) per cent., reckoned on the selling price.

III

[fol. 121] The books of the members of said Association shall be open at all times to examination by the Federal Trade Commission, or any other United States Governmental Agency. In that way the Federal Government may, at all times, know that the actual average cost of producing and placing on the market maple, beech and birch flooring has been determined in the manner hereinbefore provided, in paragraph I of this Plan, and that the public is paying only a fair and reasonable price for its flooring.

Suggestions in Support of the Foregoing Plan

We respectfully submit that the foregoing Plan will result in the conservation of forest resources that cannot be replaced during our lifetime. The stand of maple, beech and birch stumpage is limited and is becoming rapidly depleted, and every reasonable effort should be made to avoid unnecessary waste and loss in its use. If agreeable to the Commission and with the object in view of practical conservation, we will secure the advice and co-operation of the Forest Products Laboratory, at Madison, Wisconsin, with respect to improved methods that will eliminate all unnecessary waste in the manufacture of flooring.

That a profit of twelve (12) per cent. on sales is a reasonable percentage of profit, is recognized by the United States Government in the sale of its own standing timber. The Government, in arriving at the stumpage value of its timber, allows to the purchaser a profit of twelve (12) per cent. on the selling price of lumber over and above six (6) per cent. per annum interest on the capital employed together with all overhead charges. The foregoing facts are shown in a communication from Mr. H. S. Graves, United States Forester, under date of March 10, 1913, accompanying a Prospectus in which the United States Government offers to sell its standing timber in [fol. 122] Kaniksu National Forest in the State of Idaho; the foregoing communication and Prospectus will be found in the records of the Forest Service of the United States.

Under said Plan, consumers and the same classes of trade in the same market will be treated exactly alike, without any discrimination whatever.

The prosperity of the flooring industry is essential to the communities in which the plants are located, because in many communities that industry is the only source of livelihood and unless the industry prospers labor cannot be employed at a living wage.

Unfair and ruinous competition, which leads to disaster in an industry, is hurtful to the public welfare, because it results in the loss of capital, the closing up of plants and unemployment of labor.

Under a system of standardized values such as our Plan contemplates, always however, subject to the supervision and direction of the Federal Trade Commission, or other governmental agencies, uniformity in manufacture, quality and measurement can be established and maintained, thus assuring to the public reliable goods at fair and reasonable prices.

Chicago, July fourteenth (14th), 1915.

(Here follows reproduction of signatures to foregoing document, side folio pages bottom of 122, 123, 124, and 125)

[fol. 126] GOVERNMENT'S EXHIBIT No. 12

Minimum Price Plan

As Revised as at January 1, 1919

Maple Flooring Manufacturers Association

2-9-1116

[fol. 127] The Undersigned members of the Maple Flooring Manufacturers Association hereby amend the Articles of the Association by the following Minimum Price Plan, which amendment shall be in force and binding upon each member for and during the period from January 1, 1919, to July 1, 1919.

Article I

Pursuant to the petition dated July 14, 1915, which the Maple Flooring Manufacturers Association submitted to the Federal Trade Commission at Washington, D. C., on or about the 27th day of August, 1915 (a copy of which petition follows this supplemental agreement), the members of the Maple Flooring Manufacturers Association hereby agree to establish minimum prices for the sale of Maple, Beech and Birch Flooring, and agree not to sell any Maple, Beech or Birch Flooring during the period beginning January 1, 1919, and ending July 1, 1919, below such minimum prices.

Article II

In order that the minimum prices which may be established from time to time under this agreement shall be fair and reasonable to the consumer as well as to the manufacturer, the actual average cost of Maple, Beech and Birch Flooring shall be based upon and determined by the following fundamental elements, viz.:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling flooring;

(c) Interest on the capital actually invested in the flooring business at the rate of five (5) per centum per annum;

(d) Annual depreciation of Plant; and

(e) The usual overhead charges incurred in carrying on the flooring business.

[fol. 128]

Article III

Minimum prices for which Maple, Beech and Birch Flooring may be sold by the members of the Association shall from time to time be established under this agreement, but such minimum prices shall not exceed an amount which will give the members an average net profit (over the average actual cost to be so determined) in excess of ten (10) per cent, reckoned upon such minimum selling prices.

Article IV

The following Minimum Prices are hereby established, and shall be in force on and after January 1, 1919, and until altered as hereinafter provided, viz.:

For Maple, Beech and Birch Flooring, Clear, No. 1 and Factory standard grades and lengths, the said Minimum Prices shall be the delivered prices in the Table of Values of May 20, 1918, in the Association Rate Book and Index of Towns, less the following concessions and commissions from the said delivered prices:

Concessions and Commissions

Concessions from Delivered Prices in Table of Values of May 20, 1918.

A Commission not exceeding $1.00 may be allowed to your own Registered Special Representative, or to Registered Wholesalers and Commission Men.

Your Registered Special Representative may allow the Wholesaler's Commission of $1.00 when selling Registered Wholesalers and Commission Men.

Concessions on 13/16" x 1½", 2", 2¼" and 3¼" Faces D. & M.:

[fol. 129] Terms of Sale: 60 days net or 2% discount for cash in 15 days, or 1% discount for cash in 30 days from date of invoice after deducting freight. War tax to be paid by consignee.

If the car has not arrived, the discount may be deducted on 90% of the invoice less estimated freight, for cash within proper discount period, the balance with original paid freight bill to be remitted net within 5 days after arrival of car. No cash discount will be allowed after 30 days from date of shipment.

The foregoing minimum prices may from time to time be increased or decreased by the affirmative vote of not less than three-fourths in number of the members of the Association, and such increased and decreased minimum prices shall be binding upon the members as fully as if such prices had been specifically named in this agreement at the time the same was executed by each of them; but such minimum prices shall not be increased to an amount which will give the members an average net profit of over ten (10) per cent, as provided in Article III of this Agreement.

Article V

The members of the Association shall not sell any Maple, Beech or Birch Flooring for the period beginning on the 1st day of January, 1919, and ending on the 1st day of July, 1919, for less than the minimum prices which may from time to time be established and in force under this agreement. In case any member shall sell any Maple, Beech or Birch Flooring at less than the minimum prices which may from time to time be established and in force under this agreement, then such member shall pay to the Maple Flooring Manufacturers Association (to be placed in its Expense Fund Account) a sum of money equal to ten (10) per cent, reckoned upon the prices at which any such flooring is sold in violation of this Article.

[fol. 130] Article VI

The members of the Association shall furnish to its Secretary in writing, a full and complete report whenever requested by him, showing all sales of flooring, to whom made and the prices at which the same was sold; and the Secretary of the Association shall have the right for the purpose of verifying such reports to examine or cause to be examined the books, papers, records and documents of each of its members.

Article VII

In case any member of the Association shall have on hand any Maple, Beech or Birch Flooring which he is unable to market at the minimum price at that time in force under this agreement, or is unable to sell the same to any other member of the Association without regard to such minimum price, then he shall offer such flooring to the members of the Association through its Secretary, stating the quantity and kind and the price at which he is willing

to sell such flooring, which price may be less than such minimum price; and in case such flooring is bought by any member of the Association, then the member buying the same shall not sell such flooring at any price less than the minimum price then in force under this agreement; but in case such flooring is not bought by any member of the Association within thirty days after the same has been so offered to the members of the Association through its Secretary then the member so offering to sell such flooring may sell the same in the open market at not exceeding $1.00 below the minimum price basis then in effect.

In case any member of the Association sells any flooring in violation of this Article VII, then he shall pay to the Maple Flooring Manufacturers Association (to be placed in its Expense Fund Account) a sum of money equal to ten (10) per cent, reckoned upon the price at which he sells such flooring in violation of the provisions of this Article.

[fol. 131] Article VIII

In case any member of the Association shall fail, neglect or refuse to pay the ten (10) per cent provided for in Article V or the ten (10) per cent provided for in Article VII of this agreement, then the Secretary or Treasurer of the Maple Flooring Manufacturers Association shall cause the same to be paid by withdrawing from any fund or moneys standing to the credit of such member on the books of the Association a sum of money equal to the amount which he has so failed, neglected or refused to pay, and place the money so withdrawn in the Expense Fund Account of the Association.

Article IX

Each member of the Maple Flooring Manufacturers Association hereby assures his fellow members that he enters into this agreement in good faith and that he will not, either directly or indirectly, by any secret rebate or in any other way defeat the letter or spirit of this agreement.

Memorandum of Amendments

Special Representatives

1. Each member to be entitled to confidential registration of representatives with the Secretary equivalent to five to each 1% of his allotment.

2. Registered representatives to be wholesalers or commission salesmen. But all established representatives of members, up to numerical limit, to be eligible for registration. Provided, however, that present representatives not exclusively wholesalers or commission salesmen shall not be registered unless they have been actively representing the registering member one year or more, prior to January 1, 1919.

[fol. 132] 3. Such registered representatives may be allowed not to exceed $1.00 per M concession from minimum prices in effect at the time of sale, but they must not, directly or indirectly, give any portion of sail concession to their customers, and members shall be held strictly responsible for the acts of their registered representatives.

4. Only the special representatives registered with the Secretary can be paid the commission of not to exceed $1.00 per M, and the commission can be paid only by the member who registers such special representative. More than one member, however, may register the same special representative.

5. As an assurance that the aforesaid conditions are complied with, the Secretary of the Association shall have the right to examine or cause to be examined the books, papers, records and documents of each of its members.

Wholesalers and Commission Men

1. In addition to the Registered Special Representatives, whose registration is to remain confidential, a list shall be adopted by Wholesalers and Commision Men, to whom a commission of not exceeding $1.00 may be paid by any member of the Association, as soon as such list shall have been published to all the members of the Association.

2. Nominations for the registration of Wholesalers and Commission Men shall be made in writing to the Secretary by the members of the Association, without limitation as to the number that may be nominated or registered.

3. All nominations for registration shall be bulletined to the members by the Secretary, and if no objections are filed within ten days from the date of the bulletin, registration shall automatically take effect and the Secretary will then notify the members that the registration has been made; but no commission shall be paid to any Wholesaler or Commission Man, nominated for registration until [fol. 133] notification of registration is received from the Secretary.

4. If objection to registration is filed by any member of the Association, the objection shall be referred by the Secretary for adjudication to a Committee, to be appointed by the Trustees and to be known as "Trade Relations Commtitee."

[fol. 134] Petition of the Members of the Maple Flooring Manufacturers Association to the Honorable Federal Trade Commission, Washington, D. C.

To the Honorable Federal Trade Commission, Washington, District of Columbia.

GENTLEMEN: We, the undersigned members of the Maple Flooring Manufacturers Association, engaged in the business of manu-

facturing and selling maple, beech and birch flooring, respectfully petition you to investigate and pass on the following plan under which we propose to conduct our flooring business. This plan will allow us a legitimate return for the capital, skill and energy devoted to the busines, abolish unfair competition, and furnish the consumer with an adequate supply of flooring at fair and reasonable prices.

We represent about seventy per cent. of the industry and about 50,00 people are dependent upon this industry for a living. Our manufacturing plants are located principally in the states of Michigan and Wisconsin, where the raw material is chiefly produced, and also in Chicago, where the raw material is transported for manufacture into flooring.

Firmly believing that the plan we submit is in harmony with a constructive business policy and is not detrimental but helpful to the public welfare, and is not in violation of the law, we respectfully ask the Commission to approve our plan, which is as follows:

[fol. 135] Plan

I

That a comprehensive survey of the Maple, Beech and Birch flooring industry shall be made by the Federal Trade Commission, with or without the co-operation and supervision of the United States Forest Service (as the Commission may deem best), at the expense of the Maple Flooring Manufacturers Association, for the purpose of determining scientifically the actual average cost of Maple, Beech and Birch flooring at the plants of the members of said Association. Such actual average cost to be based upon the following fundamental elements, viz:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling Maple, Beech and Birch flooring;

(c) Interest on the capital invested at the rate of five (5) per cent. per annum;

(d) Annual depreciation of plants;

(e) Usual overhead charges.

II

When the actual average cost has been so determined, the members of said Association shall be permitted to sell their flooring on a basis which will give them a profit of twelve (12) per cent., reckoned on the selling price.

III

The books of the members of said Association shall be open at all times to examination by the Federal Trade Commission, or any

other United States Governmental Agency. In that way the Federal [fol. 136] Government may, at all times, know that the actual average cost of producing and placing on the market maple, beech and birch flooring has been determined in the manner hereinbefore provided, in paragraph I of this Plan, and that the public is paying only a fair and reasonable price for its flooring.

Suggestions in Support of the Foregoing Plan

We respectfully submit that the foregoing Plan will result in the conservation of forest resources that cannot be replaced during our lifetime. The stand of maple, beech and birch stumpage is limited and is becoming rapidly depleted, and every reasonable effort should be made to avoid unnecessary waste and loss in its use. If agreeable to the Commission and with the object in view of practical conservation, we will secure the advice and co-operation of the Forest Products Laboratory, at Madison, Wisconsin, with respect to improved methods that will eliminate all unnecessary waste in the manufacture of flooring.

That a profit of twelve (12) per cent. on sales is a reasonable percentage of profit, is recognized by the United States Government in the sale of its own standing timber. The Government, in arriving at the stumpage value of its timber, allows to the purchaser a profit of twelve (12) per cent. on the selling price of lumber over and above six (6) per cent. per annum interest on the capital employed together with all overhead charges. The foregoing facts are shown in a communication from Mr. H. S. Graves, United States Forester, under date of March 10, 1913, accompanying a Prospectus in which the United States Government offers to sell its standing timber in Kaniksu National Forest in the State of Idaho; the foregoing communication and Prospectus will be found in the records of the Forest Service of the United States.

Under said Plan, consumers and the same classes of trade in the same market will be treated exactly alike, without any discrimination whatever.

[fol. 137] The prosperity of the flooring industry is essential to the communities in which the plants are located, because in many communities that industry is the only source of livelihood and unless the industry prospers labor cannot be employed at a living wage.

Unfair and ruinous competition, which leads to disaster in an industry, is hurtful to the public welfare, because it results in the loss of capital, the closing up of plants and unemployment of labor.

Under a system of standardized value such as our Plan contemplates, always however, subject to the supervision and direction of the Federal Trade Commission, or other governmental agencies, uniformity in manufacture, quality and measurement can be established and maintained, thus assuring to the public reliable goods at fair and reasonable prices.

Chicago, July fourteenth (14), 1915.

[fol. 138] GOVERNMENT'S EXHIBIT No. 13

Maple Flooring Manufacturers Association

Minimum Price Basis

January 6, 1921

[fol. 139] Minimum Price Basis

The Undersigned members of the Maple Flooring Manufacturers Association hereby establish the following Minimum Price Basis for the sale of Maple, Beech and Birch Flooring during the period from January 6, 1921, to July 1, 1922.

Article I

Pursuant to the Petition dated July 14, 1915, which the Maple Flooring Manufacturers Association submitted to the Federal Trade Commission at Washington, D. C., on or about the 27th day of August, 1915 (a copy of which petition follows this memorandum), the members of the Maple Flooring Manufacturers Association hereby establish a Minimum Price Basis for the sale of Maple, Beech and Birch Flooring during the period beginning January 6, 1921, and ending July 1, 1922.

Article II

In order that the Minimum Price Basis which may be established from time to time shall be fair and reasonable to the consumer as well as to the manufacturer, the actual average cost of Maple, Beech and Birch Flooring shall be based upon and determined by the following fundamental elements, viz:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling flooring;

(c) Interest on the capital actually invested in the flooring business at the rate of six per centum per annum;

(d) Annual depreciation of Plant as allowed by the Government; and

(e) The usual overhead charges incurred in carrying on the flooring business.

[fol. 140] Article III

The Minimum Price Basis for the sale of Maple, Beech and Birch Flooring shall from time to time be established in accordance with Article II, but such Minimum Price Basis shall not exceed an amount

which will give the members an average net profit in excess of five percent. reckoned upon actual average cost as determined in accordance with Article II.

Article IV

The following Minimum Price Basis is hereby established, subject to change from time to time in accordance with Article II and Article III.

For Maple, Beech and Birch Flooring, Clear, No. 1 and Factory, standard grades and length, as classified herein, the said Minimum Price Basis shall be the delivered values in the Table of Values Based Upon Average Cost, dated January 6, 1921, in the Association Rate Book and Index of Towns, less the following concessions from, or plus the following additions to the said basic delivered values:

Concessions and Additions

Table of Values January 6, 1921

Factory	2.00	3.00	5.00	6.00

Commissions

A Commission not exceeding $2.00 may be allowed to your own Registered Special Representative, or a Commission not exceeding $1.50 may be allowed to Registered Wholesalers and Commission Men.

Your Registered Special Representative may allow the Wholesaler's Commission of $1.50 when selling Registered Wholesalers and Commission Men, but the Commission to be paid to your Registered Special Representative on his sales to Registered Wholesalers and Commission Men to whom he allows the $1.50 Wholesaler's Commission shall not exceed $1.00. In no event shall the total Commissions allowed exceed $2.50.

Terms of Sale

Sixty days net or 2% discount for cash in 15 days, or 1% discount for cash in 20 days from date of invoice after deducting freight. War tax to be paid by consignee.

If the car has not arrived, the discount may be deducted on 90% of the invoice less estimated freight, for cash within proper discount period, the balance with original paid freight bill to be re- [fol. 142] mitted net within 5 days after arrival of car. No cash discount will be allowed after 30 days from date of shipment.

Article V

The members of the Maple Flooring Manufacturers Association establish the Minimum Price Basis as a Declaration of Business Principles to be observed in the marketing of their product, believing that a method, such as the Minimum Price Basis affords, of stabilizing the value of a standardized product is fair and equitable and that it will prove beneficial to the public welfare.

The records of the Association and the books of its members shall be open at all times for examination by the Federal Trade Commission, so that the Commission may, at all times, know that the actual average cost of Maple, Beech and Birch Flooring has been determined in accordance with Article II and that the Minimum Price Basis has been established in accordance with Article III, and that the public is paying only a fair and reasonable price for its flooring.

It is understood that the Minimum Price Basis shall be submitted to and filed with the Federal Trade Commission for its approval and that in the event of the Commission's disapproval the Minimum Price Basis shall be null and void.

Chicago, January 6, 1921.

[fol. 146] Copy of Petition of the Members of the Maple Flooring Manufacturers Association to the Honorable Federal Trade Commission, Washington, D. C.

To the Honorable Federal Trade Commission, Washington, District of Columbia.

GENTLEMEN: We, the undersigned, members of the Maple Flooring Manufacturers Association, engaged in the business of manufacturing and selling maple, beech and birch flooring, respectfully petition you to investigate and pass on the following plan under which we propose to conduct our flooring business. This plan will allow us a legitimate return for the capital, skill and energy devoted to the business, abolish unfair competition, and furnish the consumer with an adequate supply of flooring at fair and reasonable prices.

We represent about seventy per cent of the industry and about 50,000 people are dependent upon this industry for a living. Our manufacturing plants are located principally in the states of Michigan and Wisconsin, where the raw material is chiefly produced, and also in Chicago, where the raw material is transported for manufacture into flooring.

Firmly believing that the plan we submit is in harmony with a constructive business policy and is not detrimental but helpful to the public welfare, and is not in violation of the law, we respectfully ask the Commission to approve our plan, which is as follows:

[fol. 147] Plan

I

That a comprehensive survey of the maple, beech and birch flooring industry shall be made by the Federal Trade Commission, with or without the co-operation and supervision of the United States Forest Service (as the Commission may deem best), at the expense of the Maple Flooring Manufacturers Association, for the purpose of determining scientifically the actual average cost of maple, beech and birch flooring at the plants of the members of said Association. Such actual average cost to be based upon the following fundamental elements, viz:

(a) The actual market value of the raw material;

(b) The average cost and expense of manufacturing and selling maple, beech and birch flooring;

(c) Interest on the capital invested at the rate of five (5) per cent per annum;

(d) Annual depreciation of plants;

(e) Usual overhead charges.

II

When the actual average cost has been so determined, the members of said Association shall be permitted to sell their flooring on a basis which will give them a profit of twelve (12) per cent, reckoned on the selling price.

III

The books of the members of said Association shall be open at all [fol. 148] times to examination by the Federal Trade Commission, or any other United States Governmental Agency. In that way the Federal Government may, at all times, know that the actual average cost of producing and placing on the market maple, beech and birch flooring has been determined in the manner hereinbefore provided, in paragraph I of this Plan, and that the public is paying only a fair and reasonable price for its flooring.

Suggestions in Support of the Foregoing Plan

We respectfully submit that the foregoing Plan will result in the conservation of forest resources that cannot be replaced during our lifetime. The stand of maple, beech and birch stumpage is limited and is becoming rapidly depleted, and every reasonable effort should be made to avoid unnecessary waste and loss in its use. If agreeable to the Commission and with the object in view of practical conservation, we will secure the advice and co-operation of the Forest Products Laboratory, at Madison, Wisconsin, with respect to improved methods that will eliminate all unnecessary waste in the manufacture of flooring.

That a profit of twelve (12) per cent on sales is a reasonable percentage of profit, is recognized by the United States Government in the sale of its own standing timber. The Government, in arriving at the stumpage value of its timber, allows to the purchaser a profit of twelve (12) per cent on the selling price of lumber over and above six (6) per cent per annum interest on the capital employed together with all overhead charges. The foregoing facts are shown in a communication from Mr. H. S. Graves, United States Forester, under date of March 10, 1913, accompanying a Prospectus in which the [fol. 149] United States Government offers to sell its standing timber in Kaniksu National Forest in the State of Idaho; the foregoing communication and Prospectus will be found in the records of the Forest Service of the United States.

Under said Plan, consumers and the same classes of trade in the same market will be treated exactly alike, without any discrimination whatever.

The prosperity of the flooring industry is essential to the communities in which the plans are located, because in many communities that industry is the only source of livelihood and unless the industry prospers labor cannot be employed at a living wage.

Unfair and ruinous competition, which leads to disaster in an in-

dustry, is hurtful to the public welfare, because it results in the loss of capital, the closing up of plants and unemployment of labor.

Under a system of standardized values such as our Plan contemplates, always however, subject to the supervision and direction of the Federal Trade Commission, or other governmental agencies, uniformity in manufacture, quality and measurement can be established and maintained, thus assuring to the public reliable goods at fair and reasonable prices.

Chicago, July fourteenth (14th), 1915.

(Here follows reproduction of signatures to foregoing document, side folio pages bottom of 149, 150, 151, and 152.)

[fol. 153] GOVERNMENT'S EXHIBIT No. 14

February 2, 1920—a. m.

DEAR SIR: Will you please write me what the following schedule of prices for Maple flooring lumber would add to the present M. P. basis:

Fas @	$125.00
Selects @	115.00
No. 1 Common @	90.00
No. 2 Common @	75.00
No. 3 Common A @	65.00

Thanking you for the information.

Yours very truly, M. E. Thomas.

[fol. 154] GOVERNMENT'S EXHIBIT No. 14-A

December 16, 1920—a. m.

DEAR SIR: From present indications I assume that there will be an insistent demand for the resumption of our M. P. P. at the time of our next meeting, December 22. It seems to me desirable to work out an adjustment of the plan so it can be put into effect the first of the year providing the members all agree to it. There is one feature which has not been covered by the previous plan and which under our present lineup I think will be very important to consider and provide for. I understand that considerable of No. 47's shipments are not according to our regular standard methods of grad-[fol. 155] ing. If my information is correct, they handle quite a bit of business mixed grades and possibly without trimming for grades in filling such orders. There should be some way of governing the prices of stock of this character to avoid disturbing competition under an M. P. P. arrangement.

In order to have the plan work successfully and satisfactorily we think there should be a uniform basis so that there could be no question about the mimimum being protected. No. 47 is getting the benefit of whatever prestige the Association membership affords and should be willing to cooperate in the manner of selling to make the competition basis entirely equitable and consistent.

I do not know whether this feature has occurred to you but thought I would call your attention to it so you can think it over and possibly wor kout some plan to meet the condition.

Under the old plant price changes were made by a 75% vote of the members. This is not entirely fair inasmuch as the vote of a member producing a million feet can offset the vote of a member producing ten million feet. Would it not be better to have the voting on the allotment basis?

I think that the plan is desirable if it can be safeguarded so that one can continue to do business under it and not be forced out on account of maintaining too high level of prices under certain conditions.

Yours very truly, M. E. Thomas

[fols. 156-157] GOVERNMENT'S EXHIBIT No. 14-B

January 11, 1921.

Minimum Price Basis

To MEMBERS.

GENTLEMEN: In order that you may clearly understand the details of the Minimum Price Basis, we are enclosing the following:

1. Memoranda concerning M. P. B.

2. Schedule showing the Quota of Special Representatives each member is entitled to register.

3. List of Wholesalers and Commission Men dated May 19, 1919, to be used as a guide pending the revision of this list.

No doubt, many changes have taken place since this list was issued and we shall appreciate it very much if you will kindly send us your suggestions regarding the elimination of names from this list and we will at once submit your suggestions to the Trade Relations Committee as soon as Dr. Earle as President of the Association advises me of his appointments to serve on this Committee.

Please send me at once a revised list of your Registered Special Representatives in accordance with Section- 1, 2 and 3 in the Memoranda concerning M. P. B.

We have in the hands of the printer the following:

1. Tables of Values date danuary 6, 1921.

2. Sheet showing Concessions and Additions.

3. New blank forms for filing with the Secretary a complete list of your Unfilled Orders on Hand January 6, 1921, subject to the M. P. B.

4. New blank forms for Weekly Sales Reports of all new orders booked each week for all kinds of Maple, Beech and Birch Flooring.

A supply of the above forms will be sent to each member as soon as received from the printer.

Very truly yours, George W. Keehn, Secretary.

[fol. 158] Memoranda Concerning Minimum Price Basis

Special Representatives

1. Each member of the Association shall be entitled to confidential registration of Special Representatives with the Secretary equivalent to five Special Representatives to each 1% shipped by such member of the Average Annual Shipments of all the members of the Association.

2. Registered Special Representatives to be wholesalers or commission salesmen, but all established Special Representatives of members, up to numerical limit, to be eligible for registration; provided, however, that present representatives not exclusively wholesalers or commission salesmen shall not be registered as Special Representatives unless they have been actively representing the registering member one year or more, prior to January 1, 1921.

3. Only the Special Representatives registered with the Secretary can be paid the Commission as hereinafter stated, and the commission can be paid only by the member who registers such Special Representative. More than one member, however, may register the same Special Representative.

Wholesalers and Commission Men

4. In addition to the Registered Special Representatives, whose registration shall be confidential, a list shall be adopted of Wholesalers and Commission Men, to whom a commission, as hereinafter stated, may be allowed, as soon as such list shall have been published to all the members of the Association.

5. Nominations for the registration of Wholesalers and Commission Men shall be made in writing to the Secretary by the members of the Association, without limitation as to the number that may be nominated or registered.

6. All nominations for registration of Wholesalers and Commission Men shall be bulletined to the members by the Secretary, and if no objections are filed within ten days from the date of the bulletin, registration shall automatically take effect and the Secretary will then notify the members that the registration has been made;

but no commission shall be paid to any Wholesaler or Commission Man nominated for registration until notification of registration is received from the Secretary.

7. If objection to registration is filed by any member of the Association, the objection shall be referred, by the Secretary, for adjudication to a Committee to be appointed by the Trustees and to be known as "Trade Relations Committee."

Commissions

8. A Commission not exceeding $2.00 may be allowed to your own Registered Special Representative, or a Commission not exceeding $1.50 may be allowed to Registered Wholesalers and Commission Men.

9. Your Registered Special Representative may allow the Wholesaler's Commission of $1.50 when selling Registered Wholesalers and Commission Men, but the Commission to be paid to your Registered Special Representative on his sales to Registered Wholesalers and Commission Men to whom he allows the $1.50 Wholesaler's Commission shall not exceed $1.00. In no event shall the total Commission allowed exceed $2.50.

10. As an assurance that the aforesaid conditions are complied with, the Secretary of the Association shall have the right to examine or cause to be examined the books, papers, records and documents of each of its members.

Terms of Sale

11. Sixty days' net or 2% discount for cash in 15 days, or 1% discount for cash in 30 days from date of invoice after deducting freight. War Tax to be paid by consignee.

If the car has not arrived, the discount may be deducted on 90% of the invoice less estimated freight, for cash within proper discount period, the balance with original paid freight bill to be remitted net within 5 days after arrival of car. No cash discount will be allowed after 30 days from date of shipment.

January 6, 1921.

[fol. 159] GOVERNMENT'S EXHIBIT No. 14-C

January 22, 1921.

To MEMBERS.

GENTLEMEN: Since the general meeting on the 6th, the I. Stephenson Company, Trustees and East Jordan Lumber Company have signed the Minimum Price Basis, so the only member who has not yet signed is Nichols & Cox Lumber Company.

We have written and telephoned twice to Mr. Nichols since the meeting, offering to go to Grand Rapids any time to talk things over with him and Mr. Cox (the last time I talked with Mr. Nichols was on the 18th) and he tells me that they have been so busy with inventory and closing up their year's business that he and Mr. Cox have not discussed the M. P. B. or come to any definite conclusions regarding it, so I presume all we can do is to wait a few days more in hopes of getting their signature before submitting the document to the Federal Trade Commission.

Very truly yours, George W. Keehn, Secretary.

[fol. 160] GOVERNMENT'S EXHIBIT No. 14-D

January 31, 1921.

To Members.

GENTLEMEN: After several conferences with Mr. Newman our Counsel at which all conditions were fully discusses and considered, letters (copies of which are enclosed) have been drafted and will go forward today or tomorrow to the Federal Trade Commission and to the Department of Justice, Washington, D. C.

The printed documents accompanied by the Rate Book with contents stated in paragraph three of the letters will be sent by registered mail, return receipt requested, so that we shall know that the same have been duly received by the authorities at Washington.

Nichols & Cox Lumber Company decided not to enter into the Minimum Price Basis, so their signature does not appear in that part of the printed document, but it does appear in the reprint of the petition dated July 14, 1915. Their signature also appears in the old so-called Minimum Price Plan, which was dated June 21, 1916, and which was filed with the Federal Trade Commission and the Department of Justice about June 30, 1916, but which was never enforced and which is referred to in our letters today, dated January 29, 1921.

Very truly yours, George W. Keehn, Secretary.

February 3, 1921. — p. m.

DEAR SIR: Your announcement of January 31st to members stating that Nichols & Cox Lumber Co. decided not to enter into the minimum price basis was quite a surprise and disappointment to us. We feel it essential that they cooperate in this plan and unless [fol. 161] they do so we do not see how we can continue. We will, however, suspend our decision until the first of March hoping that Nichols & Cox Lumber Co. may be secured in the meantime. If they refuse to go in we want it understood that we shall feel free to withdraw from the plan March 1st.

Very truly yours, M. E. Thomas.

May 28, 1921.

To Members.

GENTLEMEN: We have the following letter from East Jordan Lumber Company dated the 26th:

"We have your favor of the 21st and are exceedingly sorry that the minimum price plan did not go through, as we feel this is the only plan which has ever worked out satisfactorily, and that it would be especially valuable to us at this time.

The writer was away until Tuesday of this week and neglected to report that we had made no sales of flooring last week. We will try to see that all of our sales are reported promptly on Saturday of each week hereafter.

Very truly yours, East Jordan Lumber Company. (Signed) John J. Porter."

Very truly yours, George K. Keehn, Secretary.

[fol. 167] GOVERNMENT'S EXHIBIT No. 14-J

[Omitted in printing]

[fol. 168] GOVERNMENT'S EXHIBIT No. 14-K

December 12, 1921.

GENTLEMEN: I think I should let you know as members of the Special Committee that two representatives, Mr. Howe and Mr. Rooney, of the Department of Justice, Chicago, called to see me re-

cently upon instructions received from Washington, to investigate the Association's working plans as now in operation.

It seems there has been a change in the Attorney General's office at Washington and that Mr. Nebeker, with whom we had considerable correspondence last spring, as you will remember, is no longer connected with the department and as the new assistant Attorney General found the correspondence in their files, he naturally wants to know what was done with the so-called Minimum Price Basis and how the Association is now operating. It also seems that they could not find the various copies of the old Articles of Association and the old Minimum Price Plan which were filed with them a long time ago.

Mr. Howe and Mr. Rooney requested me to give them duplicate copies of the various documents and to write them a letter assuring the Department of Justice that the representations made to Mr. Nebeker by Dr. Earle as President of the Association, had been carried out in good faith. They also inquired about the Allotment Plan and I told them it had been discontinued in March, 1920.

It so happened that we had extra copies of the old correspondence with the Department of Justice and the Federal Trade Commission, which copies were made in 1919, when the Federal Trade Commission investigated us, so I gave them a set of the copies and wrote them a letter, a carbon copy of which I enclose.

Not knowing but what a representative of the Department of Jutice might also call upon Dr. Earle at Hermansville, I concluded to make a trip to see the doctor and explain the situation to him, so I went to Hermansville at once and spent Sunday, November 27th, with him.

We have heard nothing further from Mr. Howe or Mr. Rooney since I saw Mr. Howe on Friday, November 25th, and gave him my letter of November 23rd and the papers referred to in the letter. I told them all about the form and nature of our statistical reports and offered to give them copies of them any time if they would like to have them and they said if they wanted them or any further information regarding the Association they would telephone me or [fol. 169] call upon me again. Not having heard anything further from either of them I am inclined to think the incident is closed.

Yours very truly, Geo. W. Keehn, Secretary.

GOVERNMENT'S EXHIBIT No. 14-L

November 23, 1921.

GENTLEMEN: Referring to your several interviews with us and your request for copies of our Articles of Association and of the so called proposed Minimum Price Plan and Minimum Price Basis, we submit the following:

1. Copy of Articles of Association filed with the Department of Justice, Washington, D. C., December 31, 1912. The duration of

these Articles was extended to January 1, 1919, as per our letter to the Attorney General of the United States dated June 27, 1916. (Copies of correspondence attached.)

2. Copy of Articles of Association January 1, 1919 to July 1, 1919.

3. Copy of Articles of Association July 1, 1919 to July 1, 1922. Article XIV (the allotted percentage feature) was discontinued March 31, 1920.

4. Copy of Petition to the Federal Trade Commission, Washington, D. C., dated July 14, 1915, and submitted to the Commission August 27, 1915. (Copies of correspondence attached.)

5. Copy of proposed Minimum Price Plan of July 1, 1916, filed with the Attorney General of the United States and with the Federal Trade Commission, Washington, D. C., June 27, 1916. (Copies of correspondence attached.)

As stated in our letter to the Attorney General dated January 29, 1921, this proposed Minimum Price Plan was never enforced and was never consumated, we never having heard anything further from the Attorney General either approving or disapproving since we received his letter of July 6, 1916, in which he stated that he could not comply with our request to give us an official opinion on the subject. (Copies of correspondence attached.)

6. Copy of proposed Minimum Price Basis dated January 6, 1921, submitted to the Attorney General and also to the Federal Trade Commission on January 29, 1921. We wish to advise you, that upon receipt of the reply of Mr. Frank Nebeker, Assistant to the [fol. 170] Attorney General; (Copies of correspondence attached) dated February 11, 1921 (to our letter of January 29, 1921) that the said minimum Price Basis was not proceeded with and thereupon automatically became null and void in accordance with the last paragraph of the Minimum Price Basis, which provided that in event of the Government's disapproval the Minimum Price Basis shall be null and void.

We positively assure you that the representations made by the President of the Association in his letter of February 11, 1921 to Mr. Frank L. Nebeker, Assistant to the Attorney General, have been carried out in good faith and that the Association has not been operating and is not now operating under the so called Minimum Price Basis.

We wish to explain that the copies of the old correspondence with the Department of Justice and with the Federal Trade Commission, Washington, D. C., were made in 1919 for the Attorney and Examiner for the Federal Trade Commission, who at that time made investigation of this Association.

Should you desire copies of the statistical reports which the Association compiles and issues from time to time, we shall be glad to furnish them.

November 23, 1921.

[fol. 171] GOVERNMENT'S EXHIBIT No. 15

Minutes of Annual Meeting of January 22, 1913

Morning Session

Pursuant to adjournment of the meeting of December 20, 1912, the annual meeting of the Maple Flooring Manufacturers' Association was held in the rooms of the Association, Chicago, on Wednesday, January 22d, 1913, at 10 A. M.

* * * * * * *

The minutes of the meeting of December 20, 1912, were read and on motion, approved.

The Market Conditions Committee presented its monthly report for December and an annual report covering the work of the Committee during the year 1912. On motion, the reports were accepted and the Secretary was instructed to send a copy to each member of the Association, and on motion, a rising vote of thanks was given the Committee for their valuable and efficient services to the Association.

The annual report of the Secretary for the year 1912 was read, and on motion the report was adopted and a copy ordered sent to each member of the Association.

The Secretary reported that since the general meeting of the Association, held on December 20, 1912, Attorney Newman had been in correspondence with the Department of Justice in regard to the Allotment Articles, a full report of which correspondence had been transmitted to the members on January 8, 1913, and that in view of the representations made to the Government in submitting the plan, Mr. Newman recommended that the arrangement take effect as of January 1, 1913. This recommendation was fully concurred in by the members present.

The meeting then proceeded to the election of officers and trustees for the year 1913; and on motion, a Nominating Committee was appointed by the Chairman to nominate candidates to fill the respective offices during the ensuing year. The Nominating Committee presented the names of the following to serve as designated during the coming year:

Officers

President	Dr. George W. Earle
Vice Presidents	J. W. Embree and Charles T. Mitchell
Treasurer	George C. Wilce

Board of Trustees

Dr. George W. Earle, Chairman.	W. D. Young.
J. W. Embree.	Thomas Forman.
Charles T. Mitchell.	Charles T. Kerry.
George C. Wilce.	A. L. Dennis.
	One vacancy to be filled.

[fol. 172] On motion, duly seconded, the Secretary was instructed to cast a ballot for their election to the respective offices as designated, which was done; whereupon, they were declared duly elected.

In accordance with Article XIII, the meeting then proceeded to the election of a Trustee of the Special Fund. On motion of Mr. Forman, seconded by Mr. Embree, the Colonial Trust and Savings Bank of Chicago was unanimously elected Trustee of the Special Fund.

* * * * * * *

Market Conditions Committee

Morris E. Thomas, Chairman.
T. Wilce Company.
W. D. Young & Company.
Kerry & Hansen Flooring Co.
A. L. Dennis Salt & Lumber Co.
W. H. White Company.
J. W. Wells Lumber Company.
Northwestern Cooperage & Lumber Co.

Committee on Grades

Charles T. Kerry, Chairman.
S. L. Eastman.
W. L. Saunders.
George Strable.
One vacancy to be filled.

Advertising Committee

B. P. Whedon, Chairman.
Morris E. Thomas.
William E. Cox.
W. B. Earle.
John J. Porter.

The meeting then adjourned to the Hotel La Salle for luncheon.

Afternoon Session

After luncheon, Attorney Newman, who was present, briefly addressed the meeting, after which trade conditions and the general state of the market were discussed. It was the opinion of the members present that considering the present market values of rough lumber and the actual costs of manufacturing and selling flooring, the present values of flooring are entirely too low, and it was suggested that at the next meeting of the Market Conditions Committee, the Committee figure out what the selling values of flooring would be if a logical and scientific method of determining values of flooring were used, that is: if the selling values of flooring were based upon the cost of raw material plus manufacturing and selling costs and plus a reasonable profit.

It was suggested by Mr. Forman that the question of discontinuing the boring of flooring be considered at the next general meeting of the Association.

* * * * * * *

(Signed) Geo. W. Keehn, Secretary.

[fols. 173 and 174] GOVERNMENT'S EXHIBIT No. 15-A

* * * * * * *

The President, Dr. Earle, briefly reviewed the work of the Association during the past year, and thanked the members for their co-operation, which had brought about greatly improved conditions in the flooring industry.

The Annual Report of the Secretary for the year 1913 was submitted and read, and on motion was ordered placed on file, and a copy sent to each member of the Association.

Mr. Thomas, Chairman of the Market Conditions Committee, then presented the Annual Report of his Committee which was read by the Secretary, and on motion the report was adopted and the Secretary instructed to send a copy to the members, and on motion a vote of thanks was tendered to the Committee for their efficient work during the year, and a rising vote of thanks was given to Mr. Thomas for his invaluable services, and for the time and energy he had devoted during the entire year, as Chairman, to the work of the Market Conditions Committee.

* * * * * * *

A recess was then taken to give the Trustees an opportunity to appoint the standing committees for the year 1914, and after the Trustees had considered the matter, the President announced the reappointment of the same members to serve on the respective committees during 1914 as had served during 1913, with the addition of Foster-Latimer Lumber Company to the Market Conditions Committee, and of W. D. Connor to the Grades Committee.

* * * * * * *

[fol. 175] GOVERNMENT'S EXHIBIT No. 15-B

Chicago, January 28th, 1914.

NINTH ANNUAL REPORT FOR CALENDAR YEAR 1913

To the President and Members of the Maple Flooring Manufacturers' Association.

GENTLEMEN: The members of this Association should be well pleased with the general outcome of the flooring industry for the year 1913. Business conditions generally were less favorable, as you know, during the last half of 1913 than in 1912 and the first half of 1913, but this affected only to a slight extent the annual volume of our shipments. The average conditions of stocks as a whole for the two years show that the relations maintained between supply and demand averaged about the same, while values averaged very much better in 1913 than in 1912. This can be accounted for by the

educational work of the Market Conditions Committee, a more careful study by the membership of our statistics, and the conviction, brought about by the so-called Scientific List, that if any profit at all in the flooring industry is to be realized, it must be realized now before a Vanishing Industry becomes a Vanished Industry; and most important of all in its influence upon Association work has been the growth of a spirit of closer co-operation and greater friendliness among the members in their relations with each other.

During the year the Association held six regular meetings, and the action of special significance taken by the Association may be briefly summarized as follows:

Annual Meeting in January

It was suggested that the Market Conditions Committee formulate a table of values showing what flooring would be actually worth, and what it should sell for if delivered values were based by a logical and scientific method in accord with the following fundamental principles:

1. The market value of the raw material as established by current sales of rough lumber in the open market.

2. Add the cost of manufacturing and selling.

3. Then add one-ninth to represent the minimum profit of 10% on sales.

4. Add cost of freight or delivery.

* * * * * * *

Values recommended for Thin Flooring, and 1,000 pounds established as the standard weight of 3/8" stock.

Differentials recommended for White Clear Maple Flooring.

* * * * * * *

[fol. 176] A report of the work of the Market Conditions Committee will be made by Mr. Thomas, Chairman, and the work of the Grades Committee will be reviewed by Mr. Kerry, Chairman of that Committee.

* * * * * * *

[fol. 177] New Members

In 1913 two new members joined the Association, G. H. Tennant Company, on January 1st, and Bliss & Van Auken Lumber Company, on March 1st, but as Ward Brothers and Flanner-Steger Land & Lumber Company withdrew from membership in February, our membership remains at 29, the same as a year ago.

Statistics for Year 1913

While the annual statistics will be reviewed in the report of the Market Conditions Committee for the year, the Secretary would like to invite your attention to two tables which appear among the annual reports, because they tell the whole story of the results and possibilities of intelligent co-operation:

Maple Flooring—13/16" x 2¼" Face

	Clear		No. 1		Factory	
	1912	1913	1912	1913	1912	1913
Average % of stock sold	207%	140%	144%	151%	57%	73%
Average net price; Mich. and Wisconsin Mills....	$37.69	42.49	31.80	36.76	17.74	22.01

Prospects for 1914

While some may consider the business outlook for 1914 problematical, there is no occasion for pessimism or calamity howling. Underlying conditions are sound; winter wheat looks good; there is plenty of money in the country in the hands of those who will spend it, and if the new Currency Bill fulfills its mission, we shall have no more panics. The world is going on and is going to want Maple Flooring. If it happens to want less of it, then manufacture less of it, and be contented with a smaller volume of business at values consistent with the hazards of a manufacturing industry whose raw material is fast disappearing.

Respectfully submitted, George W. Keehn, Secretary.

[fol. 178] GOVERNMENT'S EXHIBIT No. 15-"C"

January 29th, 1914.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: We were all very sorry indeed not to see you at the Annual Meeting yesterday. Twenty-one members were represented at the meeting, and we had the largest number—25—at the Dinner that we have ever had, and the members all expressed themselves as well satisfied with what the Association accomplished during the past year.

We enclose copies of the Annual Reports for 1913, which were the principal topics discussed at the meeting, and if you will compare the prices obtained for Flooring in 1913 with the prices of 1912, notwithstanding that average stock conditions during 1913 were less favorable than in 1912, you will agree with the other members who were here, that the work of the Association last year was of benefit

to the industry. We also enclose list of the Officers, Trustees and Committees for 1914.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 179] GOVERNMENT'S EXHIBIT No. 15-D

March 12th, 1914.

To Members.

GENTLEMEN: According to the By-Laws, a regular meeting of the Association is scheduled for the month of March, and as it seems to be of more than usual importance to have a meeting at this time, please let me know whether or not you will attend if a meeting is called for Wednesday, March 25th.

The Market Conditions Committee will meet on Tuesday, the 24th, and will have a complete report on trade conditions to su' mit to the general meeting, and the Grades Committee may also wish to discuss with the members further details of the work of Mr. Ro' ertson, the Association Inspector, which will be commenced about the first of April.

The Shipments for the month of February held up well, amounting to 10,800 M, only 400 M less than January or practically the same, considering February is a short month. These shipments were about 12% less than February 1913, and about 8% more than February 1912, so last month can be considered a good average February. We have not yet received all the February reports from four or five members, but the new business booked during the month is showing up well, and so far as our statistics are concerned, based upon the reports already received, there is no real occasion for inconsistent values or for discouragement respecting the flooring situation.

* * * * * * *

[fol. 180] GOVERNMENT'S EXHIBIT No. 15-E

May 12th, 1914.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: We have delayed writing you about the general meeting on the 6th expecting to send you our April statistics at the same time, but as one of the April reports has not yet been received, I thought I would write you today about the meeting and forward the statistics later.

The meeting was well attended, 22 members being represented, and the following is an outline of the business transacted:

* * * * * * *

[fol. 181] The plan of exchanging quotations, referred to in the Market Conditions Committee report of April 23rd, was discussed and the members who attended the meeting expressed their intention of co-operating in the plan. It was explained that the plan was already in operation, as the members of the Committee who attended their last meeting, and 4 or 5 other members of the Association, who afterwards joined with them, have been sending carbon copies of their quotations on inquiries for 50 M feet or more flooring and have been advised in turn of other quotations on the same business; in other words: the plan is working now as outlined in a letter sent to the membership on April 27th, but in order to get the best results, it is necessary to have the co-operation of the entire membership.

* * * * * * *

[fol. 182] GOVERNMENT'S EXHIBIT No. 15-F

July 11th, 1914.

Mid-Summer Meeting—Mackinac Island

To Members.

GENTLEMEN: The semi-annual meeting of the Association will be held at the Grand Hotel, Mackinac Island, on Thursday and Friday, July 30th and 31st, 1914.

Meetings of committees will be held on the 30th and the general meeting of the Association on the 31st. If all the business coming before the Association cannot be transacted on the 31st another session will be held on Saturday, August 1st.

The following meetings will be held on Thursday, the 30th:

1. Market Conditions Committee—

To make report on market conditions in June and to review the first half of 1914.

* * * * * * *

4. Meetings of the three arbitrators (Dr. Earle, Mr. Rittenhouse and the Secretary) with Nos. 42, 43 and 44 to readjust their allotments from July 1, 1914 to December 31, 1915, in accordance with agreement with them that their allotments were to be readjusted to take effect after the first eighteen months of the three-year allotment contract had expired.

5. The Board of Trustees will meet with No. 32 to readjust their allotment from May 1, 1914. This readjustment is necessary under Article XVII because of their Dighton fire. The Trustees will also consider any other matters that other members may wish to present to them.

This meeting of the Association will be of vital importance, and each member should be represented, as the findings of the arbitrators and of the Board of Trustees are subject to the right of appeal to the entire Association, as provided for in the Articles of Association, in Article XVII, Page 11, regarding fire, and Article VI, Page 4, Board of Trustees.

* * * * * * *

[fol. 183] GOVERNMENT'S EXHIBIT No. 15-G

Minutes of Semi-annual Meeting, Mackinac Island, July 30th and 31st, 1914

The semi-annual meeting of the Maple Flooring Manufacturers' Association was held at the Grand Hotel, Mackinac Island, Michigan, on Thursday and Friday, July 30th and 31st, 1914.

* * * * * * *

Report of Arbitrators and Board of Trustees.—The Secretary reported that meetings of the Arbitrators and of the Trustees had been held to readjust the allotments of No. 42, 43 and 44, in accordance with the agreement made with them at the meeting of November 14th, 1912, that their allotted percentages were to be readjusted at the end of the first eighteen months of the three year Allotment Contract, such readjustments to be mutually acceptable to a majority of the Association and to the three members in question, and to be effective from July 1st, 1914, to December 31st, 1915.

It will be recalled that in arriving at the allotments effective January 1st, 1913,

(a) The 1911 allotments represented 40%.

(b) The Present Conditions Period, January 1911-October 1912—22 months, represented 50%.

(c) The matchers represented 10%.

It was the opinion of the Arbitrators that a fair and equitable way of arriving at the new allotments was to pursue the same method, excepting

(a) Substitute their 1913 allotments for their 1911 allotments.

(b) Substitute as their Present Conditions Period their shipments during the past 18 months for the 22 months in the old Schedule.

(c) Apply the 10% for matchers the same as in the previous schedule.

After considerable discussion the question was raised by one of the three members that 40% was too high a value to place upon their allotments for 1913, because they had been engaged so short a time in the flooring industry that their sales records were of too

short duration to establish their 1911 and 1913 allotments on an equitable basis compared with the allotments of the older manufacturers. In order to meet the situation a joint meeting of the Arbitrators and Board of Trustees was held, and after further consideration it was deemed equitable to change the basis of readjustment from 40%, 50% and 10% to 30%, 60% and 10%.

* * * * * * *

[fols. 184 & 185] Market Conditions Committee Report.—The report of the Market Conditions Committee was presented by its Chairman, Mr. Thomas. The report was adopted unanimously, and all the members present voted in favor of exchanging quotations on inquiries for one carload or more of flooring, as recommended by the Committee. The Secretary was instructed to send a copy of the report to each member of the Association and to request and urge the members who were not present to join with the other members in the exchange of quotations.

* * * * * * *

[fol. 186] GOVERNMENT'S EXHIBIT No. 15-H

Chicago, August 5th, 1914.

To Members.

GENTLEMEN: Because of the importance of the business transacted at the semi-annual meeting at Mackinac Island, I thought I would send to each of you a copy of the minutes of the meeting.

Referring to the method of equalizing the new allotments to 100% basis, you will see, as shown in column 3, that because of the concession by No. 40 of 500 M feet from their allotment ratio, their allotted percentage is reduced from 1.90% to 1.60% (and the ratio in feet from 3,177 M to 2,675 M) so the allotted percentages of the other members of the Association should total 98.40%, to which we add 1.60% for No. 40 to make the toal 100%. After the five readjustments the allotted ratios effective July 1st, 1914, of all the members other than No. 40 total 100.55%, column 2, which is reduced to 98.40% in column 3. In reducing 100.55% to 98.40% each 1% of the 100.55% has a value of 97.86.

If you will refer to the allotment schedule of October 27th, 1913, columns 8 and 9 headed "Allotted Per Cents," you will notice that the values in M feet were estimated on annual shipments of 180 millions, from which we deduct 12,800 M as the estimated shipments of No. 7, leaving 167,200 M as the estimated annual rate of shipments of the allotment members, as shown in column 9 of the schedule of October 27th, 1913, and in columns 4 and 5 of the schedule of August 4th, 1914. Should you desire any further explanation please advise.

Regarding the new plan of exchanging quotations in inquiries for one carload or more of flooring, recommended by the Market Conditions Committee, and which all the members who attended the meeting voted to put in operation on August 3rd, I am glad to say that yesterday and today we received 34 carbon copies of quotations, so the reduction in the quantity is going to work out well. But the greater the number of members who join in the plan the greater will be the practical benefits not only to the individual member, but to the entire Association as well, so why not make it unanimous?

Congratulating the Association upon the happy outcome of the Mackinac Island meeting, I am

Yours very truly, George W. Keehn, Secretary.

[fol. 187] GOVERNMENT'S EXHIBIT No. 15-I

Minutes of Annual Meeting, January 29, 1915

The Tenth Annual Meeting of the Maple Flooring Manufacturers' Association was held in Chicago on Friday, January 29th, 1915, at 10 A. M.

* * * * * * *

The President stated that inasmuch as the work of the Association during the year 1914 would be reviewed in the annual reports of the Chairmen of the standing committees, and in the report of the Secretary, that it was unnecessary for him to go into the details, but that he wished to thank the members for their hearty co-operation during the year, and to congratulate them upon the results that had been achieved through the work of the Association in spite of adverse conditions.

The annual report of the Secretary was submitted and read, and on motion accepted, and a copy of it ordered sent to each member of the Association.

The report of the Treasurer was presented, but the reading of it was dispensed with because copies of it had already been mailed to the membership. On motion the report was accepted and ordered placed on file.

The regular monthly report of the Market Conditions Committee covering the December statistics was presented and read and was accepted, and the Secretary instructed to send copies of it to the membership. In its report the Committee stated that it had just completed the collection of data covering present manufacturing and selling costs of Maple Flooring, and that a table had been compiled illustrating what the present selling prices of Maple Flooring should be F.O.B. Cadillac, Michigan, if selling prices were based upon the fundamental principles embodied in the so called Scientific List of February 1913. The attention of the members was especially called to that feature of the Committee's report.

The annual report of the Market Conditions Committee for the

year 1914, was presented by Mr. Thomas as Chairman, and read by the Secretary, and on motion the report was accepted and the Secretary instructed to send a copy to each member of the Association. On motion a rising vote of thanks was given to Mr. Thomas for his efficient work and his very valuable services as Chairman of the Market Conditions.

* * * * * * *

The meeting then proceeded to the election of Officers and Trustees to serve during the year 1915, and on motion the President appointed as a Nominating Committee Mr. Law, Mr. Cox and Mr. Gillouly. After deliberation the Nominating Committee nominated for re-election, to serve during the ensuing year, the same officers [fol. 188] and Trustees who served during the previous year, and on motion the rules were suspended and the Secretary was instructed to cast the unanimous ballot of the Association for the candidates named by the Nominating Committee, which was done, whereupon the same Officers and Trustees who had served during the previous year were declared unanimously re-elected to their respective offices to serve for the term of one year, and until their successors are elected and have qualified.

* * * * * * *

After the dinner had been disposed of the meeting was again called to order by the President, who stated that under the head of unfinished business the question of discontinuing the boring of flooring on July 1st, 1915, should be taken up for further discussion and consideration. The Secretary read the correspondence with the members who had not voted on this question at the previous meeting of the Association on November 20th, 1914, when the subject was last considered, and as it appeared from the records and correspondence that nearly all the members of the Association were in favor of discontinuing the boring of flooring on July 1st, 1915, provided the co-operation of the principal non-member manufacturers could be secured, a memorandum of agreement had been prepared for signatures. Thirteen of the members who were then present signed the agreement, and the Secretary was instructed to circulate it among the absent members, and the non-member manufacturers, and get as many signatures as possible to the memorandum, and the report to the next general meeting of the Association.

Mr. Kerry, Chairman of the Grades Committee, stated that Mr. M. H. Robertson, the Association Inspector, had gone south for the winter, and that he had expressed his willingness to make another trip among the Association mills, if so desired, upon his return from the south. On motion the Grades Committee was instructed to engage Mr. Robertson to make another trip among the Association factories as soon after his return from the south as may be mutually arranged, but it was the sense of the meeting that the trip should be completed in time for Mr. Robertson to make a report at the Semi-Annual Meeting in July.

On motion the meeting adjourned subject to the call of the President.

(Signed) Geo. W. Keehn, Secretary.

[fol. 189] GOVERNMENT'S EXHIBIT No. 15-J

Tenth Annual Report for Calendar Year 1914

January 29th, 1915.

To the President and Members of the Maple Flooring Manufacturers' Association.

GENTLEMEN: The year 1914 will long be remembered by the lumber industry as one of the most unsatisfactory in its experience, but the manufacturers of Maple Flooring have many things to be thankful for that have been denied to others. Many lines of business show shrinkages of 25% to 50% in volume while our shipments are only 11% less than in 1913, and our bookings of new orders during 1914 were only 7% less than in 1913. Neither have values for flooring suffered to the same extent as have values of other lumber products, taking the average for the year as a whole.

Association Meetings

During the last year the Association held five meetings. The Annual Meeting in January, A regular meeting in May, The Semi-Annual Meeting at Mackinac Island in July, And regular meetings in September and November.

Work of Committees

Reports of the work of the standing committees will be made by the chairman of the respective committees, Mr. Thomas for the Market Conditions Committee, Mr. Whedon for the Advertising Committee, and Mr. Kerry for the Grades Committee.

* * * * * * *

[fol. 190] ### Membership

No change in our membership has taken place during the year, so it stands at 29 the same as a year ago.

Statistics for Year 1914

You have already received the annual statistics, and while they will be reviewed in detail in the report of the Market Conditions Committee, I would like to submit a contrast of stock conditions and current net values during the past three years. It proves beyond a doubt that co-operation can be made helpful in bad times as well as in good times.

Maple Flooring 13/16" x 2¼" Face

Contrast	Clear			No. 1			Factory		
	1912	1913	1914	1912	1913	1914	1912	1913	1914
Avg. % of Stock Sold.....	207%	140%	123%	144%	151%	108%	57%	73%	70%
And Avg. Net Price Mich. and Wis....	37.69	42.49	41.38	31.80	36.76	36.45	17.74	22.01	21.39

Proportionate to stock conditions, values were far better in 1914 than in 1912, and considering the more favorable stock conditions in 1913, the 1914 values compare quite favorably. They are less than you could have had for the asking, because they show a greater shrinkage than was justified by the small shrinkage of only 7% in our total sales. With 93% of last year's business values should have held to the same levels.

Current Net Values

An analysis of the statement, Trend of Current Net Values, will show the following gains and losses in the average for 1914 compared with 1912 and 1913:

The 2¼" Clear shows a gain of $3.69, 9.8%, over 1912 and a loss of $1.11, 2.6% from 1913.

[fol. 191] The 2¼" No. 1 shows a gain of $4.65, 14.6%, over 1912 and a loss of 31 cents, .8 of 1% from 1913.

The 2¼" Factory shows a gain of $3.65, 20.6%, over 1912 and a loss of 62 cents, 2.8%, from 1913.

Assuming the percentage produced of each grade during the year would apply to the 2¼" face, and applying these percentages to the average values obtained during that year, the following table would show the net returns of Group E mills for their 2¼" face product.

	1912		1913		1914	
Clear	50% @ $37.69	$18.85	50% @ $42.49	$21.25	51% @ $41.38	$21.10
No. 1.....	34% " 31.80	10.81	35% " 36.76	12.87	35% " 36.45	12.76
Factory	16% " 17.74	2.84	15% " 22.01	3.30	14% " 21.39	3.00
	100%	$32.50	100%	$37.42	100%	$36.86
Gain over 1912.....				4.92		4.36
Loss in 1914 from 1913.....						.56

Adverse Trade Conditions

When we consider that lumber had borne its full share of the great depression in business that existed during practically the entire year, and which has amounted to almost stagnation since the outbreak of the European War, we should be thankful that values have held to so high an average, and in view of the staggering accumulation of surplus stocks on top of adverse trade conditions, it is surprising that prices have not gone completely to smash.

Too Much Output

The statement of surplus stocks shows that the total of our surplus items averaged in 1914 double what they averaged in 1913, and that they have increased 20 million feet during the last five months. They now aggregate 28,649 M, 71%, of the stocks on Hand. This is the worst showing in the history of the Association, worse even than on March 1st, 1912, when our stocks reached their highest point, and were about 6 millions more than now, but at that time 49% of the stock was sold, whereas only 29% of our present stock is sold.

It is never of much use to talk about the water that has passed over the dam, but if you will refer to the monthly reports of your Market Conditions Committee you will find many references to the danger of over-production, and the members were urged repeatedly to give careful thought to their individual production. Had this been done values would have held automatically to the high points in January, and we would not now have nearly one million dollars tied up in unsold stocks.

Cautionary references to over-production appear in seven of the Committee's reports, starting with February 13th and becoming more emphatic in the succeeding reports of May 18th, June 25th, September 24th, October 30th, November 20th and December 18th, so it would seem that the Committee displayed storm signals early enough and often enough in the year against over-production.

Our deplorable stock conditions unerringly point a shining finger that must not be denied, to the path of Decreased Production to meet Decreased Demand, if anything but junk is to be the portion of the Maple Flooring industry as the net result of its transactions during the year of grace 1915.

Respectfully submitted, George W. Keehn, Secretary.

[fol. 192] GOVERNMENT'S EXHIBIT No. 15-K

Semi-Annual Meeting July 16, 1915

A #5516

The following is a memorandum of the principal business transacted at the Semi-annual Meeting of the Association held at the Grand Hotel, Mackinac Island, Michigan, on July 16, 1915:

In the absence of the President, Dr. George W. Earle, the meeting was called to order by Mr. Charles T. Mitchell, Vice-president, and eighteen members of the Association were present.

Grade Committee Report.—This report was made the first order of business, and in the temporary absence of the Chairman, Mr. Charles T. Kerry, the Secretary stated that in accordance with the action taken by the Association at the annual meeting in January, the Grades Committee had arranged with Mr. Robertson to make the fourth trip among the Association mills. As the Grades Committee had no data of any kind regarding manufacturing conditions except as to their own individual plants, only such reports having been made to the Committee as were made to the individual members of the Association respecting their own plants, that Mr. Robertson would make a report to the meeting covering the general features of his work.

Mr. Robertson thereupon made the following report, which was accepted, ordered placed on file, and the Secretary instructed to send a copy to each member of the Association:

"Pursuant to instruction of your Committee on Grades, I have made the fourth trip of inspection at your mills, commencing May 1st and finishing June 9th, individual report of which has been submitted to each member.

As on former trips there was extended by yourselves and employees every courtesy necessary to make my visit pleasant and successful, for which I wish at this time to again thank you.

First I am pleased to report a decided improvement in the general features of manufacturing the stock. The same grade presents an improved appearance by reason of the elimination of such features as chipped edges, excessive short tongue, shallow or unfinished back, and general machine work which tends to an untidy appearance. In the handling of the finished product there is also improvement among a majority of the members. Concerning this feature I may be a little too insistent, but it has been my observation that the average flooring customer will more severely criticise defective edges than any of the other allowable defects. I am sure that all manufacturers who are placing emphasis on the general detail of the manufacture and handling of their product, will agree that it is a matter of no minor importance, and in view of the fact that almost every job of any importance has a competitive substitute with all of its attractive features presented to the buyer, manufacturers of Maple Flooring can not afford to relax vigilance or omit any detail which will serve to recommend their product.

In the matter of loss in trimming, some of you have made considerable improvement, others not so much. The main loss is of course in the "long trim" but there is also a loss on the part of most of the members in trimming out allowable defects and not thereby raising the grade but increasing amount of short stock. This is especially true of Factory.

You will recall that the report of the third trip of inspection made near the close of last year, indicated a very uniform condition

of the grades throughout the membership. The extremes of difference of high strata being reduced from 13 to 5 points in the Clear and from 15 to 7 points in the No. 1 and from 17 to 5 points in the Factory grade during the period from April 1st to November 1st. The average high strata grade for the three inspection trips of this period was 64.5% in Clear, 65.1% in No. 1, and 59% [fol. 193] in Factory. From this we established a standard at 65% high strata for the Clear and No. 1 and 59% for the Factory. By comparing your fourth trip report with these figures and the complete report of last year, you will note but slight difference in the strata grade of Clear and No. 1 but the Factory is raised two points. A majority show about one point advance in the grade of Factory, but six of the members show from 5 to 13 points above last years standard, and were it not for the fact that three members are from 2 to 7 points below standard, the general average would be still higher. These members who were off standard both above and below gave the matter due attention at the time of our visit, and the matter is no doubt corrected by this time.

The high strata grade report shows as follows:

Clear	Extremes	61 & 68%.	Difference of	7	points.
No. 1	"	60 " 69%.	"	" 9	"
Factory	"	52 " 72%.	"	" 20	"

This looks a little discouraging when compared with report of third trip which shows differences of 5 points in Clear, 7 points in No. 1 and 5 points in Factory. However, when we come to analyze it more completely we find that in Clear 6 members are at standard, 4 are one point above and 2 are one point below, making 12 members at or within one point of standard and 20 are within two points of standard. In the No. 1 grade 4 members are at standard, 8 are one point above and 3 are one point below, making 15 members at or within one point of standard, and 18 are within two points of standard. In the Factory grade only three members are at standard of last year, but ten are one point above, and one member is one point below, making 14 members at or within one point and 17 are within two points of standard. Thus we see that while the strata grading shows an upward tendency, yet the combined figures of the entire Association are not much changed from last year. But here lies the trouble. The object we are seeking is a complete Standardization of the product, which means uniformity of grade, each member having the standard and working as zealously to it as he does to the standard gauge. In this respect we see opportunity for criticism. We had the standard and were practically at it at the close of last year, but there have been departures, as is shown not so much by the general average but by the extremes of difference, as shown not only in the strata grade but also in the "off" grade, by which we mean the No. 1 found in Clear, the Clear and Factory found in No. 1, and the No. 1 in Factory.

The general average of these is slightly increased but not sufficient to be termed startling, but it lacks uniformity, ranging in Clear from

nothing to 10½% of No. 1, and of Clear in the No. 1 from nothing to 15%, and of Factory in No. 1 from nothing to 7½%; of No. 1 in the Factory grade from nothing to 16½%.

It can be easily understood that a customer receiving a car of Clear Flooring which ran 68% high strata, containing no No. 1, would not be quite satisfied if his next car ran 61% high and contained 10½% No. 1, and still more dissatisfied if one car of Factory ran 72% high with 16½% of No. 1 in it and another car ran 52% high and no No. 1 in it.

I am convinced that the strata grading can be reduced to three points and the off grading to 5% extreme difference, and when this is accomplished and strictly adhered to there will not be much use for an Official Inspector."

Respectfully submitted, (Signed) M. H. Robertson, Official Inspector.

Discussion of Report.—Mr. W. B. Earle stated that from information his Company had obtained in a general way and also from bundles of flooring they had seen of other members' manufacture, that some of the members were making their grades very much higher than the standard as defined by the Grading Rules and the interpretations of Grades. That this fact was evidently found true [fol. 194] by Mr. Robertson on his fourth trip was indicated by his report to the meeting, the average percentage of Clear in the No. 1 and of No. 1 in the Factory having materially increased since his third trip. In the discussion it developed that the increases in the average percentages of Clear in the No. 1 and of No. 1 in the Factory was because a few members of the Association were considerably higher in their grading than the Association standards.

The question was then considered of the advisability of making four grades of flooring by having an intermediate grade between No. 1 and Factory by making two grades out of the present Factory grade, and it was the sense of the meeting that the fourth grade should be established. The vote on this question was 14 "yes" and 2 "no", No. 6 and No. 44 voting "no".

It was argued that the spread of $16.00 between No. 1 and Factory is a far greater spread than should exist between any grade and the next lower grade of lumber or lumber product.

On motion it was then unanimously voted that the matter be referred to the Grades Committee, with the suggestion that the Committee meet at Saginaw, Michigan, with Mr. Robertson present, and review the grades, and that the Committee make to the Association a comprehensive report with recommendations, the same to be acted upon by the Association at its next general meeting.

On motion it was further ordered that Mr. Robertson make a fifth trip among Association mills at such time as the Grades Committee may arrange, subsequent to their meeting at Saginaw.

The Market Conditions Committee reported verbally that as the June reports and the Semi-annual Reports for the first half of 1915 had been mailed to the members in advance of the meeting, the

members were in a position to know our statistical conditions on July 1st.

These reports show that our stock conditions on July 1st were more unfavorable than on June 1st, there being a decline of three points in the percentage sold of all grades on Maple, Beech and Birch stocks, but of Maple 2¼" face, however, the same percentage was sold on July 1st as on June 1st.

Stocks on hand increased during the last month 1,029 M, but notwithstanding this increase the policy pursued during the winter and spring months of avoiding excess production had resulted in a decrease of 3½ millions from the quantity on hand on March 1st.

Shipments during the first half of 1915 decreased 11.8% compared with the first half of 1914, but this decrease was happily counterbalanced by the decrease of 16.9% in production during the same period.

From the June reports of 21 members the Committee finds that Current Net Values obtained for Clear and No. 1 were practically the same as in May, but that Factory showed a recession of 50 cents. The present selling values therefore for 13/16" x 2¼" face Clear, No. 1 and Factory are now represented by concessions of $7.00, $5.00 and $7.50 respectively from the Table of Delivered Values of May 21, 1913.

Compared with June 1914, Group E mills show decreases of $2.91 on Clear, $1.87 on No. 1 and $1.96 on Factory.

The members who make the monthly reports of Current Net Values are in a position to analyze in detail the net prices obtained by other members and by each geographical group. If you are not making this report you are missing information that has proven to be of great value in handling sales.

Mr. Thomas stated that there is a movement on the part of the Railway Companies to increase freight rates on dressed lumber, and that in discussing this question at the Committee Meeting the day before, the Committee was of the opinion that a Special Committee should be appointed to handle such questions in order to protect the interests of Maple Flooring. With this object in view on motion of Mr. Thomas, duly seconded, it was unanimously voted that the President appoint a Special Committee, to be known as the Traffic Committee, and to consist of three or five members as the President may deem best.

[fol. 195] Advertising Committee Report.—Mr. Whedon, Chairman, verbally reported in substance as follows:

Since the last Association Meeting the Committee had ordered printed 60 M copies of Grading Rules and 80 M copies of "Maple, Beech and Birch Floors—The Proper Nail to Use and How to Lay the Flooring," which had been distributed as follows:

Sent to	Grading rules		Maple, beech, and birch floors	
Architects	7,000		7,000	
Building contractors	15,000		15,000	
School boards in towns of 1,000 population and up	6,000		6,000	
Cotton mills	1,000		1,000	
		29,000		29,000
Members		16,000		40,000
Reserved for future use		15,000		11,000
		60,000		80,000

The Advertising Assessments for the first half of 1915 were sufficient to liquidate all advertising expenses up to July 1st, not including the new edition of 60 M Grading Rules and the 80 M of the new pamphlet "Maple, Beech and Birch Floors."

Four Advertising Booklets are in course of preparation by Mr. Christine:

(1) For the Home Builder.

(2) For the Contractor—about finishing floors, etc.

(3) For the Retail Lumber Dealer.

(4) For School Boards.

The Committee expects to complete the revision of the manuscripts and have them ready for publication within a few weeks.

Mr Whedon also stated that at the meeting of the Advertising Committee held the day previous, ways and means of securing to our membership the benefits of Association Advertising were considered, and the Committee recommends that the members have printed in their advertisements in the trade journals "Members of Maple Flooring Manufacturers' Association," so that purchasers of flooring will be in a position to know they are getting the flooring we are advertising. On motion, the recommendation was adopted by unanimous vote.

Rittenhouse & Embree Company.—The Secretary reported that Rittenhouse & Embree Company had decided to discontinue the manufacture of Maple, Beech and Birch Flooring, and read the following letter from them giving notice to that effect:

Chicago, July 12, 1915.

Geo. W. Keehn, Secretary, Maple Flooring Manufacturers' Assn., Chicago.

DEAR SIR: We are writing at this time to notify you that we have practically decided to discontinue manufacturing Maple, Beech and Birch Flooring in Chicago. We have been thinking of taking this step for some time, but had not definitely decided to do so until now.

We are very loath indeed to part company with your organization, as it has been a great pleasure to be associated with both you and your membership, and we wish to state at this time that we have [fol. 196] never been associated in any organization where the connection has been as pleasant and satisfactory.

Our situation at the present time is that we have about a million feet of flooring on hand and about 500,000 feet of stock left that we are now manufacturing. We are perfectly willing to sever relationship with your organization at the time that you feel would be the most opportune from a business standpoint, in fairness both to your organization and ourselves.

With kindest regards to yourself and your membership, and wishing you great prosperity in the future, we remain,

Sincerely, Rittenhouse & Embree Company, (Signed) By J. W. Embree, Vice-President. JWE/R.

Their letter was received with expressions of deep regret, as they have been members of the Association for over twenty years—ever since the original Association was organized—and during all that time their active and consistent co-operaton and the personal services of Mr. Rittenhouse and Mr. Embree as officers of the Association have been of very great benefit to the flooring industry.

Their letter was referred to the Trustees to be acted upon in accordance with the Articles of Association.

The meeting thereupon took a recess for dinner.

New Plan.—The meeting reconvened at 2 P. M. and was called to order by the Chairman.

Mr. Sam Horner, representing William Horner, with plants at Reed City and Newberry, Michigan, was invited at the suggestion of Mr. Charles T. Kerry to attend the afternoon session, and Mr. Bigelow and Mr. Cooper of Bigelow-Cooper Lumber Company, Saginaw, Michigan, were also present upon invitation of the Association.

The special order of business was the consideration of the New Plan proposed by the Trustees.

Mr. W. D. Young reported in behalf of the Trustees that the Trustees had held a meeting in Chicago on July 2nd for the purpose of devising some plan for establishing and maintaining legitimate values for flooring, and that after going over the subject thoroughly with Mr. Newman, our attorney, he had advised that the matter take the form of a petition to the Federal Trade Commission requesting permission to establish prices on Maple, Beech and Birch Flooring, such prices to be fair and reasonable and to be based upon certain fundamental principles to be embodied in the petition. At the request of the Trustees Mr. Newman prepared the Petition, a printed copy of which had been mailed to each member of the Association in advance of the meeting.

Mr. Young also stated that Mr. Forman could give to the meeting important information regarding a Plan that had been adopted by a group of Oak Flooring Manufacturers, and Mr. Forman thereupon outlined their Plan.

The Petition to the Federal Trade Commission was then read by the Secretary, and after the Petition was discussed it was signed by the members who were present, and the Secretary was instructed to obtain the signatures of the other members of the Association.

As the co-operation of William Horner was desired in this matter and in the general work of the Association, he was invited to join the Association as a statistical member for the remainder of this year beginning with July 1st, with the expectation of participating in such further arrangements as may be adopted in the work of the [fol. 197] Association. Mr. Horner expressed his willingness to join the Association on that basis, and he was thereupon elected to statistical membership by unanimous vote, and signed the petition to the Federal Trade Commission.

Mr. Cooper stated that when his firm commences the manufacture of flooring in November, they will be glad to take up the question of joining the Association.

On motion of Mr. Eastman, seconded by Mr. Strable, the President and Trustees were instructed to appoint a Committee to proceed with the Petition and to consult with Attorney Newman as to the best method of presenting it to the Federal Trade Commission, and also to make every effort to complete the Plan and to put it into practical operation.

On motion, the meeting adjourned, subject to the call of the President.

Respectfully submitted, George W. Keehn, Secretary.

[fol. 198] GOVERNMENT'S EXHIBIT No. 15-L

Memorandum of Meeting of October 22, 1915

Pursuant to the call of the President, a general meeting of the Maple Flooring Manufacturers' Association was held at the Hotel La Salle, Chicago, on Friday, October 22d, 1915, at 10 A. M.

* * * * * * *

Twenty-one members of the Association were present and eight absent, the absent members being No-. 7, 15, 17, 30, 34, 36, 37 and 40.

* * * * * * *

The Market Conditions Committee report was submitted by Mr. Thomas, Chairman, and after the report and trade conditions generally had been discussed it was the consensus of opinion that better values should be obtainable for 13/16" x 2¼" face Clear Maple Flooring, because of its greatly oversold condition, than prevailed during the month of September. In order to be better posted in regard to current quotations on this item, it was suggested that the members send to the Secretary carbon copies of all quotations they

make on inquiries for one or more cars of 13/16" x 2¼" face Clear Maple Flooring, such information to be strictly reciprocal, and to be exchanged only among the members who quote on identical business: the Secretary to advise each member of all quotations made by other members on the same business, giving the Association numbers of the members making the quotations, and the member who gets the order to report it to the Secretary, who in turn will advise the other members who quoted on the same business the price at which the order was taken, but omitting the identity of the member who made the sale. Nineteen of the members who were present voted in favor of trying out this method, commencing at once, and the Secretary was instructed to ask the co-operation of the absent members.

The Advertising Committee report was presented by Mr. Whedon, Chairman, who stated that the manuscripts for the four advertising booklets referred to in the report submitted at the Semi-Annual meeting had been prepared, and that the contract for printing them had been let to Rogers & Company, who got out the Association Official Maple Flooring Book in 1911. The titles of the booklets, and the number of copies to be printed are:

1. Individuality in the Home, A Woman's Dream, Size 4½" x 6¼"	100 M	Copies.
2. Schoolroom Floors, Size 4½" x 6¼"	50 M	"
3. Ten Reasons Why Retail Lumbermen should handle Maple Flooring, Size 3¼" x 6¼"	50 M	"
4. How to Lay and Finish Maple Floors, Size 3¼" x 6¼"	50 M	"

[fol. 199] The cost of the booklets will average about two cents each, not including the cost of special envelopes and the expense of postage and distribution. While the books are being printed, a sample of each one will be sent to the members of the Association and in case they want extra copies for their own use, arrangements will be made to supply them at cost, provided orders for a sufficient quantity of each book are received before the work is off the press to justify extra runs.

On motion the action of the Advertising Committee was approved and ratified by unanimous vote, and on motion it was ordered by unanimous vote that an advertising assessment of five cents per M feet on the shipments during the year 1916 be levied, the assessments to be paid quarterly the same as heretofore.

Trade Mark.—The Advertising Committee recommended that a trade mark be adopted by the Association to be placed upon the product of Association mills for the purpose of identifying our flooring so that architects and others who specify Association grades, as the result of our advertising, will know they are getting the flooring they specify. This will also tend to limit the benefits of our advertising to the membership of our Association. On motion it was voted unanimously to adopt a trade mark, and the Advertising Committee was given full power and authority to act in all matters and things pertaining to the trade mark.

The Grades Committee report was submitted by Mr. Kerry, Chairman, as follows:

At the Semi-Annual meeting the Committee on Grades was asked to make a recommendation to the Association relative to the advisability of establishing a grade of No. 2 Common, making four grades, Clear, No. 1 Common, No. 2 Common and Factory. The Committee went to the T. Wilce Company mill, took 500 lineal feet of 2¼" flooring as it came from the machines, and at market prices this flooring would net $31.01 making three grades, and in making four grades it would net $31.83. They afterwards went over the flooring that was selected out for No. 2 Common, and decided that by retrimming this stock, and putting it in the Clear, No. 1 and Factory, it would bring more money than it would to make a grade of No. 2 Common of this stock which could be retrimmed, and that it would not make an excessive amount of short lengths The Committee on Grades was unanimous in recommending to the Association that they do not consider it advisable to establish another grade.

The report of the Grades Committee was adopted by unanimous vote, and the Secretary was instructed to advise the membership accordingly.

Mr. Robertson then made a general report covering his observations while on his fifth trip among the Association flooring factories, which report was accepted, ordered placed on file, and the Secretary instructed to send a copy of it to each member of the Association.

[fol. 200] Traffic Committee.—The President announced that in accordance with the action taken at the Semi-Annual meeting, he had appointed the following to serve as the Traffic Committee:

Cummer-Diggins Company, Mr. Abbott, Chairman.
Strable Lumber & Salt Co., Mr. Spencer.
W. D. Connor Company, Mr. McCulloch.
William Horner, Mr. Wheeler.

The appointments were confirmed by the meeting and the Committee requested to take up the questions coming within the scope of its work.

Federal Trade Commission.—The Secretary reported that nothing further from the Federal Trade Commission had been received in regard to our petition which had been forwarded to them on August 27th, excepting an acknowledgment under date of September 4th of the receipt of the petition. In acknowledging its report the Secretary of the Commission stated that the Commission was holding a series of foreign trade hearings in the west and would probably not return to Washington until the latter part of the month, and that immediately upon its return our letter and petition would be given careful attention. At the request of the Commission copies of the proceedings of various meetings, our statistical reports, advertising literature, and other data were forwarded to the Commission in order that it may be fully informed regarding our Association work. It

was the sense of the meeting that if no definite reply is received from the Commission by the middle of November that the Secretary write them, and again call their attention to the petition, and ask if they had arrived at any decision.

The Secretary reported that an application for membership had been received from Kneeland-McLurg Lumber Company, Phillips, Wisconsin, and on motion the Secretary was instructed to invite them to become a statistical member of the Association for the remainder of the year 1915, the question of membership after that time to be a matter of mutual arrangement.

* * * * * * *

[fol. 201] GOVERNMENT'S EXHIBIT No. 15-M

Minutes of General Meeting, May 19, 1920

Pursuant to the call of the President of the Maple Flooring Manufacturers' Association a general meeting of the Association was held at the Hotel La Salle, Chicago, Wednesday, May 19, 1920, at 10:00 A. M.

The meeting was called to order by the President.

All the members of the Association were present excepting Wilce Flooring Co. and I. Stephenson Co., Trustees.

* * * * * * *

The President reported that at a meeting of the Market Conditions Committee held in April, the injunction obtained by the Government in the U. S. Court at Memphis, Tenn., against the so-called Open Competition Plan of the American Hardwood Manufacturers' Assn., had been discussed and that a Committee, consisting of the President and Secretary of the Association, had been appointed to consult with Mr. Jacob Newman, counsel for the Association, regarding what course our Association should pursue in view of the decision of the Federal Judge in the Memphis case. The Chairman stated that such conference had been held and that as a result Mr. Newman had written a letter to the Secretary giving his advice on the subject.

Mr. Newman's letter was then read by the Secretary, and after discussing the matter fully, it was the sense of the meeting that, while our Association was not in any way a party to the Memphis case, we should obey the spirit and letter of the injunction regarding the compilation or distribution of statistics thru the Secretary's office pending a decision of the appeal for modifications of the injunction.

On motion, a Committee, consisting of Mr. Thomas, Mr. Wells and the Secretary, was appointed by the Chair to draft a resolution to submit to the meeting for its action.

The Committee thereupon presented the following resolution:

Resolved, That in view of the injunction recently obtained by the Government in the Federal Court at Memphis, Tenn., against the so-called Open Competition Plan of the American Hardwood Manu-

facturers' Association, the Secretary is hereby instructed not to compile or distribute any statistical reports pending a decision of the appeal for the modification of the injunction.

On motion, the resolution was adopted by unanimous vote.

Labor conditions in the northwest, as the result of the strike called by the Timber Workers' Union, were discussed. The strike was deplored because of its certain effect to reduce the output of flooring and lumber products generally, at the very time when an increase in production, especially of flooring and building lumber, is so greatly needed to help carry out the building program of the country.

* * * * * * *

[fol. 202] GOVERNMENT'S EXHIBIT NO. 15-N

Minutes of Semi-annual Meeting, July 29, 1920

The Semi-annual Meeting of the Maple Flooring Manufacturers' Association was held at the Hotel La Salle, Chicago, Thursday, July 29, 1920, at 10:00 A. M.

The meeting was called to order by the President.

All the members of the Association were present with the exception of I. Stephenson Co. Trustees, and Flanner-Steger Land & Lumber Co.

* * * * * * *

Survey of Costs.—The Secretary reported that the Survey of Costs for the first quarter of 1920 showed an increase of $2.22 per M or 12% in Manufacturing and Marketing Costs compared with the last quarter of 1919 with the certainty of still higher average costs during the second quarter of 1920, because of general increases in wages all along the line, reduced output at many of the mills on account of strikes and labor conditions and the smaller volume of shipments owing to lack of adequate transportation facilities all of which must inevitably increase the overhead and the cost of doing business.

The Secretary was instructed to collect and compile data regarding Manufacturing and Marketing Costs during the second quarter of 1920.

* * * * * * *

[fol. 203] Labor and manufacturing conditions at the mills and trade and general conditions affecting the flooring industry, were discussed informally, whereupon the meeting adjourned subject to the call of the President.

George W. Keehn, Secretary.

[fol. 204] GOVERNMENT'S EXHIBIT No. 15-O

Memorandum of General Meeting, September 9, 1920

A general meeting of the Maple Flooring Manufacturers' Association was held at the Hotel La Salle, Chicago, Thursday, September 9, 1920, at 1:00 P. M., pursuant to the call of the President.

All of the members of the Association were present with the exception of W. D. Young & Co., I. Stephenson Co. Trustees, East Jordan Lumber Company and Foster-Latimer Lumber Co.

* * * * * * *

The Chairman made a few brief remarks regarding business conditions generally, after which conditions in the Maple Flooring industry were discussed by the meeting.

While our statitstics for the month of August were not complete, the reports in the hands of the Secretary indicate that—

Stocks are accumulating and would be about 3 millions more than on August 1st.

Unfilled orders are diminishing and would be about 5 millions less than on August 1st.

Shipments for August would be about 1 million less than July.

Production for August would be about ½ million more than July.

New business booked would be about 1 million less than July.

Flooring data covering the first week in September received from 13 mills indicate the following forecast for September:

Shipments.—The July and August shipments of the 13 mills were 7 millions and 6 millions, respectively, with September shipments running at the rate of about 40% of July and 45% of August.

Production.—The Production of the 13 mills averaged 8 millions in July and August, with September Production running at the rate of about 70% of July and August.

New Business Booked.—The new orders of the 13 mills were 3 millions in July and only 2 millions in August, with September running at the rate of about 40% of July and 60% of August. Six of the mills reported no New Business Booked at all during the first week in September.

Surveys of Manufacturing and Marketing Costs during the second quarter of 1920, compare with the first quarter of 1920 and the last quarter of 1919 as follows, after deducting the value of the wood in each case;

Second Quarter 1920	$23.93
First Quarter 1920	20.61
Last Quarter 1919	18.39

being an increase of $3.32 over the preceding quarter and an increase of $5.54 over the last quarter of 1919.

The advances in freight rates effective August 26th were also discussed and it was suggested that pending the revision of the Rate Book one-third of the old rate, as represented by the symbols in the Rate Book, be added to take care of the additional cost of freight

to destination. For example: 21¢ represented by B A in Rate Book plus one-third would be 28¢ and would be represented by B H in Rate Book.

[fol. 205] GOVERNMENT'S EXHIBIT No. 15-P

Memorandum of Special Meeting, January 6, 1921

A Special Meeting of the Maple Flooring Manufacturers' Association was held at the Hotel La Salle, Chicago, January 6, 1921, pursuant to adjournment of the General Meeting held on December 22, 1920.

The Meeting was called to order by the President and all the members of the Association were present excepting East Jordan Lbr. Co.

* * * * * * *

The President announced that in accordance with the action taken at the last meeting, the following Special Committee had been appointed to formulate a plan to stabilize conditions in the Flooring [fol. 206] Industry with the view of doing our part to assist in the resumption of building operations:

Mr. Thomas, Chairman, and Mr. Ralston, representing Western Lower Michigan.

Mr. Whedon and Mr. Kerry representing Eastern Lower Michigan.

Mr. A. C. Wells and Dr. Earle representing the Northwest.

The Committee then made its report and the Plan as formulated, to be known as the Minimum Price Basis, was read to and fully discussed by the meeting and on motion was accepted. It was ordered that the Minimum Price Basis, as accepted, be made a part of the Minutes of the Meeting and that copies of same be sent to each member of the Association.

The report of the Committee on spreads, in the "M. P. B.," between the different woods, grades, thicknesses and faces of 13/16" and thicker, and on representative values of 3/8", special grades and extra shorts, was accepted.

The Chairman stated that the advisability had been considered of appointing a Committee to appear before the Ways and Means Committee at the Tariff Hearings to be held in Washington this month, and that inasmuch as Mr. C. A. Bigelow of Bigelow-Cooper Company is a member of a Committee representing the National Lumber Manufacturers Association and would be in Washington when the hearings are held, that he be requested to look after the interests of Maple, Beech and Birch Flooring.

It was the sense of the meeting that a duty should be levied on Canadian flooring coming into the United States and that the rate of duty should be the same as the Canadian Government levies upon

Maple, Beech and Birch Flooring shipped from the United States into Canada.

Mr. Dewey of Bigelow-Cooper Company was requested to inform Mr. Bigelow of the action taken by the meeting.

* * * * * * *

George W. Keehn, Secretary.

[fol. 207] GOVERNMENT'S EXHIBIT No. 15-Q

Minutes of Special Meeting—April 27, 1921

Special meeting of the Maple Flooring Manufacturers Association held at the Hotel La Salle, Chicago, April 27, 1921, pursuant to the call of the President, Dr. George W. Earle.

The meeting was called to order by the President and 19 members of the Association were present. Five members were absent, namely, Nos. 7, 24, 26, 30 and 45.

The minutes of the general meeting held on February 25, 1921, were read and, on motion, duly seconded, were approved.

* * * * * * *

The statistical reports for the month of March 1921 were submitted to the meeting and briefly discussed, and several plans to remedy the present deplorable conditions in the industry were suggested and considered, but no definite conclusions were arrived at.

It was suggested that the plans proposed be given further thought and that the meeting adjourn subject to the call of the President with the understanding that the President would call such meeting to be held at as early a date as possible. On motion, duly seconded, the meeting thereupon adjourned subject to the call of the President.

George W. Keehn, Secretary.

[fol. 208] GOVERNMENT'S EXHIBIT No. 15-R

Minutes of General Meeting, July 8, 1921

A general meeting of the Maple Flooring Manufacturers Association was held at the Hotel La Salle, Chicago, July 8, 1921, pursuant to the call of the President of the Association.

The meeting was called to order by the President and all the members of the Association were present excepting Nos. 1, 26, 37, 45 and 49.

The minutes of the general meeting held on May 20th, were read and, on motion, duly seconded, were approved.

* * * * * * *

Mr. Kerry further reported that a communication had been received from Mr. W. P. Porter of the East Jordan Lumber Company, suggesting that the name "Factory" as applied to the third grade of Maple, Beech and Birch flooring, should be changed. Mr. Porter's letter was thereupon read to the meeting, and is as follows:

"The very limited demand for, and ruinously low price of Factory Maple Flooring raises the question whether the name "Factory" as applied to this grade does not create the impression that it is suited only to a factory building, and is of too low grade and too poor quality to be used in house building, and thus limits its use.

We all remember when the present grade of No. 3 Maple lumber went under the name of "Mill Culls," and though this grade then was much better than the present grade of No. 3, it had almost no value until its name was changed to No. 3.

We know from local experience that this grade of flooring makes a very good and serviceable floor for moderate priced houses, and we strongly believe if it were called No. 2 Flooring and special effort made to extend its use, we could not only unload part of our immense surplus of this grade, but could get a price much nearer its cost.

With Factory flooring selling as low as $22.00, which is a loss of $40.00 on every thousand feet, it would seem worth while to find a remedy if possible for this condition.

Please advise us what you think of this question."

Mr. Kerry stated that copies of Mr. Porter's letter and of the Secretary's reply had been mailed to all the members of the Grades Committee, and that it was the opinion of the Committee that the matter be referred at this meeting to the entire Association.

The subject was fully discussed and considered by the meeting, and it was the sense of the meeting that it would not be advisable to make any changes at this time in any of the names of the grades of our flooring and, on motion, duly seconded, it was voted that definite action be deferred for the present.

[fol. 209] Mr. Robertson thereupon made a brief report of his observations of grading conditions at the Association mills considered as a whole, and congratulated the members upon their maintaining the standard grades as established by the Association, and stated that all the grades now averaged practically at standard, there being an average of only

1.9% of No. 1 in the Clear.

0.4% of Clear and 1.4% of Factory in the No. 1.

0.3% of the No. 1 grade and 0.2% of No. 2 Factory in the Factory.

Advertising Committee.—The report of the Advertising Committee was submitted by Mr. Whedon, Chairman of the Committee, who stated that since the last general meeting a contract had been made with Sweet's Catalog for three pages in its 1921 edition, and Mr. Whedon recommended that the Association commence some new advertising work and that we advertise in the Textile World, a

publication having a large circulation among cotton and other textile mills which are large users of Maple flooring. The recommendation was approved.

Mr. Whedon also reported that a communication had been received from Mr. Ralston of William Horner, containing information that there seemed to be an effort to substitute rift yellow pine flooring for Maple flooring in New York City school buildings, and that the matter had been presented to and considered by the Advertising Committee and that it was the unanimous opinion of the Committee that Mr. Robertson as our Field Representative should make a special trip to New York City to see the architect of the Board of Education of New York City in the interests of Maple flooring.

Mr. Robertson then made a comprehensive report of his interview with the Architect of the New York City School Board and, on motion, Mr. Robertson was requested to reduce his report to writing so that a copy of it could be sent by the Secretary to all the members of the Association.

On motion, duly seconded, Mr. Ralston of William Horner was given a vote of thanks for bringing the matter to the attention of the Advertising Committee, and Mr. Robertson was complimented and thanked for the efficient manner in which he handled the situation.

Tariff Hearings.—The Secretary stated that at the general meeting of the Association held on January 6th, Mr. C. A. Bigelow of Bigelow-Cooper Company, had been requested to look after the interests of Maple, Beech and Birch flooring in the Tariff hearings before the Ways and Means Committee at Washington, D. C., and that a letter had been received from Mr. Bigelow, stating as follows:

"We are pleased to advise that while we did not get all we wanted in the tariff bill yet, we did get the reciprocity feature and this, if finally enacted into law, will force the Canadians to abolish their tariff, or if they do not, the President will impose a similar tariff on imports from Canada."

On motion, duly seconded, a vote of thanks was given Mr. Bigelow as an appreciation of his efforts at the Tariff hearings in behalf of Maple, Beech and Birch flooring.

The Secretary was instructed to advise Mr. Bigelow of this action of the Association.

[fol. 210] GOVERNMENT'S EXHIBIT No. 15-S

Minutes of General Meeting, August 19, 1921

A general meeting of the Maple Flooring Manufacturers Association was held at the Hotel La Salle, Chicago, August 19, 1921, pursuant to the call of the President of the Association.

The meeting was called to order by the President and 19 members of the Association were present, No. 49 being represented by verbal

proxy to Mr. Whedon. Three members were absent, namely, Nos. 26, 37 and 42.

The Oval Wood Dish Corporation of Tupper Lake, New York, who have made application for membership in the Association, were present, being represented by Mr. Frank M. Hodges, and Mr. August C. Beck, representing the August C. Beck Company of Milwaukee, Wisconsin, was also present upon special invitation. The Chairman stated that invitations to attend the meeting had also been sent to R. Connor Company, Marshfield, Wisconsin, and Robbins Flooring Company, Rhinelander, Wisconsin, both of whom replied that it was impossible for them to be here on the day of the meeting.

The reading of the minutes of the last meeting held July 8th, was dispensed with, a memorandum of the proceedings of the meeting having been sent to the membership soon after the meeting was held.

Market Conditions Committee.—Mr. Thomas, Chairman of the Market Conditions Committee, stated that his Committee had nothing special to report as a Committee, no meeting having been held prior to the convening of the general meeting, as the members of the Committee felt that trade conditions and our July Statistics could be discussed to just as good if not better advantage by the Association as a whole, as to hold a separate meeting of the Committee.

Trade conditions as reflected by the July reports were then fully discussed and considered, and it was the consensus of opinion that current market values of flooring are represented by Concessions from the Table of Values dated May 21, 1921, of

$5.00 on No. 1, all faces, 13/16″ Maple and Birch flooring.

$5.00 on Factory, all faces, 13/16″ Maple and Birch flooring.

The concessions on 13/16″ Beech flooring are increased $5.00 on all faces of No. 1 and Factory grades only, above the concessions named in the Concession Sheet dated May 21, 1921.

No changes were suggested in the Clear grade 13/16″ and thicker, or in the ⅜″ Clear and No. 1, as it was the consensus of opinion that their current market values are represented by the Table of Values Based upon Average Cost and the sheet showing Concessions, Additions and Differentials, all dated May 21, 1921.

Cost Data.—The Secretary stated that a compilation had been made from our Cost records and data, old and new, reviewing in a general way the Trend of Market Values of Rough Maple Flooring Lumber, Manufacturing and Marketing Costs and of Average Prices Realized for Maple Flooring F. O. B. Michigan and Wisconsin Mills, beginning with the year 1916, and including the first half of 1921, and that copies of the compilation would be sent to the members for their information.

[fol. 211] August Forecast.—Flooring data received from 11 mills covering the first 17 days of August indicate that August business compared with July business is likely to show an increase of about 10% in Shipments and an increase of about 50% in New Business Booked, with August Production running about the same as July Production, assuming that the remainder of the month of August averages about the same as the first 17 or 18 days. The improvement

in the volume of New orders taken is gratifying considering that this is vacation time and a period of seasonal dullness in the trade, and while the volume is far below normal, it is hoped that the demand will continue to improve during the fall months.

* * * * * * *

Federal Trade Commission.—The Secretary reported that information in detail regarding the activities of our Association had been requested by the Federal Trade Commission and that, in accordance with the long established policy of the Association, full, frank and complete replies had been made to the questionnaire sent us by the Commission.

Pacific Coast Shipments.—At the request of the Michigan Hardwood Manufacturers Association our members were requested to give data regarding their shipments of flooring to the Pacific Coast during the calendar year 1920. Several members stated that their statistics would come forward in a few days and the Secretary was instructed to transmit the totals only, when completed to Mr. J. C. Knox, Secretary of the Michigan Hardwood Manufacturers Association, with the suggestion that perhaps it would be advantageous to get statistics of Pacific Coast shipments during the year 1916, which would afford a basis of comparison and would show to what extent the high rates of freight to Pacific Coast Terminals had affected the shipments of flooring. When the data is completed a memorandum will be sent to our members showing the total shipments and a synopsis of the opinions expressed by the members on the subject of excessive rates westbound and the reasonableness and the absolute necessity of reducing them to a parity with eastbound rates on lumber, if our flooring in any volume is to move to the Pacific Coast.

Forest Products Laboratory.—The Secretary stated that a communication had been received from the Forest Products Laboratory, Madison, Wisconsin, regarding air seasoning of lumber and that ten copies of the proposed plan of Air Seasoning Study had been received from the Laboratory and the Secretary was instructed to distribute same among such of our members who have saw mills and flooring plants and who may be more directly interested in the subject.

* * * * * * *

[fol. 212] Revise Articles of Association.—After a prolonged discussion of the demoralized conditions in the flooring industry, the Secretary was instructed to prepare a draft revising the Articles of Association with the view of securing greater co-operation in the industry, and to have the draft of the revision ready to submit to the next general meeting of the Association.

New Member.—The Oval Wood Dish Corporation was admitted to membership in the Association upon recommendation of the Board of Trustees, their membership to date from August 1, 1921. It was understood that the Secretary would give them full and complete information regarding the work of the Association and that Mr. Robertson, our Official Inspector, would be requested to visit their

plant at Tupper Lake, New York, and give them such assistance as they may desire in standardizing their grades of flooring.

* * * * * * *

[fol. 213] GOVERNMENT'S EXHIBIT No. 15-U

Memorandum of General Meeting, September 23, 1921

A general meeting of the Maple Flooring Manufacturers Association was held at the Hotel La Salle, Chicago, September 23, 1921, pursuant to the call of the President of the Association.

The meeting was called to order by the President and 19 members of the Association were present. Four members were absent, namely, Nos. 1, 30, 47 and 49.

* * * * * * *

Report of Special Committee.—The report of the Special Committee, consisting of Dr. Earle, Mr. Whedon, Mr. Thomas, Mr. Wilce and the Secretary which was appointed sometime ago to revise the Articles of Association, was submitted by Mr. Whedon as Chairman of the Committee. The report of the Committee was discussed at considerable length, but no definite or final action was taken.

August Statistics.—The August statistics and trade conditions as reflected in our statistical reports were briefly discussed. It was noted that stock conditions had improved considerably during the past month, particularly in Clear and No. 1 Maple 13/16 x 2¼" face, the former being sold 161%, an improvement of 53 points since August 1st, while the No. 1 was sold 72%, an improvement of 27 points since August 1st.

The 13/16 x 2¼" Clear Maple in the hands of 24 members on September 1st was only 1,800 M with Unfilled Orders of 2,900 M, so it was oversold 1,100 M—a very strong condition indicating that the demand is considerably in excess of supply and production.

* * * * * * *

The Factory continues to be in bad shape there being 6,400 M of 13/16 x 2¼" on hand with only 700 M sold, leaving 5,700 M with no place to go but home.

The results of August business compare with July as follows, using the statistics of the same 22 members as a basis of comparison:

August-July, 1921, Statistics of 22 Members Compared

1921	Stocks	Unfilled orders
September 1	32,407 M	10,601 M
August 1	33,452 "	9,009 "
Decrease	1,045 M	
Increase	.....	1,592 M
Per cent	3.1%	17.7%

1921	Shipments	Production	N. B. B.
August	9,582 M	8,620 M	10,740 M
July	7,875 "	7,798 "	7,149 "
Increase	1,707 M	822 M	3,591 M
Per cent	21.7%	10.5%	50.2%

[fol. 214] Three Test Runs of 1921.—The Secretary stated that the members of the Association were deeply indebted to the North Branch Flooring Company for complete details regarding the results of Three Test Runs made in January 1921 and between May 1 and September 10, 1921, in which 1,539 M feet of rough Maple lumber was used, consisting of 77% Wisconsin and Upper Michigan stock and 23% Lower Michigan stock, and a careful and accurate count was kept of the flooring product by grades and faces. The Secretary further stated that with the permission of the North Branch Flooring Company an analysis of the Three Test Runs had been made and that copies of same would be given to the members of the Association for their information.

More Discussion of Special Committee's Report.—The report of the Special Committee was then further discussed, but as no definite or satisfactory conclusions were arrived at, the meeting adjourned.

[fol. 215] GOVERNMENT'S EXHIBIT No. 15-V

Memorandum of General Meeting, November 17, 1921

Pursuant to the call of Dr. Earle, President of the Maple Flooring Manufacturers' Association, a general meeting of the Association was held at the Hotel LaSalle, Chicago, November 17, 1921.

In the absence of Dr. Earle, the Vice-President of the Association, Mr. Whedon acted as chairman of the meeting. All the members of the Association were present with the exception of Nos. 1, 7, 30 and 45.

The reading of the minutes of last meeting was dispensed with, a memorandum of the proceedings of that meeting having been sent to the members soon after the meeting was held.

Stronger Market.—Trade conditions and our statistical reports for the month of October were discussed. Clear and No. 1 Maple Flooring 13/16" x 2¼" face are both in a very strong position, as indicated by their oversold condition, the Clear being sold 232% and the No. 1 sold 208%. The improvement in the demand for No. 1 is particularly noticeable, as it was sold only 45% on August 1st compared with 208% sold on Nov. 1st.

In view of recent advances in the market value of rough Maple Flooring lumber and taking into account Manufacturing and Marketing Costs and the relations of supply and demand as indicated by the heavily oversold condition of Clear and No. 1, it was the consensus of opinion as follows:

1. That present market values of Maple Flooring 13/16" are represented by Frame "A" Basis, Table of Values dated 5-21-21, at Full List for Clear and No. 1 and a concession of $5.00 on Factory.

2. That the spread of $7.00 between 2" and 2¼" in Clear and No. 1 is excessive and that a spread of $3.00 would be more representative of the difference in the intrinsic value of the two faces.

3. That the spread between Clear 3¼" and 2¼" be reduced from $10.00 to $5.00, and the spread between Factory 3¼" and 2¼" be changed from $2.00 to $5.00.

4. That the market values of Birch are equal to Maple, and that Beech Clear and No. 1 are $10.00 less than Maple and Birch, and that Beech Factory is equal in value to Maple and Birch Factory.

5. That the Table of Values dated May 21, 1921, covering 3/8" represents the present market value of 3/8".

November Forecast.—Flooring data received from 14 mills covering the first half of November indicate that November Shipments are running 5% more than in October, with Production 3% more and New Business 4% more than in October, so it would seem that the demand for flooring is well sustained. The New Business Booked in October reached the very large total of 16 millions, and as the bookings so far this month indicate a small increase, it is possible that November may equal or even surpass October in the volume of New Orders.

Grades Committee.—The Secretary reported that certain changes had been made by the Grades Committee in the Grading Rules in accordance with the vote by mail of the members of the Association, and that a new edition of the Grading Rules would be printed in which the changes, as adopted, would be incorporated.

The Secretary stated that because the Rules read * * * "to 3½ feet," the question had arisen as to whether the 3½ feet is included in the percentages of short lengths permissible in each grade. For [fol. 216] example: the Grading Rule for Clear reads "the proportion of lengths 2 to 3½ feet shall be what the stock will produce up to 20%. In order to avoid any doubt or misunderstanding that the 3½ feet is included in the percentages of short lengths, it was sug-

gested that the word "inclusive" be inserted in the Grading Rules for Clear, No. 1 and Factory after the words * * * "to 3½ feet," making them read * * * "to 3½ feet inclusive." On motion, it was so ordered.

* * * * * * *

Status on August 1 and on November 1, 1921, of 13/16" x 2¼" Face Clear and No. 1 Maple Flooring Based Upon Statistics of Same 22 Members.

[fol. 217] GOVERNMENT'S EXHIBIT No. 15-W

November 17, 1921.

To Members.

GENTLEMEN: Referring to the discussion of trade conditions at the general meting of the Association held today, it was the consensus of opinion that in view of the relations of supply and demand for flooring, as reflected by our October statistics, and also in view of

recent advances in the market value of rough Maple Flooring lumber, that the present market values of flooring would be represented as follows according to a new Table of Values to be printed under date of November 17, 1921:

Frame A, F. O. B. Cadillac, Michigan, Basis, 11-17-21

For 13/16" Maple and Birch D. & M.

	1½" face	2" face	2¼" face	3¼" face
Clear	85.00	87.00	90.00	85.00
No. 1	68.00	72.00	75.00	75.00
Factory	20.00	28.00	30.00	35.00

Full List on Clear, all faces.
Concession on No. 1, all faces—$10.00.
Concession on Factory, all faces—$5.00.

Beech Clear, $10.00 less than Maple & Birch Clear of same face.
Beech No. 1, $10.00 less than Maple & Birch No. 1 of same face.
Beech Fcty., same price as Maple & Birch Factory of same face.

With no changes in the present differentials respecting Thick Flooring and Jointed Flooring.

This would work out as follows, using the Table of Values of May 21, 1921, until you receive the new Table of Values for 13/16" and Concession Sheet, which we will have printed at once under date of November 17th:

13/16" Maple and Birch

	13/16" x 1½" face	2" face	2¼" face	3¼" face
Clear	Full List	Add $4.00	Full List	Add $5.00
No. 1	" "	" 4.00	" "	Full List
Fcty	Concsn. 5.00	Concsn. 5.00	Concsn. 5.00	Consen. 2.00

Beech Clear, $10.00 les than Maple & Birch Clear of same face.
Beech No. 1, $10.00 less than Maple & Birch No. 1 of same face.
Beech Fcty., same price as Maple & Birch Factory of same face.

With no changes in the present differentials respecting Thick Flooring and Jointed Flooring.

⅜" Table of Values 5-21-21

Clear—Full List.
No. 1—Full List.

Please be sure and send us promptly your sales report for the week ending November 19th, so that this information showing the trend of the market can be exchanged promptly among those of you who make this report.

Yours very truly, George W. Keehn, Secretary.

[fol. 218] GOVERNMENT'S EXHIBIT No. 15-X

Memorandum of General Meeting, December 22, 1921

Pursuant to the call of Dr. Earle, President of the Maple Flooring Manufacturers Association, a general meeting of the Association was held at the Hotel La Salle, Chicago, December 22, 1921.

The meeting was called to order by the President. Sixteen members were present in person and one member, the Strable Lumber & Salt Co., was represented by verbal proxy to Mr. Whedon. Six members were absent, namely: Nos. 3, 5, 14, 30, 37 and 45.

On motion, it was ordered that the reading of the minutes of the last meeting held November 17th, be dispensed with inasmuch as a copy of the minutes of that meeting had been mailed to each member soon after the meeting was held.

November Statistics.—Trade conditions and the flooring situation in general as reflected by our November statistics were discussed. As a result of the large volume of New Business Booked in November stock conditions on December 1st showed a decided improvement over November 1st, especially in the Clear and No. 1 grades of 13/16 x 2¼" Maple flooring, the Unfilled Orders for Clear being 6¼ millions with Stocks of only 2¼ millions, and the Unfilled Orders for No. 1 being over 5½ millions with Stocks of only 1½ millions. In the following table the statistics of the same 24 members for November and October 1921 are compared:

November-October, 1921, Compared, Same 24 Members

1921	Stocks	Unfilled orders
December 1	31,246 M	18,884 M
November 1	31,196 "	15,437 "
Increase	50 M	3,447 M
Per cent		22.3%

	Shipments	Production	N. B. B.
November	12,417 M	12,539 M	16,110 M
October	12,024 "	12,024 "	15,910 "
Increase	393 M	515 M	200 M
Per cent	3.3%	4.3%	1.3%

December Forecast.—Flooring data received from thirteen mills covering the first twenty days of December indicate a less active demand for flooring than during last month. This is to be expected, of course, at this season of the year because of the approach of the holidays and inventory time when the placing of new orders is usually deferred. It looks as if the December Shipments will be

about 20% less than in November, December Production about 5% less than in November, and December New Business Booked about 50% or 60% less than in November.

* * * * * * *

[fol. 219] Memphis Case.—Reference was made to the decision of the U. S. Supreme Court in the so-called Memphis case and it was the sense of the meeting that our Association should abide by the spirit and meaning of the decision and that as soon as full text of the decision has been made public so that its bearing upon the work of our Association can be interpreted and fully understood that a general meeting of the Association be called to be held as soon after the holidays as can be arranged.

On motion, the meeting adjourned subject to the call of the President.

George W. Keehn, Secretary.

[fol. 220] GOVERNMENT'S EXHIBIT No. 15-Y

January 5, 1922.

To members.

GENTLEMEN: In accordance with the action taken at the last general meeting of the Association, that the Association hold another meeting sometime in the second week in January, a general meeting is hereby called to be held at the Hotel La Salle, (Suite 209) Chicago, Thursday, January 12th, at 10:30 A. M. Sharp, to discuss the general affairs and work of the Association.

Mr. Newman, our attorney, is making a careful study of the decision of the U. S. Supreme Court in the Memphis Case, and will give us in a few days a written opinion as to what bearing the decision has upon the activities of our Association. If we get his opinion by the 7th we will send you a copy of it so you will receive it before you leave home for the meeting.

It goes without saying that it is of the utmost importance that every member of the Association be represented at this meeting, so please be certain to attend.

We hope you will advise us by return mail whether or not you will be present at the meeting.

Very truly yours, George W. Keehn, Secretary.

[fol. 221] GOVERNMENT'S EXHIBIT No. 15-Z

Minutes of Meeting January 12, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Hotel La Salle, Chicago, Thursday, January 12, 1922.

In the absence of Dr. Earle, President of the Association, Mr. Whedon, the Vice-President, acted as Chairman of the meeting.

Seventeen members of the Association were present and six members were absent, the absent members being Nos. 1, 4, 7, 26, 30 and 37.

The reading of the Minutes of the meeting held on December 22, 1921 was waived, copies of the Minutes of that meeting having been mailed to the membership soon after the meeting was held.

The Chairman stated that in accordance with the wishes expressed by the members at the previous meeting, the Secretary had requested Mr. Jacob Newman, as counsel of the Association, to give his written opinion regarding the decision of the U. S. Supreme Court in the so-called "Memphis Case or Open Competition Plan". The Secretary reported that Mr. Newman's written opinion had been obtained and it was thereupon read to the meeting and it is attached hereto and made a part of these Minutes. The Secretary was instructed to send a copy to each member of the Association.

After discussing the opinion, it was suggested that Mr. Newman be invited to attend the meeting to answer any questions the members might wish to ask regarding the Court's decision.

After further discussion of the whole subject with Mr. Newman it was the sense of the meeting, that in view of his legal opinion and his analysis and interpretation of the spirit and meaning of the Supreme Court's decision, that the statistical work of the Association, which was immediately suspended when the decision of the Court became known, be resumed and proceeded with in accordance with Mr. Newman's legal advice in his written opinion.

On motion, it was ordered by unanimous vote that new Articles of Association be prepared and the Secretary was instructed to confer with Mr. Newman in drafting new Articles of Association and have them ready in time to submit to the next general meeting of the Association.

* * * * * * *

[fol. 222] GOVERNMENT'S EXHIBIT No. 15-AA

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Copy of Legal Opinion of Newman, Poppenhusen, Stern & Johnson Regarding the Decision of the United States Supreme Court in the Case Known as "The Memphis Case or the Open Competition Plan"

January 13, 1922.

To the Maple Flooring Manufacturers Association, Chicago, Illinois.

GENTLEMEN: As your counsel we have been asked to construe the opinion of the Supreme Court of the United States in the case of

American Column & Lumber Co. et al. vs. The United States of America, and advise you whether, in the light of that opinion, the plan under which you are now operating is lawful.

Justices Brandeis, Holmes and McKenna dissented from the opinion rendered by the majority of the court, but the decision of the majority is now the law of the land and must be obeyed.

Broadly speaking, the members of the Supreme Court did not differ with respect to the law, which is plain and direct. The difficulty lay in the application of the law to the facts of the case then before the court. The Federal Anti-Trust Act declares that:

"every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States * * * is * * * illegal."

The majority and minority decisions are in irreconcilable conflict with respect to the application of the Anti-Trust Act to the particular facts involved in the American Hardwood case. In this conflict the majority of the court reached the conclusion and held that the record in the case shows that the American Hardwood Association had formed and operated the "Open Competition Plan" for the purpose of increasing prices, limiting production and suppressing competition.

All the decisions of the Supreme Court under the Federal Anti-Trust Act show that each case was decided upon its own particular facts. No general rule can be laid down which will cover all situations and conditions. The controlling question in each case always is, do the facts of the particular case show the violation of the Federal Anti-Trust Act? The particular facts in the American Hardwood case led the Supreme Court to the conclusion that the members of the "Open Competition Plan" had operated that Plan in a way and manner and for a purpose, which, when considered together as an entire plan or scheme, plainly show not only that they violated but had deliberately intended to violate the Anti-Trust law.

The court in so holding is not to be understood as condemning any one particular act, but as condemning the purpose and effect of all the things done by the members of the Association, on the ground that when taken together they constitute a general plan or scheme to increase prices, limit output and suppress competition. [fol. 223] Let us now take up and consider what were the things done under the "Open Competition Plan," which, considered as a whole made the Supreme Court declare the Plan unlawful. The facts as found are as follows, viz.:

(a) That the defendants who produced one-third of the hardwood manufactured in the United States were members of an Association, most of whom were members of what was called an "Open Competition Plan;" and

(b) That the members of this "Open Competition Plan" exchanged detailed information concerning almost every phase of the

business operation in which they were respectively engaged; and that this information was sent to their representative, Mr. Gadd, who combined, classified, summarized, analyzed and interpreted the same; that this infomation so combined, classified, summarized, analyzed and interpreted by Mr. Gadd was forwarded weekly or monthly to the members of the Plan; and

(c) That the meetings of the members were held almost weekly for the purpose of discussing the foregoing information, and that the subject of prices, output, etc. were fully discussed at these meetings and the members urged and influenced to accept and act upon the views as to prices and output discussed and approved at these meetings; and

(d) That the foregoing information sent to the members was not made public in any general way and that, therefore, the buyers were at a disadvantage; and

(e) That F. R. Gadd, the representative of the members, sent each member of the Plan a monthly "market report letter" which discussed in a very elaborate way existing conditions in the Hardwood Lumber Industry as to output, price, competition, etc., and that this letter attempted to forecast the future as to output, price, competition, etc.; and

(f) Finally, that all the foregoing means were used for the purpose of limiting production, increasing prices and suppressing competition, and succeeded in so doing.

In endeavoring to ascertain just what the court did decide, we must keep in mind that it was the combined effect, not of two or three of the foregoing things, but of all of the things done and the purpose for which they were done, that led the Supreme Court to hold that the Federal Anti-Trust Act had been violated.

The court in its opinion said:

"This elaborate plan for the interchange of reports does not simply supply to each member the amount of stock held, the sales made and the prices received, by every other member of the group, thereby furnishing the data for judging the market, on the basis of supply and demand and current prices. It goes much farther. It not only furnishes such information, with respect to stock, sales, and prices, but also reports, giving the views of each member as to 'market conditions for the next few months;' what the production of each will be for the next 'two months;' frequent analyses of the reports by an expert, with, we shall see, significant suggestions as to both future prices and production; and opportunities for future meetings for the interchange of views, which the record shows [fol. 224] were very important. It is plain that the only element lacking in this scheme to make it a familiar type of the competition suppressing organization is a definite agreement as to production and prices. But this is supplied: by the disposition of men

'to follow their most intelligent competitors,' especially when powerful; by the inherent disposition to make all the money possible, joined with the steady cultivation of the value of 'harmony' of action; and by the system of reports, which makes the discovery of price reductions inevitable and immediate. The sanctions of the plan obviously are, financial interest, intimate personal contact, and business honor, all operating under the restraint of exposure of what would be deemed bad faith and of trade punishment by powerful rivals."

The first seven lines of the foregoing quotation from the opinion of the court show plainly that the court did not hold that the mere interchange of information by competitors is in and of itself unlawful, but what the court held was that such interchange of information, when taken in combination with all the things done by the members and their representatives under the "Open Competition Plan" and the purpose for which such things were done, is the thing that made the plan as a whole unlawful. Nor does the court hold that the weekly meetings of the members were in themselves unlawful, but it does hold that such meetings became unlawful when they were made part of a general plan or scheme to increase prices, limit output and suppress competition.

After quoting at length from the records of the Hardwood Association, the correspondence of its members and F. R. Gadd, Esq., their representative, the reports of the weekly meetings and of various Committees, the court says:

"These quotations are sufficient to show beyond discussion that the purpose of the organization and especially of the frequent meetings was to bring about a concerted effort to raise prices regardless of cost or merit, and so was unlawful, and that the members were soon entirely satisfied that the Plan was 'carrying out the purpose for which it was intended.'"

It is true that further on in the opinion the court says:

"Genuine competitors do not make daily, weekly and monthly reports of the minutest details of their business to their rivals, as the defendants did; they do not contract, as was done here, to submit their books to the discretionary audit and their stocks to the discretionary inspection of their rivals for the purpose of successfully competing with them; and they do not submit the details of their business to the analysis of an expert, jointly employed, and obtain from him a 'harmonized' estimate of the market as it is and as, in his specially and confidentially informed judgment, it promises to be. This is not the conduct of competitors but is so clearly that of men united in an agreement, express or implied, to act together and pursue a common purpose under a common guide that, if it did not stand confessed a combination to restrict production and increase prices in interstate commerce and as, therefore, a direct restraint upon that commerce, as we have seen that it is, that conclusion must inevitably have been inferred from the facts which

[fol. 225] were proved. To pronounce such abnormal conduct on the part of 365 natural competitors, controlling one-third of the trade of the country in an article of prime necessity a 'New form of competition' and not an old form of combination in restraint of trade, as it so plainly is, would be for this court to confess itself blinded by words and forms to realities which men in general very plainly see and understand and condemn, as an old evil in a new dress and with a new name."

The foregoing language is a sort of summary by the court and must be read and considered in the light of all the facts involved in the case. This language was used after the court had carefully analyzed all things done by the Hardwood Association in the course of operating its "Open Competition Plan," and after the court had found that the underlying motive of the members of the Plan was (in the language of the court) "to bring about a concerted effort to raise prices regardless of cost or merit, and so was unlawful.

This opinion plainly shows that the court placed great emphasis upon the innumerable acts of the members and their representative in the course of carrying into effect the "Open Competition Plan" and especially upon the purpose the members had in mind in all that they did under the Plan.

The members of the Association and its representative, Mr. Gadd, added many unusual features to the "Open Competition Plan" as originally drawn. These unusual features, together with the Plan and the unlawful purpose which the members had in mind in originating and executing the same, were the things the court condemned, and not the mere interchange of information. If the record in the Hardwood case had shown nothing but an interchange of information concerning past and completed transactions relating to stocks on hand, prices received and material manufactured, we are of the opinion that the court would not have held that the members of the Hardwood Association had violated the Federal Anti-Trust Act.

In dealing with this subject, the court says:

"In the first quarter of the year the problem was to maintain the war prices then prevailing rather than to advance them, and although the minutes of the various meetings were kept in barest outline, we find that beginning within a month of the consideration of the awo associations, the members of the 'Plan' began actively to cooperate, through the meetings, to suppress competition by restricting production. This is very clearly shown by the excerpts following from the minutes of meetings and from the market letters and sales reports distributed at them."

Further on in the opinion the court reached the conclusion that the members and their representative practically admitted not only that the plan was unlawful, but that the purpose of the Plan to increase prices, limit output and suppress competition had been achieved.

On this subject the court says:

"But not only does the record thus show a persistent purpose to encourage members to unite in pressing for higher and higher prices without regard to cost, but there are many admissions by members, not only that this was the purpose of the 'Plan,' but that it was fully realized."

[fol. 226] The court in its opinion declares that many of the members as well as their representative, Mr. Gadd, proclaimed their purpose under the "Open Competition Plan" from the house-tops and boasted that they had succeeded in raising prices and suppressing competition.

The Supreme Court affirmed the decree of the trial court at Memphis which was very broad in its terms; but when the decree of the lower court is carefully analyzed, you will find that the interchange of information concerning stocks, sales and prices was forbidden, not because the interchange in itself was unlawful, but because it was used as a part and parcel of an unlawful scheme to increase prices, limit output and suppress competition.

We understand that the members of your Association are merely interchanging information concerning past and completed transactions relating to stocks on hand, prices received and quantities manufactured, and that no one classifies, analyzes, interprets, comments upon or makes any recommendation concerning the same, or makes any prophesies as to future stocks on hand, prices, output or other matters and that there is no agreement, combination or understanding between you to fix or increase prices, or to limit output or suppress or destroy competition.

Conclusion

1. After carefully considering the decision of the court in this case, we are of opinion that you have the lawful right to interchange information concerning the following matters, provided that the information so interchanged is not for the purpose of fixing or increasing prices, limiting production or suppressing competition and is confined wholly to past and completed transactions, viz.:

(a) The amount of stock on hand;

(b) The amount of unfilled orders on hand;

(c) Total amount of shipments made;

(d) Total amount of production;

(e) Total amount of actual new business on your books;

(f) The average prices realized by you at your mill;

(g) Surveys of the average cost of manufacturing and selling Maple Flooring.

But in interchanging the foregoing information, you must see to it that no one classifies, analyzes, interprets, comments upon or makes any recommendations concerning the same, or makes any prophesies as to future prices, output or other matters. Each Maple flooring manufacturer must be allowed to interpret, in his own way, the information he receives, and draw his own conclusions and run his own business, free from the control, influence or domination of any outside agency or agencies.

2. We recommend that the foregoing information to be so interchanged should be published in one or more trade journals so that the consumer of Maple Flooring may have equal knowledge with the manufacturer as to the condition of the Maple Flooring industry and as to all questions of supply and demand. By so publishing the information, you meet the objection urged by the Supreme Court in its opinion that in the American Association case, the information was given to the manufacturers and not disclosed to the consumers, and for that reason the manufacturers had a decided advantage over the consumers.

[fol. 227] 3. We urge that the utmost care should be exercised by you to avoid doing any of the things condemned by the Supreme Court in the American Hardwood Manufacturers' case, and to which we have called your attention in this opinion.

And in closing we beg to call your attention to the fact, that even if you interchange the foregoing information in absolute good faith and with no intention whatever to fix or increase prices, limit output or suppress competition, some over zealous officer of the Government may nevertheless charge you with having done so for an unlawful purpose. All we can say is that if you follow our instructions as outlined in this opinion, we believe the Supreme Court will not condemn your conduct.

Respectfully yours, Newman, Poppenhusen, Stern & Johnston. By J. Newman.

Weekly Sales Report

GENTLEMEN: As stated in the minutes of the meeting held on the 12th, a copy of which was sent you yesterday, statistical work of the Association is to be resumed and proceeded with in accordance with Mr. Newman's legal advice in his written opinion, a copy of which was also sent you yesterday.

Will you please, therefore, send us, by return mail, your Weekly Sales Report for the week ending today the 14th, blank form for which is enclosed.

Very truly yours, George W. Keehn, Secretary.

Chicago, February 8, 1922.

General Meeting, February 24, 1922

To Members.

GENTLEMEN: Pursuant to advices from Dr. Earle as President of the Association, a general meeting of the Association is hereby called to be held on Friday, February 24th, at 10:30 A. M. sharp, and in accordance with the suggestion at the last general meeting, it will be held at the Congress Hotel. We have reserved rooms 1124-1128 for the meeting and luncheon. The rooms are on the 2nd floor—not on the 11th floor as one would naturally suppose.

There is much important business to come before this meeting and every member of the Association should be represented. Among the subjects to be considered are the following:

1. New Articles of Association.—The adoption of the proposed new Articles of Association to take effect as at January 1, 1922.

While quite a number of the members have expressed their approval of the Articles as drafted, some of the members have suggested modifications but, as stated in our previous communications, modifications can easily be made before the Articles are signed. We can have them re-printed afterwards, so that each member will have a copy as finally adopted.

2. Annual Meeting.—If the proposed new Articles are adopted, the meeting of the 24th should be considered the first annual meeting of the new Association, and the election of Officers and Trustees and the appointment of Committees would be in order.

3. General Expenses.—As the question of the General Expenses of running the Association may be considered and as the new Articles provide for an Expense Fund Assessment of 25 cents per M feet on Shipments, we have prepared for your information a statement showing the cost in cents per M feet of the various items of general expenses during the last half of 1921, based upon estimated Shipments of 63 millions during that period.

4. Survey of Costs.—At this writing we have received 8 Surveys of Costs for the last quarter of 1921 and they show a substantial reduction. The average cost is about $17.00.

It is earnestly urged that other members will send in their Surveys in a few days, so that our compilation to be submitted to the meeting will be more complete and represent a larger proportion of the industry.

5. Advertising Campaign.—Our Advertising Campaign is now well under way and the Chairman of your Advertising Committee will have an interesting report to present to the meeting.

6. Rate Book.—The question of the method to be used in compiling and publishing our Rate Book, which was discussed at the

last general meeting and referred to in our circular letter of January 23rd, will be open for discussion.

7. Trade conditions as reflected by our statistics and the prospective demand for flooring in 1922.

To MEMBERS.

GENTLEMEN: This is to remind you of the general meeting of the Association to be held at the Congress Hotel (Rooms 1124-1128 on the Second Floor), Chicago, Friday, February 24th, at 10:30 **A. M. Sharp.**

We mailed you the December Reports on the 15th and mailed you yesterday the Annual Reports for the calendar year 1921. Please remember to bring them with you to the meeting so you will have them to refer to.

Five of the members have not yet sent in their reports for January, but we hope to receive them by the 20th and if so we will have our reports for January made out in time for the meeting.

Please bring with you the flooring data as outlined in the blank form below so we can see how the business is running this month.

Hoping to see you at the meeting, we are

Very truly yours, George W. Keehn, Secretary.

[fol. 231] GOVERNMENT'S EXHIBIT No. 15-EE

To MEMBERS.

GENTLEMEN: On account of the severe storm which blockaded and stopped the running of trains in the northwest and in western lower Michigan north of Grand Rapids, very few members were able to attend the general meeting yesterday. The only ones from the storm area who were here were Mr. Shepeck, who happened to be in Chicago the day before, and Mr. Greene, who got here by way of Bay City. Mr. Blodgett managed to get here from St. Paul and Mr. Nichols arrived here the day before. Saginaw Valley and Tup-

per Lake were more fortunate in respect to train service and the members from there were all here.

Ten members in all were present, namely: Nos, 2, 7, 22, 24, 30, 33, 37, 48, 49, 51. As there was less than a quorum, no official business was transacted, but the proposed new Articles of Association were read and discussed in detail and some few changes and modifications were suggested. It was thought best to have the Articles reprinted, inasmuch as the forms have been held intact at the printers, and send new copies to the membership so each member will know how the Articles will read with all suggested revisions incorporated. These reprints will be mailed you on the 27th or 28th.

We did not receive the last missing January reports until Thursday, the 23rd, so we have not yet completed all of our reports for last month, but we succeeded in finishing three of them in time for the meeting and gave them to the members who were present and mailed them after the meeting to the absent members. The balance of the January reports will follow early next week.

The members who were here consider it of the utmost importance that another meeting be held Thursday, March 9th, so that definite and final action can then be taken regarding the proposed new Articles of Association. Our new meeting rooms in the Congress Hotel were found very pleasant and satisfactory, so arrangements were made to hold the next meeting there on March 9th, and if the other members also like the meeting rooms, our meetings will be held there regularly hereafter.

It was the unanimous opinion of the meeting yesterday that hereafter general meetings of the Association should be held regularly each month, and that this matter should be taken up at the general meeting on March 9th and a day and date fixed for the monthly meetings. It was suggested that perhaps the Thursday nearest the middle of each month would be a convenient time in the month to hold meetings.

Please set aside Thursday, March 9th, and make your arrangements now to be here on that day, "weather permitting."

Yours very truly, George W. Keehn, Secretary.

[fol. 232] GOVERNMENT'S EXHIBIT No. 15-FF

March 4, 1922.

General Meeting, March 9th

To MEMBERS.

GENTLEMEN: Referring to our letter of February 25th please be sure and come to the general meeting of the Association to be held at the Congress Hotel (Rooms 1124-1128 Second Floor), on Thursday, March 9th, at 10:30 A. M. Sharp.

The business to come before the meeting is to take definite action regarding the adoption of the proposed new Articles of Association,

and also to take action on the other matters mentioned in the call of February 8th for the general meeting of February 24th, which meeting could not be held on account of the storm and which was adjourned to March 9th by the ten members who managed to get to Chicago.

If you have not already done so we hope you will send us, by return mail, your statistical reports for the month of February so that we can compile and submit to the meeting as much data as possible regarding the February business. It will also be of interest to know how March business is running, so kindly bring with you to the meeting the flooring data as per blank form below.

It is imperative that every member of the Association be represented at this meeting and if any of you find that it will be impossible for you to be here, please send a written proxy to some other member of the Association to act for you so that definite results can be accomplished at the meeting.

Very truly yours, George W. Keehn, Secretary.

March 10, 1922.

Memorandum of General Meeting, March 9, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Thursday, March 9, 1922, pursuant to adjournment of the meeting held February 24, 1922.

In the absence of Dr. Earle, President of the Association, the meeting was called to order by Mr. Whedon, Vice President of the Association, who acted as Chairman of the meeting.

Fourteen members of the Association were present in person, namely: Nos. 2, 4, 22, 23, 24, 30, 34, 37, 42, 44, 47, 48, 50 and 51. One member, No. 33, was represented by written proxy to Mr. Whedon.

The following members were absent: Nos. 1, 3, 5, 7, 14, 17, 26, 45 and 49.

The proposed new Articles of Association, as revised at the meeting held on February 24th and reprinted and mailed to the members on February 28th, were read article by article and section by section and were discussed in detail, and the following modifications

were suggested and adopted by the members present at the meeting, namely:

The word "May" was substituted for the word "April" in section 3 of Article IV. The following words were added to Section 1 of Article XVIII: 'and said Trademark Contract shall form a part of these Articles of Association but it shall not be subject to amendment under the provisions of Article XXII.'

The Trademark Contract referred to in the foregoing addition to Section 1 of Article XVIII was submitted, discussed and adopted, and the Secretary was instructed to send a copy of same to the absent members.

The following members of the Association then signed the proposed new Articles of Association as revised at this meeting, subject to the condition that the signatures of the other members be obtained: Nos. 2, 22, 23, 24, 30, 34, 37, 42, 44, 48, 50 and 51.

Mr. Gibson, who represented the Wisconsin Land & Lumber Co., said that he preferred not to sign the Articles in the absence of Dr. Earle and that the matter be taken up with the Doctor.

Mr. Ralston, representing William Horner, said that while the Grand Rapids Trust Company, Receiver for William Horner, was in favor of continuing their membership in the Association, he felt that the Trust Company should sign the Articles as Receiver for William Horner.

Mr. Whedon stated that while No. 33 had sent in a written proxy giving him power to act for them, and that No. 49 had given him a verbal proxy to the same effect, that he preferred to have Nos. 33 and 49 themselves sign the Articles.

After a general discussion of trade conditions, the meeting adjourned to Wednesday, March 29th, and the Secretary was instructed to communicate in the meantime with the absent members, either by correspondence or personal visits, in regard to getting their signa-
[fol. 234] tures to the new Articles of Association.

It was also suggested that the Secretary communicate with certain non-member manufacturers with a view to getting them to join the Association, so that more cooperation can be secured for the impovement of conditions in the industry.

George W. Keehn, Secretary.

P. S.—March 13, 1922. Since the above was dictated the signatures of Strable Lumber & Salt Company, Bigelow-Cooper Company and I. Stephenson Company Trustees have been obtained to the proposed new Articles of Association, making 15 signatures in all at this writing.

Next general meeting Wednesday, March 29th, at 10:30 A. M. sharp, Rooms 1124-1128 Congress Hotel.

Mr. Thomas writes us as follows under date of March 10th explaining why he was not at the meeting:

"I seemed to be out of luck the last two meetings and missed attending each time. Expected to leave here Wednesday afternoon, but was unable to go on account of ill health.

Do not assume that this is going to be a habit. I expect to be there next time."

[fol. 235] GOVERNMENT'S EXHIBIT No. 15-HH

March 23, 1922.

Reminder

To MEMBERS.

GENTLEMEN: This is to remind you of the general meeting of the Association to be held at the Congress Hotel, Rooms 1124-1128 (Second Floor) Wednesday, March 29th, at 10:30 A. M. sharp.

It is earnestly hoped that every member of the Association will be represented at this meeting so that definite action can be taken regarding the proposed new Articles of Association.

We have word from Mr. Ralston that the Receiver for William Horner has decided to continue their membership in the Association so I have arranged to be in Grand Rapids, Saturday morning the 25th to get their signature to the new Articles of Association conditional, of course, upon getting the signatures of the other members who have not yet signed up.

It will be interesting to know how the flooring business has been going in March so please fill out and bring with you to the meeting the data as outlined in the blank form below.

Very truly yours,

George W. Keehn, Secretary.

Minutes of General Meeting March 29, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Wednesday, March 29, 1922, pursuant to adjournment of the meeting held March 9th.

In the absence of Dr. Earle, President of the Association, the meeting was called to order by Mr. Whedon, Vice President of the Association, who acted as Chairman of the meeting.

Nineteen members of the Association were present in person and one member, the Oval Wood Dish Corporation, was represented by

written proxy to Mr. Charles A. Brand, making twenty members in all represented at the meeting.

The following members were absent: Wilce Flooring Company, John Schroeder Lumber Co., Holt Hardwood Co., and East Jordan Lumber Co.

The reading of the Minutes of the last meeting held on March 9th was dispensed with, a memorandum of the business transacted at that meeting having been sent to the members immediately after the meeting was held.

* * * * * * *

The Chairman stated that since the last meeting the following other members had signed the proposed new Articles of Association: Strable Lumber & Salt Co., Bigelow-Cooper Company, I. Stephenson Co. Trustees, and the Grand Rapids Trust Company, Receiver for William Horner. The Chairman then requested the members who were present at this meeting but who had not yet signed the proposed new Articles of Association on account of having been absent from the meeting of March 9th, to affix their signatures to the new Articles, whereupon the following members signed the new Articles: Mitchell Brothers Co., Cobbs & Mitchell, Inc., Cummer-Diggins Co., and Flanner-Steger Land & Lumber Co.

Mr. Gibson, representing the Wisconsin Land & Lumber Co., stated that Dr. Earle had fully expected to attend the meeting but was unable to do so, but that he felt certain the Wisconsin Land & Lumber Company would continue their membership and their hearty cooperation in the work of the Association, having done so ever since the first association was organized about 25 years ago, and that the matter of their signing the new Articles could be deferred until the next general meeting of the Association.

The Secretary reported that he had received a letter from the John Schroeder Lumber Company, stating that they had practically decided to discontinue manufacturing flooring of any kind and if there should be a change in their program they will be glad to take the matter up again with the Association.

The Secretary also reported that he had called upon the Wilce Flooring Company in regard to getting their signature to the new Articles and that Mr. George Wilce and Mr. Harvey Wilce stated that inasmuch as they were running Oak Flooring almost entirely and were manufacturing very little Maple Flooring, (consisting of practically all 3/8″) that it was a question in their minds whether or not it was desirable to continue their membership in the Association. It was the unanimous opinion of the members that for old times' sake and in view of the active and helpful cooperation of the Wilce Company in the work of the Association ever since its organization, that it would be very desirable to have them continue their membership, even though they may not manufacture much Maple Flooring. The Secretary was instructed to see them again and to request and urge them to continue their membership.

[fol. 237] The Secretary was instructed to communicate with the East Jordan Lumber Company in regard to getting their signature to the new Articles of Association.

* * * * * * *

The meeting then proceeded to the election of President, Vice President and Treasurer, under the new Articles of Association, to serve until the next annual meeting and until their respective successors are elected and have qualified. Mr. Whedon stated that while it was the desire of every member of the Association that Dr. Earle continue as President, that the Doctor had written to the Secretary sometime ago tendering his resignation as President, feeling that while he fully appreciated the honor, that he should no longer serve as President and that he should be relieved from the duties of that office. Mr. Gibson informed the meeting to the same effect regarding the wishes of Dr. Earle about continuing on as President of the Association.

On motion, duly seconded, B. P. Whedon was nominated for President, M. E. Thomas for Vice President and A. C. Wells for Treasurer, and on motion duly made and seconded, it was voted unanimously that the rules be suspended and that the Secretary be instructed to cast the unanimous ballot of the meeting for B. P. Whedon for President, M. E. Thomas for Vice President and A. C. Wells for Treasurer. This was done, whereupon they were declared duly elected to their respective offices to serve until the next annual meeting of the Association and until their successors are elected and have qualified.

On motion, duly made, seconded and carried, Messrs. Whedon, Thomas and Wells were requested to act as a Nominating Committee to nominate four members of the Association to serve as the remaining four members of the Board of Trustees as provided in Articles V and VII.

The Nominating Committee nominated Dr. George W. Earle, Charles T. Kerry, T. M. Ralston and J. D. Staple to serve as the remaining four members of the Board of Trustees until the next annual meeting of the Association and until their successors are elected and have qualified. On motion, duly made and seconded, it was ordered by unanimous vote that the rules be suspended and that the Secretary be instructed to cast the unanimous ballot of the meeting for the candidates named to serve as Trustees of the Association. This was done, whereupon Dr. George W. Earle, Charles T. Kerry, T. M. Ralston and J. D. Staple were declared duly elected as members of the Board of Trustees to serve as Trustees of the Association until the next annual meeting and until their successors are elected and have qualified.

* * * * * * *

It was then requested that the Board of Trustees hold a meeting immediately following the adjournment of this general meeting to

appoint standing committees to serve until the next annual meeting and until their successors have been appointed. The Secretary was instructed to notify the members respecting the action of the Board of Trustees in the appointment of Committees.

* * * * * * *

The meeting then proceeded to the informal discussion of trade conditions. Flooring data received from 14 mills covering the first 27 days of March indicated that March Shipments are likely to show an increase of about 15% over the February Shipments, March Production about 10% less than February Production and the New Business Booked in March about 40% greater than the New Business Booked in February.

* * * * * * *

The Secretary was instructed to write to non-member manufacturers and invite them to join the Association under its new Articles of Association.

* * * * * * *

There being no further business, the meeting on motion adjourned to meet Thursday, April 20th at the Congress Hotel, Chicago.

George W. Keehn, Secretary.

East Jordan Lumber Company, Mr. John J. Porter, East Jordan, Michigan.

GENTLEMEN: The general meeting held yesterday was well attended, the only members who were not represented being yourselves, the Holt Hardwood Company and the Wilce Flooring Co. It was a good meeting and all the members were very sorry that you were not present.

The new Articles of Association have now been signed by all the members excepting yourselves, the Wilce Flooring Company and the Wisconsin Land & Lumber Co. Dr. Earle has not been in good health lately and while he fully intended to attend the meeting yesterday, he did not feel able to make the trip. Mr. Gibson represented them and said there was no question in his mind about the Wisconsin Land & Lumber Company continuing their membership and their cooperation in the work of the Association, having been among the founders of the first Association way back in 1895 or 1897, and they have always been active members ever since in the various forms of Association work.

The Wilce Flooring Company are manufacturing very little Maple Flooring, as they are running mostly Oak. Last year they manufactured only half a million feet of Maple, practically all 3/8", and they may decide to discontinue altogether the manufacture of Maple. For that reason they are undecided whether or not it is worth while to continue their membership, although we would all like very much to have — do so for old times' sake, even though they manufacture very little Maple Flooring.

The other members are all counting upon your continued co-operation under the new Articles of Association so we are sending you a copy of the Articles for your signature and we shall be glad to have you sign them and return them to us by registered mail.

When I was at Grand Rapids on the 25th I tried to get you over the long distance telephone to tell you how matters were progressing in regard to the new Articles, but was unable to reach you. The telephone operator told us that some of the wires to East Jordan were still down.

With regards,

Very truly yours, —— ——, Secretary.

[fol. 240] GOVERNMENT'S EXHIBIT No. 15-LL

Reminder

General Meeting Apr. 20

To Members.

GENTLEMEN: This is to remind you of the general meeting of the Association to be held at the Congress Hotel (Rooms 1120-24), Chicago, Thursday, April 20, at 10:30 a. m. sharp.

It is earnestly hoped that every member of the Association will be represented at the meeting, as subjects of interest and importance will be discussed. It is expected that the Committee on Cost Surveys and the Advertising Committee will make reports regarding matters coming within the scope of their work.

The Secretary will also have a report to make regarding the conference he attended at Washington on April 12th, which conference was called by Secretary Hoover of the Department of Commerce and to which all trade associations whose activities are national or interstate were invited to send representatives. It was a very interesting conference, and the necessity and usefulness of trade associations and the statistical data compiled by them were fully recognized in the addresses delivered by Mr. Hoover as Secretary of Commerce and by Mr. Gaskill as Chairman of the Federal Trade Commission.

Please bring with you to the meeting the flooring data as outlined on the blank form below, so we shall know what has happened in the flooring business so far in April.

Yours very truly, George W. Keehn, Secretary.

Flooring Data, April 1-18 or 19, Incl.

Shipments	....	M
Production	....	"
New Orders	....	"

tical data in condensed form covering past years as shown in our annual reports, namely the annual Barometers and the annual statements in which are given by months;

(a) Stocks on Hand.
(b) Unfilled Orders.
(c) Total Shipments.
(d) Total Production.
(e) Total New Orders Booked.

The Department of Commerce would also like to have if possible the total normal capacity of all the flooring plants in the Association, expressed in annual and monthly averages, for the purpose of comparing the total Production each month and each year with the total normal capacity each month and each year, and in order to know to what extent of normal capacity the plants as a whole are being operated, as shown by the Production compared with the normal capacity.

The Secretary stated that the representatives of trade associations who attended the conference were requested to fill out a questionnaire. The questionnaire as filled out by him was then read to the meeting and is as follows:

Department of Commerce

Washington

(1) Name of representative: George W. Keehn.

(2) Home address: 1045 Stock Exchange Bldg., Chicago.

(3) Name of Association represented: Maple Flooring Manufacturers Association.

(4) Principal products: Maple, Beech and Birch Flooring.

(5) Number of members of Association: 23.

(6) Percentage of productive capacity of industry represented by Association: About 70%.

(7) Is your Association interested in foreign trade? Some members are.

(8) Has your Association appointed a committee for co-operation with this Department on foreign trade matters? No.

(9) Is your Association interested in the dissemination of statistical? Yes.

(10) Has your Association appointed a committee for cooperation with this Department on statistical matters? No, but will do so.

(11) Does your Association compile statistics? Yes.

(a) Of commodities? Yes.
(b) Of prices? Yes.

If so, what period of time do the reports cover? (a) monthly, (b) weekly and monthly.
[fol. 243] (12) Is your Association interested in questions of simpli-cation and standardization? Yes. Our product is standardized.

(13) Has your Association appointed a committee for cooperation with this Department on matters of simplification and standardization? No, but will do so.

It was suggested that in accord with question 10, a Committee be appointed to be known as "Statistical Committee to Cooperate with the Department of Commerce," and it was further suggested that such Committee consist of the President, Vice-president, Treasurer and Secretary of the Association. It was so ordered.

It was also suggested that inasmuch as the Department of Commerce is deeply interested in matters of simplification and standardization, as evidenced by question 13, that our Grades Committee cooperate in that direction with the Department of Commerce. On motion it was so ordered.

The Secretary reported that a complete report of the proceedings of the conference had been received from the Department of Commerce and on motion, duly seconded, he was instructed to have same printed in pamphlet form and send copies to the members of the Association for their information.

* * * * * * *

Mr. Colby of Cummer-Diggins Company stated that Mr. Saunders as Chairman of the Grades Committee had requested him to bring to the attention of the members the question of the advisability and desirability of creating an intermediate grade of flooring between the No. 1 grade and the Factory grade, believing that it would be beneficial to both manufacturers and consumers of flooring. It was suggested that the matter be referred to the Grades Committee with the request that the Committee investigate the subject fully and make a report with recommendations to the next general meeting of the Association. On motion, duly seconded, the Grades Committee was requested to do so.

The question was then discussed of having Mr. Robertson, our Official Inspector, make a trip among the Association flooring mills to oversee the grading, and on motion duly seconded the Grades Committee was requested to have Mr. Robertson make the trip at his early convenience.

* * * * * * *

In the absence of Mr. Cox, Chairman of the Advertising Committee, Mr. Whedon reported that the advertising campaign is being actively proceeded with and that the results are very encouraging, judging by the number of requests received by the Secretary for flooring literature. Mr. Whedon stated that the Committee would hold a meeting later in the day to work out further details in connection with the advertising campaign.

* * * * * * *

Flooring data received from 15 members covering the first 18 days of April indicate that April shipments are averaging about 10% less than in March with Production and New Orders Booked in April averaging about the same as in March.

Stock conditions of 13/16 x 2¼" Clear, No. 1 and Factory Maple Flooring on April 18th as reported by 15 members were as follows:

	Stocks on hand	Unfilled orders	Unsold	Oversold	April 18, % sold	March 31, % sold
Clear	2,935 M	3,465 M	.....	530 M	118%	110%

Factory	3,018	1,348	1,670 M	.....	45	38
Total ..	7,247	9,009	(net)	1,762	124	95

[fol. 244] Trade Conditions and the relations of supply and demand as reflected by our statistical reports for the month of March, the first quarter of 1922 and the first 18 days of April, were then discussed and there being no further business the meeting, on motion, adjourned to Wednesday, May 17th, at 10:30 A. M.

George W. Keehn, Secretary.

Next general meeting Wednesday, May 17th, at 10:30 A. M. sharp, rooms 1120-1124 Congress Hotel.

[fol. 215] GOVERNMENT'S EXHIBIT No. 15-NN

Chicago, May 10, 1922.

To Members:.

GENTLEMEN: This is to remind you of the general meeting of the Association to be held at Congress Hotel (Rooms 1120-1124), Chicago, Wednesday, May 17, at 11:00 A. M. Sharp, Chicago daylight saving time.

Among the subjects to be discussed at the meeting are the following:

* * * * * * *

3. The Committee on Cost Surveys will meet on the afternoon of the 16th and will make a comprehensive analysis of the Average Cost of Manufacturing and Marketing Maple Flooring as ascertained according to Article XIV of the Articles of Association, and will make a report to the general meeting.

If you have recently purchased any rough Maple Lumber on the open market or if you have any information regarding any purchases or sales of same, will you please send the information on the 15th to the Seretary, giving the prices F. O. B. saw-mill (omitting the location of the saw-mill), and the cost of freight from the saw-mill to your flooring plant? This information will be very useful to the committee in its work and it will be held strictly confidential and no information will be given, revealing the identity of the buyer or seller, or the source of the information, if you so desire.

There has been a good volume of New Orders Booked since the last meeting and it will be very interesting to know how buiness has been running during the first half of May. It looks as if the 13/16" x 2¼" face No. 1 Maple flooring will be oversold to a greater extent than on April 18th, the date of our last compilation.

Please remember to bring with you to the meeting the flooring data as per blank form below, so the data can be summarized and the members fully informed as to actual stock conditions, etc., on May 15th.

Yours very truly, George W. Keehn, Secretary.

[fol. 246] GOVERNMENT'S EXHIBIT No. 15-OO

Minutes of General Meeting May 17, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Wednesday, May 17, 1922, pursuant to adjournment of the meeting held April 20th.

The meeting was called to order by the President.

Eighteen members of the Association were present and four members were absent, namely: Cummer-Diggins Company, Osgood & Blodgett Mfg. Company, Holt Hardwood Company and Flanner-Steger Land & Lumber Company.

On motion, it was ordered that the reading of the Minutes of the meeting held on April 20th be dispensed with.

* * * * * * *

The Secretary then reported as follows:

1. That since the meeting on April 20th he had talked with George Wilce of the Wilce Flooring Company in regard to continuing their membership in the Association and that Mr. Wilce had stated that inasmuch as they are not manufacturing any Maple Flooring at all now and have not been manufacturing any for some time and as it is doubtful whether or not they will resume the manufacture of Maple Flooring, he requested that their membering be considered terminated as at April 1st and that the question of resuming their membership in the Association be held in abeyance to await further developments regarding their manufacturing operations.

2. Correspondence with Ward Brothers in regard to joining the Association was then read to the meeting and the Secretary was instructed to follow up the matter as soon as H. J. Ward, who is now ill, is well enough to give the subject further consideration.

3. That Mr. Gibson of the Wisconsin Land & Lumber Company had sent the Secretary some correspondence with the R. Connor Company in which it was stated that W. D. Connor had returned from the Pacific Coast and would like further information in regard to the work of the Association. The Secretary was instructed to communicate further with R. Connor Company.

4. The Secretary then read to the meeting correspondence with the Department of Commerce, Bureau of the Census, Washington, D. C., concerning the statistics which have already been furnished to the Department and which are to be furnished from time to time. The Secretary was instructed to furnish like statistics to Lumber Trade papers for the information of the public.

* * * * * * *

[fol. 247] Mr. Dewey, Chairman of the Committee on Cost Surveys, reported that the Committee had held a meeting on the afternoon of the 16th and he briefly outlined the present situation respect-

ing the supply of rough Maple Flooring lumber and its market value as established by recent sales on the open market. It was the opinion of the Committee that the actual market values of rough flooring stock delivered F. O. B. cars at the flooring mill would average $50.00 for No. 1 Common, $35.00 for No. 2 Common, and $20.00 for No. 3 Common A, and it was found that the Average Cost of Manufacturing and Marketing Maple Flooring during the first quarter of 1922 according to reports received from 6 or 7 representative flooring mills was $17.99 per M feet of flooring produced.

* * * * * * *

Flooring data received from 15 members covering the first half of May indicate that May Shipments are likely to be about 18% greater than April Shipments, May Production about 6% greater than April Production, and New Orders Booked during May about 11% more than New Orders Booked during April.

[fol. 248] Stock conditions of 13/16 x 2¼" Clear, No. 1 and Factory Maple Flooring on May 15th as reported by 15 members were as follows:

	Stocks on hand	Unfilled orders	Unsold	Oversold	May 15, % sold	April 30, % sold
Clear	3,519 M	5,056 M		1,537 M	144%	127%
No. 1	928	5,568		4,640	600	385
Factory ..	2,674	2,239	435 M		84	61
Total	7,121	12,863	(net)	5,742	181%	142%

* * * * * * *

[fol. 249] GOVERNMENT'S EXHIBIT No. 15-PP

Chicago, June 15, 1922.

To Members.

GENTLEMEN: Please be reminded that pursuant to adjournment of the general meeting of the Association on May 17th, the next general meeting of the Association will be held Wednesday, June 21st, at 11:00 a. m. sharp, Chicago time, at the Congress Hotel (Rooms 1120-1124), Chicago.

* * * * * * *

Flooring data as outlined on the blank form below will be of interest, so please fill out the blank form and bring it with you to the meeting, so the members will know how the flooring business is running this month in respect to supply and demand.

Hoping that we shall have a good attendance at the meeting, we are

Yours very truly, George W. Keehn, Secretary.

[fol. 250] GOVERNMENT'S EXHIBIT No. 15-QQ

Minutes of General Meeting June 21, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Wednesday, June 21, 1922, pursuant to adjournment of the meeting held May 17th.

The meeting was called to order by the President.

Nineteen members of the Association were present and three members were absent, the absent members being: Osgood & Blodgett Mfg. Company, East Jordan Lumber Company and Flanner-Steger Land & Lumber Company.

* * * * * * *

Mr. Dewey, Chairman of the Committee on Cost Surveys, made a brief verbal report regarding the available supply of rough maple flooring stock and its present market values as established by recent sales on the open market according to best information obtainable, and stated that a Survey of Manufacturing and Marketing Costs during the second quarter of 1922 would be made early in July. He urged that every member of the Association make this report so that the data on this subject will be as complete as possible and be representative of average conditions in the industry.

The Secretary reported that the compilations pertaining to the Surveys of Cost which were made in accordance with Article XIV of the Articles of Association had been completed under date of May 31st and would be mailed to the members of the Association on June 24th for their information.

* * * * * * *

Mr. Saunders, Chairman of the Grades Committee, reported that his Committee had held a meeting just before the general meeting convened and had fully discussed the question of creating and establishing an intermediate grade of flooring between the No. 1 grade

and the Factory grade, and that the Committee had decided not to recommend to the Association that it be done at this time. The report of the Committee was received and approved.

Mr. Saunders also gave a very interesting account of the proceedings of the Standardization Conference at Washington, D. C. which he had attended and which conference had been arranged under the auspices of Mr. Hoover as Secretary of the Department of Commerce.

* * * * * * *

[fol. 251] The Chairman stated that correspondence had been received from Frank F. Fish, Secretary-Treasurer of the National Hardwood Lumber Association and from Earl Palmer, Chairman of the Sales Code Committee, of that Association, and that in accordance with their request a Committee would be appointed to represent our Association at the conference to be held to discuss the so-called proposed National Sales Code.

* * * * * * *

[fol. 252] The Secretary reported that in accordance with the request of the Department of Commerce, Bureau of the Census, Washington, D. C., data regarding the normal capacity of the Association flooring plants were being collected, and that up to this time such data had been received from 17 members of the Association. The members who have not yet furnished the data to the Secretary were requested to do so as soon as possible.

According to flooring data respecting Shipments, Production and New Orders Booked during the first 20 days in June, received from 14 members, the indications are that June Shipments are running about 13% less than in May, June Production about 4% less than in May, and New Orders Booked about 23% less than in May.

Statistics regarding Stock Conditions on June 20th of 13/16" x 2¼" face Maple Flooring, received from 15 members, indicated the following conditions on that date.

	Stocks on hand	Unfilled orders	Oversold	% sold
Clear	3,134 M	6,462 M	3,328 M	206%
No. 1	444 "	6,092 "	5,648 "	1372 "
Factory	1,918 "	2,471 "	553 "	129 "
Total	5,496 M	15,025 M	9,529 M	273%

* * * * * * *

There being no further business the meeting adjourned to Wednesday, July 19, 1922.

George W. Keehn, Secretary.

[fol. 253] GOVERNMENT'S EXHIBIT No. 15-RR

Chicago, July 13, 1922.

To MEMBERS.

GENTLEMEN: In accordance with adjournment of the meeting of the Association held on June 21st, the next general meeting of the Association will be held at the Congress Hotel, Chicago (Rooms 1120-1124), Wednesday, July 19th, at 11:00 a. m. sharp, Chicago daylight savings time. Reports will be in order from the following Committees:

1. Advertising Committee M. E. Thomas, Chairman.

2. Committee on National Sales Code proposed by National Hardwood Lumber Association, W. L. Saunders, Chairman.

3. Committee on Cost Surveys, J. E. Dewey, Chairman.

It is hoped that the members who have not yet sent in their reports of Manufacturing and Marketing Cost during the second quarter of 1922 will do so at once so that the data can be compiled in advance of the meeting.

Any information you can send us regarding current market values of rough flooring stock as established by recent sales on the open market will be useful to the Committee.

It is important to know how the flooring business is running so far this month and we wish to suggest that if the members will supply the data as outlined on the blank form below covering the first half of July and mail the data to us at the close of business July 15th, or on Monday the 17th at the latest, that we will compile same and have it ready as soon as the meeting is called to order. This will save time and give you a better opportunity to consider the relations of supply and demand as reflected by the data than if the matter is delayed by our not getting these reports until the members arrive in Chicago and then not getting them compiled until late in the afternoon.

We are glad to say that for the first time on record every member of the Association made the Weekly Sales Report for the Week ending July 8th, as you will see by the report we are mailing you today.

Hoping that all the members will be represented at the meeting, we are

Very truly yours, George W. Keehn, Secretary.

No. —.

[fol. 254] GOVERNMENT'S EXHIBIT No. 15-SS

Minutes of General Meeting July 19, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Wednesday, July 19, 1922, pursuant to adjournment of the meeting held June 21st.

The meeting was called to order by the President.

Seventeen members of the Association were present and five members were absent, the absent members being Cummer-Diggins Company, Osgood & Blodgett Manufacturing Company, East Jordan Lumber Company, Flanner-Steger Land & Lumber Company and North Branch Flooring Company.

The reading of the Minutes of the meeting held on June 21st was dispensed with, a copy of same having been mailed to each member soon after the meeting was held.

* * * * * * *

Mr. Thomas, Chairman of the Advertising Committee, briefly reviewed the work of the Committee and reported that the Committee had just held a meeting and had fully discussed and carefully considered Advertising plans for the last half of 1922. He stated that the Advertising Fund, consisting of the amount remaining in the Old Advertising Fund plus the amount derived from assessments during the first half of 1922, was sufficient to complete and carry out all contracts entered into by the Committee in December 1921 and in the Spring of 1922 and leave a balance of nearly $2,000.00, so that the Committee had kept within its income.

He stated that the new booklets "Winning Friends for Floors of Maple, Beech and Birch" and "Color Harmony in Floors" and the various Dealers' Helps which have been arranged for would cost in the neighborhood of $9,000.00, and that if the Advertising Assessment for the last half of 1922 was continued at only 10 cents per M on shipments, there would be no funds left over with which to carry on now advertising in the various publications used during the first half of 1922.

He reported that the Committee was unanimous in the opinion that the Advertising Campaign as undertaken and carried on in the various publications up to this time should be continued dur-

ing the Fall of 1922, so that the interest of consumers and lumber dealers in M. F. M. A. flooring would be steadily increased and so that the benefits already derived from our advertising would not be lost, as would be the case if the advertising was not continued. He stated that the Committee was of the unanimous opinion that the Advertising Assessment during the last half of 1922 should be at the rate of 25 cents instead of 10 cents per M ft. on shipments, in order to provide an additional fund of about $12,000.00, about two-thirds to be used for advertising in national publications, lumber trade and building trade papers, and about one-third for Dealer's Helps of various kinds. Mr. Thomas' report was complete and comprehensive and after other members of the Committee had spoken on the subject, it was fully discussed by the meeting, and on motion duly seconded it was voted that the Advertising Assessments from July 1st to December 31st, 1922 be at the rate of 25 cents instead of at the rate of 10 cents per M ft. on the shipments of Maple, Beech and Birch Flooring. The roll was called and all the members present voted in the affirmative with the exception of G. Harold Earle of the Wisconsin Land & Lumber Company, who refrained from voting, stating that he wished to wait until Dr. Earle returned home from the Pacific Coast so he could discuss the matter with him before the vote of the Wisconsin Land & Lumber Company was recorded.

* * * * * * *

At the meeting of the Association held on June 21st a Committee [fol. 255] consisting of Messrs. Saunders, Harder and Dregge, and Mr. Whedon, ex-officio, was appointed to represent the Association at the conference of the National Sales Code Committee of the National Hardwood Lumber Association. In the absence of Mr. Saunders, Chairman of the Committee, Mr Whedon reported that our Committee approved the Sales Code and recommended it for adoption by our Association. The Secretary was instructed to obtain copies of the National Sales Code and send them to the members for their consideration so that the question of the adoption of the Sales Code could be taken up at the next meeting of the Association.

* * * * * * *

Mr. Dewey, Chairman of the Committee on Cost Surveys, stated that the report of the Committee made at the last meeting covered in a general way the situation at this time in respect to the present available and probable future supply of rough flooring lumber. He requested the members who have not yet sent to the Secretary their reports of Manufacturing and Marketing Costs during the second quarter of 1922, to do so as soon as possible, and it was the sense of the meeting that every member of the Association should make this report.

* * * * * * *

The Secretary reported that in accordance with the request of the Department of Commerce, Bureau of the Census, Washington, D. C., data regarding the normal capacity of the flooring plants had been collected and would be at once forwarded to the Bureau of the Census.

The replies of the members indicate that the Normal Capacity, for the manufacture of Maple, Beech and Birch Flooring, of the 20 mills whose statistics appear on our monthly Barometer sheets, the Average Days Run per Year and the Average Working Hours per Day, are as follows:

Normal capacity per year	146,400 M
" " " month	12,200 "
Average days run per year	281 days
" working hours per day	9.8 hours

Also that similar data of the mills of the 22 members, being our present total membership, are as follows:

Normal capacity per year	158,400 M
" " " month	13,200 "
Average days run per year	281 days
" working hours per day	9.8 hours

* * * * * * *

The Secretary then submitted and read to the meeting the following communication from the Secretary of the Department of Commerce, Washington, D. C.:

Department of Commerce,

Office of the Secretary,

Washington

July 11, 1922.

Maple Flooring Manufacturers' Association, Stock Exchange, Chicago, Illinois.

GENTLEMEN: The preliminary lumber conferences with this Department in May showed the wide interest of all lumbermen in questions of guaranteed inspection, uniform grading, nomenclature and simplification of sizes. The next step is for the lumber industry to determine what recommendations in each of these subjects it can offer this department with the unanimous concurrence of producers, distributors and users. To develop such recommendations, some centralizing committee or bureau is essential and I believe that the general conference called at Chicago for July 20, 21 and 22, through the agency of the National Lumber Manu- [fol. 256] facturers' Association, will give full opportunity for every interest to have proper voice in arranging this executive unit and indicating the general lines of its action.

I sincerely trust you will give this conference and the necessary subsequent work your complete support, and that through such general meeting of minds constructive action of lasting value to the industry and the nation will result.

For the Secretary:

Cordially yours, (signed) Wm. A. Durgin.

It was the sense of the meeting that inasmuch as our product is already standardized, trademarked, and guaranteed as to grade and quality, with guaranteed inspection, and simplified as to the number of sizes to as great an extent as possible and at the same time conserve the raw material, that it did not seem necessary to appoint a Committee to attend the conference.

It will be recalled that at the general meeting of the Association held April 20th, the Grades Committee was appointed to act in this connection should the Committee deem it necessary to do so in reference to our product.

* * * * * * *

The Secretary reported that Financial Statements had been prepared covering the finances of the old Association which was terminated as of December 31, 1921, and of the new Association organized as of January 1, 1922, and that copies of same would be mailed in due course to each member of the Association.

* * * * * * *

According to flooring data of Shipments, Production and New Orders Booked during the first half of July, received from 15 members, the indications are that July Shipments are running about 20% less, Production about 21% less and New Orders Booked about 22% less than in June.

Statistics regarding Stock conditions on July 15th of 13/16" x 2-¼" face Maple Flooring, received from 15 members, indicated the following conditions on that date:

	Stocks on hand	Unfilled orders	Oversold	% sold
Clear	2,189 M	6,330 M	4,141 M	289%
No. 1	337 "	5,713 "	5,376 "	159 "
Fct.	1,332 "	2,433 "	1,101 "	183 "
Total	3,858 M	14,476 M	10,618 M	375%

* * * * * * *

[fol. 257] GOVERNMENT'S EXHIBIT No. 16-TT

July 28, 1922.

To members.

GENTLEMEN: At the last general meeting of the Association, it was suggested that if the quantities of Stocks of, and Unfilled Orders for, regular standard grades and lengths were entered separately on the report covering the different grades, thicknesses and faces, and if the odds and ends like surplus shorts, extra shorts, etc., were entered in the column "Other Kinds", that we have an accurate showing of the actual conditions existing at the end of each month, respecting Stocks of, and Unfilled Orders for, standard grades and lengths.

For example and as an illustration, the reports of Stocks of 13/16 x 2¼" face Clear Maple Flooring would include only the Stocks of regular standard lengths of that grade and face and the Unfilled Orders for that item would include only the Unfilled Orders for regular standard lengths of that grade and face. Then under "Other Kinds" in next to the last columns, the Stocks of, and Unfilled Orders for, surplus shorts, extra shorts, etc., would be entered. The same method to be followed of course, in reference to all other items of Stocks and Unfilled Orders, so that in all cases the Stocks of, and Unfilled Orders for, regular standard grades and lengths would be comparable.

* * * * * * *

[fol. 258] GOVERNMENT'S EXHIBIT No. 15-UU

August 10, 1922.

To members.

GENTLEMEN: Pursuant to adjournment of the meeting held on July 19th, the next general meeting of the Association will be held at the Congress Hotel, Chicago (Rooms 1120-1124), Wednesday, August 16th, at 11.00 a. m. Sharp, Chicago daylight saving time.

The first order of business will be to take action regarding the adoption of the National Sales Code of the National Hardwood Lumber Association which you will recall was recommended by our Committee for adoption by our Association. A copy of the Sales Code was sent to each member of the Association with the minutes of the last meeting, so if you have not yet read the Code, will you please do so, in order that you will all be familiar with it and will be in a position to vote on the question of its adoption at the meeting on the 16th?

The Advertising Committee will also have a report to make regarding the progress of the advertising work since the last meeting. In this connection, we wish to say that we are mailing you today a sample set of the two new Booklets and other advertising matter, just coming off the press, and which will go forward in a few days to our mailing list of 17,000 lumber dealers.

The Committee on Cost Surveys will be glad to have any information you can send us regarding current market values of rough flooring stock as established by sales on the open market up to the time of the meeting, in order that the information may be included in the report of the Committee.

You will be glad to know that up to this time, ten members in all have sent in their Surveys of Manufacturing and Marketing Costs during the second quarter of 1922. We are expecting Surveys from other members between now and the meeting on the 16th, so we feel certain that we shall have enough Surveys to indicate average conditions in the industry.

Please be sure and bring with you to the meeting the flooring data as per blank form below so that you will have as complete information as possible regarding statistical conditions on the day of the meeting.

* * * * * * *

[fol. 259] GOVERNMENT'S EXHIBIT No. 15-VV

Minutes of General Meeting, August 16, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Wednesday, August 16, 1922, pursuant to adjournment of the meeting held on July 19th.

The meeting was called to order by the President.

Fifteen members of the Association were present and seven members were absent, the absent members being: Cummer-Diggins Company, East Jordan Lumber Company, Flanner-Steger Land & Lumber Company, Kerry & Hanson Flooring Company, Osgood & Blodgett Manufacturing Company, West Michigan Flooring Company and Wisconsin Land & Lumber Company.

* * * * * * *

The first order of business was to take action regarding the National Hardwood Lumber Sales Code of the National Hardwood Lumber Association, a copy of which Sales Code had been sent to each member of our Association with the minutes of the previous meeting. After the subject had been fully discussed and sections of the Sales Code had been read to the meeting, on motion, duly seconded, the following resolution was adopted:

Resolved, That the Maple Flooring Manufacturers Association hereby approves the National Hardwood Lumber Sales Code of the National Hardwood Lumber Association in respect to transactions pertaining to the purchase and sale by our members of Hardwood Lumber.

* * * * * * *

Mr. Thomas, Chairman of the Advertising Committee reported in behalf of the Committee that the work in connection with the Ad-

vertising campaign was being carried on as outlined in his report to the Association at the general meeting on July 19th; and that the following advertising literature, namely:

1. Booklet "Winning Friends for Floors of Maple, Beech and Birch".

2. Booklet "Color Harmony in Floors".

3. Form letters "A Message to Lumber Dealers".

4. Printer's Proofs (on one large sheet) of advertising copy, etc., for the use of Lumber Dealers in their local newspaper advertising.

was being mailed to the following mailing list of Lumber Dealers, etc.:

Lumber Companies (Line)	634
" Exporters	315
" Retail Dealers rated $5,000.00 and up	11,992
" Wholesale	3,514
" " , Hardwood	750
	17,205

And also that about 10,000 copies of "Color Harmony in Floors" (or such quantity as may be required), would be mailed to the following mailing list:

Architects' Libraries, Colleges and Universities, Manual Training Schools, Boards of Education.

[fol. 260] And that the Advertising Committee recommended that there be divided among the members of the Association for their own personal use about 10,000 copies of "Winning Friends for Floors of Maple, Beech and Birch" (in multiples of 50) and about 5,000 copies of "Color Harmony in Floors" (in multiples of 25), using as the basis for the division of the booklets the shipments for the first half of 1922.

The report of the Committee and the division of the booklets for the personal use of the members of the Association as proposed by the Committee were approved and adopted by unanimous vote.

The question of the best method of handling inquiries for flooring received at the office of the Association as the result of our Advertising Campaign was discussed and on motion was referred to the Advertising Committee, with the request that the Committee fully consider the subject and report to the next general meeting of the Association.

Mr. Dewey, Chairman of the Committee on Cost Surveys reported that his Committee had no recent data regarding sales of rough flooring lumber on the open market which indicated a material difference from the data submitted by the Committee at the last meeting of the Association.

Mr. Dewey also stated that the reports from eleven members giv-

ing their Manufacturing and Marketing Costs during the second quarter of 1922, showed an average of $16.93 compared with $17.99 for the first quarter of 1922, and that the average waste in the second quarter was 23.5% compared with 22.4% in the first quarter.

The question of the Average Cost to the manufacturer of furnishing small quantities of Maple, Beech and Birch flooring, loaded in cars for LCL shipment, was discussed and on motion was referred to the Committee on Cost Surveys for such recommendations as the Committee may wish to make to the next general meeting of the Association.

The Secretary reported that revisions of freight rates to the following states have been completed and reprinted and were mailed to the members on August 14th: Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin, and that revisions of freight rates to the following states had been completed and were now in the hands of the printer, namely: Connecticut, Delaware, District of Columbia, New York, Vermont and Virginia and that Casey and Learned, Inc. (Successors to Elkington), who are handling our Rate Book work are now working on Pennsylvania and the New England States and would finish same in a few days and that other states would be revised as rapidly as possible.

Flooring data of Shipments, Production and New Orders Booked during the first half of August received from fourteen members indicated that August Shipments are running about the same as in July, August Production about 13% greater than in July and New Orders in August about 7% greater than in July.

Statistics regarding stock conditions on August 14th and 15th of 13/16 x 2¼" face Maple flooring received from fifteen members indicated as follows:

	Stocks on hand	Unfilled orders	Oversold	% sold
Clear	2,344 M	6,213 M	3,869 M	265%
No. 1.....	333	5,648	5,315	1696%
Fety.....	1,118	2,220	1,102	199%
Total.	3,795	14,081	10,286	370%

The general statistics for the month of July and the relations of supply and demand as reflected by the statistics were reviewed and there being no further business the meeting, on motion, adjourned, subject to the call of the President.

George W. Keehn, Secretary.

[fol. 263] GOVERNMENT'S EXHIBIT No. 15-YY

September 21, 1922.

To members.

GENTLEMEN: We are mailing you today the statistical reports for the month of August and as it would be interesting to know how the flooring business is running this month, we thought we would suggest that you send us data as per blank form below so we can compile it and let you have the results early next week. You can then compare same with stock conditions, etc., at the end of August.

When it was decided not to hold our regular meeting this month, we spoke to the Congress Hotel Company about reserving our rooms for the October meeting and we found that our rooms were engaged a long time ago for every day during the week beginning October 15th, except Saturday, the 21st, which would not be a convenient day for our meeting. Our rooms are also engaged for every day during the week beginning October 22nd, except Tuesday the 24th, so we made reservations for that day and date, subject to cancellation, if necessary. Will Tuesday, October 24th be satisfactory to you as the date of our next general meeting?

Yours very truly, George W. Keehn, Secretary.

October 17, 1922.

General Meeting October 24, 1922

To members.

GENTLEMEN: The next general meeting of the Maple Flooring Manufacturers Association will be held at the Congress Hotel, Chicago (Rooms 1120-1124), Tuesday, October 24th, at 10:30 a. m. sharp.

At the last meeting held on August 16th, the question of the Average Cost to the manufacturer of furnishing small quantities of Maple, Beech and Birch flooring for LCL shipment was discussed and was referred to the Committee on Cost Surveys for such recommendations as the Committee may wish to make, so this matter will be open for discussion at this meeting, as unfinished business.

At this writing, only a few members have sent in their reports of their Manufacturing and Marketing Costs during the third quar-

ter of 1922, but it is hoped that other members who can do so will make this report by the end of this week so that the Committee on Cost Surveys will have sufficient information upon which to base a report that will represent average conditions in the industry during the past three months. If you know of any recent sales of rough Maple flooring lumber, please let us have the information as it will be useful to the Committee in computing the average cost of Maple flooring F. O. B. flooring plants.

The Advertising Committee will also have a report to make regarding its work which has been carried on diligently and along the lines reported by the Committee at previous meetings of the Association.

It has now been two months since there has been a "gathering of the clan" and it is hoped that every member of the Association will be represented at the meeting so that trade conditions and the relations of supply and demand for flooring can be discussed and considered.

Will you please mail us on Friday the 20th, your flooring data as per blank form below so we can compile same on Monday the 23rd, and have it ready when the meeting convenes on the 24th?

We expect to have our statistical reports for the month of September made out and in the mail for you on the 19th or 20th, so that you will have an opportunity to look them over in advance of the meeting, and see how the September business turned out.

Kindly let us know whether or not you will be present and how many from your company will attend the meeting and luncheon.

Yours very truly, George W. Keehn, Secretary.

[fol. 265] GOVERNMENT'S EXHIBIT No. 15-AAA

Minutes of General Meeting October 24, 1922

A general meeting of the Maple Flooring Manufacturers' Association was held at the Congress Hotel, Chicago, Tuesday, October 24, 1922, pursuant to the call of the President of the Association.

The meeting was called to order by the President, and upon call-

ing the roll, it was found that sixteen members were present and six members were absent, the absent members being Wisconsin Land & Lumber Company, I. Stephenson Company Trustees, Cummer-Diggins Company, Osgood & Blodgett Manufacturing Company, East Jordan Lumber Company and Flanner-Steger Land & Lumber Company.

* * * * * * *

Committee on Cost Surveys.—Mr. Dewey, Chairman of the Committee on Cost Surveys, reported that there had been no opportunity to hold a meeting of his Committee to discuss the question of the Average Cost (to the manufacturer) of Maple, Beech and Birch Flooring for LCL Shipments, but that the Committee would hold a meeting after the general meeting adjourned and would make a recommendation to the next general meeting of the Association.

Mr. Dewey further reported that according to reports of Manufacturing and Marketing Costs received from ten members of the Association covering the third quarter of 1922, that the "Average Cost of Manufacturing and Marketing Maple, Beech and Birch Flooring" during that period was $18.42 compared with an average of $16.93 during the second quarter of 1922, an increase of $1.49, and that according to information obtained regarding the current market value of rough Maple Flooring lumber as established by recent sales on the open market, there had been quite an advance in the cost of raw material during the past sixty days, and that there seemed to be a growing scarcity in the visible supply of rough flooring stock for the coming winter and spring months.

Grades Committee.—The Secretary reported that at a meeting of the Grades Committee held during the summer at which practically all the members of the Committee were present and at which Mr. Robertson, our Official Inspector, was also present, the question of our reinspection service was fully discussed and considered. It was the opinion of the Committee that inasmuch as Mr. Robertson is engaging a considerable portion of his time in Field Representative Work, besides being in Florida during the winter months, and as the services of Mr. Tucker, our other Official Inspector, are not always available, that it would be desirable to have Mr. Singler work into the Reinspection service and that with this object in view, Mr. Singler had spent considerable time in the mill of the Kerry & Hanson Flooring Company with Mr. Robertson and also with Mr. Fred R. Welsh, of the Grades Committee, studying the more technical features in the manufacture and grading of our product and working towards a more intimate knowledge of Association grades; and that he had also put in some time to good advantage at the mills of Cummer-Diggins Company, Cobbs & Mitchell, Inc., and William Horner, and that it is the intention to have Mr. Singler spend as much time as possible and as opportunity offers in the mill of the North Branch Flooring Company with Mr. Charles A. Brand, of the Grades Committee, in order that he can act as an Official Inspector for the Association, should the occasion arise.

[fol. 266] Advertising Committee.—Mr. Thomas, Chairman of the Advertising Committee, reported that the work of his Committee had been carried on in accordance with the general plan mapped out by the Committee and as reported to the Association at its previous meetings; and that the Committee had in preparation a "Sales Manual" for the use of lumber dealers which would give specific information and suggestions which would aid them in selling Maple, Beech and Birch Flooring; how to handle the flooring and take care of it so that troubles would be avoided after the flooring was laid and how best to remedy any trouble or dissatisfaction which may rise because of misunderstandings as to grades or lack of proper care in laying or finishing the flooring; the "Sales Manual" to also contain general information and specific recommendations as to woods, grades, thicknesses and faces best adapted for use in each particular case. Mr. Thomas further stated that work on the proposed "Sales Manual" would be proceeded with by Wm. H. Rankin Company, our Advertising Agents, and would be in more tangible form by the time the Association meets again.

Mr. Thomas also stated that Mr. Robertson had completed the Field Representative work in the West and Northwest, reports of which had been sent to the members from time to time, and that Mr. Robertson was now on his Eastern-Southern trip, starting at Cleveland, then to Pittsburgh, then through Pennsylvania to Harrisburg, moving Northeast to Wilkes Barre, Scranton, then to Binghamton, N. Y. and from there into New England, then South along the Atlantic Coast, visiting all the large cities into the Carolinas and close the trip there where it will meet the trip of one year ago. Mr. Robertson's first report from Albany, N. Y. regarding his eastern trip had just been received and copies were distributed among the members present and the Secretary was instructed to mail copies to the absent members.

The report of the Advertising Committee was received with approval and the members present expressed themselves as much pleased with the progress of our advertising campaign and the results accomplished and as also greatly pleased with Mr. Robertson's Field Representative work and the useful and valuable information contained in his reports.

* * * * * * *

Rate Book.—The Secretary reported that revisions of the Rate Book were being made as rapidly as possible considering the large number of towns in our Rate Book and also in view of having to again revise certain states affected by the September 1st changes in rates.

* * * * * * *

Statistics.—The Secretary reported that a compilation of statistics covering the first nine months of 1922 embracing the reports of all members during that period show as follows in round figures:

Statistics First Nine Months 1922, All Members

Stocks were at the high point March 1st	38,300 M
" " " " low " October 1st	26,000 "
Unfilled Orders were at the low point Mar. 1st	13,200 "
" " " " " high " July 1st	28,000 "
" " totaled on October 1st	24,200 "
Shipments totaled	112,800 M
Production "	105,600 "
New Orders "	116,400 "

Statistics Third Quarter 1922, Same 22 Members

1922	Stocks on hand	Unfilled orders		Shipments	Production	New orders
July 1	29,338 M	28,042 M				
" 31	27,504 "	26,929 "	July	13,818 M	11,310 M	11,876 M
Aug. 31	26,343 "	24,616 "	Aug.	15,110 "	14,072 "	13,090 "
Sept. 30	26,050 "	24,186 "	Sept.	13,707 "	13,528 "	12,467 "

Reminder

To Members.

GENTLEMEN: This is to remind you that the next general meeting of the Association will be held at the Congress Hotel, (Rooms 1120-1124), Chicago, Wednesday, November 15th, at 10:30 a. m. sharp, pursuant to adjournment of the meeting held on October 24th.

Your Advertising Committee will hold a meeting the day before to formulate further details regarding our advertising campaign for the year 1923 and will make a report to the general meeting of the Association.

* * * * * * *

Please remember to bring with you to the meeting or mail same so we will receive it by the morning of the 15th, the statistical information as per blank form below to show how the flooring business is running so far this month.

Hoping we shall have a good attendance at the meeting, we are,

Yours very truly, George W. Keehn, Secretary.

[fol. 269] GOVERNMENT'S EXHIBIT No. 15-CCC

Minutes of General Meeting November 15, 1922

A general meeting of the Maple Flooring Manufacturers' Association was held at the Congress Hotel, Chicago, Wednesday, November 15, 1922, pursuant to adjournment of the meeting held on October 24, 1922.

Before the meeting convened, the Secretary explained to the officers of the Association that Horace A. Lewis and Hugh G. Garber of the Department of Justice, had been at the office of the Association for several days getting additional information, etc., regarding the work of the Association to supplement the information obtained through previous investigations in November 1921 by Thomas J. Howe and James D. Rooney, and in May and June 1922, by Alfred A. Franck, all of the Department of Justice, and that in accordance with the long established policy of the Association to be open and above board in all its dealings with the Government, that whatever information, documents, correspondence, etc., was asked for by Messrs. Lewis and Garber had been furnished them the same as had been done with Messrs. Howe, Rooney and Franck of the Department and also James McKeag, Attorney and Examiner for the Federal Trade Commission when he made his examination for the Commission in April, 1919.

The Secretary further stated that he had invited Messrs. Lewis and Garber as representatives of the Department of Justice to attend the Advertising Committee meeting to be held on the 14th and the general meeting of the Association to be held today the 15th, in order that the Government would know at first hand what transpires at our meetings, and that Mr. Lewis had accepted the invitation and would attend our general meeting and luncheon. Upon the arrival of Mr. Lewis at 11:30 A. M., he was introduced to all the members present and the meeting was then called to order by the President. All the members of the Association were present with the exception of the following six members: Wisconsin Land & Lumber Company, Cummer-Diggins Company, Osgood & Blodgett Manufacturing Company, East Jordan Lumber Company, Strable Lumber & Salt Company and Flanner-Steger Land & Lumber Company.

* * * * * * *

Tariff Canadian Flooring.—The Secretary reported that the following letter, dated November 4, 1922, had been received from Mr.

Charles A. Bigelow, who represented our Association at the numerous tariff hearings held in Washington, D. C., in 1921:

"As the New tariff law has been in effect now for some time there has been no action taken. Under paragraph 1700 in which there is the following clause:

Provided, That if there is imported into the United States any of the foregoing lumber, planed on one or more sides and tongued and grooved, manufactured in or exported from any country, dependency, province, or other subdivision of government which imposes a duty upon such lumber exported from the United States, the President may enter into negotiations with such country, dependency, province or other subdivision of government to secure the removal of such duty, and if such duty is not removed he may by [fol. 270] proclamation delare such failure of negotiations, and in such proclamation shall state the facts upon which his action is taken together with the rate imposed, and make declaration that like and equal rates shall be forthwith imposed as hereinafter provided; whereupon and until such duty is removed, there shall be levied, collected and paid upon such lumber, when imported directly or indirectly from such country, dependency, province, or other subdivision of government, a duty equal to the duty imposed by such country, dependency, province, or other subdivision of government upon such lumber imported from the United States,"

and we wish to suggest that the Maple Flooring Manufacturers' Association bring this to the attention of the President and request that action be taken either in the way of having Canada remove her duty on importations of hardwood flooring or that the United States impose the same duty on hardwood flooring going into the United States as Canada imposes on our product going into that country. I believe this to be our plain duty to protect our industry."

Very truly yours, (Signed) Chas. A. Bigelow.

The Secretary stated that a copy of Mr. Bigelow's letter had been mailed to the members on November 7th in order that appropriate action could be taken at this general meeting of the Association.

After the subject had been fully discussed, it was the sense of the meeting that inasmuch as Canada levies a duty of 25% ad-valorem on Maple, Beech and Birch flooring manufactured in this country and shipped into Canada and that inasmuch as Canadian Maple, Beech and Birch flooring is being shipped from Canada into the United States free of duty and is being sold in considerable quantities, to the detriment of our members and other manufacturers of Maple, Beech and Birch flooring and is making serious inroads in our business in our home markets, that a petition should be prepared and addressed to the President of the United States requesting that he take action in accordance with the provisions of the new tariff law under paragraph 1700.

On motion, duly seconded, a Committee consisting of Charles A. Bigelow, Chairman, Frank M. Hodges and the Presideent and the Secretary of the Association was appointed to make a thorough

investigation of the facts and conditions respecting importations of Canadian Maple, Beech and Birch flooring, the prices said flooring is being sold at in our markets and the extent to which such importations are depriving our product of its own home market and to draw up petition to the President of the United States in behalf of the industry.

* * * * * * *

I. C. C. Service Orders 24 & 25.—The Secretary then read to the meeting telegrams and correspondence with Strable Lumber & Salt Company and W. D. Young & Company regarding Service Orders Nos. 24 and 25 issued by the Interstate Commerce Commission, Washington, D. C., which compel the loading of all Western box cars either to Chicago, Peoria and St. Louis or beyond. It was further stated that several of the members had telegraphed protests to the Interstate Commerce Commission, requesting modifications of the Service Orders and that as some modifications had been made, that the Association take no further steps in the matter, or take any action which might tend to interfere with the movement of grain and food stuffs, which the Interstate Commerce Commission considers of paramount importance.

* * * * * * *

[fol. 271] Field Representative Work.—The Secretary informed the meeting that M. H. Robertson was closing his Field Representative trip in Eastern and Southern territory and that a report had just been received from him dated at Richmond, Va., November 11th, telling of conditions in Philadelphia, Baltimore, Washington and Richmond, and that a copy of his report would be sent to each member in due course; and that he would be in Atlanta, Ga., in a few days and from there would go to St. Petersburg, Fla., to spend the winter and would make short trips from there at any time if so desired by the Advertising Committee.

Cost Surveys.—The Chairman then asked Mr. Dewey as Chairman of the Committee on Cost Surveys if he had any information regarding recent sales of rough Maple flooring lumber on the open market. Mr. Dewey stated that in his opinion there had been no material change in the situation since the last meeting and that since the previous report of his committee, he had not heard of any large or important sales, but that there seemed to be less flooring stock offered and that some of the sellers were asking higher prices and that he thought the cost of rough flooring stock delivered FOB cars at flooring mills would average about the same as 30 days ago.

* * * * * * *

October Statistics.—The statistical reports for the month of October were then distributed among the members present and a set of the reports was given to Mr. Lewis of the Department of Justice to bring his files up to date.

[fol. 272] Advertising Committee.—The Chairman then stated that the report of the Advertising Committee would be made by Mr.

Thomas immediately after luncheon and that Messrs. Nordburg and Ellis of Wm. H. Rankin Company, who are handling our advertising campaign would be present to supplement Mr. Thomas' report with any further information the members may desire. The meeting then adjourned to luncheon.

After luncheon the meeting reconvened and Mr. Thomas ma le the report of the Advertising Committee, in substance as follows:

"Your Advertising Committee met yesterday and prepared a program for the first half of 1923 which we recommend to the members for approval. As we see it, the outlook for business for at least the first half of 1923 is promising. It looks as though there is enough interest at the present time and the current inquiry indicates that there will be a larger volume of business in the first half of 1923 than there was in the first half of 1922. Consequently we have mapped out a program with that in mind and Mr. Nordburg and Mr. Ellis of Wm. H. Rankin Company have prepared and worked out details, to all of which we gave much thought and consideration at our meeting yesterday. According to the program suggested, the space advertising for the first six months would cost about $28,000 and we plan to expend the remainder of the Advertising Revenue during the first half of 1923 for Dealers' Helps, the Sales Manual, folders, etc., and it is of course intended to have Mr. Robertson continue his Field Representative Work in accordance with the wishes of the Association, as expressed at its recent meetings.

This means that we are going to ask you to grant us for the first six months of 1923 an Advertising Assessment of 50 cents per M on your flooring shipments, and we can try it out for six months and if we do not make good the assessment can be reduced for the second half of 1923. Now this amount may seem more than it really means, but as a matter of fact it amounts to only five-eighths of one per cent on your sales of flooring. We understand that a canvass was recently made by the American Lumberman of the amount spent by Retail Lumber Dealers in their individual advertising, and it was found that the range was from one-half of 1% to 3% on sales and that the average for the many sections of the country covered by the canvass was 1½% on sales. We also understand that in some lines of industry manufacturers are expending for advertising as high as 5% on their sales.

The Committee feels that we must advertise to hold our place in the market and to increase the demand for our product. We cannot stand still and competition is getting keener every year. It was brought out at the last meeting that Armstrong's linoleum is crowding us out in some markets and that they now have on a very extensive advertising campaign. The Committee also feels that advertising our product is after all really an investment and that it is certain to increase the volume of demand and we feel that we are justified in pushing our product as it has the intrinsic value and all the merits we claim for it in our advertising. So far our advertising has been productive of good results as evidenced by the many requests received at the office of the Association for Color Harmony in Floors and other flooring literature in response to our advertising campaign.

Details regarding the Sales Manual for the dealer and the little folders to use as stuffers are being worked out by the Committee and Wm. H. Rankin Company. The folders will be devoted to various subjects like "short lengths," actual tests of cost of laying short lengths, about "⅜" Flooring," how it can be used not only for new work but also to modernize old homes by laying it over old floors, etc. The main thing is to arouse consumer interest and get the Retail Lumber Dealers back of our campaign through the active assistance of our own members. It seems certain that there will be a large amount of residential building during the first half of 1923 and that many residences now under construction will be ready for flooring in the spring of 1923 and there is no reason why our product, particularly Beech and Birch, should not find their rightful place in the home. This can be brought about by advertising. [fol. 273] Mr. Nordburg of Wm. H. Rankin Company then presented and explained a chart showing the scope of the proposed advertising campaign for the first half of 1923 and recommended that the Literary Digest be the keystone of the campaign and take the place of some of the other publications that we have been using. This seems desirable because of the very large and diversified circulation of the Literary Digest among all classes of readers. It was also urged that we go into Women's magazines and make a direct appeal to women because the home is a big field for our floorings. In addition to these publications, that we continue to use some of the others from which we have derived the best results from our advertising during the past year, measured by the number of inquiries received for Color Harmony and other flooring literature. All of our advertisements are keyed, so the source of every inquiry is known. Mr. Ellis then briefly spoke of the importance of carrying our message to the women in women's magazines and explained further details regarding the folders or insert stuffers, etc., as outlined by Mr. Thomas.

It was suggested that blue prints be made of the charts displayed by Mr. Nordburg, including the one which shows that, according to government statistics, the production of Oak flooring during the first six months of 1922 was double the production of Maple, Beech and Birch flooring during that period. It was so ordered and the Secretary was instructed to send blue prints to the members.

After the report of the Committee had been further discussed, it was moved and seconded that an Advertising Assessment of 50 cents per M feet be levied on shipments of Maple, Beech and Birch flooring during the first six months of 1923. Twelve of the members voted in the affirmative and the other four members stated that they wished to consult with their associates before having their votes recorded and that they would advise the Secretary within a few days after their return home. The Secretary was instructed to communicate with the members who were not present at the meeting and get their views on the subject.

Statistical Committee.—The Chairman stated that at the meeting of the Association held on April 20, 1922, a Statistical Committee to Cooperate with the Department of Commerce had been appointed and that the Committee consisted of the President, Vice-President,

Treasurer and Secretary of the Association. He suggested that the duties of the Committee be extended to include cooperation with the Department of Justice by furnishing any information regarding the activities of the Association which the Department may desire. It was so ordered.

There being no further business, the meeting on motion adjourned to Tuesday, December 19, 1922, and Mr. Lewis of the Department of Justice was invited to attend the meeting.

George W. Keehn, Secretary.

December 14, 1922.

Reminder

To Members.

GENTLEMEN: Pursuant to adjournment of the general meeting held on November 15th, the next general meeting of the Association will be held at the Congress Hotel (Rooms 1120-1124), Chicago, Tuesday, December 19th at 10:30 A. M. sharp.

We are endeavoring to collect data regarding importations of Canadian Maple, Beech and Birch flooring and we hope to have sufficient information at hand on the date of the meeting so that the Committee appointed at the last general meeting can proceed to draw up a petition to President Harding requesting him to take action under paragraph 1700 of the new Tariff Law.

The question of the amount of the advertising assessment for the first half of 1923 will also come before the meeting for final action, so that the Advertising Committee can make its plans in accordance with the wishes of the Association.

We now have all the November reports from all the members excepting one member, whose reports are expected today or tomorrow, so we hope to have all of our reports made out in time for the meeting, so you will know how the November business turned out.

Will you please send us by mail, so we shall receive it on the morning of the 18th, the statistical information as per blank form below, so we shall know on the day of the meeting how the December flooring business is averaging, compared with November. If you cannot mail this report on Saturday, the 16th, please remember to bring it with you to the meeting.

Hoping the membership will be fully represented at the meeting, we are

Yours very truly, George W. Keehn, Secretary.

[fol. 275] GOVERNMENT'S EXHIBIT No. 15-EEE

Minutes of General Meeting December 19, 1922

A general meeting of the Maple Flooring Manufactururs Association was held at the Congress Hotel, Chicago, Tuesday, December 19, 1922, pursuant to adjournment of the meeting held on November 15, 1922.

The meeting was called to order by the Chairman and fourteen members of thee Association were present and eight members were absent, the absent members being Nos. 4, 14, 22, 26, 33, 34, 37 and 45.

* * * * * * *

[fol. 276] Cost Surveys.—The Chairman then requested Mr. Dewey, Chairman of the Committee on Cost Surveys, to report for his Committee and Mr. Dewey stated that the situation respecting rough Maple flooring lumber remained about the same as reported at the last meeting, as there had been very few recent sales of any consequence which he knew of. It was suggested that it would be desirable to get as much data as possible regarding recent Test Runs in order that information regarding results obtainable under existing conditions could be made available to the Committee. Eight of the members who were present said they would supply such data based either upon Test Runs already made or which they would make as soon as possible and the Secretary was instructed to request other members to supply such data. It was suggested that in order to get a more dependable average that only such Test Runs be reported as were or are made from commercially sawed lumber and that the data from the members embrace the following:

1. The exact quantity in feet of each grade of rough lumber used in the Test Run.

2. The exact quantity in feet of each grade, thickness and face of flooring produced from this lumber.

* * * * * * *

[fol. 277] Rate Book.—The Secretary reported that all revisions of the Rate Book had been completed and that all revisions had been sent to the members with the exception of the second revision of the state of Iowa, which was now in the hands of the printer and would be sent to the members within a few days, thus finishing the Rate Book work for the year 1922.

The Secretary further reported that the contract with Casey & Learned Inc., had expired on December 5th and stated that the question of renewing the contract for another year had been discussed with them, and outlined a new proposition received from them to run for one year from December 5, 1922. After the matter had been fully discussed, the Secretary was authorized and directed to close a new contract with Casey & Learned, Inc., for our Rate Book work.

* * * * * * *

[fol. 278] Statistics.—The statistical reports for the month of November were then distributed among the members and the following statistics covering the first 11 months of 1922 compared with the same period of 1921 were read to the meeting:

Statistics First 11 Months 1922-1921 Compared

	Shipments	Production	New orders
1922			
Jan.-Nov.	135,559 M	128,620 M	136,788 M
1921			
Jan.-Nov.	92,538 M	93,623 M	105,470 M
Increase, 1922....	43,021 M	34,997 M	31,318 M
" %.....	46.5%	37.4%	29.7%

Flooring data received from 14 members covering the first half of December indicate that Shipments are running about 6% more. Production about 17% more and New Orders about 28% more than in November.

Statistics of 14 members regarding their stock conditions on December 16 of 13/16 x 2¼" face Maple flooring indicate as follows:

	Stocks on hand	Unfilled orders	Oversold	% sold Dec. 16	% sold Nov. 30, all members
Clear	1,832	5,683	3,851	310	265
No. 1	1,099	4,152	3,053	378	376
Fcty.	944	2,216	1,272	235	193
	3,875	12,051	8,176	311	274

* * * * * * *

[fol. 279] GOVERNMENT'S EXHIBIT No. 15-FFF

Minutes of Annual Meeting January 24, 1923

The annual meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Wednesday, January 24, 1923, pursuant to the Articles of Association and to adjournment of the general meeting held on December 19, 1922.

The meeting was called to order by the Chairman and all the members of the Association were present excepting the Wisconsin Land & Lumber Company. Much regret and sympathy was expressed because of the absence of Dr. Earle who, the Secretary informed the meeting, is ill in a hospital at Found du Lac.

* * * * * * *

[fols. 280 & 281] Survey of Costs.—The President then made a few remarks, briefly reviewing the work of the Association during the past year and then asked Mr. Dewey if he had any report to make as Chairman of the Committee on Survey of Costs. Mr. Dewey reported that recent sales of rough Maple lumber had been made at various prices and stated that in his opinion, the averages of the various sales would not materially change our Average Cost Chart compiled in October, 1922. Mr. Dewey further stated that after more information regarding Test Runs and recent flooring operations had been received from the members and after more data regarding Manufacturing and Marketing Costs during the last quarter of 1922 had been collected and compiled by the Secretary, that it was the intention of the Committee to make a careful study of the whole situation and make a comprehensive report to the Association at its next meeting, with the view of compiling new Average Cost Charts if cost conditions warrant.

* * * * * * *

[fol. 282] Annual Election.—The meeting then proceeded to the election of Officers and Trustees to serve until the next annual meeting and until their successors are elected and have qualified, as provided in Article V, Section 1, of the Articles of Association. A motion was made and seconded that all rules be suspended and that the Secretary be instructed to cast the unanimous ballot of the meeting for the re-election of the same President, Vice President, Treasurer and the other four Trustees to serve for another year. The motion was put by Mr. Dregge, acting as temporary Chairman and was adopted by unanimous vote, whereupon the following were declared duly elected to their respective officers to serve until the next annual meeting and until their successors are elected and have qualified:

B. P. Whedon, President.

M. E. Thomas, Vice President.

A. C. Wells, Treasurer.

Board of Trustees

B. P. Whedon, Chairman

Dr. George W. Earle,	J. D. Staple,
C. T. Kerry,	M. E. Thomas,
T. M. Ralston,	A. C. Wells.

Committees.—The meeting then took a recess to give the Board of Trustees an opportunity to appoint the Committees for the ensuing year. After the Trustees had met, the meeting was again called to order and the Chairman announced the appointment of the following Committees for the year 1923:

Advertising Committee

M. E. Thomas, Chairman

Chas. A. Brand,
G. Harold Earle,
F. E. Holland,
H. H. Shepeck.

Committee on Cost Surveys

J. E. Dewey, Chairman

J. L. Colby,
Chas. Dregge,
Philip D. Flanner,
C. H. Law,
P. S. McLurg,
J. D. Staple,
George Strable.

Grade Committee

W. L. Saunders, Chairman

W. L. De Witt,
W. H. Greene,
H. I. Latimer,
John J. Porter,
Fred R. Welsh.

December 19th, 1913.

Market Conditions Committee Report

To members.

GENTLEMEN: At the meeting of the Market Conditions Committee, held in Chicago yesterday, the November reports were studied and analyzed, and it was found that our statistical conditions are surprisingly strong, and that there is nothing in our present situation that need cause discouragement or any weakness in values. These conclusions are based on the following facts revealed by the monthly reports.

Stocks on hand on December 1st show a reduction during the month of November of 1,182 M, and while the comparative statement shows that the same 27 members had 1,855 M more Flooring

on hand on December 1st, 1913, than on December 1st, 1912, as a matter of fact, the stocks on hand are no larger than a year ago if we allow for the No. 2 Factory and the Extra Shorts included in our reports of December 1st, 1913, but which were not included in the reports of December 1st, 1912.

The Unfilled Orders show a decrease from a year ago of 5,494 M, but this is largely accounted for, as explained in previous reports of the Committee, by the absence this year of the speculative buying which prevailed last year, when considerable business was booked in the summer and early fall for delivery before the end of 1912 in anticipation of advances in flooring prices.

The Shipments were larger than was anticipated, as they equal November a year ago, the Production was 710 M less than in November 1912, and the New Business Booked held up to the volume of November a year ago. As the Shipments were 1,182 M more than the Production, the Stocks on Hand of the 29 members were reduced to 30,126 M, the new lowest point of the year. These are facts worth noting.

The following table of Stocks and Unfilled Orders on Hand on December 1st and November 1st, 1913, 1912 and 1911, shows the effect the business of the three Novembers had on stock conditions on December 1st of the years under review:

On Dec. 1st	Stocks on hand	Unfilled orders	Per cent of stocks sold
1913.....	30,126 M	16,554 M	55%
1912.....	29,533 "	22,299 "	75
1911.....	39,086 "	19,166 "	49
On Nov. 1st			
1913.....	31,308 M	22,006 M	70%
1912.....	29,888 "	27,425 "	92
1911.....	36,825 "	18,660 "	51

During Nov.	Stocks on hand	Unfilled orders
1913.....	Decreased 1,182 M	Decreased 5,452 M
1912.....	" 355 "	" 5,126 "
1911.....	Increased 2,261 "	Increased 506 "

[fol. 286] It will be noted that November 1913 compares favorably with the other Novembers, and although Unfilled Orders decreased 5,452 M this year, about the same thing happened last year, while we have the advantage this year of a decrease in stocks of 1,182 M while stocks a year ago decreased only 355 M. The per cent of stocks sold on December 1st shows a recession from November 1st of 15 points this year, and 17 points last year.

A comparison of Shipments, Production, and New Business Booked during November and October of the three years, with the decreases in November compared with the previous month, appears in the table below. You will notice that the Shipments in Novem-

ber of this year fell off very slightly, compared with the heavy decreases in November of the two years previous.

	Shipments		Production		New business booked	
	Nov.	Oct.	Nov.	Oct.	Nov.	Oct.
1913	14,609 M	15,514 M	13,427 M	15,152 M	10,927 M	14,176 M
1912	14,601 "	17,751 "	14,031 "	17,059 "	11,167 "	14,054 "
1911	12,165 "	16,729 "	14,426 "	15,534 "	11,274 "	13,353 "

Decreases in Novembers Compared with Octobers

	In shipments	In production	In new business booked
1913.....	905 M	1,725 M	3,249 M
1912.....	3,150 "	3,028 "	2,887 "
1911.....	4,564 "	1,108 "	2,079 "

The record below shows that the first 11 months of 1913 compare favorably with like period of the two years previous, except that Production appears to have been too strenuous for the amount of New Business Booked, which shows a decrease of 10 millions from last year with an increase of 9 millions in Production over last year. The danger of over-production still confronts us and each member should carefully watch his own Production if stocks are to maintain their equilibrium, and if disastrous weakness in Flooring values between now and next spring is to be avoided.

11 Months, January-November

	Members	Shipments	Members	Production	Members	New business
1913....	29	161,693 M	27	153,731 M	27	145,577 M
1912....	29	163,454 "	27	144,863 "	27	155,377 "
1911....	29	148,067 "	29	152,886 "	29	148,110 "
Month of Dec.						
1913....	29	?	29	?	29	?
1912....	29	13,410 "	29	15,966 "	29	11,453 "
1911....	29	11,535 "	29	14,326 "	29	10,552 "

You will find on the last page of this report comparisons in detail of stock conditions on December 1st and November 1st, 1913 and 1912. You will notice that there is a surplus of 2¼" face, but this surplus consist of Factory, as the No. 1 is oversold enough to equalize the undersold conditions of Clear. Warehouse conditions are still good, as the stocks are so distributed that no warehouse congestion appears to exist.

[fol. 287] The Current Net Values obtained during November, as reported by 23 members, show about the same level of prices as the previous month. In analyzing the individual reports and the reports

of 17 members in Michigan and Wisconsin, we find a decrease of 14 cents on Clear, an increase of 17 cents on No. 1, and a decrease of 24 cents on Factory 13/16 x 2¼" Face, from October values.

As the present method of reporting Current Net Values was adopted by the Association, it is a matter of deep regret to the Committee that all the members do not make this report, as the Committee would then have complete data upon which to base its conclusions. As it now stands, the 23 members who exchange this report are advised of the prices obtained by each other, but they have no knowledge of the prices obtained by the six members who do not report, while each of the six members is traveling along, and in the dark as to the prices obtained by the other 28 members of the Association. These conditions cannot but have a depressing effect upon values, as all the members are not in the position to refute statements made by buyers regarding low prices, which they would be in if they knew from the reports of the member himself the prices he is getting for his Flooring. All the steps taken during the past two years in the work of the Association, tending to greater publicity and a freer and franker exchange of information among the members themselves, have been of benefit to them, and in times of slackened demand and stories and rumors of low prices, team-work among those who are vitally interested in maintaining stable conditions in their own industry, has the greatest value to them.

As the address of Mr. Arthur J. Eddy, a copy of which was mailed to the membership early this month, has been favorably commented upon by a number of the members, the Committee believes you will be interested in reading Mr. Eddy's book—"The New Competition"—which contains, at greater length, the ideas and methods outlined in his address, so you will receive a copy of the book in a few days. While we may not agree with all of Mr. Eddy's arguments and conclusions, it is worth while knowing what other industries are doing for the purpose of bettering their conditions. Chapter XV, "Vanishing Industries," should convince all of us of the wisdom of making money now in the Flooring business while there is raw material left to make money with— As the raw material goes, the opportunity goes with it forever.

In conclusion, the Committee cannot but feel convinced that Flooring conditions should be considered satisfactory, and that our statistics are as favorable as could be expected at this season of the year, when the demand always slows up with the approach of the holidays and inventory time.

Now is the time of all times to "stick tight," as trying to force sales by cutting prices below a logical basis will not increase the demand or create any new business.

Wishing you a Merry Christmas, and a Happy and Prosperous 1914, we beg to remain,

Respectfully yours, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, C. H. Land, I. N. Bushong and J. D. Staples, B. C. Whedon, of Market Conditions Committee.

[fol. 288] GOVERNMENT'S EXHIBIT No. 18-A

March 25th, 1914.

Market Conditions Committee Report

To members.

GENTLEMEN: After carefully studying flooring conditions at our meeting yesterday, we find our statistics show about the same average conditions on March 1st as on February 1st, as will appear from the following analysis in detail of our reports for the month of February.

Maple, Beech and Birch Stocks increased during February 2,305 M, but, as Unfilled Orders also increased 1,538 M, the percentage of the stock sold remains the same—69%. In Maple 2¼" Face there were recessions in the percentages sold, amounting to 12 points in Clear and 21 points in No. 1, but as the Factory moved up 17 points, there was a net loss of only 6 points in the three grades. Maple 2" Face shows gains of 21 points in Clear, 1 point in No. 1, 10 points in Factory, and a total gain of 11 points in the three grades.

The better movement in Factory should be noted because it indicates that better prices should now be obtainable for this grade, especially in view of the fact that 70% of the 2¼" Factory was sold on March 1st as against only 39% on January 1st.

The condition of 2¼" Maple has improved materially since January 1st, as you will note by the following comparison:

1914	Clear, % sold	No. 1, % sold	Factory, % sold	The 3 grades, % sold
Jany. 1	88	99	39	77
Mar. 1	133	127	70	117
Gain Points	45	28	31	40

This is certainly quite a betterment and should be responded to by a firmer feeling in respect to values.

Shipments and Production for January and February show decreases from January and February, last year, of 3,057 M and 2,952 M respectively, so the decrease in Shipments has been taken care of by the decrease in Production, and consequently, the Stocks of corresponding membership have increased no more, so far this year, than during the first two months last year.

The New Business Booked during February was of healthy volume, amounting to 14,195 M, only 3% less than in February 1913. The decrease from January 1914 was 1,129 M, but as February 1913 was 2,708 M less than January 1913, we should not feel dissatisfied with last month's bookings.

Reports of Current Net Values for February were received from 22 members, and your Committee hopes the other 7 members will follow suit next month so our data will be complete and can be exchanged in detail among the entire membership.

The following table shows the net values obtained by the members in each geographical group for new orders booked during February for 13/16 x 2¼" Face Clear, No. 1 and Factory Maple Flooring, Freights and Commissions deducted. The figures given are mathe- [fol. 289] matically correct, as the total feet sold and the net amount realized by each member in each group are added and the total net value is divided by the total number of feet sold, to find the net value per M feet for each group. You will note that the spread between 2¼" Clear and No. 1 is less in all groups than the recommended spread of $6.50. This condition has existed for sometime, and using Group E as a basis of comparison for the past six months, we find the spread has been as follows: September $4.59, October $5.21, November $4.90, December $5.16, January $4.58 and February $5.21.

	Clear	No. 1	Factory
Group A, Eastern Lower Michigan...	42.23	36.45	23.24
Group B, Western Lower Michigan..	41.29	37.43	21.08
Group C, All Lower Michigan.....	41.75	36.79	22.39
Group D, Upper Michigan and Wisconsin	43.49	38.43	21.66
Group E, All Michigan and Wisconsin	42.59	37.38	22.10

In view of this data, the present selling values of flooring may be considered $3.50 off on Clear, $2.00 off on No. 1, and $3.50 off on Factory from the Recommended List of May 21, 1913, and while these values are lower than our statistics, the demand for our goods and the market price of the raw material warrant, the Committee is convinced that without the exchange from month to month of the information in the individual reports of Current Net Values, prices would have gone much lower because of the dull season of the year and the general uncertainty and apprehension regarding the business outlook for 1914. Inquiries for flooring have been coming in more freely since the first of the month, conditions are improving, and the indications are that a healthy, normal volume of business may be expected, and now that we are through the dull winter months, we should all "perk up" and awaken to the fact that our conditions entitle us to better prices for flooring and that the only way to get them is to ask them.

We were fortunate in having with us at our meeting Messrs. Cox, Porter and W. B. Earle, of the Advertising Committee, and also Mr. Embree, all of whom took part in the discussion, and as their views coincided with the views of this Committee, this report reflects the consensus of the opinions of eleven members of the Association in regard to present trade conditions and the prospects for flooring business during the remainder of the first half of 1914.

Respectfully submitted, Morris E. Thomas, Chairman: Dr. George W. Earle, George C. Wilce, B. P. Whedon, A. C. Wells, E. J. Gillouly, J. D. Staples, of Market Conditions Committee.

[fol. 290] GOVERNMENT'S EXHIBIT No. 18-B

January 21st, 1914.

To Members.

GENTLEMEN: The enclosed reports for the month of December will be analyzed at the Annual Meeting by the Market Conditions Committee, which will meet next Tuesday the 27th, but we thought we would mail you the reports today, so you can study them over in the meantime for yourselves, and also in order to give more time at the Annual Meeting for consideration of the Annual Reports, and the transaction of other important business.

Yours very truly, George W. Keehn, Secretary.

The president expects you at the Annual meeting next Wednesday, the 28th.

[fol. 291] Chicago, January 28th, 1914.

Market Conditions Committee Annual Report, Year 1913

To the Maple Flooring Manufacturers' Association.

GENTLEMEN: In analyzing the December reports, which were mailed you a few days ago, your Market Conditions Committee, which met in Chicago yesterday, finds that stock conditions and the price situation during the month of December, were about the same as during the previous month, and that warehouse conditions seem to be easy with the entire membership. Production, however, appears to have been too strenuous during December, compared with the volume of shipments and new business booked, and the Committee wishes to again urge the members to give their attention to their individual conditions, in order that the dangers of over-production may be avoided.

There has been an improvement in the business outlook during the past thirty days, and the Committee feels optimistic about the future and can see no occasion for sacrificing values or taking on business at low prices, especially for long deferred deliveries.

In concluding this final report, a brief review of our work during the year is in order.

The Market Conditions Committee is composed of nine members, the President acting ex-officio and eight members appointed by the Trustees to represent the Association membership as comprehensively as possible. This year, eleven meetings of the Committee were held with an average attendance of nearly seven. As all of the members of this Committee are familiar with the details and experience of their respective sales departments, their large average attendance at the meetings has afforded a very complete exchange of information and views in regard to market conditions and current values from time to time. This consensus of information, together with a due consideration of the statistics, which are compiled monthly by the

Secretary, and also of such information as could be obtained from the general membership, has been the basis of our reports.

In our monthly reports of market conditions, we have endeavored to reflect, as accurately as the available data would permit, what has seemed to us a conservative average of conditions. Based upon statistical information and the prices you have reported, your Committee has submitted from month to month an estimate of the prices obtainable.

In accordance with the instructions of the Association, a Scientific Price List was made early last year, which represented a profit of 10% on f. o. b. mill prices. This had an educational value which, for a time, was reflected by a higher range of prices, although these never attained the level of the scientific list. However, prices continued strong and hopeful until mid-summer, but suffered a decline the latter half of the year on account of being exposed to the assumed uncertainty in general business conditions.

[fol. 292] At the suggestion of several members of the Association, your Committee collected information regarding the values for 3/8-inch flooring from the members who manufacture it, and at its March meeting, tabulated and reported to you the average prices and weights, and also gave the results of a test run of 3/8-inch flooring made by one of the members of the Committee.

When prices are depressed and there is a prospective upward trend in view, it is comparatively easy to book large orders at the low prices for long deferred deliveries. Such orders may look good when you get them, but the complacent feeling is forgotten after prices have advanced several dollars and you are then called upon to make shipments. While the manufacturer can consistently refuse to be worked in this manner by the speculative buyer, it is not so easy to handle orders for specific jobs where shipment cannot be made until the building is ready for the flooring. During the year, your Committee suggested several times that such contingencies could be met by quoting current prices for shipments within 30 or 60 days and adding such reasonable advance for later shipments as the market outlook would warrant. This plan has been tested by some of the members with satisfactory results. If this method of quoting became universal, it would not only add firmness to a current basis and expedite placing of orders for early shipment, but it would also prepare the buyer for consistent advances in general.

Some buyers have made a practice of using invoices of flooring purchased at an earlier date, when values were lower, to convince a salesman that his current prices were higher than his competitors and to induce him to meet the supposed competition. To prevent this practice and safeguard our members, your Committee offered the recommendation that members place upon all their invoices, close up to the price of the last item, the date when the flooring was sold. If this plan is universally adopted, one of the disturbing elements of competition will disappear.

The improved method of reporting current net values should

also be noted. The old plan was to report the sales during the month which were shipped during the same month. Now all of the sales of the specified items during the month are reported, regardless of when shipment is made. This covers a larger range of transactions and more clearly indicates the trend of prices from month to month.

Early in 1912, and likewise early in 1913, an effort was made to obtain an estimate of the output of the various Association factories for the current year. In both cases the Committee was unable to get complete information, because some of the members failed to answer the request for data. If data of this kind were supplied when asked for, it would be very helpful to the Committee in forecasting the future. Looking forward is sometimes quite as profitable in results as looking backward.

Stocks on hand have been fairly well distributed during the year, so we have not suffered materially from overcrowded warehouses and the consequent demoralization in prices.

[fol. 293] The foregoing, in addition to our usual monthly reports, comprises the salient features of our effort to serve you during the year. In this brief review, statistical matter has been omitted, as you have been furnished it in abundance from month to month and because the annual statistica, compiled by our Secretary, are already in your hands. In our judgment, some progress has been shown, and a larger service in the future depends upon a more general and specific response to the committee's request for data. Closer trade relations can be brought about in no other manner.

In conclusion, your Committee wishes to express its appreciation of the assistance you have afforded by the information and statistics you have furnished, and to acknowledge its indebtedness to Mr. Keehn, whose efficient co-operation and tireless zeal are largely the cause of whatever has been accomplished.

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, Charles T. Kerry, Earle L. Crossman, J. D. Staples, George C. Wilce, for Market Conditions Committee.

[fol. 294] GOVERNMENT'S EXHIBIT No. 18-C

April 24, 1914.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: I would like to particularly call your attention to the enclosed extract from the last report of the Market Conditions Committee, in regard to the new plan of exchanging quotations among the members who quote on the same business, if the inquiry is for 50 M feet or more of Maple, Beech or Birch flooring.

It seems to me that this plan will promote greater stability in flooring values and that it will tend to prevent many of the foolish variations in quotations which now so frequently happen, and which,

in many cases, are not at all necessary to obtain the order in question, as very often the bidder lowers his quotation on the representations of the buyer that he has lower prices, when the bidder's quotation is already the lowest the buyer has.

I certainly hope you will co-operate in this plan and give it a try-out, and you can rest assured that everything will be handled in this office strictly in accord with the plan as outlined in the Committee's report, and that only the members who quote on certain business will be advised of the quotations on that business, and that no information will be given respecting the idenity of the source of such quotations.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 295] Extract from Market Conditions Committee Report of April 23rd, 1914

"Rumors of lower prices, however, have been brought to our attention, and we feel that some plan should be adopted that will protect us all from needless and foolish competition among ourselves. There is no reason why competition among the membership should not be tempered, and a practical way to bring this about would be by the exchange among the members, through the Secretary's office, of quotations made on the same business, so all the members who make quotations on the same inquiries will know immediately what prices have been quote by other members, but without revealing the identity of such other members. As a start, the Committee recommends that an extra carbon of all quotations on lots of 50 M feet or more be sent to the Secretary's office on the day such quotations are made, and the members who send these carbon copies will be advised at once by the Secretary of all quotations made on the same inquiry; for example: if A, B and C quote on 50 M feet of 2¼" Clear to John Smith, Toledo, Ohio, each of them will send to the Secretary, on the same day he quotes, an extra carbon of his letter, and the Secretary will at once advise A, B and C that three members of the Association, not giving their names or numbers, have quoted the following prices to John Smith at Toledo on 50 M feet of 2¼" Clear. If carbon copies of quotations made by other members come in subsequently, all the members who quoted will be at once advised of all quotations. In this way the members who quoted on the business will know the prices that other members of the Association have quoted, and if John Smith writes A that he is quoted $2.00 or $3.00 less, A will not get stampeded and panicky and foolishly lower his quotation, for he will know that John Smith has no such price from any member of the Association, because A will know the prices B and C quoted.

As members of the Market Conditions Committee, we heartily recommend the adoption of this plan, and as we are in favor of trying it out, we have agreed to begin at once the exchange of this information among ourselves, as a start, but in order to make the plan effective and get the best results, every member of the Associa-

tion should co-operate. It is self-evident that more can be accomplished for all of us by closer co-operation in the work of the Association, and we cannot see any disadvantages in the plan, or that it will in any way increase competition among the members for any particular order, because only the members who have quoted, and consequently know all about the order, will be advised of the prices quoted, but not who made the quotations."

June 25th, 1914.

Market Conditions Committee Report

To Members.

GENTLEMEN: Your Market Conditions Committee met in Chicago yesterday and after discussing in detail flooring conditions as shown by our May statistics, we wish to report as follows:

While stocks on hand on June 1st are 10% greater than a year ago, they are only 63 M more than on May 1st, 1914, the production and shipments having held even during the month of May; Unfilled Orders show a decrease of 2,638 M from last month's report, and a decrease of 5,799 M from June 1st a year ago. Our May shipments were 828 M more than for the month of April and 1,499 M or 10% less than in May 1913, but this reduction in shipments is helped out considerably by the decrease of 934 M in production from May a year ago. New Business Booked shows a falling off of 2,592 M compared with May 1913.

Our statistical position in every essential feature, with the exception of the increase in stocks on hand, to which reference will be made later in this report, has materially improved since January 1st, as you will notice by analyzing the attached statement "Comparative Statistics." This improvement is the most marked in 2¼" Factory Maple Flooring, 100% of which was sold on June 1st as against only 39% on January 1st, and there is no reason visible to the Committee why Factory Maple Flooring should not be bringing better values, as we do not recall that at any previous time the Association was ever sold out on 2¼" face Factory. A comparison of Shipments, Production and New Business Booked for the first five months of 1912, 1913 and 1914 is as follows:

Shipments			Production			New business		
1912	1913	1914	1912	1913	1914	1912	1913	1914
63,378	69,864	61,430	60,729	72,257	65,525	68,290	73,979	68,667

1914 shows decreases from 1913 in Shipments of 8,434 M, 12.1%, in Production of 6,732 M, 9.3%, and in New Business Booked of 5,312 M, 7.2%, and compared with 1912, 1914 shows a decrease in

Shipments of 1,948 M, 3%, and increases in Production of 4,796 M, 7.9%, and in New Business Booked of 377 M, ½ of 1%.

While 1914 Production has decreased 6,732 M from a year ago, it would seem that the Production is still too large compared with the Shipments and the volume of New Business Booked. When we consider that stocks on hand since January 1st have increased over five million feet, or at the rate of one million feet a month, it would seem prudent that each member of the Association give thought and study to the question of production in his own individual case, because if stocks continue to increase at this rate during the next seven months, the flooring on hand at the close of the year would amount to 45½ millions, and none of us needs to consult a clairvoyant to find out what would happen to values in the meantime, should this occur.

[fol. 297] In analyzing Current Net Values obtained during the month of May, as shown by the reports of the members, and taking into account other information that came to the Committee in the Exchange of Quotations, we find that selling prices for flooring are represented by concessions from the Logical Basis of Values Table of May 21st, 1913, of $4.50 on Clear, $3.00 on No. 1 and $4.50 on Factory 2¼" face Maple Flooring. While rumors of larger concessions have been heard of in a few isolated cases, the Committee was not able to trace the quotations to authentic sources, and, therefore, believes that the concessions mentioned above show the market values obtainable. These values are lower than the flooring situation warrants and show declines from a year ago of $1.00 on Clear, 85 cents on No. 1 and $1.45 on Factory, using Michigan and Wisconsin mills as the basis for comparison. From the standpoint of statistics, what more could reasonably be expected than our present stock conditions of 2¼" face Maple Flooring, of which 133% of the Clear, 107% of the No. 1, 100% of the Factory, and 118% of the total were sold on June 1st? Weakness in the value of these staple items can only be "psychological," to borrow a White House expression, because our statistics and the prospects for better business in the Fall when the record breaking crops begin to turn into money, do not warrant the present low level of values.

* * * * * * *

[fol. 298] GOVERNMENT'S EXHIBIT No. 18-E

July 31st, 1914.

Semi-annual Report of Market Conditions Committee

General Market Conditions.—General business has been quiet during the first half of 1914. The improvement which was confidently expected would materialize in 1914 was not realized during that period. There has been a general downward tendency of values in

the commodity market, a general retrenchment by the Railroads in buying and building and by curtailing forces, a reduction of forces in industrial operations and uncertainty as to ultimate effect of tariff changes, a general feeling of conservatism and a disposition to go slow until the outcome of these conditions could be more clearly foreseen.

On the other hand, there has been an easy money market, unusually good crop prospects and a favorable outlook for building activity that uses lumber and flooring. While the trade conditions of our industry are intimately related to general business conditions and while the market during the last six months has been quite listless most of the time, there has not been any serious tendency to make radical reductions in prices. In reviewing the results of the half year, our industry has been comparatively prosperous and we have realized much better values for our products than have been enjoyed by our competitors who manufacture and market Oak and Yellow Pine. This is a time for us to count our blessings as we have fared so much better than many others.

The outlook now seems to be clearing and we can consistently hope for better conditions during the next six months than during the first half of this year.

Production and its Relation to Consumption.—During the first half of the year there was a decrease in both production and shipments as compared with one year ago. The following table will show the situation.

	Production	Shipments	Stock increase
1913	87,804 M	84,592 M	3,212 M
1914	80,020 "	75,800 "	4,220 "

This is a comparison of corresponding membership and shows a net increase of stock this year of a trifle more than one million feet. In view of the general market conditions this year, a better showing at this time could not reasonably be expected.

Warehouse Conditions.—The statistical report shows three and one half million feet more stock on hand July 1st, 1914, than July 1st, 1913. The increase, however, is very well distributed and twenty members show more on hand now than one year ago while nine show less on hand than July 1st, 1913. Only four members, however, numbers one, five, seven, fourteen show over one half million feet more on hand now than one year ago. During the last four months the volume of stock on hand has remained practically the same, the variation being less than four hundred thousand feet and the smallest quantity of stock on hand during that period being shown the first of July. In general, therefore, warehouse conditions at the present time are comparatively very satisfactory.

Unfilled Orders and Stocks on Hand.—Last year the largest volume of unfilled orders was shown April 1st, and during this year the largest volume was shown May 1st, and on July 1st, 1914, the unfilled [fol. 299] orders were nearly five million less than one year ago.

This year the buying has been more largely for rush or early shipment than was the case during the first half of 1913. During February, March and April of both years the volume of new business was practically the same, but it was less during January and May in 1914 than in 1913, but during June 1914 the new business exceeded the new business during June 1913 nearly one half million feet. The tabulated statements, which you have already received from the Secretary, show in detail comparative stock conditions the first half of 1913 and 1914. Particular attention is called to the present condition of 13/16" x 2¼" face Factory Maple Flooring which July 1st was 114% sold, this being the highest point ever reached. This prospective condition was mentioned in our report dated March 25th and also in our report dated June 25th. It clearly indicates that better prices are obtainable for this item on account of the statistical condition.

The condition of the Flooring industry is essentially sound and healthy at present and with the bumper crops assured, the outlook for the last half of the year should be very encouraging.

Current Net Values.—An analysis of Current Net Values obtained for new business booked during the month of June shows the following comparison with May, using the average of Group E, Michigan and Wisconsin mills, as the basis:

Clear 48 cents less, No. 1 23 cents more, and Factory 27 cents less than May.

In the Committee's report of June 25th it was stated that selling values at that time, based on May statistics, were represented by concessions from the delivered table of values of May 21st, 1913, of $4.50 on Clear, $3.00 on No. 1 and $4.50 on Factory. It would seem, considering present conditions and the outlook for the future, that flooring ought to move at materially better prices, especially for No. 1 and Factory of which 114% in each grade of 2¼" face Maple was sold on July 1st. When we consider that the production of No. 1 (34%) is limited, and of Factory is very limited, being only 13% as shown by our records of production by grades, it is reasonable to believe that both these items, particularly the Factory, should respond to higher values. While the 2¼" Clear showed a recession from May values, the percentage sold on July 1st is 128%, which condition is too good to justify any greater concession than $4.50, as the difference of 48 cents in the average price obtained may have been caused more by adverse freight rates on the June bookings compared with May than any actual weakness in selling prices.

Exchange of Quotations.—The Committee finds that the method of Exchanging Quotations on lots of 50 M feet or more has been greatly limited in its value, because of the establishment of the minimum of 50 M feet, as many of the members who are willing to exchange quotations say they receive very few inquiries for lots of 50 M feet or more. The Committee, therefore, recommends that quotations be exchanged on all inquiries for one carload or more of Maple, Beech or Birch Flooring, in order that the greatest possible benefit may be derived from this method of imparting information regarding mar-

ket conditions. As heretofore this exchange of quotations is strictly reciprocal and is only sent to the members who quote on identical inquiries for identical items.

[fol. 300] GOVERNMENT'S EXHIBIT No. 18-F

August 22nd, 1914.

Market Conditions Committee Report

GENTLEMEN: The Association should be more than satisfied with the splendid showing presented by our July reports. That the flooring situation is in an extremely strong position, from the standpoint of statistics, is clearly indicated by the following analysis of our July reports:

The outcome of the July business resulted in a decrease of 3,694 M in the Stocks on Hand of 28 members, bringing the total stocks down to 33,163 M, the low point of the year, and this reduction in stocks should indicate easy warehouse conditions. The volume of Unfilled Orders on August 1st decreased only 604 M from July 1st. Compared with the month of June, July Shipments were 1,742 M more, Production 1,574 M less, and New Business Booked 2,111 M greater, as will be seen by the table below:

June and July, 1914, Compared, 28 Members

	End of June	End of July	Increase	Decrease
Stocks on Hand.....	36,857 M	33,163 M	....	3,694 M
Unfilled Orders	24,951 "	24,347 "	.....	604 "
Shipments	13,832 "	15,574 "	1,742 M	.....
Production	13,454 "	11,880 "	.....	1,574 "
New Business Booked.	12,529 "	14,640 "	2,111 "	.....

Comparing July, 1914, with July, 1913, we find the Shipments, 15,574 M, were 1,129 M more this July than last July, and is the largest volume of shipments we have had since the month of September; the Production, 11,880 M, is 1,553 M less than July, 1913, and is the lowest point in production since April, 1912; the New Business Booker, 14,640 M, is 2,924 M more than in July, 1913, and with the exception of January is the largest amount of New Business Booked in any one month so far this year. This fact is worthy of mention because July is usually a dull month, while in January the bookings are generally quite heavy, because provision is frequently made at that time for requirements for the year.

July, 1913, and July, 1914, Compared, 28 Members

	End of July, 1913	End of July, 1914	Increase	Decrease
Stocks on Hand.....	32,554 M	33,163 M	609 M	....
Unfilled Orders	26,583 "	24,347 "	.....	2,236 M
Shipments	14,445 "	15,574 "	1,129 "	.....
Production	13,433 "	11,880 "	.....	1,553 "
New Business Booked.	11,716 "	14,640 "	2,924 "	.....
Stock decrease in July, 1913.....				1,012 "
Stock decrease in July, 1914.....				3,694 "

As the 2¼" face Maple is the largest item in our production and sales, it deserves special consideration, and we would, therefore, like [fol. 301] to call your particular attention to its stock condition on July 1st and August 1st, 1913 and 1914.

Status of 2¼" Face Maple

	Clear		No. 1		Factory		All grades	
% sold	1913	1914	1913	1914	1913	1914	1913	1914
July 1.....	137%	128%	170%	114%	71%	114%	128%	121%
Aug. 1.....	126	174	152	142	71	98	117	146
Loss	11	...	18	...	even	16	11	...
Gain	...	46	...	28	...	...	...	25
Betterment in points..	...	57	...	46	...	...	...	36

While the Factory shows a recession of 16 points during July, 1914, as compared with an even break during July, 1913, this is no doubt due to the fact that old orders have been filled and new orders have been coming in more slowly because the manufacturers have been quoting higher for this grade. This would naturally result in buyers holding off in placing new business.

Current Net Values during July, based on reports from Michigan and Wisconsin mills, compared with June, show losses of 75 cents on Clear, and 38 cents on No. 1, and a gain of 72 cents on Factory. In our report last month we stated that 2¼" Factory should respond to higher values, and this prediction has been verified. Based on our statistics, July selling values are represented by concessions from the Table of Values of May 21st, 1913, of $5.00 on Clear, $3.00 on No. 1 and $4.00 on Factory. It would seem, however, that flooring should now move at better prices because we all know now how favorable our statistics are, and that they fully justify holding for a higher level of values.

Exchange of Quotations.—If you are not sending in carbon copies of your quotations on inquiries for one carload or more of Maple, Beech or Birch Flooring, will you please do so, in order that you may have the benefit of this excellent method of exchanging information in regard to current market values. The members who are co-operating in this plan are well pleased with the results, but better results will follow if all the members will join in.

* * * * * * *

[fol. 302] GOVERNMENT'S EXHIBIT No. 18-G

September 24th, 1914.

Market Conditions Committee Report

To Members.

GENTLEMEN: Every member of the Market Conditions Committee, with one exception, attended the Committee Meeting held yesterday, so this report reflects the consensus of opinion of practically the entire Committee.

After a thorough study of the flooring situation, as shown by our August statistics, we are glad to report that the favorable conditions existing on August 1st were continued during the month, and our stock conditions on September 1st are materially better than on September 1st last year.

We find our stocks on September 1st were 439 M less than a year ago, and 951 M less than a month ago.

Shipments held up even with August, 1913, amounting to over 15½ millions for both Augusts. Production was 800 M less than last August, and it was a genuine surprise to find that the New Business Booked, amounting to 13 millions, exceeded August a year ago by 117 M. The July and August shipments of about 32 millions, against Production of about 27 millions (including No. 36 for both July and August) have reduced stocks from 38 millions on July 1st to less than 33 millions on September 1st, resulting in easy warehouse conditions all around.

It is especially encouraging and gratifying to compare the first eight months of 1914 and 1913. You will note by the table below that our Shipments and New Business Booked show decreases of only 6.7% and 1.2%, respectively, while our Production decreased 8.7%.

	Shipments		Production		New business		Members
	1913	1914	1913	1914	1913	1914	
First Half.	84,592	75,800	87,804	80,020	86,568	82,208	29
July	14,445	15,574	13,433	14,880	11,716	14,460	28
August ...	15,538	15,504	15,349	14,553	12,857	12,974	29
	114,575	106,878	116,586	106,453	111,141	109,822	
Decrease ..	.....	7,607	.....	10,133	.....	1,319	
Per cent...	.....	6.7%	.....	8.7%	.....	1.2%	

This showing will be still more favorable when the missing statistics of No. 36 for July are included.

While the percentage sold of Maple, Beech and Birch stocks on September 1st, 1913, and 1914, were 74% and 65%, respectively, the stock conditions of 2¼" face Maple are stronger now than a year ago, viz:

% sold	Clear	No. 1	Fact'y	All grades
Sept. 1, 1913.....	117%	137%	71%	109%
Sept. 1, 1914.....	148	143	88	129
Gain, points.....	31	6	17	20

[fol. 303] Altho the total stocks show a less percentage sold now than a year ago, this is by no means a discouraging feature, and should cause no weakness in the value of 2¼" face Maple, because the surplus stocks are made up of items that are not competitive with 13/16" x 2¼" face Maple.

Maple, Beech and Birch Surplus Stocks on Sept. 1st

Year	1¼"	2"	3¼"	1 1/16"	3/8"	¼"	Other kinds	Total
1913	1,017 M	None	2,296 M	1,592 M	912 M	285 M	2,476 M	8,578 M
1914	1,447	1,992 M	2,852	2,594	1,725	358	2,578	13,546

Current Net Values for August, as indicated by Group E, Michigan and Wisconsin mills, show gains over July of 26 cents on Clear, 49 cents on No. 1 and 19 cents on Factory, so it would seem that our last report giving the status of the Market at $5.00 off on Clear, $3.00 on No. 1 and $4.00 on Factory may be modified for the better, at least to the extent of 50 cents on No. 1, or $2.50 off instead of $3.00 off.

The present system of reporting Current Net Values was Commenced with September, 1913, so a comparision of August, 1914, with September, 1913, may be of interest to you. While it is not exact, it is more reliable than a comparison of the two Augusts would be, because of the difference in the method of reporting last August and this August.

Group E	Clear	No. 1	Factory
Sept. 1913	$42.25	$37.66	$22.64
August 1914	41.11	36.51	21.85
Decline	1.14	1.15	.79
% of Decline	2.7%	3%	3.5%

Exchange of Quotations.—The plan of exchanging quotations is a useful feature in the Association work, but its value to the industry would be far greater if all the members who quote and sell for carload shipments would participate in this method of exchanging information. All but ten members who make carload shipments are now exchanging quotation, and the Committee wishes to respectfully urge upon them to join in the plan, not only for the benefit it will be to them, but also for the benefit it will be to the entire Association.

The following is a copy of an Exchange of Quotations made on September 22nd, of six quotations, to —— (an AJ point in Wisocisnn) on 2¼" Clear and No. 1 Maple Flooring:

Clear	No. 1
$49.00	$40.00
44.50	40.00
44.50	40.50
44.00	40.00
44.00	39.00
46.00	42.00

Commissions @ $1.50 are added to net quotations to equalize basis of comparison with AJ delivered values of $48.50 on Clear, and $42.00 on No. 1.

Forecast.—It is always difficult to accurately forecast the future, but it is impossible to do so now because of the complex conditions that may result from the great war in Europe. Some authorities predict an era of greater prosperity for this country, while others fear that if the high rates for money continue that building opera- [fol. 304] tions may be greatly restricted which would result in a decided falling off in the demand for flooring. In view of the compli-

cated situation, it would indeed seem prudent to go slow and be guided by a careful study of our statistics from month to month, pursue a policy of "watchful waiting" in respect to production, and safeguard ourselves all we can by a liberal echange among ourselves of all available information regarding trade conditions as they develop.

[fol. 305] GOVERNMENT'S EXHIBIT No. 18-H

October Thirtieth, 1914.

Market Conditions Committee Report

To members.

GENTLEMEN: All but one member of the Market Conditions Commitee attended the Commitee Meeting held yesterday, and flooring conditions at this time were studied and analyzed and very careful thought was also given to the outlook for flooring business during the coming winter and spring.

Our September reports are unfavorable, as they show heavy decreases in Shipments and New Business Booked compared with September a year ago, Shipments falling off 3,133 M, or 19%, while New Business Booked fell off 3,450 M, or nearly 25%; Production decreased only 425 M (less than 3%), so our stocks on hand increased 1,117 M during this September as against a decrease in September a year ago of 1,591 M, an adverse condition of 2,700 M. Our Stocks on October 1st were 33,585 M, or 1,915 M more than on October 1st, 1913.

Comparing with August of each year we find the Shipments in September 1913 were 1 million more than in August 1913, while September 1914 was over 2 millions less than August 1914, and that bookings of New Business show up still more unfavorably, September 1913 being 1,100 M more than August 1913, while in this September nearly 2½ millions less of New Business was booked than in August 1914.

The members of the Committee report very light shipments and new bookings during October, most of them saying that they are not averaging much better than 50% to 60% of last month.

Stock conditions also show a decided falling off in the per cent sold on October 1st, compared with September 1st, 1914.

Maple 2¼"	Sept. 1, 1914	Oct. 1, 1914	Decreased, points
Clear	159%	129%	30
No. 1	143	107	36
Factory	88	75	13
All Grades	133	109	24
M. B. & B.			
Clear	71	62	9
No. 1	70	57	13
Factory	47	36	11
All Grades	65	54	11

September building statistics reported from 121 cities indicate a decrease of 35% from September a year ago, and the prediction is [fol. 306] made that October building permits will probably be 50% less than last October.

In view of these facts, and the general outlook, it is impossible to see where much flooring business is coming from during the next six months. A condition and not a theory now confronts us, and it is one that demands radical individual action on the part of each member of the Association regarding his own production if Stocks on Hand are to be in harmony with the state of trade.

In estimating the probable volume of shipments for the last quarter of 1914 and the first quarter of 1915, it was the consensus of opinion that the most optimistic view does not warrant a higher expectancy than 50% to 60% of the shipments during like periods in 1913-1914.

Our Shipments from October 1st, 1913, to April 1st, 1914, were 76 millions, an average of about 12½ millions a month, with Production of 81 millions, an average of 13½ millions a month. Our Production for 9 months this year has also averaged 13½ millions monthly. If this rate of Production is continued, and Shipments fall off say 40% it will spell ruin to everyone engaged in the flooring industry, and the time to think and to act is NOW.

With more than ample Stocks on Hand of 33½ millions, it would be suicidal to produce 81 millions more to meet a prospective demand of 45 or 50 millions, and the only remedy is not to manufacture more flooring than the market needs, as indicated by our statistics and the prospects for business between now and April 1st. As a matter of fact, the Production should average a greater decrease than the anticipated decrease in Shipments, because our present stocks of 33½ millions are overlarge by 8 or 10 millions for the probable volume of Shipments.

The following table demonstrates what stock conditions will be on April 1st, 1915, if Shipments decrease 40%, and if Production is continued at the same rate as during the half year October 1913-March 1914, and during the first 9 months of this year:

Stocks on Hand October 1st, 1914	33½	Millions
Production 6 months at 13½ millions	81	"
	114½	"
Shipments, say 60% of 76 millions	45½	"
Stock on Hand April 1st would be	69	"

As iron and steel are considered a reliable barometer of general business conditions, you may be interested in knowing the policy the steel manufacturers are adopting to meet their condition, as stated in the Chicago Herald yesterday:

"The general rate of steel mill operations at Pittsburgh is only 40 to 45 per cent of capacity, while the Chicago mills are likely to

drop to 30 per cent this week. For part of the week no Chicago plate mills will be in operation. Prices are giving way."

* * * * * * *

[fol. 307] While reports from Michigan and Wisconsin mills, Group E, show that September values were on a level with August, a weaker feeling has developed during October, and from the best information obtainable, selling values today of 2¼" Maple Flooring are $6.00 off on Clear, $4.00 off on No. 1 and $5.00 off on Factory from the Table of Delivered Values of May 21st, 1913. This condition is to be deplored, not only because of the immediate loss it represents to the flooring manufacturers, but also because of the depressing influence it is bound to have on values during all of next year, as unless its effect is counteracted the result will be to establish a low level of prices from which it will take a long time to recover.

A comparison of the first 9 months of 1914 with the first 9 months of 1913 shows that Shipments and Production have traveled on a parity, as while Shipments decreased 7.8%, Production decreased 8.3%. This relation between Production and Shipments is reflected in the Current Net Values that have prevailed during the year. Comparing September 1913 and 1914, Group E, we find decreases of only $1.30 (3.1%) on Clear, $1.04 (2.8%) on No. 1, and 78 cents (3.5%) on Factory. It is safe to say that no other branch of the lumber industry can show such favorable results, but it will be impossible for these conditions to continue unless a sane policy is pursued of keeping the Prduction below the Shipments, no matter how small the Shipments may be.

Slaughtering values never has increased consumption, and cutting prices is not going to create any new business, certainly not under present conditions.

The thing to do is to sit tight and not rock the boat.

Next General Meeting

The next general meeting of the Association will be held on Friday, November 20th, instead of during the last week in the month, because of Thanksgiving Day coming on the 26th.

It is always important to get together and talk things over, but in times like these it is imperative.

Will you please make your plans now to attend the meeting?

George W. Keehn, Secretary.

November Twentieth, 1914.

Market Conditions Committee Report

To members.

GENTLEMEN: At our Market Conditions Committee Meeting held yesterday the October statistics were studied and analyzed, and we

find conditions on November 1st, 1914, are much more unfavorable than a year ago, and than on October 1st, 1914.

The Stocks on Hand on November 1st total 35,676 M, and are 4,368 M (14%) more than on November 1st, 1913, and they increased during the month of October 2,091 M, against a decrease in October 1913 of 362 M, an adverse condition equal to about 2½ million feet. Unfilled Orders are only 14,372 M, and show a startling decrease of 7,634 M (34.7%) from November 1st, last year, and are nearly 4 million feet less than on October 1st, 1914. October 1914 Shipments were 13,455 M against 15,514 M in October a year ago, a decrease of 2,059 M (13.3%), while Production this October, 15,546 M, was 2,091 M more than the October Shipments and 394 M more than the Production in October of last year. The New Business Booked, 10,617 M, was very light, and was 3,559 M (25.2%) less than in October 1913. The decreases in Shipments and in the New Business Booked strongly emphasize the fact that our October Production was altogether too large in view of the meager outlook for flooring business the coming winter and spring, and it seems self evident that nothing less than a 50% basis of the present rate of production can save the flooring industry from complete demoralization in values. If our Production during the next five months continues to exceed the rate of Shipments to the extent of 2,100 M per month, as happened in October, our present Stocks on Hand of 35½ millions will exceed 46 millions on April 1st, and equal the high point reached in stocks on March 1st, 1912, as shown by our Annual Report of January 22nd, 1913.

The following table shows the trend of Stocks on Hand, the percent sold, and the Shipments and Production from November 1st, 1911, to April 1st, 1912:

Date	M. B. & B. stocks	% sold	Month	Shipments	Production
Oct. 1, 1911....	38,020 M	60			
Nov. 1, "	36,825	51	Oct.	16,729 M	15,534 M
Dec. 1, "	39,086	49	Nov.....	12,165	14,426
Jan. 1, 1912....	41,877	42	Dec.	11,535	14,326
Feb. 1, "	44,783	44	Jan.....	9,276	12,182
Mar. 1, "	46,314	49	Feb.....	9,636	11,167
Apr. 1, "	46,192	54	Mar.....	13,333	13,211
Average..	41,871 M	50	Total	72,674 M	80,846 M

Increase:

Oct. 1-Apr. 1	8,172 M	Excess Production...	8,172 "
Nov. 1-Apr. 1	9,367 M		

[fol. 309] You will notice that the percent of the total stock sold on November 1st, 1911, was 51%, while on November 1st this year it was only 40%. A comparison of the percent sold of 2¼" face Maple

on November 1st and October 1st, 1914-1913, is still more discouraging from the November 1st, 1914 standpoint:

Maple 2¼"	November 1st		October 1st	
	1914	1913	1914	1913
Clear	85%	117%	129%	102%
No. 1	83	149	107	163
Factory	41	85	75	70
All grades	74	113	109	107

It has seldom happened in the history of the Association that the unfilled orders for our most staple item, 2¼" face Clear Maple, has been only 85% of the stock on hand, as was the case on the first of this month.

Another fact that demonstrates our condition of overproduction is the number of surplus stocks of Maple Flooring, the surpluses having increased from 49 on October 1st to 61 on November 1st. On November 1st the surpluses were Clear 28, No. 1 20, Factory 13, Total 61, as against 23, 18, 8 and 49 respectively on October 1st.

Values obtained during October, Group E Michigan and Wisconsin mills, show recessions from September of 9 cents on Clear, 67 cents on No. 1, and 71 cents on Factory, but from the best information obtainable the Committee believes that values at this writing are weaker than in October. Reports of quite low prices in some markets are current, while in other territory better values appear to be obtained, but taking the field as a whole, present average selling values for flooring are represented by concessions of $6.50 on Clear, $5.00 on No. 1, and $6.00 on Factory from the delivered values in the table of May 21st, 1913.

Unless each member begins now to carefully consider his own production, and regulates it from now on to conform with trade conditions, we shall repeat the disastrous experience caused by the overproduction during the last quarter of 1911 and the first quarter of 1912 when stocks increased from 37 millions on November 1st, 1911, to 46 millions on March 1st, and April 1st, 1912, and as a result of which Clear and No. 1, 2¼" Face Maple Flooring, sold at $9.00 less, and Factory at $9.50 less than our present table of values. Your Committee's report of March 21st, 1912, shows that market values at that time, using Frame A Cadillac basis, were $37.50 for Clear, $31.00 for No. 1 and $17.00 for Factory 2¼" face, and unless the rate of production is harmonized with the rate of Shipments during the next five months, so that the stocks on hand are kept proportionate to the requirements of the trade, the low prices that prevailed in the spring of 1912 will look high to all of us next spring. Flooring stocks are now excessive for the prospective demand, and it stands to reason that if the October rate of Production is continued in the face of the certain falling off in Shipments, which a common sense view of business conditions convinces us is inevitable, the result will be nothing less than a calamity.

[fol. 310] GOVERNMENT'S EXHIBIT No. 18-J

December Eighteenth, 1914.

Market Conditions Committee Report

To members.

GENTLEMEN: Your Market Conditions Committee met yesterday and after a thorough study of the November statistics, we wish to report the following as our analysis of flooring conditions as we see them:

Stocks on Hand, 38 millions, are nearly 8 millions more than a year ago, and show an increase of 2,275 M during November, as against a decrease of 1,182 M in November 1913 a relative adverse condition of practically 3½ millions this November compared with last November. Stocks are now at a dangerously high point, and if they continue to increase at the same rate during December, January and February they will be 45 millions on March 1st; in fact they will then exceed that amount if the November rate of decrease in shipments, 32%, continues or becomes greater. As the prospects for flooring business during the coming three months are extremely poor, it is self evident that the only hope of salvation is to keep the rate of production below the rate of shipments if the present excessive stocks on hand are to be reduced by March 1st.

You will note that Unfilled Orders on December 1st were 5 millions less than a year ago, and nearly 3 millions less than on November 1st, and it seems likely that the Unfilled Orders on January 1st will be at a still lower point.

Shipments, 9,941 M, are 4,668 M, 32%, less than in November 1913, and show a decrease of 3,514 M, 26%, from October 1914.

The New Business Booked shows a decrease of 1,132 M, 10.4%, from November 1913, and a decrease of 822 M, about 8%, from October 1914, and the bookings so far this month are said to be very light.

The reduction in the output during November, compared with November a year ago, was only 1,211 M, 9%, but as one member, No. 5, was shut down during November 1913, a more accurate way to measure the individual efforts of the manufacturers to meet the decrease in demand by reducing their production is to compare November 1914 with October 1914 production. The October Production was 15,546 M, and the November Production was 12,216 M, a gratifying decrease of 3,330 M or 21%.

The percent of the total stock sold on December 1st was only 30%, the lowest point in the history of the Association, and the percent [fol. 311] sold of 2¼" face Maple is also most discouraging, as shown by the tables below:

* * * * * * *

The request for Flooring Manufacturing Information for the month of December 1914 has met with generous responses from the membership, all but three members having made complete reports.

The attached table will show the manufacturing plans for December of 26 members, together with comparisons of their production for December 1913 and for November and October 1914, and also with their shipments for December 1913.

You will note that the estimated production for December 1914 of these 26 members is 10,109 M, which is 21% less, 5½% less and 26% less than their production in December 1913, November 1914 and October 1914 respectively. Their shipments in December 1913 were 9,495 M, and if we estimate a decrease of one-third in shipments, their shipments would amount to 6,330 M, as against an estimated production of 10,109 M, which would result in an increase of nearly 4 million feet in Stocks on Hand on January 1st, 1915, and bring the stocks on that date up to 42 millions. This points out the necessity for still greater individual reductions in the rate of production during January and February if the stocks on hand are to be reduced, and if the rate of production is to harmonize with the rate of shipments.

[fol. 312] Current Net Values obtained during November appear to be about the same as reported by the Committee to the General Meeting on November 20th, but some of the members report they are getting better values in some territory, and that they have not found it necessary in making some recent sales to make the concessions of $6.50, $5.00 and $6.00. The November reports, using Group B as a basis, and it seems logical to do so because our basing point Cadillac is located in that territory, indicate that sales have been made, and can be made, at concessions of $6.00 on Clear, $4.50 on No. 1 and $5.50 on Factory from the delivered values in the table of May 21st, 1913.

While the anticipated decrease of 26% in December production from the October production is not 50% it is a start in the right direction, and it should have a salutary effect and give a firmer tone to the market.

The folly of sacrificing values was never more to be deplored than under present conditions, because it is absolutely impossible at this particular time to create any greater demand for flooring by making ruinous prices.

We are now approaching the holidays and inventory time, and low prices instead of bringing out any new business will only result in establishing flooring values for the year 1915 on a ruinously low level from which it may be impossible to recover during the entire year.

* * * * * * *

[fol. 313] GOVERNMENT'S EXHIBIT No. 18-K

January Twenty-ninth, 1915.

Market Conditions Committee Annual Report, Year 1914

To the Maple Flooring Manufacturers' Association.

GENTLEMEN: Last July our Semi-Annual report stated that general business during the first half of 1914 had not been as good

as anticipated, and that the outlook for the last half of the year indicated a general improvement. But the unexpected happened. That report was made July 31st just when the European War was beginning, and the flooring industry was soon confronted with a complicated situation. It was without precedent. Modern business had never before been so seriously menaced. There was no past experience which would serve as a guide through these complex conditions. Some authorities predicted an era of greater prosperity for this country, while others, less optimistic, feared that for a considerable period building operations would be greatly restricted which would result in a decided falling off in the demand for flooring.

Beginning with September, the monthly reports of the Committee have with increasing emphasis explained and commented upon the unfavorable conditions which were developing. It was hoped that this information would be helpful to the industry in meeting an unusual situation. While the papers have endeavored to promote confidence and to convince the public that prosperous business is just ahead, the motive of the endeavor has been too transparent to be taken seriously, and we have assumed that you did not want to be misled in our reports by pulmotored optimism. Even now it is doubtful whether there is any material improvement in business not resulting from European requirements on account of the war and reports of such improvements have apparently been exaggerated. Until the plants which are running with reduced labor, reduced hours, or not at all, can get back to normal, we shall be unable to re-enter the promised land of business prosperity.

However, it does not require an abnormal demand for flooring to support fair prices. It is not so much the measure of the demand as it is the relation of supply to demand that determines the price basis of a commodity. Right now the relation of supply to demand is the really important factor in the flooring industry and nothing less than a consistent adjustment of it will result in any material improvement in present conditions.

The year 1914 has made a surprisingly good record for us notwithstanding unfavorable conditions.

The first quarter of the year made a better showing in every way than the first quarter of 1912, and about as good as the first quarter of 1913.

The first half of 1914 compared with 1913 shows a net increase of stock of about one million feet. However, the net average prices for this period averaged more than the first half of 1912 or 1913.

[fol. 314] During the last half of 1914 stocks increased 3,282 M ft. more than during last half of 1913. Prices were under those of 1913 and over those of 1912, and 1914 prices being considerably better than an average of 1912 and 1913.

The statistical reports issued by the Secretary show the comparative results for the year.

Early in the year this Committee recommended a plan for exchanging quotations which was adopted for a time by some of the members, but later it was abandoned. You have frequently expressed a desire for some workable plan which would protect you

from foolish and needless competition among yourselves. It was hoped that the systematic exchange of quotations would afford the relief longed for, but it is evident that there is a lack of confidence—

"That makes us rather bear those ills we have
Than fly to others that we know not of."

Until this feeling can be overcome there is little prospect of more effective team-work than heretofore.

Early in 1913 a Scientific Price List was made which represented a profit of 10% on F. O. B. mill prices. This was based on the then current values of lumber, the cost of labor, and the selling expense. The Price List has not been changed since that time. During 1914 it was decided to revise the data to show the present cost of manufacturing and selling flooring. This has been done, and the result is given in our monthly report of this date.

To demonstrate the importance of the relation between production and shipments under present depressed conditions you have lately been rquested each month to estimate your production of flooring for the following month. This information has been tabulated showing the estimates in detail together with the production and shipments of each member for the corresponding month in the previous year. This table also shows the estimated and actual production for the preceding month. This is all your Committee can do as its function is assumed to be a clearing-house of information for the members of the Association. Any improvement in the situation depends entirely upon your individual action.

In our monthly reports of market conditions we have endeavored to reflect, as accurately as the available data would permit, what has seemed to us a conservative average of conditions. Based upon statistical information and the prices you have reported, your Committee has made from month to month an estimate of the prices obtainable.

A review of the business follies of 1914 should leave with you a favorable impression of the work of this Association. The results achieved are probably without parallel in the lumber world during that period.

What would have happened to the flooring industry without an Association may be imagined from what did happen to other industries you know about.

[fol. 315] It seems to your Committee that no better demonstration could be had to show the value of the Association, and that its working methods are not only eminently fair and equitable to all concerned, but are also efficient and practical. While the year's results are not all we could wish, let us be thankful to the Association that they are no worse.

During the year 1914 ten meetings were held, with an average attendance of 73% of the Committee membership, and representing over 30% of the Association membership. The Committee is composed of ten members, representing 45% of the Association membership. As all of the members of this Committee are familiar with the details and experience of their respective sales departments, their

large average atendance has afforded a very complete exchange of information and views in regard to market conditions and current values from time to time. It may be of interest to note that two of the members attended all 10 meetings during the year, three attended 9 meetings, and the others attended 1, 4, 6, 7 and 8 meetings, respectively.

Once more your Committee wishes to express its appreciation of the information and statistics you have furnished from time to time, and also to acknowledge the efficient co-operation of our Secretary who has never yet refused to tabulate the statistics or to write up our reports. We admit confidentially that it has become quite the habit of the Committee to "Let George do it."

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, B. P. Whedon, Charles T. Kerry, Earle L. Crossman, The Michigan Trust Co., Receiver of W. H. White Co., A. C. Wells, J. D. Staple, E. J. Gillouly, Market Conditions Committee.

[fol. 316] GOVERNMENT'S EXHIBIT No. 18-L

January Twenty-ninth, 1915.

Market Conditions Committee Report

To members.

GENTLEMEN: In analyzing the December statistics which were mailed you a few days ago, your Market Conditions Committee finds that stock conditions were more unfavorable on January 1st than on December 1st, stocks having increased during December to the extent of 2,680 M, bringing them on January 1st up to the large total of 40,631 M, 6,804 M more than on January 1st a year ago.

Unfilled Orders show a decrease of 5,703 M from January 1st, 1914, and are now below 12 millions, or only 29% of the stocks on hand.

December Shipments, 8,643 M, were of better volume than was anticipated at the previous meeting of the Committee, but were 2,348 M below December 1913.

The New Business Booked was 9,192 M, a decrease of 3,102 M, from December a year ago.

While December Production, 11,323 M, was 3,369 M less than December 1913, and 893 M less than November 1914, it is still excessive, measured by the demand, as it exceeds December Shipments and New Business Booked by 2,680 M and 2,131 M, respectively.

The 26 members who estimated their December production at 10,109 M, produced 9,839 M, a decrease of 270 M, and while this decrease is small it is gratifying because it indicates that each individual member is giving careful thought to his own production and is making an effort to harmonize it with his own trade requirements. The absolute necessity of doing this is apparent, when we consider that if the stocks on hand January 1st increase to the same extent

in January and February as they did in December we shall be confronted with a stock on March 1st of 46 millions. This would be within 500 M of the high point on March 1st, 1912, and the result will be a repetition of the disastrous experience that followed, as Maple Flooring touched its lowest point of the year in April and May when the average selling prices obtained by Michigan and Wisconsin mills were $36.15 for Clear, $30.82 for No. 1 and $16.87 for Factory, but we are likely to fare worse this spring than we did in the spring of 1912, because at this time our unsold stocks are five million more than on March 1st, 1912, to which must be added whatever the excess may be of production over shipments during January and February, if we wish to measure the probable decline in values after March 1st if our stocks on hand continue to increase.

Twenty seven members estimate their January production at 8,065 M against their production in January 1914 of 11,816 M, a decrease of 3,751 M, or 31.7%, but if the shipments of these 27 members amount to only 50%, as estimated, of their January 1914 shipments, which were 10 million feet, our stocks would show an increase of 3 million feet at the end of this month.

In discussing Current Net Values, the findings of the Committee, based on the best information obtainable, are that selling values of flooring, F. O. B. Cadillac, Frame A, are represented by concessions [fol. 317] that average $6.50 on Clear, $5.00 on No. 1 and $6.50 on Factory from the Table of Values of May 21st, 1913.

Manufacturing and Selling Costs

New data has been collected covering present manufacturing and selling costs of Maple Flooring and replies from 15 members representing 60% of the output of 1914 have been tabulated. The average of the replies received of the answers to the eight questions shows total manufacturing and selling costs of $11.68 per 1 M feet of flooring produced. Deducting the net profit of $1.12 derived from wood and other by-products of flooring lumber per 1 M feet of the flooring produced, leaves the actual cost per 1 M feet of flooring produced, $10.56. You will remember that in February 1913 the so-called Scientific List was constructed, founded upon the results of six test runs and based upon the market value of the rough lumber used and manufacturing and selling costs plus one-ninth to represent the 10% profit on sales, which is the minimum profit consistent with the hazards of a manufacturing industry. When the flooring product of the six test runs was priced at the market values current at that time it was found that flooring was being sold at 59 cents less than actual cost and that a horizontal advance of $4.68 was required to bring the selling prices to a basis that would cover actual cost plus 10% profit on sales.

In order to bring our Scientific List up to date a new table has been compiled on the basis of the same six test runs as follows:

1. The present market values of the raw material.

2. Present manufacturing and selling costs, less profit derived from wood and other by-products of flooring lumber.

3. Allowance of 20% for waste, the average as shown by new data.

4. One-ninth added for the 10% profit on sales.

We find the actual cost of 1 M feet of flooring sold is $35.22, and by a strange coincidence the selling price F. O. B. Cadillac, Mich., as stated in this report, when applied to the test run production, amount to exactly $35.22, the actual cost, so if a profit of 10% on sales is to be obtained a horizontal advance of $3.91 is required. Applying the table of values of May 21st, 1913, Frame A, to the flooring product of the six test runs, the average value of 1 M feet of flooring is $41.22, so the concessions from our delivered values should not exceed $2.50 on Clear, $1.00 on No. 1 and $2.50 on Factory if the manufacturers of flooring feel that they are entitled to a 10% profit on their sales.

Market Conditions Committee Report

To Members.

GENTLEMEN: Every member but one of your Market Conditions Committee attended the meeting held in Chicago yesterday, so the findings embodied in this report reflect the consensus of opinion of practically the entire Committee.

Stock conditions on February 1st were substantially the same as on January 1st, except that Unsold Stocks increased 650 M. and now amount to the unprecedented total of 29,299 M, as against Unsold Stocks on February 1st, 1914, of only 11,112 M. Considering this heavy burden of Unsold Stocks, it is surprising that values have held as well as they have, and the Committee feels that the members of the Association should be thankful for the results that are being accomplished in spite of extremely adverse conditions.

The following table will show stock conditions in detail on February 1st, 1914-1915, and also on January 1st of each year:

Stock Conditions, per Cent Sold

	Maple, beech, and birch				2¼" face maple			
	Feby. 1st		Jany. 1st		Feby. 1st		Jany. 1st	
	1914	1915	1914	1915	1914	1915	1914	1915
Clear ...	86	38	66	35	145	74	88	61
No. 1...	74	27	57	28	148	46	99	43
Factory .	31	24	24	20	53	42	39	34
All	69	31	52	29	123	57	77	49

Compared with December, 1914, January shows the following decreases; in Shipments 1,102 M, in Production 1,702 M, and in New Business Booked 233 M. Stocks on hand increased during January 2,080 M, and Unfilled Orders increased 1,430 M during last month.

Compared with January a year ago, Shipments, Production and New Business Booked show decreases of 3,678 M, 3,387 M and 6,365 M respectively, while the Stocks on Hand on February 1st were 7,095 M more than a year ago, and the Unfilled Orders are 11,092 M less than at that time.

Overproduction

The only possible remedy to counteract present conditions is greater individual decreases in production in order to meet the decrease in demand. Our Stocks on Hand on February 1st were practically 43 millions. Flooring Manufacturing Information reports indicate that 26 members expect to produce 9 millions in February, and if our February shipments show the same per cent of decrease as our January shipments, stocks will increase 2½ millions during February, and the total on hand on March 1st will be about 45½ millions.

[fol. 319] While these facts confront us there is no reason to get panicky, but on the contrary there is every reason to Sit Tight And Not Rock The Boat. January and February are always the dullest months in the year in the flooring business and we have gotten through them in good shape, and if past experience is any guide the volume of shipments should begin to increase in March and April. This has happened every year, as the following statistics of shipments during the first six months of the last four years will illustrate. Why should it not happen again this year?

Shipments	1911	1912	1913	1914
January	10,292	9,632	12,494	11,219
February	11,631	10,023	12,617	10,835
March	14,079	13,526	14,432	13,204
April	12,847	14,632	15,322	12,672
May	13,574	15,565	14,999	13,508
June	12,928	15,631	14,728	14,364
	75,351	79,009	84,592	75,802

Current Net Values

Current Net Values during January, as reported by 21 members, held practically even with the findings of the Committee in its last report, and are represented by concessions of $6.50 on Clear, $5.00 on No. 1 and $6.50 on Factory from the Table of Values of May 21st, 1913. It should be stated, however, that some recent sales are reported as having been made at better values, but taking the field as a whole and the situation as a whole up to this date, values are practically unchanged:

Current Net Values, Group E, Michigan & Wisconsin Mills

Maple 2¼" face	January, 1913	December, 1914	November, 1914
Clear	$40.01	$40.18	$39.78
No. 1	35.34	35.25	35.36
Factory	20.41	19.84	20.71

To have held our own during the two dullest months of the year and in spite of rapidly accumulating stocks is something to feel proud of, and now that we are just approaching the time when a better demand for flooring may be reasonably expected, the last thing to do is to lose heart and sacrifice values, when there is absolutely no possibility of increasing the demand in times like these.

[fols. 320 & 321] Essential to Have Reports Before the 5th of Each Month

Because of the critical situation we are now in it is of the utmost importance that our statistical reports be in the hands of the membership very early in the month in order that the information in the reports may be of greater value to the Association. The Committee urgently requests that you make out your reports hereafter in time for them to be in the hands of the Secretary by the 4th or 5th of each month, so the Committee can hold its regular monthly meeting by the 8th or 9th and make its reports on the day following their meeting. This will place our statistics in the hands of the membership by the 10th of each month instead of during the last week in the month, as so frequently happens now.

May we not depend upon your co-operation in this respect, because after all it takes no more time to make out your reports on the 2nd or 3rd of the month than it does to make them out two or three weeks later, and at this particular time of all times there is nothing more important to us all than to have accurate information as quickly as possible regarding conditions which have such a direct bearing upon our own welfare.

* * * * * * *

[fol. 322] January 30th, 1915.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: We are very sorry you were not present at the Annual Meeting held yesterday, as we had a good attendance and a very harmonious meeting.

The principal business transacted was the discussion of the annual reports, and the election of Officers and Trustees, and the appointment of the standing committees for the coming year. The same Officers and Trustees were re-elected, and the Trustees appointed the same members who served last year on the various committees to serve again this year.

I would like to urge upon you to carefully read and study the annual reports reviewing the work of the Association during the year, and especially the report of the Market Conditions Committee for December, which covers the data collected regarding manufacturing and selling costs, and to which is attached a table illustrating our so called Scientific List brought up to date. This table is figured on the basis of the present market value of the raw material, manufacturing and selling costs, and present selling values for flooring as applied to the six test runs which were used in the construction of the original Scientific List in 1913.

These six test runs were actual practical demonstrations in which a total of 1,790 M ft. of Lower Michigan Maple was used, and a record was made of the grades of each lot of rough lumber used, and of the grades of the flooring product obtained, and as the averages have been carefully computed and checked, you can rely upon the mathematical accuracy of the showing in the table.

Yours very truly, George W. Keehn, Secretary.

[fol. 323] GOVERNMENT'S EXHIBIT No. 18-N

October Twenty-second, 1915.

Market Conditions Committee Report

To Members.

GENTLEMEN: On September 1st we had 2,553 M 13/16 x 2¼" face Clear Maple Flooring on hand and this item was 214% sold. October 1st shows 2,329 M on hand and 246% sold, and only two members with 100 M or over on hand.

Particular mention of this conspicuous feature in the September statistics was made in our report last month but as it did not reach the members until about September 20th there was not the logical improvement in September prices which the statistical condition warrants.

It may seem strange that the impulse of this condition was not felt sufficiently to obtain better prices before the statistical information was available. The 2¼" face Clear Maple is our largest and most important item and should command a price in keeping with demand and supply. That it did not do so during September is apparent.

Was there a reason? We think there were several. But we are not so sure that we can analyze them. An attempt to do so, however, may be helpful by directing your thought to this subject.

1. On account of approaching winter and the usual decreased shipments during that season some of us may have assumed that the anticipated slackening in demand will offset the present favorable stock condition. Some have therefore continued to book orders ahead of production without insisting on a consistent price.

2. We have been drifting so long and the general lumber business has been so unfavorable that it may have seemed a hopeless effort for individual members to face about and obtain better prices. Little permanent progress up stream can be made unless there is a general disposition to pull together.

3. Attention has heretofore been called to an incorrect interpretation of one feature of our monthly reports. The current net values given each month are the findings of the committee based on the average of the prices reported as obtained during the previous month. They are never "recommended" prices. They are intended to reflect what members have done. Consequently, no one should hesitate to ask more than these net values, especially when already oversold. Besides the values reported would not be an average if they were not based on both the higher and lower. If all who were oversold on 2¼" Clear during September had asked at least the higher level for new business do you not think that this item would have shown a greater average advance than 21¢ per M during that month?

4. There are various methods of reaching the retail dealer. The most flexible and possibly the best method is to reach him yourself or by your own salesman. It enables one to maintain a higher level of prices on the list and to shade them instantly when it seems necessary to do so to get the order. But it is impractical to cover a large territory thoroughly in this manner.

[fol. 324] Another method is to reach the dealer through the wholesaler or by letter. This method is quite flexible and prices can be very readily adjusted to a competitive basis and quotations can be made with a short time limit.

A third method is to employ special representatives in various sections of the country whose relation to the manufacturer is similar to that of salesmen. This method is not flexible because such salesmen must be supplied with price lists which will enable them to meet the competition under the other methods and it is not practical to change these lists every week. Naturally, advances in such lists are made cautiously and conservatively.

The foregoing is offered in a spirit of co-operation. We are all in the same boat and must pull together if we — get better results. It does not rest with this committee to criticise the methods of any member nor could it accomplish anything by so doing. But if each member will think over the reasons for our failure to take advantage of an opportunity during September to get better prices for Clear Maple it may suggest to each of us how far we are individually responsible for the outcome. The efficacy of the Association is merely the sum total of that of its members.

In its report last month the Committee predicted that the shortage in 13/16 x 2¼" Clear Maple would be more pronounced during the fall months than on September 1st, because according to the best estimates available, current sales of that item are greater than its production. Our September statistics have verified this prediction, as on October 1st the stock sold was 3,403 M feet more than the stock

on hand compared with 2,914 M feet oversold on September 1st, an increase of practically half a million in its oversold condition. If a forecast of the stock conditions on February 1st of 13/16 x 2¼" Clear Maple could be made at the next meeting of the Committee, it would be of great value to the Association in estimating what prices it would be reasonable to expect would be obtainable for this item for the spring trade. If members have dependable information of this sort not later than December, it should protect them against booking stock orders for future shipment at lower prices than subsequent conditions will make necessary. With this end in view, will you please compile the following information for the use of the Committee and send it as soon as possible to the Secretary.

1. Quantity of 13/16 x 2¼" face Clear Maple you produced during the month of October.

2. Quantity of New Orders you booked for 13/16 x 2¼" Clear during the month of October.

3. Quantity of 13/16 x ¼" face Clear Maple you estimate you will produce during the months of November, December and January, listing each month separately.

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, B. P. Whedon, Charles T. Kerry, A. C. Wells, J. D. Staple, of Market Conditions Committee.

[fol. 325] GOVERNMENT'S EXHIBIT No. 18-O

March 31st, 1915.

To Members.

GENTLEMEN: Will you please fill out and return as quickly as possible the enclosed blank report forms, so the Market Conditions Committee can hold its regular monthly meeting very early in April?

Would you be in favor of holding a general meeting of the Association in April, say on the 14th or 15th, and will you attend the meeting if it is called? At the last meeting of the Market Conditions Committee, Dr. Earle and other members expressed the view that it would be desirable to hold a general meeting of the Association in April, provided a good attendance was assured. Please let us hear from you so Dr. Earle can be governed accordingly in regard to calling a meeting.

* * * * * * *

[fol. 326] GOVERNMENT'S EXHIBIT No. 18-P

April 15th, 1915.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: Enclosed please find statistical reports for March and for the first quarter of 1915, and the report of the Market Conditions Committee.

We trust you will take time to study these statistics, and read the report of the Market Conditions Committee, which was accepted by the Association at the meeting held today.

The general meeting was well attended, 21 members being present, and a report of the proceedings of the meeting will be sent you tomorrow.

Yours very truly, George W. Keehn, Secretary.

[fol. 327] April 15th, 1915.

Market Conditions Committee Report.

To Members.

GENTLEMEN: In discussing flooring conditions at our meeting yesterday, we find that all things considered March, 1915, compares quite favorably in all essential features with March, 1914, with the exception of the amount of Unfilled Orders on our books on April 1st this year, which are 11½ millions, or 42% less than on April 1st, 1914.

Stocks on Hand April 1st are only 2,827 M more than a year ago, thanks to the decrease in March of 2,631 M in Production, and the unexpectedly large shipments, which amounted to 12,739 M, and were only 465 M, or 3½% less than in March last year. When your Committee met on March 11th it was then too early in the month, as stated in that report, to closely estimate the March shipments, and as the outlook at that time was none too favorable, the Committee conservatively estimated a possible decrease of one-third in March shipments, compared with March, 1914, and in view of this possibility the members were cautioned to pursue a conservative policy in production. It is gratifying, therefore, to note the decrease of 2,631 M in output from the amount produced last year, and this reduction in output coupled with the large volume of March shipments resulted in a decrease of 1,664 M during the month of March in our Stocks on Hand.

The New Business Booked, 12,352 M, should be considered of satisfactory volume in view of the feeling of uncertainty prevailing in the lumber world, and the inclination on the part of buyers to go slowly and play a waiting game. This disposition not to stock up heavily, and to delay the placing of orders until the time has almost arrived when the flooring is needed for use, accounts to a considerable extent for the relatively small amount of our Unfilled Orders during the first quarter of 1915, compared with like period in 1914 and 1913. There has been, however, the customary seasonal

betterment in the percentages sold of 2¼" face Maple Flooring. In 1915 the Clear, No. 1 and Factory improved 39 points, 16 points and 3 points respectively, with an improvement in all grades of 21 points from January 1st to April 1st. While these changes are not as great as in 1914 and 1913, it should be a source of satisfaction to know that all of the 2¼" face Clear Maple Flooring on hand or its equivalent is now sold.

While stocks decreased in March this year 1,664 M, compared with an increase in March, 1914, of 502 M, their present magnitude carries the emphatic warning that the danger of overproduction must still be carefully guarded against, and that each member should avoid producing more flooring than is needed to meet the requirements of his own trade. Because on April 1st this year only 38% of Maple, Beech and Birch stocks were sold, as against 70% on April 1st last year. Expressed in feet, this means our unsold stocks are now 25,683 M versus 11,406 M, or 2¼ times as much as a year ago. [fol. 328] Compared with February, 1915, March shows increases of 3,816 M or 43% in Shipments, and 590 M or 5% in New Business Booked, while in March, 1914, the Shipments and New Business Booked were respectively 2,369 M (22%) and 587 M (4%) greater than in February, 1914.

You will be interested in analyzing the statistics for the first quarter of 1915, and comparing them with the first quarter of 1914. You will note the Shipments were only 6,055 M (17%) less than the first quarter of 1914, and that Production was 10,032 M (25%) less, and New Business Booked 11,228 M (also 25%) less than in the first quarter of 1914. As Production exceeded Shipments 619 M, stocks show an increase of like amount since January 1st. During the same period in 1914 and in 1913 stocks increased 4,596 M and 5,109 M, respectively. While stocks are much larger now than are required for the volume of shipments, we should feel gratified that the attention given to the subject of Production during the dull winter months kept our Stocks on Hand from increasing only 619 M since January 1st.

Current Net Values.—In our last report of March 12th we found Current Net Values in February were represented by concessions of $6.50 on Clear, $5.00 on No. 1 and $6.50 on Factory from the Table of Delivered Values of May 21st, 1913. While March net values obtained in some territory resulted in recessions from the values secured in February it would seem that taking the general market as a whole the concessions mentioned still reflect the average concessions that were made in booking a large majority of the new orders taken during March. In view of the large volume of shipments in March it would appear that these concessions were greater than were actually necessary to effect sales, and that had the members been aware of the liberal movement of flooring last month that prices would have held firmer. Taking into account the large shipments for March, and the fact that April shipments usually show an increase over March, a majority of the Committee inclines to the opinion that values now obtainable are $6.00 off on Clear, $4.50 off on No. 1, and $6.00 off on Factory, and that the manufacturers should feel justified in expecting to realize that basis in making

quotations and sales, Provided Always that Production does not exceed demand, and that Stocks on Hand will be reduced as rapidly as possible from their present high altitude.

Again the Committee wishes to respectfully urge every member of the Association to make the Current Net Values report so that the Committee will have more complete information upon which to base its findings. Will you not do this, not only for your own good, but for the good of the industry as well?

Flooring Manufacturing Information.—In sending out the forms on March 31st for Flooring Manufacturing Information for April, it was the consensus of opinion of the Committee that Shipments in April, 1915, were likely to show a decrease of 21% from April, 1914. Should this estimate hold good the 27 members who reported their expected production for April as 9,627 M would ship 8,700 M, and this would result in an increase of over 900 M in Stocks on Hand on May 1st. This would be an unfortunate condition, and it is hoped that some of the members have overestimated their probable Production for this month, and that they may be in a position to revise their manufacturing operations during the last half of the month.

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, B. P. Whedon, Charles T. Kerry, Earle L. Crossman, E. J. Gillouly, A. C. Wells, of Market Conditions Committee.

[fol. 329] GOVERNMENT'S EXHIBIT No. 18-Q

April 16th, 1915.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: The General Meeting of the Association held yesterday was very well attended, as 21 members were present and only 8 absent. The following is an outline of the principal business transacted:

1. The report of the Market Conditions Committee was discussed and on motion accepted and a copy ordered sent to each member of the Association. The members were pleased with the results of March business, and feel that the unexpectedly large shipments last month give good grounds for encouragement and that if production is held well in hand, so that Stocks on Hand are reduced, that better values for flooring should be obtainable.

The rates of freight from Cadillac have been carefully checked over and revised to date, and new fillers for the Rate Books are now being printed and will be sent to the membership next week. Please advise promptly how many fillers you will want for your Rate Books.

* * * * * * *

3. The Secretary reported that the memorandum of agreement to discontinue the boring of dressed and matched flooring on July 1st, 1915, had been traveling back and forth among the members of the Association, and that it had now been signed by 25 members, and that the signatures of the following non-member manufacturers had been obtained:

North Branch Flooring Company, Chicago.
Herman H. Hettler Lumber Co., Chicago.
Chicago Maple & Oak Flooring Co., Chicago.
Ward Brothers, Big Rapids, Michigan.
William Horner, Reed City and Newberry, Michigan.

The agreement, which is now in Chicago, will be sent to the remaining members in the northwest to whom it has not yet been submitted for signature.

The Advertising Committee was instructed to get out some literature for the members to distribute among their customers for the [fol. 330] purpose of educating the users of Maple Flooring, and the public generally, to the effect that the boring of flooring is no longer desirable or of practical use, because of the improved wire nails now used, and the modern method of laying hardwood floors, as set forth in the Association Official Flooring Book on pages 31 and 33.

* * * * * * *

[fol. 331] GOVERNMENT'S EXHIBIT No. 18-R

May Twenty-sixth, 1916.

Market Conditions Committee Report, April Statistics

To members.

GENTLEMEN: At the meeting of the Market Conditions Committee held in Chicago yesterday flooring conditions, as reflected by our April statistics, were thoughtfully considered, and the Committee finds as follows:

Statistics of corresponding membership compared with April 1915:
Stocks on May 1st are 1,216 M (3.2%) less than a year ago.
Unfilled Orders are 11,219 M more than a year ago. This is a remarkable gain of 77.8%.
Shipments are 430 M (3.5%) more than last April.
Production is only 202 M (1.9%) more than last April.
New Business Booked is 801 M (6.6%) more than last April.
Stocks decreased in April 1,240 M, as against a decrease last April of 1,402 M.

The following table compares April 1916 with March 1916, and April 1915 with March 1915:

	April-March, 1916	April-March, 1915
Stocks	Decreased 1,240 M	Decreased 1,402 M
Unfilled Orders	Increased 799 "	" 672 "
Shipments	" 638 "	Increased 330 "
Production	Decreaed 2,041 "	" 323 "
New Business Booked	" 935 "	" 523 "

Stock conditions improved materially all around:

M. B. & B.—Clear up 2 points, No. 1 up 8 points, Factory up 3 points, the three grades up 5 points during April.

Compared with a year ago: Clear up 22 pints, No. 1 up 38 points, Factory up 41 points, all three grades up 32 points.

Maple.—Clear up 7 points, No. 1 up 10 points, Factory up 3 points, all three grades up 7 points during April.

Compared with a year ago: Clear up 33 points, No. 1 up 40 points, Factory up 40 points, all three grades up 36 points.

Maple 2¼" Face.—Clear up 21 points, No. 1 up 8 points, Factory down 2 points (from 106% to 104%) all three grades up 8 points during April.

Compared with a year ago: Clear up 73 points, No. 1 up 48 points, Factory up 71 points, all three grades up 57 points.

[fol. 332] Surpluses.—Surpluses are 11 less in Clear, 11 less in No. 1 and 8 less in Factory, and 30 less in all three grades than a year ago, and are 6 less in Clear, 3 less in No. 1 and 1 less in Factory, making 10 less in all three grades than a month ago.

These reductions in the number of surpluses indicate that warehouse conditions average very easy, and consequently offer no reason for sacrificing values. And by the way it has been several years since the Committee collected data regarding warehouse capacity, and as a good many changes have no doubt occurred since then, the Committee would like new reports from the members regarding the maximum and ordinary capacity of their warehouses, so the information in the hands of the Committee will be up to date. Will you kindly fill out and return to the Secretary the enclosed blank report form?

Production.—The relations of Production with Shipments and New Business Booked are the most favorable of any month so far this year. Calling Production the base, or 100%, the Shipments and New Orders are equal to 115% and 118%, respectively, of the Production.

April, 1916

Production	10,977 M	100%
Shipments	12,607 "	115%
New Orders	12,929 "	118%

Current Net Values.—Reports from 21 members show average gains in Current Net Values obtained during April compared with

March, and using Group E Mills as the basis of comparison we find that No. 1 is up 32 cents, Factory is up 39 cents and that Clear held practically even. Compared with April, 1915, Clear is up $2.75, No. 1 up $1.07, Factory up $1.22, a gain of $1.93 over April a year ago on the entire product, on the basis of 50% Clear, 35% No. 1 and 15% Factory. This gain is nothing to gloat over, however, as it represents only 5½% to 6% on the value of the product, which has been more than taken care of by the advance in the value of the rough lumber, and the higher costs of manufacturing, etc.

In its report last month the Committee found the selling values of flooring were then represented by concessions of $3.00 on Clear, $3.00 on No. 1 and $4.00 on Factory, but as better prices for No. 1 and Factory were obtained during April the Committee considers the present market established at $3.00 off on Clear, $2.50 off on No. 1 and $3.50 off on Factory from the Table of Delivered Values of May 21, 1913.

Minimum Price Plan.—The Special Committee appointed to work out the details of the Minimum Price Plan is sorry to report that it still lacks the signature of one member of the Association, and consequently the Plan cannot take effect on June 1st, as proposed. It is hoped the missing signature will be obtained next week, and if it is the Plan will go into effect on July 1st instead of June 1st, as the time would be too short to get all the details of the Plan in the hands of the membership in time to become operative on June 1st.

[fol. 333] Warehouse Capacity

Ordinary capacity for convenient handling of stock..... M ft.
Maximum capacity ..... M ft.
Do you intend to increase the present capacity by making additions or building new warehouses, and if so to what extent? ..... M ft.
No. 17.

[fol. 334] If the Minimum Price Plan is finally consummated its duration will be for sixteen months just the same, but will run from July 1, 1916, to November 1, 1917. This change was adopted by the members of the Market Conditions Committee who were present yesterday, and who have signed the agreement, and it is hoped it will be acceptable to the other members of the Association who have already signed the agreement, as it simply means a postponement of one month in the date the Plan is to take effect; in other words a month would be taken off at this end and added on to the other end, so the duration of the agreement will not be changed.

The new Rate Book, containing the Index of Towns and Table of Values of May 15th, 1916, is not in type and will be printed within a very few days, and new sets of fillers will be sent to the members for their Rate Books as soon as received from the printer.

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, B. P. Whedon, William E. Cox, E. J. Gillouly, A. C. Wells, J. D. Staple, of Market Conditions Committee.

[fol. 335] GOVERNMENT'S EXHIBIT No. 18-S

May 8th, 1917.

John Schroeder Lumber Company, Milwaukee, Wis.

GENTLEMEN: Replying to yours of the 4th, LJK, we enclose herewith Table of Values of January 26th, 1917, covering 13/16" Maple Flooring; also a Table of Values of January 27th, 1917, covering 3/8" Flooring. The index letter for Milwaukee is H, as you, of course, know.

The following are the Concessions now in effect on 13/16" x 1½", 2", 2¼" and 3¼" Faces D. & M.:

	Maple	Beech	Birch
Clear	$1.00	$4.00	$2.00
No. 1	1.00	4.00	3.00
Factory	1.00	1.00	1.00

No values have been recommended on 3/8" Flooring, but the Table of Values of January 27th seemed to ref-ect at that time the consensus of opinion of the manufacturers of Flooring.

Because of the higher prices of rough Maple lumber and the increase in the cost of manufacturing Flooring, it was recommended that an advance of $2.00 be made, effective May 1st over the Values for 13/16" mentioned in my letter of April 25th.

[fol. 336] GOVERNMENT'S EXHIBIT No. 18-T

Maple Flooring Manufacturers' Association, Chicago

Market Conditions Committee Report, April Statistics

To Members.

GENTLEMEN: The regular monthly meeting of your Market Conditions Committee was held today, and all the members of the Committee were present excepting Mr. Kerry and Mr. Strable, who were unable to attend.

The flooring situation as reflected in our April Statistics shows a decided improvement in stock conditions compared with a month ago, and a very decided improvement over May 1st, a year ago. You will note by studying the Barometer Sheet that all points are "Up," and that Maple 2¼" face Factory has attained the pinnacle. It is now 444% sold, which is the very highest point sold of all high points sold in any kind of flooring in the history of the Association.

In exchanging trade experiences, members of the Committee report the demand strong for Factory and No. 1, particularly for Factory, and it is their opinion that this demand will continue strong and grow stronger on account of the class of buildings now

in course of construction and which are likely to be built during the summer and fall. It is the view of the Committee that on account of the oversold condition of Factory and the heavy prospective demand for it that much higher prices than present values can be readily obtained. As the No. 1 grade moved up 62 points during April and as the demand for it seems likely to increase, it should also command higher levels of value. The Clear grade also improved 42 points last month, and as it is now 236% sold, its present selling basis is more than justified by its statistical position.

The large volume of New Business Booked in April, 15,443 M, shows a handsome gain over March Bookings, and it is thought that the New Business Booked during the first ten days of May at quotations made prior to May 1st was also of heavy volume. The members of the Committee report booking considerable new business at the prices recommended as at May 1st-10th.

Our Production last month was a million and a half less than Shipments, and five and a half millions less than New Business Booked, and as the New Business Booked was four millions more than the Shipments, flooring conditions on May 1st are correspondingly stronger than a month ago. These conditions, coupled with the higher market prices rough Maple lumber is bringing and the frequent increases in wages and other manufacturing costs, confirm the probability of an advancing market for flooring, especially in the Factory and No. 1 grades.

[fol. 337] Because of the proposed advance of 15% in freight rates the Committee wishes to suggest to the members of the Association that it would be wise to take the precaution of making all quotations subject to advances in freight, in order to protect themselves, should the Interstate Commerce Commission grant the request of the railways for an increase in freights.

The opinion was expressed that the present Spreads between Clear and No. 1 and between No. 1 and Factory are larger than are justified by market conditions, and we would be glad to have your views on this subject. The Secretary will send you blank forms requesting an expression from you in the form of a vote for our guidance, so we can consider the question at our next meeting and make some recommendation to the Association.

The present Spreads between Maple 13/16" x 2¼" Face Clear and No. 1 is $6.00, and between No. 1 and Factory $14.50, which appear excessive in view of the relative demand for and the intrinsic values of the different grades. It looks like a famine in Factory when it is sold 444% with an increasing demand.

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, B. P. Whedon, William E. Cox, E. J. Gillouly, A. C. Wells, J. D. Staple, of Market Conditions Committee.

[fol. 338] Spreads

Table of M. P. P. Values—January 26, 1917—Maple

Frame A, F. O. B. Cadillac Basis, Corrected to Correspond with M. P. P. Values in Effect May 1, 1917

	13/16"	1¼"	2"	2¼"	3¼"
Clear	$50.00	$49.00	$51.00	$46.50	
No. 1	37.00	43.00	45.00	43.50	
Factory	20.50	28.50	30.50	33.50	

The following tables express our opinion of the Spreads between the different grades and faces of Maple Flooring which should prevail according to present market conditions, using the 13/16" x 2¼" Face Clear as the basis of comparison:

Frame A—M. P. P.—Values, F. O. B. Cadillac Basis—May 1, 1917

	13/16"	1¼"	2"	2¼"	3¼"
Clear	$50.00	$48.00	$51.00	$47.00

[fol. 339] GOVERNMENT'S EXHIBIT No. 18-U

Market Conditions Committee Report, June Statistics

To members.

GENTLEMEN:

Welcome Home.—The members of the Market Conditions Committee were very glad to have with them at their meeting yesterday, Captain E. J. Gillouly of Foster-Latimer Lumber Company, who has just returned from overseas, after about a year and a half in the service, principally in France, as Captain of Company E, 6th Battalion, 20th Engineers (Forestry). The Captain is glad to get back into the flooring game again and finds that conditions, values, listings, etc., have indeed changed while he was away.

* * * * * * *

All Records Broken.—Never before in the history of the Association has there been such an oversold stock condition, particularly in respect to the Maple 2¼" face. The clear is sold 749%, the No. 1 grad- 414% and Factory 401%, all three grades 529%. Expressed in feet, the Clear is oversold 12½ millions, the No. 1 grade 7½ millions and the Factory over 3½ millions, making a total of 23½ millions more 13/16" x 2¼" face Maple sold than was on hand on July 1st. It looks as if it would take the equivalent of nearly all the 2¼" face Maple that will be produced during the next four months or so to fill old orders.

The June business of the same 29 members compares with May as follows:

June-May, 1919, Compared, Same 29 Members

	Stocks	Orders	Shpmts	Prodn	N. B. B.
July 1...	20,210 M	46,354 M	14,998 M	10,939 M	18,926 M
June 1...	25,033 "	41,049 "	12,955 "	10,727 "	22,534 "
Decrease..	4,823 M	.....	.....	.....	3,608 M
Increase..	.....	5,305 M	2,043 M	212 M	.....
Per Cent..	19.3%	12.9%	15.8%	2%	16%

Current Net Values.—Current Net Values for June reflect the advance adopted in May, but as the advance adopted in June did not take effect until June 19th, with the customary ten days in which to protect outstanding quotations, it was not to be expected that a large volume of new orders would be booked in June at the new June prices. Current Net Values for July, however, will reflect the June 19th M. P. P. Basis.

[fol. 340] Survey of Costs.—Surveys of Costs for the 2nd quarter of 1919 were received from ten members whose flooring operations are typical of the average of the industry. Their reports indi-

cate an advance in Manufacturing and Marketing Costs of $1.29 over the previous survey. The gross cost is $22.14 less wood $2.22, leaving the net cost $19.92 compared with $18.63, according to the preceding survey. The market value of rough flooring lumber has also advanced. The Committee felt that it should be conservative and that it would be better to be too low than too high regarding the average current market value of lower Michigan, upper Michigan and Wisconsin 4/4 Maple Flooring stock. Based upon information regarding recent sales, not asking prices, the Committee concluded that $3.00 would represent the advance on the flooring lumber. This would equal $3.66 advance in the cost of 1,000 ft. of flooring (counting 18% waste) in arriving at the selling basis of the product. Using the composite results of the seven test runs, as per our revised statement of May 15, 1919, it works out as follows:

Cost of 1,000 ft. of flooring sold	$56.34		
To cover $3.00 advance on flooring lumber, counting 18% waste. Add	3.66		
Add increase in Manufacturing and Marketing Costs from $18.63 to $19.92	1.29		
		$61.29	
Add one-ninth to give 10% profit on sales		6.81	
			$68.10
Value of Seven Test Run flooring product per statement of May 15th.....	$58.98		
Add advance of June 19th	6.00		
		64.98	
Horizontal advance required.....		3.12	
			$68.10

Committee's Recommendations.—In view of cost conditions the Market Conditions Committee recommended a horizontal advance of $3.00 and the recommendation was immediately telegraphed to all the other members of the Association as follows:

"Because of increased costs Market Conditions Committee recommends horizontal advance of Three ($3.00) Dollars effective today. Please wire approval today."

At this writing we have received affirmative replies from all but one member of the Association, and we are expecting to hear from him during the day.

Some of the replies which we quote below favored a larger advance than $3.00.

Members' Replies.—No. 7 I. Stephenson Co.—"Why stop at three make it ten getting four to six over that now."

No. 14 Cummer Diggins Co.—"Think should be five dollars but will abide by recommendation."

No. 29 Welsh & Kerry Co.—"Your telegram at hand saying Market Conditions Committee recommends horizontal advance of $3.00, which is very satisfactory to us. However, we had already advanced our 2¼" price $5.00 per thousand feet and we are not very wild for orders at that price."

[fol. 341] No. 49 Bigelow Cooper Co.—"Approve three dollars advance should have been at least five."

No. 6 Thomas Foremon also favored an advance of $5.00.

The recommendation of the Committee is, therefore, adopted, effective July 17th, with the understanding that members who may wish to do so, may protect up to July 28th inclusive, old outstanding quotations made on or before July 17th. New Concession Sheets will be sent you as soon as received from the printer.

While discussing trade conditions and before the recommendation of the $3.00 advance was decided upon several members of the Committee stated that because of their own stock conditions they had already advanced their prices $3.00 to $4.00 and were not very anxious for new business on that basis, and after the recommendation of $3.00 was adopted, they expressed their intention of asking $2.00 or $3.00 more than the new recommendation. So, if any members of the Association feel that the recommendation of the Committee is too low or is at a lower basis than they wish to take new orders at, they can, of course, pursue the same course and ask more than this new MPP Basis.

It should always be remembered that the MPP is a minimum price not a maximum price.

Values of 3/8".—The Committee discussed the market value of 3/8" flooring, which is also oversold to a greater extent than ever before in the records of the Association, especially the Clear grade. It was the view of the Committee that a horizontal advance of $5.00 on 3/8" Clear and No. 1 be recommended, and the Secretary was instructed to have a new Table of Values covering the 3/8", printed and mailed to the members. Please bear in mind that the 3/8" prices do not carry any concession, but are net, being subject only to commissions to your Registered Special Representatives and to Registered Wholesalers and Commission Men.

Get Rid of Odds and Ends.—Your Committee also wishes to suggest that because of the scarcity of staple items of flooring and their oversold condition that it is an opportune time to work off odds and ends and what are ordinarily slow selling items of flooring. If you cannot quote on or furnish flooring of any given items because of having none in stock, or because you are heavily oversold, you may have something else on hand that you can offer to your customer that will answer his purpose and which he will be glad to buy.

Respectfully submitted, M. E. Thomas, Chairman; B. P. Whedon, W. B. Earle, Chas. T. Kerry, Wm. E. Cox, E. J. Gillouly, A. C. Wells, J. D. Staple, of Market Conditions Committee.

Uniform Matching.—After the adjournment of the Market Conditions Committee meeting the question of Uniform Matching was discussed informally, and Mr. Kerry said he would follow it up as Chairman of the Grades Committee, with the other members of the Grades Committee, with the view of getting expressions from all the members of the Association as to whether or not they would be in

favor of adopting uniform matching. Flooring stocks are quite low now and it looks like an opportune time to adopt uniform matching, to take effect say, along about September 1st or October 1st, at which time stocks may be even lower than they are now if the shipments continue to exceed the production as in June.

You will recall that the matchings of seven mills were uniform and that the seven sample pieces from Nos. 2, 3, 5, 6, 14, 43 and 49 went together perfectly and fitted as well as if all of them had come from one machine. This looks like a good start towards unifying the matching so why not push it along and bring it to a happy conclusion.

[fol. 342] GOVERNMENT'S EXHIBIT No. 18-V

August 21, 1919.

Market Conditions Committee Report, July Statistics

To members:

GENTLEMEN: Your Market Conditions Committee met yesterday and after a careful study of the flooring situation as reflected in our July Statistics, wishes to submit to you the following report:

Unprecedented Stock Conditions.—There has been an extraordinary improvement in stock conditions and the per cent sold of Maple 2¼" face has now reached an altitude never before experienced in the industry. The following table will give you a bird's-eye view of the conditions of 2¼" face Maple in M feet and in percentages sold:

	Stocks on hand	Unfilled orders	Per cent sold
Clear	1,207 M	14,364 M	1,190%
No. 1	2,201 "	9,384 "	427 "
Factory	1,275 "	5,853 "	459 "
All Three	4,683 M	29,601 M	632%

This means that twelve times as much Clear, over four times as much No. 1, four and one-half times as much Factory, and over six times as much of all three grades were sold on August 1st as there were Stocks on Hand on that date.

It would seem that the old time practice of selling ahead for deferred delivery is not well suited to this kind of a market in view of advancing costs all along the line.

The Barometer sheet tells the story of stock conditions and other statistics compared with July 1918.

July and June 1919.—The statistics of the same 28 members for July and June 1919 compare as follows:

July-June Compared, Same 28 Members

	Stocks	Orders		Shp'm'ts	Prod'n	N. B. B.
Aug. 1.....	16,658 M	46,896 M	July	14,874 M	12,073 M	15,612 M
July 1.....	20,020 "	46,352 "	June	14,938 "	10,939 "	18,866 "
Decrease	3,362 "	.....		64 "	.....	3,254 "
Increase	.....	544 "		.....	1,134 "	.....
Per cent.....	16.8%	1.2%		4%	10.4%	17.2%

Current Net Values.—Current Net Values for July reflect the advances in values which occurred on June 19th and on July 17th, and as a large amount of new business was booked in July and August by many of the members at higher than the M. P. P. Basis of July 17th, the indications are that the Current Net Values for August are certain to show a material betterment over July.

Current Net Values realized by Group E Mills in July and June 1919 were as follows:

Current Net Values July-June, Group E Mills

13/16 x 2¼" Maple

1919	Clear	No. 1	Fact'y	The product
July	$71.94	$68.07	$56.11	$68.21
June.....	65.10	59.80	48.90	60.82
Increase.	6.84	8.27	7.21	7.39
Per Cent.....	10.5%	13.8%	14.7%	12.2%

[fol. 343] August Forecast.—The experience during the first 18 days of August of the Committee Members who attended the meeting yesterday indicates that August is likely to show increases over July of about 7% in Shipments, about 18% in Production and about 15% in New Business Booked, assuming that the other members of the Association have had similar trade conditions during the first 18 days in August, and also assuming that the last 13 days in August will work out proportionately with the first 18 days. The opinion was expressed, however, that this may not prove true with respect to Shipments and New Business Booked, because of a growing scarcity of cars at some shipping points and inability to take on new business because of unfilled orders now on hand.

Raw Material Higher.—Since the last meeting of the Committee there has been an advance in the market value of rough flooring lumber, according to reliable information given to the Committee in regard to several recent sales on the open market. If the advance in the rough lumber and the steady increases in Manufacturing and Marketing costs were fully met, an advance of $10.50 in the M. P. P. Basis would be required, but in view of all conditions, the Committee recommends horizontal advances of $6.00 on Clear, $6.00 on No. 1 and $5.00 on Factory 13/16" and thicker Maple, Beech and Birch

flooring, effective immediately with the understanding that old quotations now outstanding may be protected, if desired, up to August 30th inclusive.

M. P. P. Recommendations.—Many members of the Association are now getting and have been getting for sometime considerably more than the M. P. P. Basis adopted July 17th; in many instances the prices obtained being as much as $8.00 or $9.00 above that basis, so as a matter of fact, the proposed new M. P. P. Basis considered as a whole hardly affirms the general market condition which already exists.

Please advise the Secretary immediately upon receipt of this report whether or not you concur in the recommendation of the Committee, and if the recommendations are adopted, new Concession sheets will be printed and mailed you at once.

Other Recommendations.—The Committee wishes to make the following other recommendations:

3/8"—Advances of $5.00 on Clear and $5.00 on No. 1.

Differentials on Special Grades

13/16":

White Clear Maple $20.00 more than Clear Maple.
Red Clear Beech $25.00 more than Clear Beech.
Red Clear Birch $25.00 more than Clear Birch.

3/8":

White Clear Maple $15.00 more than Clear Maple.
Red Clear Beech $20.00 more than Clear Beech.
Red Clear Birch $20.00 more than Clear Birch.

13/16" Clear Birch.—It seems that Clear Birch flooring is now commanding a premium over Maple, as several members of the Committee stated that they are now getting $5.00 to $10.00 more for 13/16" Clear Birch than for Clear Maple. Those of you who are manufacturing Birch flooring will be especially interested in this information.

Respectfully submitted, M. E. Thomas, Chairman; B. P. Whedon, W. B. Earle, Chas. T. Kerry, Wm. E. Cox, E. J. Gillouly, J. D. Staple, of Market Conditions Committee.

[fol. 344] GOVERNMENT'S EXHIBIT No. 18-W

Pending the printing of the New Table of Values Based Upon Average Cost dated January 6, 1921, the Minimum Price Basis effective during the first quarter of 1921, is represented by the following Concessions, Additions and Differentials, using the Maple 13/16" D. & M. as the base:

Table of Values of November 19, 1920

13/16":

Maple Clear 1½" face.....Concession $27.00
Maple, all other items of 13/16".....Concession $25.00

Differentials as per Table of Differentials Below

Beech—$10.00 less than Maple.
Birch—Clear $5.00 more than Maple.
Birch—No. 1 and Factory same as Maple.

M. B. & B. Thick D. & M.:

1 1/16" All Grades—$5.00 more than Maple 13/16".
1 5/16" All Grades—$7.00 more than Maple 13/16".
1 11/16" All Grades—$8.00 more than Maple 13/16".

M. B. & B. Jointed:

13/16" All Grades—$ 3.00 more than Maple 13/16" D. & M.
1 1/16" All Grades— 8.00 more than Maple 13/16" D. & M.
1 5/16" All Grades— 10.00 more than Maple 13/16" D. & M.
1 11/16" All Grades— 11.00 more than Maple 13/16" D. & M.

The 2½" face, same as 2¼" face of same grade, thickness and wood.

The 3", 3½" and 4" faces, same as 3¼" face of same grade, thickness and wood.

Differentials on Special Grades 13/16"

White Clear Maple $20.00 more than Clear Maple.
Red Clear Beech $20.00 more than Clear Beech.
Red Clear Birch $20.00 more than Clear Birch.

Differentials on Extra Shorts 13/16"

Clear Maple, Beech or Birch 2" or 2¼" face under 22", $25.00 less than standard lengths of Clear, same wood and face.

Clear Maple, Beech or Birch 1½" face under 22", $35.00 less than standard lengths of Clear, same wood and face.

No. 1 Maple, Beech or Birch 2" or 2¼" face under 16", $20.00 less than standard lengths of No. 1, same wood and face.

No. 1 Maple, Beech or Birch 1½" face under 16", $30.00 less than standard lengths of No. 1, same wood and face.

⅜" Table of Values of November 19, 1920

Maple or Beech, Clear and No. 1 Concession $25.00.
Birch Clear $5.00 more than Maple or Beech.
Birch No. 1—Same as Maple or Beech.
White Clear Maple—Add $15.00 to Clear Maple.
Red Clear Beech—Add $15.00 to Clear Beech.
Red Clear Birch—Add $15.00 to Clear Birch.

Commissions

A Commission not exceeding $2.00 may be allowed to your own Registered Special Representative or a Commission not exceeding $1.50 may be allowed to Registered Wholesalers and Commission Men.

Your Registered Special Representative may allow the Wholesaler's Commission of $1.50 when selling Registered Wholesalers and Commission Men, but the Commission to be paid to your Registered Special Representative on his sales to Registered Wholesalers and Commission Men to whom he allows the $1.50 Wholesaler's Commission shall not exceed $1.00.

In no event shall the total Commissions allowed exceed $2.50.

Effective During First Quarter of 1921.
January 6, 1921.

Maple Flooring Manufacturers' Association, 1045 Stock Exchange Bldg., Chicago

October 28, 1921.

Market Conditions Committee Report, September Statistics

To members.

GENTLEMEN: At the request of the members in the Saginaw Valley and Reed City, a meeting of the Market Conditions Committee was called on the 25th to be held today, but on account of the short notice some of the members of the Committee had previous business engagements which prevented them from attending the meeting. As Mr. Thomas could not be present, Mr. Whedon was requested to act as Chairman of the meeting.

Conditions Improving.—The statistics for the month of September reveal a marked improvement in conditions on October 1st compared with a month ago. As you will note by the reports, the 13/16 x 2¼" face Clear Maple Flooring was 236% sold on October 1st compared with 161% sold on September 1st, and it is self-evident that with Unfilled Orders for 3,700 M and only 1,600 M on hand, the Clear grade is sold considerably ahead of the machine and it will take some time to produce enough to fill old orders and at the same time take care of the current demand for Clear during the remainder of the year.

The No. 1 was 112% sold on October 1st compared with 72% sold on September 1st and it is our opinion that in view of more liberal bookings this month of orders for No. 1, that it will show oversold to a much greater extent on November 1st than on October 1st.

Raw Material.—Several of the members present stated that they have canvassed the supply of rough flooring stock and that in their

opinion there is a shortage in the supply at the present time and that the shortage will be more pronounced before the first of the year. If their conclusions are correct and if the present improved demand for flooring continues, a shortage in the supply of Clear and No. 1 flooring is bound to result.

Why Sacrifice Factory?—There appears to be enough Factory flooring on hand to last for some time and it would seem to be sound business policy to manufacture as litle of it as possible and not to force it on the market at the very low prices now obtainable, which are far below the cost of its production. The investment and carrying charges on Factory are not heavy and the amount of capital converted by the sale of it at the ruinous prices it is bringing on the present market hardly warrants the sacrifice. Better days may come for Factory.

Extravagant Spread Between Clear & No. 1.—It was the unanimous opinion that the spread between Clear and No. 1 is out of all proportion to the difference in the intrinsic value of the two grades. This spread is now exactly $30.00, as shown by the "Record of Average Prices Realized—Group E Mills" during the month of September.

In the tabulation "Average Prices Realized F. O. B. Michigan and Wisconsin Mills" covering a period of six years, you will see that the spread between Clear and No. 1 has been as follows:

Sept.	Clear	No. 1	Spread	Per cent
1916	$43.46	$36.82	$6.64	15%
1917	51.19	46.14	5.05	10%
1918	57.12	53.71	3.41	6%
1919	84.94	79.85	5.09	6%
1920	164.98	156.09	8.89	5%
Avge.	80.34	74.52	5.82	7%
1921	86.94	56.94	30.00	35%

This is a serious situation and it was felt that an effort should be [fol. 346] made to reduce the present excessive spread to be more in harmony with past experience in the marketing of these two grades. The spread is now five times as much as the five year average.

October Forecast.—Flooring data for the first 26 days of October from the six members represented at the meeting plus the data received by mail from Nos. 3, 4, 5 and 30, indicate that October shipments are likely to be about 10% greater than September shipments, October production about 35% greater than September production, and New Business Booked about 50% more in October than in September.

As the New Business Booked in September by all the members of the Association was 10½ millions, it looks as if the volume of October New Business may reach 15 or 16 millions if the experience of the other members of the Association has been similar to that of the 10 members whose data we have. This looks like the road that leads to "normalcy."

Weekly Sales Reports.—The importance of making the Weekly

Sales Reports regularly and promptly was discussed and the great value of the information contained in the reports regarding the current state of the market was conceded, and three of the members of the Committee who are not making these reports promised to do so. All the other members of the Association who are not making these reports are earnestly urged to do so, in order that every member of the Association may keep in close touch with conditions instead of working in the dark.

Representative Values.—The general industrial situation has improved and in view of the increased demand for flooring and the oversold condition of 13/16 x 2¼" face Clear and No. 1 Maple Flooring, it was the consensus of opinion that present trade conditions and Manufacturing and Marketing Costs would be represented as follows:

Table of Values 5-21-21

13/16" Maple and Birch

Clear, All Faces	Full List
No. 1, All Faces	Full List
Fety., All Faces	Concession $10.00

With no changes in the present spreads respecting Beech Flooring, Thick Flooring and Jointed Flooring.

⅜" Table of Values 5-21-21

Clear	Full List
No. 1	Full List

More Cooperation.—We wish to make the following recommendations in order that there may be more cooperation in the work of the Association:

1. That Dr. Earle, as President of the Association, is requested to call a general meeting of the Association to be held as early in November as possible.

2. That all the members of the Association make their Weekly Sales Reports regularly and promptly.

3. That all the members send in during the first week in Novem- [fol. 347] ber their statistical reports for the month of October so that a conference can be held on November 16th or 17th.

4. That if the Secretary receives by November 7th all the October reports from all the members, that his reports be made out and mailed to the members on November 10th or 11th, so they will receive the October statistics in advance of the meeting and have an opportunity to analyze them and can come to the meeting fully informed respecting trade conditions as reflected by the statistical reports.

Respectfully submitted, B. P. Whedon, Acting Chairman; J. E. Dewey, Fred R. Welsh, T. M. Ralston, E. J. Gillouly, J. D. Staple, of Market Conditions Committee.

[fol. 348]

Survey of Costs

Manufacturing and Marketing Costs per 1 M Feet of Flooring Produced During January, February, and March, 1922

	Per 1 M ft. of flooring produced
Average of replies received, ——.	
1. Labor taking lumber off of dock, car, pile or wagon and placing in dry kiln, including expenses of night fireman	$1.16
2. Cost of manufacturing into flooring and putting flooring in warehouse, including twine, oil, belting and other factory supplies, and factory repairs and including manufacturing administrative expenses	8.34
3. Warehouse expense and loading into cars or on wagons	.90
4. Insurance and taxes. (Divide 1/4 of annual amount by quantity of flooring produced during January, February and March)	1.07
5. Interest at 6% on value of plant and on value of average stock carried of rough flooring lumber and of finished flooring. (Divide 1/4 of annual amount by quantity of flooring produced during January, February and March)	1.92
6. Selling expenses, including commissions and advertising, and office expenses including selling administrative expenses	3.75
7. Cash Discount	.80
8. Annual depreciation on flooring plant as is usually allowed by the United States Government. (Divide 1/4 of annual amount by quantity of flooring produced during January, February and March)	1.37
9. Total per M Feet	19.31
10. Less net profit from wood and other by-products of flooring lumber, per 1 M feet of flooring produced during January, February and March	1.32
11. Actual Manufacturing and Marketing Costs per 1 M feet of flooring produced during January, February and March	17.99

May 31, 1922.

[fol. 385] GOVERNMENT'S EXHIBIT No. 27-A

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

February 16, 1923.

To Members.

GENTLEMEN: Owing to the severe storm, only six members of the Association succeeded in getting to the meeting called for yesterday the 15th, namely: Messrs. Whedon, Dewey, Ralston, Davis, Flanner and Brand. As most of them are members of the Committee on Cost Surveys and were particularly interested in the meeting of that Committee, called for 9:30 A. M., it was decided to hold the Committee meeting and make a Survey of Costs and make a report of same by mail to the members for their information.

The results of this Survey of Costs, which was made in accordance with Article XIV of our Articles of Association entitled "Determining Average Cost," are summarized in the enclosed memorandum "Average Cost Based Upon Three Test Runs of 1921," bearing date of February 15, 1923.

We are having revised Cost Charts printed and will send you the following within a few days, as fast as received from the printer:

1. Average Cost Chart 13/16" Maple Flooring F. O. B. Flooring Mill.

2. Delivered Cost Charts 13/16" Maple Flooring Freight Rate Index D—A. D. F. Incl.

3. Differentials. Some revisions have been made and new sheets will be sent you on the 17th showing revisions.

4. Average Cost Chart 3/8" M. B. & B. Flooring F. O. B. Flooring Mill.

5. Delivered Cost Charts 3/8" Flooring, Freight Rate Index D—A. G. H. Incl.

The members of the Association who were present adjourned the meeting to Thursday, March 22nd, by which time transportation facilities will no doubt be better.

Yours very truly, George W. Keehn, Secretary.

Revised March 16, 1917.

[fol. 389] GOVERNMENT'S EXHIBIT No. 28-C

Maple Flooring Manufacturers Association, Chicago

May 23, 1918.

To members.

GENTLEMEN: As intimated in the last report of the Market Conditions Committee, the Test Run of December 1917, revised to May 20, 1918, conclusively supports the recommendation of the Committee and the action taken by the Association respecting the advance of $5.00 in flooring prices.

In revising this Test Run up to May 20, 1918, we have applied the present market values of the rough lumber used, the manufacturing and marketing costs as per the Survey for the first quarter of 1918, and the new selling basis of 5-20-18. It shows that a further horizontal advance of $7.58 would be required to meet all present cost conditions and to realize a profit of 10% on sales.

Thinking the question may arise that possibly the grades of lumber used in this Test Run may not fairly reflect average conditions because of the unusually large percentage of No. 3 Common contained, we have applied the same calculations to the Test Run of July 1917, and to the Composite Seven Test Runs embraced in our report to you of January 26, 1917, but the net result is not improved.

It may be of interest to record for future reference that these Test Runs were made by the following members of the Association.

Test Run of December, 1917

T. Wilce Company, Chicago, Illinois, Manufactured at North Branch Flooring Co.'s plant, Chicago, Ill.

Test Run of July 1917

West Michigan Flooring Co., Manistee, Mich.

The Seven Test Runs, Analysis of, January 1917

Thomas Forman Co., Detroit, Mich.	2 Runs
Foster-Latimer Lbr. Co., Mellen. Wis.	2 Runs
West Michigan Flg. Co., Manistee, Mich.	1 Run
J. W. Wells Lumber Co., Menominee, Mich.	1 Run
North Branch Flg. Co., Chicago, Ill.	1 Run
	7 Runs

Even tho opinions may vary in minor details like the exact current market value of the raw material and the present manufacturing and marketing costs compared with the first quarter of 1918, it is self evident that the new selling basis is still too low to meet all present cost conditions connected with the production of flooring.

Yours very truly, George W. Keehn, Secretary.

	3¼"	9.7	44.00	4.27	
		31.7			13.40
		100.%			50.00
Horizontal advance of $7.58 would be required to meet Cost Conditions and to realize Profit of 10% on Sales				7.8	7.58

To realize a profit of "Cost Plus" 10% (the method frequently used by the Government in making its purchase contracts) instead of a 10% Profit on Sales the profit would be $5.18 instead of $5.76, a difference of 58 cents. Consequently this typical flooring product should sell for $57.00 instead of $50.00.

Revised May 20, 1918.

[fol. 391] GOVERNMENT'S Ex. No. 28-E

	⅜" x 2"	.9	34.00	.31		
		42.2				24.42

Factory 13/16" x 1½"		.2%	37.00	.07	
	2"	.6	46.00	.28	
	2¼"	8.3	48.00	3.98	
	3¼"	.5	50.00	.25	
Jointed	3½"	.1	52.00	.05	
		9.7			4.63
		100. %			58.98
Additional advance required to realize a profit of 10% on selling prices					3.62
					62.60

To Realize a Profit of "Cost Plus" 10% (the method frequently used by the Government during the war in making its purchase contracts) instead of a 10% Profit on Sales, the profit would be $5.63 instead of $6.26, a difference of 63 cents; in that case the flooring manufactured in these Seven Test Runs, which have been consolidated and considered one run, should sell for $61.97 instead of $58.98, or $2.99 more than selling basis of May 13, 1919.

Revised May 15, 1919.

This is the statement referred to in our letter of May 14, 1919.

Survey of Costs

To Members.

GENTLEMEN: We enclose blank forms for Survey of Manufacturing and Marketing Costs during the first quarter of 1921, and we hope that as many members as can possibly do so will give us this data promptly, so we shall know how the average costs during the first quarter of 1921 compare with the previous survey.

Reports for the last Survey of Costs were made by ten members and the average was $25.13 instead of an average of $22.00, as was hoped might be the case when the Table of Values Based Upon Average Cost was compiled as at January 6, 1921.

If possible, please send us this report very promptly so we can compile the data and have the averages ready for the Market Conditions Committee when it meets this month.

Yours very truly, George W. Keehn, Secretary.

[fol. 397] GOVERNMENT'S EXHIBIT No. 28-K

May 28, 1921.

To Members.

GENTLEMEN: We have the following letter from East Jordan Lumber Company dated the 26th:

"We have your favor of the 21st and are exceedingly sorry that the minimum price plan did not go through, as we feel this is the only plan which has ever worked out satisfactorily, and that it would be especially valuable to us at this time.

The writer was away until Tuesday of this week and neglected to report that we had made no sales of flooring last week. We will try to see that all of our sales are reported promptly on Saturday of each week hereafter.

Very truly yours, East Jordan Lumber Company. (Signed) John J. Porter."

JJP:EC.

Very truly yours, George W. Keehn, Secretary.

[fol. 398] GOVERNMENT EXHIBIT No. 28-L

June 3, 1921.

GENTLEMEN: We sent you by mail yesterday new fillers for your Rate Books as follows:

1. Table of Values for 13/16" Flooring dated May 21, 1921.
2. Table of Values for 3/8" " " " " "
3. Concession Sheet dated May 21, 1921.

We have revised and are having reprinted our list of Wholesalers and Commission Men and will send you copies in a few days as soon as received from the printer. In the meantime, it was sort of understood at the last meeting that the Red Book would serve as a guide in classifying Wholesalers and Commission Men until such time as our own printed list is made more complete by such additions to our list as may be made from time to time. It would seem to me that any lumber dealer who is classified in the Book as a Wholesaler or Commission Man should automatically go on our list to avoid any unjust discrimination. The names of other dealers who are not classified in the Red Book as Wholesalers and Commission Men should be passed upon by the Committee the same as heretofore before we list them. This commission question has always been a complicated one and always will be.

Very truly yours, George W. Keehn, Secretary.

[fol. 402] GOVERNMENT'S EXHIBIT No. 28-O

December 1, 1921.

GENTLEMEN: We are mailing you today the new 13/16" Table of Values and Concessions Sheet, dated November 17th. Your envelope contains — copies of each, according to our record of the number of Rate Books in your hands. If this quantity is insufficient, or is more than you require, or is more than the number of Rate Book Index of Towns you are now using or will require, please fill in the form below and mail to us and we will revise our mailing lists accordingly.

We expect to receive from the printer in a few days a supply of Table of Values Charts, of heavy ledger, amber colored stock, size about 15 x 26", on which will be printed the first ten pages of our 13/16" Table of Values and the first two pages of our 3/8" Table of Values. These will afford a handy reference for desk use, and in the 13/16" Tables extra space has been allowed between frames to permit of writing the names of several towns opposite each frame. We expect to send in mailing tubes three copies to each member.

Yours very truly, George W. Keehn, Secretary.

ECS-L.

We require:

— sheets Concessions & Differentials.
— sets 13/16" Table of Values.
— " 3/8" " " "
— " Rate Book Index of Towns.

No. —.

[Omitted in printing]

[fol. 404] GOVERNMENT'S EXHIBIT No. 28-Q

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

June 24, 1922.

To members.

GENTLEMEN: 1. For the information of the members of the Association the Committee on Cost Surveys has made a careful analysis and survey of the Average Cost of Manufacturing and Marketing Maple, Beech and Birch Flooring.

2. The Survey was made in accordance with Article XIV, "Determining Average Cost," of the Articles of Association and the re-

sults of the Survey are given in the enclosed schedules, which, for brevity, are called "Average Cost Chart" and Differentials."

3. For the further information of the members, so-called "Delivered Cost Charts" have been compiled. These Charts include the Average Cost of Freight to destination of shipment; in other words, the Average Cost of Freight is added to the Average Cost of the flooring F. O. B. cars at flooring mills to illustrate what the Delivered Cost would be at destination.

4. Copies of the foregoing under date of May 31, 1922 are enclosed herewith.

5. We are also enclosing statement "Survey of Costs" for first quarter of 1922 and an analysis of the "Three Test Runs of 1921" which are also dated as of May 31, 1922.

6. Under the new Articles of Association the new Rate Book will be made up as follows, and will contain only the following matter when completed:

(a) Title Page. As per enclosed copy.

(b) Key to Freight Rates and Index Letters. As per enclosed copy.

(c) Average Freight Rates and Index of Towns. Being the equivalent approximately of the freight rates from Cadillac, Michigan.

Remarks: The freight rates are all being revised to give effect to the reduction ordered by the Interstate Commerce Commission to take effect July 1st.

(d) Average Cost Chart. Showing approximate relative Average Cost of the different grades and faces of 13/16" Maple Flooring F. O. B. cars at flooring mills.

(e) Differentials from Average Cost of 13/16" Maple Flooring.

(f) Delivered Cost Charts 13/16" Maple Flooring.

(g) Average Cost Chart 3/8" Maple, Beech and Birch Flooring.

(h) Delivered Cost Chart 3/8" Maple, Beech and Birch Flooring.

Very truly yours, George W. Keehn, Secretary.

The above only are standard stock widths in matched.

Jointed 2½, 3½ and wider only are standard widths.

Flooring 1⅛, 1⅜ and 1¼ inches thick, $1.00 more in No. 1 and Factory than ⅞ inch; clear 1⅛ inch $1.00 more than ⅞ inch; clear 1⅜ inch $3.00 more than ⅞ inch, and clear 1¼ inch $4.00 more than ⅞ inch.

When Flooring is selected to lengths six feet and longer add $3.00 per M; Eight feet and longer add $5.00 per M.

Flooring of any width or thickness is measured ¼ inch waste for matching; or ½ inch waste for jointing.

RULES FOR GRADING MAPLE FLOORING

CLEAR—Shall have one face free of all defects, but the question of color shall not be considered. Standard lengths in this grade shall be trimmed from 4 to 16 feet inclusive.

NO. 1—Will admit of tight, sound knots and slight imperfections in dressing, but must lay without waste. Standard lengths in this grade shall be trimmed from 2 to 16 feet, inclusive.

FACTORY FLOORING—Must be of such character as will lay and give a good, serviceable floor, with some cutting. Lengths, 2 to 16 feet.

On and after June 1, 1905, the rules for grading Clear Maple Flooring shall be as follows:

CLEAR—Shall have one face free of all defects, but the question of color shall not be considered. Standard lengths in all widths in this grade shall be 2 to 16 feet inclusive, the proportion of lengths 2 to 3½ feet shall be what the stock will produce up to 5% to 10%.

FREIGHT SCHEDULE FOR NORTHERN MINNESOTA AND NORTH DAKOTA POINTS

For Flooring tongued and grooved ⅞ inch and thicker, dropping fractions of cent in rate.

The 1½ inch, 2 inch, 2¼ inch and 3¼ inch faces only are standard stock widths in matched. Jointed 2½ inch, 3½ inch and wider only are standard widths.
For Thick Flooring add to price of same face in 13/16 inch, as follows: 1 1/16 inch Clear, $1.00; No. 1, $2.00; Factory, $1.00. 1 3/16 inch All Grades, $2.00.
For White Clear 5/16 inch add $15.00 to price of same face in Clear 1/2 inch.
Flooring of any width 5/16 inch and thicker is measured ¼ inch waste for matching, or ½ inch waste for jointing.
Terms: 60 days from date of invoice or 2 per cent discount for cash in 15 days from date of shipment on net bill after deducting freight.

31 M

APPLICATION OF MINIMUM PRICES.

The Delivered Prices in the Table of Values of May 15, 1916, in the Association Rate Book and Index of Towns, are the basis of the Minimum Prices—not F. O. B. mill prices.

Minimum Prices of $1\frac{1}{16}$", $1\frac{1}{16}$" and $1\frac{1}{16}$" Maple, Beech and Birch Flooring are based on the Rate Book Full List Delivered Prices of $\frac{13}{16}$" D. & M. Maple.

Minimum Prices of $\frac{13}{16}$" Jointed Flooring are based on the Rate Book Full List Delivered Prices of $\frac{13}{16}$" D. & M. Maple.

Prices of $2\frac{1}{2}$" face D. & M. or Jointed are based on $2\frac{1}{4}$" face D. & M.

Prices of 3" or wider faces D. & M. or Jointed are based on $3\frac{1}{4}$" face D. & M.

A Minimum Price is the bottom price, not an average price.

Don't stay at the bottom.

When your stock conditions and sales opportunities will not warrant your holding for top prices, insist at least on getting a substantial advance over the Minimum Price.

533

CONCESSIONS.

Concessions from Delivered Prices in Table of Values of May 15, 1916:
All concessions named include any and all commissions which may be incurred in marketing the flooring.

Concessions on $\frac{13}{16}$" x $2\frac{1}{4}$" Face D. & M.:

	Maple	Beech	Birch
Clear	$1.50	$4.50	$2.50
No. 1	1.00	4.00	2.00
Factory	2.00	5.00	2.00

Concessions on $\frac{13}{16}$" x $1\frac{1}{2}$", 2" and $3\frac{1}{4}$" Faces D. & M.:

	Maple	Beech	Birch
Clear	$3.00	$6.00	$4.00
No. 1	2.50	5.50	3.50
Factory	4.00	7.00	4.00

Basis on $1\frac{1}{16}$", $1\frac{5}{16}$" and $1\frac{13}{16}$", from Rate Book Full List Prices of $\frac{13}{16}$" Maple D. & M.:

Maple, Beech, Birch	$1\frac{1}{16}$" Concessions	$1\frac{5}{16}$" Add to List	$1\frac{13}{16}$" Add to List
Clear	$ .50	$ .50	$1.50
No. 1	Full List	1.00	2.00
Factory	1.00	Full List	1.00

Basis on $2\frac{1}{4}$" face D. & M. same as on $2\frac{1}{4}$" face D. & M. of same grade, thickness and wood.
Basis on 3" face and 4" face D. & M. same as on $3\frac{1}{4}$" face D. & M. of same grade, thickness and wood.

Concessions on $\frac{13}{16}$" Jointed Flooring from Rate Book Full List Prices of $\frac{13}{16}$" Maple D. & M.:

	Maple	Beech	Birch
Clear	$1.50	$4.50	$2.50
No. 1	1.00	4.00	2.00
Factory	2.50	5.50	2.50

Terms of sale: 60 days net from date of invoice, and not more than 2% discount for cash shall be allowed after deducting freight.

536

Effective Nov. 1, 1916, and until further notice.

CONCESSIONS AND ADDITIONS.

Table of Values January 6, 1921.

Basis on $\frac{13}{16}$" x 1½", 2", 2½" and 3¼" Faces D. & M.:

$\frac{13}{16}$"	Maple Concession	Beech Concession	Birch Concession
Clear	$5.00	$15.00	Full List
No. 1	5.00	15.00	$5.00
Factory	5.00	15.00	5.00

Basis on Maple, Beech and Birch, $1\frac{1}{16}$", $1\frac{5}{16}$" and $1\frac{13}{16}$", from Rate Book Full List Values of $\frac{13}{16}$" Maple D. & M.:

Maple, Beech and Birch Thick	$1\frac{1}{16}$" Full List	$1\frac{5}{16}$" Addition	$1\frac{13}{16}$" Addition
Clear	Full List	$2.00	$3.00
No. 1	Full List	2.00	3.00
Factory	Full List	2.00	3.00

Basis on 2½" face, same as on 2¼" face of same grade, thickness and wood.

Basis on 3", 3½" and 4" faces, same as on 3¼" face of same grade, thickness and wood.

Basis on Maple, Beech and Birch Jointed Flooring from Rate Book Full List Values of $\frac{13}{16}$" Maple D. & M.:

Maple, Beech and Birch Jointed	$\frac{13}{16}$" Concession	$1\frac{1}{16}$" Addition	$1\frac{5}{16}$" Addition	$1\frac{13}{16}$" Addition
Clear	$2.00	$3.00	$5.00	$6.00
No. 1	2.00	3.00	5.00	6.00
Factory	2.00	3.00	5.00	6.00

Established for First Quarter, 1921.

COMMISSIONS.

A Commission not exceeding $2.00 may be allowed to your own Registered Special Representative, or a Commission not exceeding $1.50 may be allowed to Registered Wholesalers and Commission Men.

Your Registered Special Representative may allow the Wholesaler's Commission of $1.50 when selling Registered Wholesalers and Commission Men, but the Commission to be paid to your Registered Special Representative on his sales to Registered Wholesalers and Commission Men to whom he allows the $1.50 Wholesaler's Commission shall not exceed $1.00. In no event shall the total Commissions allowed exceed $2.50.

TERMS OF SALE.

Sixty days net or 2% discount for cash in 15 days, or 1% discount for cash in 30 days from date of invoice after deducting freight. War tax to be paid by consignee.

If the car has not arrived, the discount may be deducted on 90% of the invoice less estimated freight, for cash within proper discount period, the balance with original paid freight bill to be remitted net within 5 days after arrival of car. No cash discount will be allowed after 30 days from date of shipment.

Established for First Quarter, 1921.

DIFFERENTIALS ON SPECIAL GRADES.

White Clear Maple, $\frac{13}{16}$", $20.00 more than Clear Maple, $\frac{13}{16}$", same face.

Red Clear Beech, $\frac{13}{16}$", $20.00 more than Clear Beech, $\frac{13}{16}$", same face.

Red Clear Birch, $\frac{13}{16}$", $20.00 more than Clear Birch $\frac{13}{16}$", same face.

* * * * * *

White Clear Maple, $\frac{1}{2}$", $15.00 more than Clear Maple, $\frac{1}{2}$", same face.

Red Clear Beech, $\frac{1}{2}$", $15.00 more than Clear Beech, $\frac{1}{2}$", same face.

Red Clear Birch, $\frac{1}{2}$", $15.00 more than Clear Birch, $\frac{1}{2}$", same face.

* * * * * *

EXTRA SHORTS.

Clear Maple, Beech or Birch, $\frac{13}{16}$"x2" or 2$\frac{1}{4}$" Face, under 22", $25.00 less than standard lengths of Clear same wood and face.

Clear Maple, Beech or Birch, $\frac{13}{16}$"x1$\frac{1}{2}$" Face, under 22" $35.00 less than standard lengths of Clear same wood and face.

No. 1 Maple, Beech or Birch, $\frac{13}{16}$"x2" or 2$\frac{1}{4}$" Face, under 16", $20.00 less than standard lengths of No. 1, same wood and face.

No. 1 Maple, Beech or Birch, $\frac{13}{16}$"x1$\frac{1}{2}$" Face, under 16", $30.00 less than standard lengths of No. 1, same wood and face.

[fol. 906] GOVERNMENT'S EXHIBIT No. 36

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago.

May 18, 1922.

To Members.

GENTLEMEN: Thinking it would be interesting to know how the rate of freight from Cadillac, Michigan, compares with the average rate of freight from all the flooring mills in Michigan and Wisconsin, we selected forty of the principal markets for flooring located in all sections of the United States and had Elkinton Service Corporation of Chicago give us the rate of freight from each of the flooring plants to the forty cities.

We find, however, that there are some inaccuracies in the compilation furnished us by Elkinton Service Corporation, so we are enclosing to each member a copy of the table of the freight rates with the request that he check the freight rates from his own mill to all of the forty destinations and return same to us as soon as possible. Will you please do this and after we receive it from you, we will have it rechecked in Chicago and will then make out a new schedule containing all corrections, so that the schedule will be accurate and we will then send each member a corrected copy for future reference.

According to the enclosed schedule, the average rate of freight from Cadillac to the forty points is 50c and this is also the average from the seventeen shipping points in Michigan and Wisconsin to the forty destinations. These averages may change, however, to the extent of a small fraction after inaccuracies are corrected.

Yours very truly, George W. Keehn, Secretary.

[fols. 907 & 908] GOVERNMENT'S EXHIBIT No. 36-A

[Omitted in printing]

(Here follows Government's Exhibit No. 37, marked side folio pages 909-929, inclusive)

[fol. 930] GOVERNMENT'S EXHIBIT No. 38

June 20th, 1913.

To Members.

GENTLEMEN: The Market Conditions Committee will meet next Wednesday the 25th, and make a complete report on the flooring situation. In the meantime, I thought I would send you the statistics for May so you would get the information they contain, about a week earlier.

You will notice that our statistics continue very strong, and that our stocks and unfilled orders on June 1st show an improvement

over May 1st, as the combined stocks of Maple, Beech and Birch Flooring show a reduction of 502 M and the unfilled orders show an increase of 492 M, which may be considered an improvement during the month of one million feet in stock conditions, and that there is a good improvement in the condition of the Factory grade. The net current values for May also show gains over April, so from the standpoint of statistics, any weak feeling that may exist in respect to getting the values recommended at the last general meeting, is a mental rather than an actual condition.

Inasmuch as our June 1st statistics show these improvements over May 1st, it would seem that the values recommended in May are more than justified, unless, of course, our members have concluded that they, as manufacturers, are not entitled to the 10% profit on sales and that they are robbing the consumer in trying to get this margin, and that they should make restitution by lowering their prices.

Yours very truly, George W. Keehn, Secretary.

January Statistics

To Members.

GENTLEMEN: The February meeting of the Market Conditions Committee could not be arranged for this week, as three or four of the Committee could not attend, so it was decided to postpone the meeting until early in March.

The January reports were received from all the members in time to issue our monthly reports today, which is the earliest date on record, and this promptness in reporting, if it is continued, will be of great advantage in the work of the Association, as the earlier the information, contained in our monthly reports, is received by the members, the greater its value to them. This is especially true at this time, because our statistics show that good, fair, healthy conditions exist and that there has been the improvement in the business outlook since the first of the year which was remarked upon at the Annual Meeting, and if thought is given to our statistical position, no good reason for demoralization in values is apparent.

Our January 1914 shipments, 11,219 M, compare favorably with

From Average Cost Charts of Maple 13/16" D. & M. February 15, 1923.

Average Cost of Beech 13/16" D. & M. all Faces:

Clear—$10.00 less than Maple.
No. 1—$5.00 less than Maple.
Factory—Same as Maple.

Average Cost of Birch 13/16" D. & M. all Faces:

KEY:

Freight Rates.....	1	2	3	4	5	6	7	8	9	0
Index Letters.....	A	B	C	D	E	F	G	H	I	J

12,494 M in January 1913 and 9,632 M in January 1912, and they show a slight gain of 63 M over December 1913, while January 1913 showed a loss of 843 M from December 1912, and January 1912 was over two millions less than December 1911, and while our January 1914 shipments are 1,275 M less than January, a year ago, they are 1,587 M greater than in January 1912 The volume of shipments, therefore, is an encouraging feature.

Stocks on Hand increased 1,789 M in January 1914 against an increase of 2,404 M in January 1913 and are now nearly two million feet more than on February 1st, a year ago, and while Production was 1,527 M less than in January 1913, the decreases, from a year ago, of 2,563 M in Unfilled Orders, 1,275 M in Shipments, and 2,155 M in New Business Booked, should receive attention, because while these decreases are no greater, perhaps, than were to be expected, they point to the need of giving timely thought to the dangers of over-production between now and next Spring.

Of the Maple, Beech and Birch Flooring on Hand on February 1st, 1912-13-14, 44%, 79%, and 69%, respectively, were sold, and when we recall that a year ago our stock conditions, 79% sold, were considered as warranting a recommended advance of at least $3.00, it would seem that the slight difference in our present stock conditions should not cause weakness in values at a naturally dull season of the year, when some accumulation in stock is to be expected.

The following tables show in detail the movement of stocks during each January of the three years under review. You will notice that this January resulted in a greater betterment in points in every item than occurred in January 1912 and 1913.

* * * * * * *

[fol. 936] Current Net Values for January, based on the reports of Michigan and Wisconsin members, compare with December as follows: Clear 15 cents less, No. 1 43 cents more, and Factory 9 cents more, which is an excellent showing, considering the large amount of New Business Booked.

It has been hoped that the few members who do not make the Current Net Values report, would conclude to do so in order that every member maye have the benefit of knowing what every other member is getting for his Flooring, as there is no question but that some of the members, who do not make this report, are led to believe that other members are selling for less than they are actually getting, and the same condition applies to the members who do report, respecting the prices the members who do not report are said to be selling at. This, as you will readily see, can cause much demoralization in values, because if a buyer tells you that so-and-so is selling [fol. 937] his Flooring at such a price, you are not in a position to refute his statement because you are not fortified with the information from the member himself of what he is getting for his Flooring. Whether or not all the members report, it would seem that the interests of the Association can be best served by sending to every member the individual reports of Current Net Values, so I trust the

members, who are making these reports, will waive the reciprocal conditions under which their reports are made, and permit the information to be sent hereafter to the entire membership, with the other regular monthly reports.

Referring to our recommended basis of 10% profit on sales, the annual statement, just published, of Sears-Roebuck & Co., who are supposed to do business on very small margins, shows their sales during the year 1913 amounted to $91,357,276, with profits of $10,331,979, or 11.3%, from which was deducted for repairs and depreciation, $1,304,310, leaving the net profit for the year $9,027,669, or 9.90%. A manufacturing business, like Maple Flooring, would seem to be more deserving of a 10% profit on sales than a merchandising business, because it is more hazardous and subject to a double risk of fluctuations in the market value of both the raw material and the finished goods, to say nothing of the larger depreciation on plant machinery, etc.

Speaking of the raw material, perhaps another good reason for respecting the logical basis of a 10% profit on sales is that large lots of rough Maple lumber are reported to have been sold recently at about last year's prices, and if this is true, it looks probable that concessions made in Flooring values will have to come out of the pockets of the Flooring manufacturers.

Respectfully submitted, George W. Keehn, Secretary.

April Statistics

To members.

GENTLEMEN: There is nothing in our flooring statistics, as shown by our April reports, for the feeling of pessimism which appears to be fashionable just now to feed upon. Maple Flooring conditions, from the standpoint of statistics, are healthy, and compared with conditions in other lines of business are more than healthy. In the Market Conditions Committee Report of April 23rd it was stated that flooring conditions were then better than was generally thought, and it was the belief of the Committee that this view would be substantiated by our May 1st statistics, and such has proven to be the fact.

* * * * * * *

[fol. 939] You will notice the increases in unfilled orders from January 1st to May 1st in each year amount to 11,379 M in 1914, 9,906 M in 1913 and 7,142 M in 1912, a very gratifying showing indeed for 1914.

You will also see that there has been a greater improvement in stock conditions, particularly in 2¼" face Maple from January 1st to May 1st in 1914 than during the two previous years, and that

2¼" face Factory has gone from 39% sold on January 1st to 98% sold on May 1st this year, an increase of 59 points as against a loss of 8 points during the same time in 1913, and this percentage of Factory sold (98%) is the best showing we have ever had.

As the 2¼" face Maple constitutes 43% of the stocks on hand and 71% of the unfilled orders, and as its present statistical position is so strong, it would seem that the manufacturers should have a higher opinion of its value, and should ask prices consistent with the relations of its supply and demand.

* * * * * * *

[fol. 940] The plan of Exchanging Quotations which was recommended by the Market Conditions Committee in its report of April 23rd, and adopted at the general meeting on May 6th, is working in a very satisfactory way, and is bound to be of practical benefit, as it shows that the differences in quotations are not as great as the manufacturers have been led by foxy buyers to believe. As an example in point, seven carbon copies of quotations were received Friday on 70 M feet of 2¼" face No. 1 Maple Flooring, delivered at an AG point, which, according to our table of logical values of May 21st, 1913, is figured at $43.50, subject to commissions. Four of the quotations were not subject to commissions, two of them were subject to $1.00 commissions, and one to $1.50 commissions. In order to equalize the quotations for comparion with the logical value of $43.50, we figured the commissions in each case at $1.50, and find the following range: one $44.50, two $42.00, three $41.50, and one $41.00, an average of $42.00. The maximum concession, therefore, was $2.50, and the average concession $1.50 from the table of logical values of May 21st, 1913. I feel so confident that the members who participate in this plan will get very tangible benefits from that I cannot see how any member can afford to deprive himself the reliable information to be obtained regarding current market dues by the method of exchanging quotations.

Yours very truly, George W. Keehn, Secretary.

[fol. 941] GOVERNMENT'S EXHIBIT No. 38-E

Tenth Annual Report for Calendar Year 1914

January 29th, 1915

To the President and Members of the Maple Flooring Manufacturers' Association.

GENTLEMEN: The year 1914 will long be remembered by the lumber industry as one of the most unsatisfactory in its experience, but the manufacturers of Maple Flooring have many things to be thankful for that have been denied to others. Many lines of business show shrinkages of 25% to 50% in volume while our shipments are only 11% less than in 1913, and our bookings of new orders

during 1914 were only 7% less than in 1913. Neither have values for flooring suffered to the same extent as have values of other lumber products, taking the average for the year as a whole.

Association Meetings

During the last year the Association held five meetings—
The Annual Meeting in January.
A regular meeting in May.
The Semi-Annual Meeting at Mackinac Island in July.
And regular meetings in September and November.

Work of Committees

Reports of the work of the standing committees will be made by the chairman of the respective committees, Mr. Thomas for the Market Conditions Committee, Mr. Whedon for the Advertising Committee, and Mr. Kerry for the Grades Committee.

Reinspections

During 1914 eight reinspections were made with the results in each case as noted:

February.—Shipment of 2¼" face No. 1 to Ohio. The complaint made of unsatisfactory manufacture, was found to be according to the facts.

March.—Shipment of 2¼" face No. 1 and Factory to Illinois. Stock found to be fully up to grade.

May.—Shipment to Ohio. Complaint on end matching and also too short a tongue for space opening on back of the flooring. Inspector found end matching out of square on portion of the stock examined, but no cause for complaint regarding short tongue.

June.—Shipment of No. 1 to New York State. Complaint on grade and manufacture. Inspector found side matching not quite correct in portion of stock, but complaint not justified on this ground in No. 1 grade. In grading 2,000 feet Inspector found 47 feet Clear and only 85 feet Factory, making a difference of considerably less than the 2% in money value allowable.

July.—Shipment of No. 1 Maple Flooring to Indiana. Complaint made because stock contained small percent of Beech, which was found to be the fact. Of 2,864 feet used 500 feet had been laid out as Beech, but the Inspector found only 103 feet of it was Beech.

August.—Shipment of two cars No. 1 Maple Flooring to Illinois. Complaint that stock was not up to No. 1 grade and contained Birch. Inspector examined 2,418 feet, which contained 139 feet of Factory [fol. 942] and 135 feet Birch. The result of the inspection was adverse to the shipper, because aside from the question of Birch the quantity of Factory was a shade too large to come within the 2% in money value allowable.

September.—Shipment to Minnesota of No. 1 and Factory. The Inspector found the stock fully up to grade, as of 1,220 feet No. 1 examined only 35 feet was Factory, and of 300 feet Factory in-

spected only 13 feet was No. 2 Factory, and the shipment was accepted by the complainant who promptly paid the cost of the reinspection.

September.—Shipment to two points in the Northwest of No. 1 and Factory. Factory inspected and found strictly up to grade and reinspection of the No. 1 waived.

December.—Shipment of Factory to Indiana. Result of inspection depends upon the elasticity of the meaning of the words "Some cutting" in the grading rules for Factory.

In weighing the results of these reinspections it would seem that careful attention should be given to mill work and that Beech and Birch should not be shipped as Maple on a falling market.

Membership

No change in our membership has taken place during the year, so it stands at 29 the same as a year ago.

Statistics for Year 1914

You have already received the annual statistics, and while they will be reviewed in detail in the report of the Market Conditions Committee, I would like to submit a contrast of stock conditions and current net values during the past three years. It proves beyond a doubt that co-operation can be made helpful in bad times as well as in good times.

Maple Flooring 13/16" x 2¼" Face

	Clear			No. 1			Factory		
Contrast	1912	1913	1914	1912	1913	1914	1912	1913	1914
Avg. % of Stock Sold	207%	140%	123%	144%	151%	108%	57%	73%	70%
And avg. net Price Mich. and Wis.....	37.69	42.49	41.38	31.80	36.76	36.45	17.74	22.01	21.39

Proportionate to stock conditions, values were far better in 1914 than in 1912, and considering the more favorable stock conditions in 1913, the 1914 values compare quite favorably. They are less than you could have had for the asking, because they show a greater shrinkage than was justified by the small shrinkage of only 7% in our total sales. With 93% of last year's business, values should have held to the same levels.

Current Net Values

An analysis of the statement, Trend of Current Net Values, will show the following gains and losses in the average for 1914 compared with 1912 and 1913:

The 2¼" Clear shows a gain of $3.69, 9.8%, over 1912 and a loss of $1.11, 2.6% from 1913.

[fol. 943] The 2¼" No. 1 shows a gain of $4.65, 14.6%, over 1912 and a loss of 31 cents, .8 of 1% from 1913.

The 2¼" Factory shows a gain of $3.65, 20.6%, over 1912 and a loss of 62 cents, 2.8%, from 1913.

Assuming the percentage produced by each grade during the year would apply to the 2¼" face, and applying these percentages to the average values obtained during that year, the following table would show the net returns of Group E mills for their 2¼" face product.

1912

Clear	50%	@ $37.69	$18.85
No. 1	34%	" 31.80	10.81
Factory	16%	" 17.74	2.84
	100%		$32.50

1913

Clear	50%	@ $42.49	$21.25
No. 1	35%	" 36.76	12.87
Factory	15%	" 22.01	3.30
	100%		$37.42

1914

Clear	51%	@ $41.38	$21.10
No. 1	35%	" 36.45	12.76
Factory	14%	" 21.39	3.00
	100%		$36.86

Gain over 1912 ..... (1913) $4.92; (1914) $4.36
Loss in 1914 from 1913 ..... .56

Adverse Trade Conditions

When we consider that lumber had borne its full share of the great depression in business that existed during practically the entire year, and which has amounted to almost stagnation since the outbreak of the European War, we should be thankful that values have held to so high an average, and in view of the staggering accumulation of surplus stocks on top of adverse trade conditions, it is surprising that prices have not gone completely to smash.

Too Much Output

The statement of surplus stocks shows that the total of our surplus items averaged in 1914 double what they averaged in 1913, and that they have increased 20 million feet during the last five months. They now aggregate 28,649 M, 71% of the stocks on Hand. This is

the worst showing in the history of the Association, worse even than on March 1st, 1912, when our stocks reached their highest point, and were about 6 millions more than now, but at that time 49% of the stock was sold, whereas only 29% of our present stock is sold.

It is never of much use to talk about the water that has passed over the dam, but if you will refer to the monthly reports of your Market Conditions Committee you will find many references to the danger of over-production, and the members were urged repeatedly to give careful thought to their individual production. Had this been done values would have held automatically to the high points in January, and we would not now have nearly one million dollars tied up in unsold stocks.

Cautionary references to over-production appear in seven of the Committee's reports, starting with February 13th and becoming more emphatic in the succeeding reports of May 18th, June 25th, September 24th, October 30th, November 20th and December 18th, so it would seem that the Committee displayed storm signals early enough and often enough in the year against over-production.

Our deplorable stock conditions unerringly point a warning finger that must not be denied, to the path of Decreased Production to meet Decreased Demand, if anything but junk is to be the portion of the Maple Flooring industry as the net result of its transactions during the year of grace 1915.

Respectfully submitted, George W. Keehn, Secretary.

January Statistics

To members.

GENTLEMEN: The oversold condition of Maple flooring as shown by our reports for the month of January is assuming startling proportions and it looks like A Long, Long Trail before Supply gets within hailing distance of Demand. This is especially true of the 13/16" x

2¼" face, the Unfilled Orders for which, compared with the Stocks on Hand, are staggering.

	Clear	No. 1	Factory	All 3 grades
Unfilled Orders ..	16,364 M	12,061 M	5,526 M	33,951 M
Stocks	713 "	755 "	862 "	2,330 "
Oversold ...	15,651 "	11,306 "	4,664 "	31,621 "

Statistics of the same 27 members (No. 6 out) for January compare with December as follows:

	Stocks	Orders		Shpmts.	Prodn.	N. B. B.
Feby. 1..	9,741 M	57,665 M	Jan.	12,054 M	13,345 M	13,933 M
Jany. 1..	8,381 "	54,080 "	Dec.	13,365 "	12,974 "	15,809 "
Incr. .	1,360 "	3,585 "		.....	371 "	.....
Decr....	....	.....		1,311 "	...	1,876 "
%	16.2%	6.6%		8.8%	2.9%	11.9%

Data received from 16 members regarding their Shipments, Production and New Business Booked during the first en days of February indicate that the February Shipments are likely to be about 10% less than January, February Production about even with January, and February New Business Booked about one-third less than January. The decrease in New Business Booked is not due to lack of demand, however, but to the inability of the mills to take on much new business on account ow having so many old orders yet to fill.

The Record of Average Prices realized FOB mills on new orders taken in January compared with December, shows that flooring values have been compelled to respond to the heavy increase in the cost of raw material. It is evident that dry flooring stock is exceedingly scarce on the market and consequently it has scored large advances in prices during the past 60 days.

We are working on the new "Table of Values Based Upon Cost" as instructed at the annual meeting on the 12th, and if you can give us any information regarding recent actual sales of rough flooring lumber on the open market, it will be of great assistance. It is important that we have this information so that the new "Table of Values Based Upon Cost," will reflect existing conditions.

Yours very truly, George W. Keehn, Secretary.

[fol. 948] GOVERNMENT'S EXHIBIT No. 38-J

Maple Flooring Manufacturers' Association

Chicago, June 23, 1921.

Statistics for May, 1921

To members.

GENTLEMEN: The enclosed statistical reports for the month of May show that conditions have improved since April. As you will note by referring to the Barometer the percentages sold of Stocks on Hand on June 1st are "Up" all along the line, the largest increase being in the perecentage sold of 13/16 x 2¼" face Clear Maple, which stands at 120% sold on June 1st compared with 99% sold on May 1st. This is the first time since October 1, 1920, that any item of Maple Flooring has been oversold, so perhaps we should look upon that fact and the large volume of New Business Booked in May, which exceeds any one month's bookings since January, 1920, as hopeful signs of better times coming for the flooring industry.

In the following tables the results of the May business are given in detail, the statistics of Welsh & Kerry Company having been eliminated from the month of April because their membership terminated as at May 1st and consequently the statistics of the same 23 Members are compared for the two months:

1921	Stocks	Unfilled orders
June 1	33,305 M	9,872 M
May 1	33,400 "	8,281 "
Decrease	95 "	.....
Increase	....	1,591 "
Percent	0.3%	19.2%

1921	Shipments	Production	New business booked
May	8,189 M	8,374 M	10,488 M
April	6,952 "	7,551 "	8,925 "
Increase	1,237 "	823 "	1,563"
Percent	17.8%	10.9%	17.5%

Average Prices Realized by Group E Mills for 13/16 x 2¼" Maple Flooring during the month of May compare with the month of April as follows:

1921	Clear	No. 1	Factory	The product
May	$87.98	62.53	28.51	70.15
April	98.18	66.61	33.38	72.91
Decrease	1.20	4.08	4.87	2 76
Percent	1.3%	6.1%	14.6%	3.8%

Very truly yours, George W. Keehn, Secretary.

[fol. 949] GOVERNMENT'S EXHIBIT No. 38-K

September 30, 1921.

To members.

GENTLEMEN: We have the following letter from Mr. Dewey of the Bigelow-Cooper Company giving his observations regarding trade conditions in the east and thinking the information his letter contains will be of interest and service to you we are sending you a copy of it.

Very truly yours, George W. Keehn, Secretary.

Bay City, Mich., September 26, 1921.

Mr. George W. Keehn, Secy., Maple Flooring Mfrs. Assn., Chicago.

DEAR SIR: Replying to your favor of the 24th inst. The writer has just returned from a three weeks' trip from the Eastern states and thought that you might be interested to know something of the conditions in that territory.

I find that there is considerable improvement in the demand for Maple Flooring and that retail yards are far more optimistic than their attitude has previously been.

The general complaint from the trade, however, is that there is such a variation of quotations on Maple Flooring and so much uncertainty in the price that they hesitate to put in any stock. I am thorough convinced that the members of the Maple Flooring Association would receive a very substantial increase in business from that locality if the prices could be stabilized.

During the time that I was there the Oak Flooring Manufacturers increased their price on 2¼" Clear $5.00 per M', making the price $108.00 delivered in New England. There were also advances on all grades of sap and Yellow Pine flooring, so that sap rift is now selling for $80.00 delivered in New York and prices are very firm, and therefore there is considerable buying.

The range of prices quoted by different members of our Association on inquiries that I came in contact with were really ridiculous and varied from $5.00 to $11.00 per M. I saw these quotations and therefore have no hesitancy in giving this information. You can readily appreciate how a buyer feels under such conditions and I am convinced that there will be no improvement in the demand for Maple Flooring until there is some stability in prices.

Yours very truly, The Bigelow Cooper Company. (Signed) J. E. Dewey, Secretary.

"Do It Now"

To members.

GENTLEMEN: We hope all of you will make special efforts to send us this week all of your reports for the month of October, so we can make out our reports and mail them to you by the middle of next week. This will give you time to look over our reports and be fully posted on the flooring situation in advance of the next general meeting which is to be held on November 15th.

The earlier in the month you get the information contained in our statistical reports for the previous month, the more valuable the information is to you.

It would be a grand and glori-us thing if every member will do this and send us all his reports on or before the 5th of the month, in accord with Article V of the Articles of the Association.

Yours very truly, George W. Keehn, Secretary.

Correction in report week ending 2-21-20

A member in Group D who reported the third item from the last advises that the grade should have been "Clear" instead of "Factory" as stated in his report. Please correct your copy.

You may be interested in reading two articles in the American Lumberman of 2-28-20, one in the second column, on page 45, and the other on page 50.

[fol. 2870] GOVERNMENT'S EXHIBIT No. 51

Sept. 30, 1921.

Mr. Wm. Horner, Reed City, Mich.

Att'n Mr. Ralstrom

DEAR SIR: We had an old order thru the John C. Hill Lumber Co. on our files calling for 2¼" Clear, on which we guaranteed prices against decline. They now ask us for shipment and claim the price has declined $5.00, stating that they could buy the stock from you on the basis of $85.00 Cadillac.

On account of the scarcity of 2¼" Clear we hardly thought it possible you would quote this price. All the manufacturers this side of the Lake are holding at $96.00 delivered Twin Cities.

This merely for your informtion as it is of course desirable that Mr. Hill, who is representing us as well as you should have one price as nearly as possible.

Yours very truly, J. W. Wells Lumber Company.

CHL:MK.

[fol. 2871] GOVERNMENT'S EXHIBIT No. 51-A

All Agreements and Contracts are Contingent Upon Strikes, Fires, Shortage of Cars, Accidents and Other Causes Beyond Our Control. All Quotations are for Immediate Acceptance Only, and are Subject to Prior Sale and Change Without Notice.

Reed City, Mich., Oct. 3, 1921.

J. W. Wells Lbr. Co., Menominee, Mich.

Attention Mr. Law

GENTLEMEN: We have your favor of the 30th, in regard to price of Clear being quoted by the John C. Hill Lbr. Co., and we note carefully what you say.

We are sorry any question like this came up but we presume Mr. Hill has heard of the late cut made in the Assoc. list which brought this down to $85.00 per M. We did not write him in this matter at all but he likely heard it thru some of his connections.

Now, we are frank in saying we do not like this business of putting our prices up against yours at all. We sell Mr. Hill on the basis of the Assoc. list as a rule, but we agree with you there is no reason for Clear being $85.00, at the present time. We are perfectly willing to keep up the figure you mention, namely $96.00, Twin Cities, as far as the territory over there is concerned and would be very glad, indeed, to work with you in the matter.

We have written Mr. Hill to this effect today and really think he is rather unfair in bringing us into a discussion of this kind at all. Incidentally, we might say we have had similar cases ourselves where your prices were quoted us as a basis of adjustment on prices guaranteed against decline. This guaranteeing against decline is poor business for us and we are thru doing it.

Thanking you for writing us and assuring you we want to work with you, we are

Yours very truly, William Horner. T. M. Ralstrom.

TMR.F.

[fol. 2872] GOVERNMENT'S EXHIBIT No. 51-B

Nov. 1, 1921.

Mr. Wm. Horner, Reed City, Mich.

DEAR SIR: We have your letter of the 29th ult. advising advance in prices on 1-1/16" Maple Flooring.

We are not manufacturing any of this dimension at present and have only a car or two of Clear and #1 in stock at present.

Our lists are out at $5.00 advance over the price of 13/16" and unless an advance is made on the 13/16" as well, it would not seem

advisable to change. However, if we should conclude to manufacture any more of this dimension we will base our prices at—

$100.00 for Clear.
75.00 " #1
25.00 " Factory.

Frame "A" basis.

Yours very truly, J. W. Wells Lumber Company.

CHL:MK.

[fol. 2873] GOVERNMENT'S EXHIBIT No. 51-C

All Agreements and Contracts are Contingent Upon Strikes, Fires, Shortage of Cars, Accidents and Other Causes Beyond Our Control. All Quotations are for Immediate Acceptance Only, and are Subject to Prior Sale and Change Without Notice.

Reed City, Mich., Oct. 29, 1921.

Bigelow Cooper Co., Bay City, Mich.; Strable Salt and Lbr. Co., Saginaw, Mich.; W. D. Young and Co., Bay City, Mich.; Kerry and Hanson Flooring Co., Grayling, Mich.; J. W. Wells Lbr. Co., Menominee, Mich.

GENTLEMEN: This letter is written in accordance with talk with Messrs. Dewey, Wheadon and Welsh at Chicago, yesterday.

Our understanding that prices Frame A., on 1-1/16 x 2-¼ maple flooring will now be as follows, effective immediately,

Clear $100. #1 $75.00. Factory $75.00.

Other items to be in proportion.

We would appreciate it if you would acknowledge this letter to each of the concerns listed above, and to ourselves, so that there may be a mutual understanding.

Yours very truly, William Horner. T. M. Ralstrom.

[fol. 2874] GOVERNMENT'S EXHIBIT No. 51-D

March 30, 1922.

Mr. Wm. Horner, Reed City, Mich.

Att'n Mr. Ralstrom

DEAR SIR: Mr. Wells showed me some quotations that were made, I believe to the Omaha Hardwood Lumber Co., and as our figures did not include a commission I am sending our original letter for your inspection, which please return after you have examined same.

While this shows a low price on Clear, the situation has changed

considerably during the past ten days and we now have no surplus of this grade and are glad to note the upward trend of prices.

Yours very truly, J. W. Wells Lumber Company, by —— ——, Sec'y.

CHL:MK.

[fol. 2875] GOVERNMENT'S EXHIBIT No. 51-E

April 3, 1922.

Mr. Wm. Horner, Reed City, Michigan.

Att'n Mr. Ralstrom

DEAR SIR: We have your letter of April 1st with comments on our quotation to the Omaha Hardwood Lumber Co., and it occurred to the writer that you did not quite understand the purpose of our sending a copy of this quotation to you.

Mr. Wells showed me a list of prices that had been quoted by the different manufacturers, in which we were shown as having made the lowest quotation on the Clear grade, figured by deducting $1.50 per M.

I sent you the letter to show that the price did not carry a commission, which would make Welch & Kerry's price $1.00 per M. under ours, and on the #1 Common there would be seven lower.

I merely write you this way to correct the impression that you had that we had quoted the lowest price on Clear. We assure you we will keep the matter confidential as far as the Omaha Hardwood Lumber Co. is concerned.

Yours very truly, J. W. Wells Lumber Company, —— ——, Secretary.

CHL:MK.

[fol. 2876] GOVERNMENT'S EXHIBIT No. 51-F

All agreements and contracts are contingent upon strikes, fires, shortage of cars, accidents and other causes beyond our control. All quotations are for immediate acceptance only, and are subject to prior sale and change wthout notice.

Reed City, Mich., April 1, 1922.

J. W. Wells Lbr. Co., Menominee, Mich.

Attention Mr. C. H. Law

GENTLEMEN: We have your letter of the 30th, with enclosed copy of quotation to Omaha Hardwood Lbr. Co., and thank you for writing us in the matter.

We do not want you to think we are prying into your business in any way but, as the writer told Mr. Arthur Wells when he saw

him in Chicago, the Omaha Hardwood Lbr. Co. were using the quotations you made them in an effort to bring our prices down, in fact they criticized the writer very severely for the high prices we quoted them and wanted us to give them a reduction of several dollars per M on a couple of cars we shipped them.

As Mr. Wells knows, your price on the Clear was the lowest of any quoted out there and while we realize that Clear orders are not as plentiful as they might be just now, still we do not think you will gain anything by going as low as you did on this particular quotation. We are going to ask you as a personal favor not to say anything to the Omaha Hardwood Lbr. Co. regarding this. Their letter was not originally sent out as a decoy. They were trying to show the writer that our prices were too high and he suggested to them that they write a few of the mills and find out what the average price was and the result was the list as shown Mr. Wells the other day. In addition, the Omaha people do not make a practice of doing anything like this and this is the first time they have ever shown the writer quotations from other mills and in this case they merely did it in an effort to prove their argument.

We certainly hope before long that the Association will get together in some way and put the price of #1 where it should be, in line with Clear. It is absolutely ridiculous to keep on selling #1 at $25.00 per M. below the Clear price and we are all losing money unnecessarily by doing so.

Thanking you for writing us and with best wishes, we are

Yours very truly, Grand Rapids Trust Co., Receiver William Horner, T. M. Ralstrom.

[fol. 2877] GOVERNMENT'S EXHIBIT No. 51-G

All agreements and contracts are contingent upon strikes, fires, shortage of cars, accidents and other causes beyond our control. All quotations are for immediate acceptance only, and are subject to prior sale and change without notice.

Reed City, Mich., April 5, 1922.

J. W. Wells Lbr. Co., Menominee, Mich.

Attention Mr. Law

GENTLEMEN: We have your favor of the 3d, regarding quotations to the Omaha Hardwood Lbr. Co., and note same carefully.

We are not trying to make a mountain out of a mole hill in any way but we thank you just the same for your courtesy in writing us regarding this.

The writer will see Mr. Law at the next meeting and we can talk it over further then if necessary.

Yours very truly, Grand Rapids Trust Co., Receiver. Wm. Horner.

[fol. 2878] GOVERNMENT'S EXHIBIT No. 51-H

Feb. 2, 1921.

John C. Hill Lumber Co., St. Paul, Minn.

GENTLEMEN: We are in receipt of your order #31, confirming wired order of the same date, calling for a car of Maple Flooring for Dillon, Mont.

We note you have checked the price for that delivery as $120.50, computed by adding the difference in rate over Twin Cities. This is no doubt correct but it is 25¢ less than the price that would be shown by the Association sheets. We would arrive at the price of $120.75 as follows: Dillon takes a G. H. old rate, new rate of A. J. D. We find the A. J. D. list on Clear $125.75, less consession of $5.00 would make $120.75.

As we do not want to show this sale at less than the list we will invoice to you at the latter figure and make up the difference to you later in some other way, all of which we trust will be satisfactory to you.

Yours very truly, J. W. Wells Lumber Company.

[fol. 2879] GOVERNMENT'S EXHIBIT No. 51-I

All prices are subject to prior sale of stock quoted and change without notice. Our delivered prices are based upon and subject to present rate of freight to point of delivery, the freight at the existing rate; any advance in freight rate and all governmental taxes or duties upon sales, shipments, bills of lading and invoices to be paid by the buyer in addition to price quoted. All agreements are contingent upon strikes, accidents, fires, delays to carriers, or other delays, unavoidable or beyond our control. No agreement or contract is considered binding until accepted in writing by us. Claims will not be allowed unless made within forty-eight hours of receipt of material and entire shipment is held intact.

Saint Paul, Minn., Jan. 31, 1921.

J. W. Wells Lumber Company, Menominee, Michigan.

DEAR SIRS: We wired you as per the enclosed and send order confirming.

According to our rate sheets here, Dillon takes a price of $14.75 more than the Twin Cities 105.75

$120.50

and we quoted accordingly and send order in that way.

They are in a rush for this and we hope you can therefore load it out at once.

Yours very truly, John C. Hill Lumber Company.

KST.

* * * * * * *

Go ahead and book all the business you possibly can for the future for our account and you may guarantee prices against decline of our list until July 1, if necessry, or we will accept the business on the basis of Association prices at time of shipment.

* * * * * * *

[fol. 2884] GOVERNMENT'S EXHIBIT No. 51-M

April 18, 1921.

Mr. Bulgrin, Marshfield, Wis.

FRIEND BULGRIN: I have your pencil note of the 16th stating you had report that our flooring, Clear 2¼", had been offered someone in Milwaukee at $88.00 delivered Milwaukee. I am glad to give you the facts in the matter as Mr. Shepek mentioned it in talking with him on phone Saturday, and I intended advising the northern people anyway so they would know how the matter stands and therefore a copy of this is going to each of them, as there is no one in the north that has co-operated any more fully in these matters than we have and sorry to say the way things have turned out we have made big losses by doing so owing to the unwarranted action taken by Lower Michigan people.

It is true that a mail quotation did get our of our office on some 2¼" Clear delivered Milwaukee at $88.50, but it was discovered the next day and I immediately personally called the parties up and explained that it was a decided error and corrected the price promptly on the phone to the Marinette basis that it should have been.

Answering your question as to whether there has been any change in prices lately, we know of none and our understanding is that everyone is using the basis made at Marinette and as we understand it you are still using this also.

Yours truly, Northwestern Coop. & Lbr. Co.

[fol. 2885] GOVERNMENT'S EXHIBIT No. 51-N

[Omitted in printing]

[fol. 2886] GOVERNMENT'S EXHIBIT No. 51-O

Gladstone, Mich., June 21, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN:

* * * * * * *

He said also they are turning orders right along on Clear and No. 1 on which they are away short and sold ahead. We have no surplus of these two grades, but have a big surplus of Factory, and we are not finding it easy to get flooring orders, and are taking very little business indeed and we have been standing up for the prices [fol. 2887] although we notice the contentions I made so vigorously at the last meeting in regard to the likelihood of the present plan working out any more satisfactorily than it has the last two or three times we have tried it is developing to be true to judge from the last two or three weekly reports of sales on which you will notice a good many cuts. I think yet that this can only end in demoralization and the result is that as I stated then, some of us in the meantime have lost a lot more business that later on we may have to take less money for.

I think if I remember I counted something over 30 sales on the last weekly report ending June 11th at less than the proposed price.

We are mentioned on that report as not having reported, but our report went in all right but think it was received by Keehn a day too late to include, but on that report there were only eight sales aggregating about 42,000', but as I remember it the prices were all up to basis.

Yours truly, Northwestern Coop. & Lbr. Co.

[fol. 2888] GOVERNMENT'S EXHIBIT No. 51-P

Aug. 30, 1921.

Wilson Lumber Co., Atlanta, Ga.

GENTLEMEN: Replying to your inquiry of the 27th inst.

Maple Flooring prices are based on rates from Cadillac, Michigan, and we enclose our price list f. o. b. Cadillac.

Trusting you can favor us with orders on the basis of this list, we remain,

Yours very truly, J. W. Wells Lumber Company.

[fol. 2889] GOVERNMENT'S EXHIBIT No. 51-Q

[Omitted in printing]

[fol. 2890] GOVERNMENT'S EXHIBIT No. 51-R

Sept. 30, 1921.

West Michigan Flooring Co., Manisteee, Mich.

GENTLEMEN: We had an old order thru the John C. Hill Lumber Co. on our files calling for 2¼" Clear, on which we guaranteed prices against decline. They now ask us for shipment and claim the price has declined $5.00, stating that they could buy from yourselves and Horner on a basis of $85.00 Cadillac.

On account of the scarcity of 2¼" Clear we hardly thought it possible you would quote this price. All the manufacturers this side of the Lake are holding at $96.00 delivered Twin Cities.

This merely for your information, as it is of course desirable that Mr. Hill, who is representing us as well as yourselves, should have one price as nearly as possible.

Yours very truly, J. W. Wells Lumber Company.

CHL:MK

[fol. 2891] GOVERNMENT'S EXHIBIT No. 51-S

Oct. 12, 1921.

West Michigan Flooring Co., Manistee, Mich.

GENTLEMEN: We have your letter of the 4th inst. with reference to prices on Maple Flooring in the Northwest.

The writer talked to some of the manufacturers on this side of the Lake in Milwaukee yesterday and in line with your letter it seems to be the opinion that the Cadillac basis on flooring should be as follows:

13/16 x 2¼" Face	Clear	$85.00
" "	No. 1	55.00
" "	Factory	20.00

We therefore instructed the John C. Hill Lumber Co. that we would accept business at these prices, which would make $91.00 for Clear, $61.00 for No. 1 and $26.00 for Factory, f. o. b. Twin Cities.

Horner also stated that he would instruct them to hold steady at these prices.

We are of the opinion that this will stabilize things in that territory as there is no question but what Hill should have one price and divide the business as equitably as possible.

We trust this will be agreeable to you.

Yours very truly, J. W. Wells Lumber Company.

[fol. 2892] GOVERNMENT'S EXHIBIT No. 51-T

Manistee, Mich., Oct. 4, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN: This acknowledges receipt of your letter of September 30th in which you advise having an old order through the John C. Hill Lumber Company for 2¼" Clear on which you guaranteed price against decline and that they are asking you for shipment and claiming the price has declined since, stating that they could buy from us or Horner on a basis of $85.00 Cadillac.

About six weeks ago we wrote the John C. Hill Lumber Company authorizing a $5.00 concession from the $90.00 Cadillac base to be used if necessary to meet competition. We at that time were under the impression that the mills on the other side of the lake were holding at $96.00 in the Twin Cities and we so informed the John C. Hill Lumber Company and suggested to them that it would be better not to quote a lower price on our product in the Twin Cities. We based our idea of values being obtained in the Twin Cities on the weekly reports which we were receiving. Mr. Hill wrote us in reply stating that he would comply with our request by holding to $96.00 on 2¼" Clear on orders for the Twin Cities, in fact he has carried out this idea and we have in the meantime received the $96.00 price on such orders and shipments for the Twin Cities against his account.

Our authorized concession of $5.00 however still stands good if necessary to meet the competition of other association mills. We believe you appreciate the fact that there are very few mills in the Association today who are not quoting 2¼" Clear below $90.00 Cadilac basis even though there is a scarcity of this particular width and grade.

[fol. 2893] We have always been stickers for price and all through this year we have stood pat on our Price Lists as we have issued them from time to time and which were based on the opinions of the Market Conditions Committee's Reports as to what they considered representative market values. We have lately made up our minds, however, that we have made a mistake in doing so. We have come to the conclusion that until there is some backbone injected into the organization, it will be necessary for us to follow the suit of others by meeting their competition if we are going to secure any business at all.

We should say that if the order to which you refer is for shipment to St. Paul or Minneapolis, there should be no concession from the $96.00 base at least so far as a comparison with the prices we are obtaining in that market is concerned.

Yours very truly, West Michigan Flooring Co. Per Green.

[fol. 2894] GOVERNMENT'S EXHIBIT No. 51-U

Manistee, Mich., Oct. 17, 1921.

J. W. Wells Lumber Company, Menominee, Mich.

Attention C. H. Law, Secy.

GENTLEMEN: This acknowledges receipt of your letter of October 12th which is a reply to ours of the 4th inst. with reference to prices on Maple Flooring in the Northwest. We note that you recently had a talk with some manufacturers on your side of the lake and it seems to be the opinion that the Cadillac basis on 13/16" x 2¼" face Maple Flooring should be $85.00 for Clear, $55.00 for No. 1 and $20.00 for Factory which would make the prices $91.00 for Clear, $61.00 for No. 1 and $26.00 for Factory f. o. b. Twin Cities.

While we have sold no Factory in the Twin Cities market we have been realizing $5.00 per M more for the Clear and No. 1, however we do believe that the prices to which you refer are more representative of the market taking all territories into consideration. We are advising the John C. Hill Lumber Co. that we will accept business at these prices.

Thanking you very kindly for having written us on this subject, we beg to remain

Yours very truly, West Michigan Flooring Co., Per Grove.

[fol. 2895] GOVERNMENT'S EXHIBIT No. 51-V

Oct. 6, 1921.

Northwestern Cooperage & Lumber Co., Gladstone, Mich.

GENTLEMEN: Referring to your letter of the 5th inst. with reference to a meeting of the Northern Flooring manufacturers, in Milwaukee on Tuesday next, will say that we can hardly see the necessity of this as we supposed everything was satisfactory at the conference a week ago and we have sent out our lists advising that there would be no reductions for at least thirty days.

In view of correspondence that we have had with some of the Lower Michigan mills it would appear that there is a tendency to base 2¼" Face Clear at $85.00 Cadillac, but do not believe this will make a great deal of difference as there is a strong demand for Clear.

If you conclude having the meeting in Milwaukee the writer will be unable to attend but we will be willing to cooperate with you in any reasonable way for the best interest of the industry.

Yours very truly, J. W. Wells Lumber Company.

[fol. 2896] GOVERNMENT'S EXHIBIT No. 51-W

Oct. 5, 1921.

Cummer Diggins Co., Cadillac, Mich.

GENTLEMEN: We are writing this letter in the spirit of co-operation knowing that you are as interested as we are in getting the best results on such limited amount of flooring as is moving in this territory and will therefore understand that this is not written in a spirit of criticism but simply with a view of co-operation and in explanation might say that very recently all of the northern manufacturers, namely eight or nine of them, met and after going over the matter thoroughly came to an understanding as to the flooring basis that should apply at points in the west, and which basis by the way, actual results demonstrate is being carried out and this basis is represented as follows, showing which items the list price is applied on and which items the concession noted applies.

	Clear, ours	Maple, yours	No. 1 ours	No. 1 yours
2¼".....	List	$5.00	5.00	10.50
1½".....	"	7.00	5.00	11.00
⅜ x 1½".....	"	6.00	List	6.00
	Beech			
2¼".....	15.00	15.00	10.00	15.00

This list is based on C. J. basis with the understanding that of course all other points take the same relative basis as against the full table of values and the reason we are writing you is because we have understood from what seems to be reliable sources that your prices in the Minneapolis and North West territory are less than the northern basis on the items shown (as above), in the neighborhood of $5 or $6, our basis being shown in the column headed "Ours" and yours in the one headed "Yours," and we felt it was only right to advise you what we are doing believing that you would be willing to revise your basis in line with the north because you can [fol. 2897] readily understand that otherwise the northern people will all immediately meet your basis which would mean a serious flat reduction to us all which knowing the situation as we do, we believe is entirely unnecessary and in the best interests of all concerned we would appreciate very much hearing from you frankly with your views at an early date as the northern manufacturers

plan to have regular meetings every ten days or two weeks and the next one is due early next week.

Yours truly, —— ——.

[fol. 2898] GOVERNMENT'S EXHIBIT No. 51-X

Gladstone, Mich., Oct. 5, 1921.

Foster Latimer Lumber Co., Kneeland McClurg Co., J. W. Wells Lumber Co., I. Stephenson Co., Wisconsin Land & Lumber Co., R. Connor Co., Holt Hardwood Co., Flanner Steger Co.

GENTLEMEN: We have taken the liberty of writing Cummer Diggins Co. Cadillac per copy attached which is submitted for your information and if any of you have run across these people's prices in the north or those of Cobbs & Mitchell, we would appreciate getting full information on same.

So far we have only received sales report from four concerns, namely Foster Latimer, Kneeland McClurg, I. S. Co. and Wisconsin Land & Lumber Co. and assume therefore the remaining northern concerns made no sales but in the event of no sales would it not be well to report to that effect to each other anyway.

Yours truly, The Northwestern Cooperage & Lumber Co.

[fol. 2899] GOVERNMENT'S EXHIBIT No. 51-Y

Gladstone, Mich., Oct. 5, 1921.

GENTLEMEN: In talking with Mr. Gibson of the Wisconsin Land & Lumber Co. over the phone, he thought it was quite desirable that we have another meeting of the northern flooring manufacturers very soon and as we feel the same way, you will kindly consider this letter a call for another meeting at the Hotel Pfister, Milwaukee, as early as possible in the morning, next Tuesday the 11th and this date is satisfactory to Mr. Gibson and we hope it will be to the others, and as it is very desirable indeed that we have a full attendance, we trust that you can each arrange your matters so as to be in attendance and we would appreciate reply on enclosed post card that you will attend so that we may be sure of a full attendance.

Milwaukee is again suggested in order to meet the convenience of two or three who we understand cannot get to Menominee or Wells nearly so conveniently as Milwaukee, but it may be possible to arrange to have later meeting at Menominee or perhaps rotate them somewhat. If we get replies promptly we will try and notify you again as to the probable attendance.

Yours truly, N. W. C. & L. Co.

End.

[fol. 2900] GOVERNMENT'S EXHIBIT No. 51-Z

Gladstone, Mich., Oct. 8, 1921.

Attention Mr. Law

GENTLEMEN: Referring to yours 6th are pleased to say we have replies from all of the others except Flanner Steger that they will be in attendance at the Milwaukee meeting Tuesday morning next and we expect to hear from Flanner that they will also attend by next Monday morning. May also say we wrote the Horner Co. and have wire stating they will be represented also. We hope you can arrange it to be present.

It should be unnecessary as you suggest to have this meeting due to the understanding had at the last meeting but it was thought well to get together again and go over the situation and see whether the understanding is being carried out especially since we have had complaint from one or two sources of greatly cut prices from somewhere that we may be able to trace out. Kindly make a special effort to attend.

Yours truly, Northwestern Coop. & Lbr. Co.

[fol. 2901] GOVERNMENT'S EXHIBIT No. 51-AA

Sales in Northwest Week Ending October 8, 1921

8,000'	13/16 x 2¼"	Clear Maple 7—18"	.....	$65.00	C. J.
10,000'	13/16 x 1½"	" "	.....	91.00	C. J.
10,000'	13/16 x 2¼"	" "	.....	96.00	C. J.

The Northwestern Cooperage & Lumber Company.

[fol. 2902] GOVERNMENT'S EXHIBIT No. 51BB

Oct. 12, 1921.

W. D. Young & Co., Bay City, Mich.

GENTLEMEN: Replying to your letter of the 10th inst.:

We believe it will be satisfactory to talk over 1-1/16" Flooring in Chicago as we would not want to go way to Bay City just for this purpose. The prices on this class of material vary considerably as the price of $62.00, which Bigelow-Cooper made Wilson some time ago indicates.

We have about 100 M ft. of this stock on hand and would like to move it but do not want to give it away, and would be willing to abide by the decision of the rest of the manufacturers in case they get together in your city in the immediate future.

The writer will be in Chicago tomorrow and also two or three

days next week. It may be possible to get together there at that time.

Yours very truly, J. W. Wells Lumber Company.

[fols. 2903 & 2904] GOVERNMENT'S EXHIBIT No. 51-CC

Bay City, Mich., Oct. 10, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN: Mr. Charles T. Kerry of the firm of Kerry & Hanson Flooring Co. telephoned the writer this noon about the value of 1 1/16" Flooring, and he suggests that the manufacturers of this thickness get together and talk over the value considering the cost of Lumber, manufacturing, etc. There are only six of us in the Maple Flooring Manufacturers Association who manufacture 1 1/16" Flooring, and according to our records they are:

J. W. Wells Lumber Co.,
William Horner,
Strable Lumber & Salt Co.,
Kerry & Hanson Flooring Co.,
Bigelow-Cooper Co., and
W. D. Young & Co.

Would you come to Bay City if we should call a meeting sometime within a week or ten days? There are a lot of inquiries for 1 1/16" Flooring at the present time, and it seems foolish to sell this stock below cost.

Awaiting your reply, we remain,

Yours very truly, W. D. Young & Co. Whedon.

[fol. 2905] GOVERNMENT'S EXHIBIT No. 51-DD

Nov. 1, 1921.

Northwestern Cooperage & Lumber Co., Gladstone, Michigan.

GENTLEMEN: We note yours of the 31st ult. with reference to prices of Short Flooring in the Fox River territory, and are glad you induced Mr. De Witt to hold-off his contemplated cut until we could all get together and talk the matter over. We are also of the opinion that until Cadillac sees fit to quote the list recommended in the Northwest it would not be advisable for us to attempt it.

As far as the writer knows now he will be able to attend a meeting in Milwaukee if called within a week or ten days.

Yours very truly, J. W. Wells Lumber Company.

[fol. 2906] GOVERNMENT'S EXHIBIT No. 51-EE

Gladstone, Michigan, October 31st, 1921.

GENTLEMEN: You probably received Mr. Dewitt's advice that on account of prices from Lower Michigan that he encountered in the Fox River territory on shorts whereby he says he lost two or three carload orders, he proposed to put his price on 7 to 22″ clear 2¼″ down to $55.00 and 2 to 3½′ to $70.00.

I immediately got in touch with him and explained the unfairness of doing this without it being brought up in meeting and properly discussed so that any change could be put in effect by all at once, and I insisted at the same time that his idea of these prices is altogether wrong. He tells me he has not, however, quoted these prices and he has finally agreed not to do so until we can have a meeting and go over matters fully, and I explained to him that I thought it would not be advisable to try to have a meeting for a week or ten days at least or until such time as it had developed whether or not we could put in effect the advance to lift on clear and No. 1 with $10.00 off on factory recommended by the committee in the Chicago meeting the other day and during this interval we ought to try and find out what the Cadillac people are doing and whether or not they have raised their prices in the northwest to this basis, as if so it will certainly make it easier for us to do the same. It is therefore likely that a meeting may be arranged for in about a week or ten days, and the writer would prefer Escanaba or Menominee, but Milwaukee will be equally agreeable, so would be glad if you would each advise if we can depend upon you attending the meeting when called at Milwaukee a little later.

Yours truly, Northwestern Cooperage & Lumber Co.

[fol. 2907] GOVERNMENT'S EXHIBIT No. 51-FF

Nov. 5, 1921.

Northwestern Cooperage & Lumber Co., Gladstone, Mich.

Attention Mr. Staples

GENTLEMEN: With reference to the proposed meeting of the manufacturers of the Northwest: Believe it will be to our best advantage to work with Cadillac on this and to that end the general meeting in Chicago should meet the requirements.

It looks, however, as if the situation is going to take care of itself as prices for rough Flooring stock are advancing rapidly and Flooring orders are more plentiful. It seems logical that prices will show an improvement in the near future with or without Association assistance.

Yours very truly, J. W. Wells Lumber Company.

[fol. 2908] GOVERNMENT'S EXHIBIT No. 51-GG

Nov. 9, 1921.

Northwestern Cooperage Co., Gladstone, Mich.

GENTLEMEN: As advised over the 'phone today, we have advanced our prices on Maple Flooring as follows:

13/16 x 2¼" Face Clear—full list.
" " No. 1 $5.00 off.
" " Factory $5.00 off.

Prices for Chicago and Milwaukee are—

13/16 x 2¼" Face Clear, $92.00.
" " No. 1, $62.00.

Yours very truly, J. W. Wells Lumber Company.

[fol. 2908½] Cooperage Co.:

As advised over phone today have advanced our prices on Maple Flooring as follows:

2¼" Cl., Full List; No. one, $5.00 off; Factory, $5.00 off; Chicago & Milw. prices: Cl., $92; No. 1, $62.

[fol. 2909] GOVERNMENT'S EXHIBIT No 51-HH

Nov. 1, 1921.

W. D. Young & Co., Bay City, Mich.

GENTLEMEN: We have your letter of the 29th ult. advising advance in prices on 1-1/16" Maple Flooring.

We are not manufacturing any of this dimension at present and have only a car or two of Clear and No. 1 in stock at present.

Our lists are out at $5.00 advance over the price of 13/16" and unless an advance is made on the 13/16" as well, it would not seem advisable to change. However, if we should conclude to manufacture any more of this dimension we will base our prices at—

$100.00 for Clear;
75.00 " No. 1;
25.00 " Factory.
Frame "A" basis.

Yours very truly, J. W. Wells Lumber Company.

[fols. 2910 & 2911] GOVERNMENT'S EXHIBIT No. 51-II

Bay City, Mich., Oct. 29, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN: We have sold during this past week 4,500 feet of 1 1/16 x 3¼" Factory Maple Flooring at $31.75 delivered on a "BA" rate, with other stock.

Our prices for 1 1/16" Maple Flooring, "Frame A," are now as follows:

	1 1/16 x 2"	1 1/16 x 2¼"	1 1/16 x 3¼"	
Clear Maple Flooring	$93.00	$100.00	$90.00	per M
No. 1 " "	68.00	75.00	75.00	"
Factory " "	23.00	25.00	27.00	"

Yours very truly, W. D. Young & Co.

[fol. 2912] GOVERNMENT EXHIBIT No. 51-JJ

Nov. 9, 1921.

W. D. Young & Co., Bay City, Mich.

GENTLEMEN: With reference to prices on Maple Flooring, will say that we are quoting Clear at full list, No. 1 at $5.00 off and Factory at $5.00 off; 1-1/16" Flooring $10.00 per M. additional. We have only two cars of Clear and No. 1 in this thickness and are not manufacturing any at present.

Yours very truly, J. W. Wells Lumber Company.

[fols. 2913 & 2914] GOVERNMENT'S EXHIBIT No. 51-KK

Bay City, Mich., Nov. 4, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN: Your favor of the 1st was received regarding the 1-1/16" Maple Flooring. We did have some quotations out on 1-1/16" Maple Flooring at the old prices, but we turned down an order owing to the advance, and we hope you will do the same thing.

The writer was sorry that you were not in Chicago at the Market Conditions Committee Meeting on the 28th. However, we expect to have a meeting about the middle of November, and I will try and see you at that time.

Yours very truly, W. D. Young & Co. Whedon.

[fols. 2915 & 2916] GOVERNMENT'S EXHIBIT No. 51-LL

Bay City, Mich., Nov. 7, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN: We have sold during the past week 8,000'—1 1/16 x 2¼" #1 Maple Flooring at $69.00 per M. D. E., which was a quotation we had out, and the order is dated Oct. 29th. It is in a mixed carload and we had to protect it. Every one of our new quotations are based on the new prices and this is the last quotation we will have to protect. We are quoting as follows Frame A basis:

	Clear	#1	Factory	
1 1/16 x 2" Face Maple Flooring	$93.00	$68.00	$23.00	per M
" x 2¼" " " "	100.00	75.00	25.00	"
" x 3¼" " " "	90.00	75.00	27.00	"

Yours very truly, W. D. Young & Co. Whedon.

[fol. 2917] GOVERNMENT'S EXHIBIT No. 51-MM

Nov. 28, 1921.

W. D. Young & Co., Bay City, Mich.

GENTLEMEN: We made no sales of 1 1/16" Maple Flooring since our last report.

We are quoting same "Frame A" basis as follows:

1 1/16 x 2¼" Face Clear	@	$100.00
" " #1	"	75.00
" " Factory	"	30.00

Yours very truly, J. W. Wells Lumber Company.

[fol. 2918] GOVERNMENT'S EXHIBIT No. 51-NN

Nov. 28, 1921.

Wm. Horner, Reed City, Mich.

DEAR SIR: We made no sales of 1 1/16" Maple Flooring since our last report.

We are quoting same "Frame A" basis as follows:

1 1/16 x 2¼" Face Clear	@	$100.00
" " #1	"	75.00
" " Factory	"	30.00

Yours very truly, J. W. Wells Lumber Company.

[fol. 2919] GOVERNMENT'S EXHIBIT No. 51-OO

Nov. 28, 1921.

The Bigelow-Cooper Co., Bay City, Mich.

GENTLEMEN: We made no sales of 1 1/16" Maple Flooring since our last report.

We are quoting same "Frame A" basis as follows:

1 1/16 x 2¼"	Face Clear	@	$100.00
"	" #1	"	75.00
"	" Factory	"	30.00

Yours very truly, J. W. Wells Lumber Company.

[fol. 2920] GOVERNMENT'S EXHIBIT No. 51-PP

Dec. 1, 1921.

Mr. Wm. Horner, Reed City, Mich.

DEAR SIR: As per your circular letter of the 29th ult. regarding export shipments of Maple Flooring, we understood that export sales were to be reported as well as any other shipments.

We have not quoted prices recently but are instructing our representatives that prices will be as follows, f. o. b. cars seaboard:

13/16 x 3¼" Prime	@	$85.00
1 1/16 x 3¼" Prime	"	95.00

Yours very truly, J. W. Wells Lumber Company.

[fol. 2921] GOVERNMENT'S EXHIBIT No. 51-QQ

All Agreements and Contracts are Contingent Upon Strikes, Fires, Shortage of Cars, Accidents and Other Causes Beyond Our Control. All Quotations are for Immediate Acceptance Only, and are Subject to Prior Sale and Change Without Notice.

Reed City, Mich., Nov. 29, 1921.

W. D. Young & Co., Strable Lbr. & Salt Co., Kerry & Hanson Flg. Co., Bigelow-Cooper Co., J. W. Wells Lbr. Co.

GENTLEMEN: In sending out the weekly report of the 5/4 sales for the last two weeks we have also made mention of the fact we have made no export sales.

Our understanding was that each mill would report their export sales weekly, the same as the 5/4 sales. We note this is not being done by the other mills.

This morning we have a cablegram from our English representa-

tive in which he states the other mills are quoting the same prices as we are, namely the figures outlined in our report to you a week ago. They state, however, that on 5/4 flooring the prices of the other mills are considerably lower.

Just to let us know what you are doing, will you not advise us what you are doing on export sales and also whether you intend to report them or not?

Thanking you, we are

Yours very truly, William Horner. T. M. Ralstron.

TMR. F.

[fol. 2922] GOVERNMENT'S EXHIBIT No. 51-RR

Dec. 2, 1921.

The Northwestern Cooperage & Lumber Co., Gladstone, Michigan.

GENTLEMEN: Replying to your letter of the 30th ult.:

Sales made between the dates you mention were included in our Nov. 26 report. We are quoting to all points full list on Clear and #1, $5 off on Factory, and 1 1/16" $10 additional.

Yours very truly, J. W. Wells Lumber Company.

CHL:MK.

[fol. 2923] GOVERNMENT'S EXHIBIT No. 51-SS

Gladstone, Mich., November 30, 1921.

J. W. Wells Lumber Company, Menominee, Michigan.

GENTLEMEN: We do not believe we have had any sales report from you for the weeks ending the 19th and 26th, and would be glad to have this, and as understood, in cases where no sales are made, it would be enlightening to have reports to that effect just the same.

Yours truly, Northwestern Coop. & Lbr. Co.

S-N.

[fol. 2924] GOVERNMENT'S EXHIBIT No. 51-TT

Dec. 14, 1921.

Northwestern Cooperage & Lbr. Co., Gladstone, Mich.

GENTLEMEN: Replying to yours of the 13th inst.:

The items on our Dec. 10 sales report listed at $2.00 or $3.00 under the present list were based on former quotations and were a compromise with an old customer. We neglected to so state same on our list.

What was the occasion of our friend Gibson's letter to you on your last report?

Yours very truly, J. W. Wells Lumber Company.

CHL:MK.

[fol. 2925] GOVERNMENT'S EXHIBIT No. 51-UU

Gladstone, Mich., Dec. 13, 1921.

J. W. Wells Lumber Co., Menominee, Mich.

GENTLEMEN: Your sales report for week ending December 10th showing the three 2¼" A items, less than understood basis do you care to give us any explanation of same? We ask with a view that there may be natural reasons for it that would clear up any misunderstanding on the part of parties getting the report which they may regard as simply a cut price. This is written with the idea of co-operation and not criticism and while there is little or no business available now, we do feel unless outsiders are coming on the market with lower prices, jeopardizing our trade that we all ought to hold firmly for reasonable time yet at least.

Have a note today from Foster Latimer stating they think the Cadillac people are making lower prices on 1½" and 2¼" factory. We have not come in contact with this ourselves nor heard of any other lower quotations.

Yours truly, Northwestern Coop. & Lbr. Co.

S/B.

[fol. 2926] GOVERNMENT'S EXHIBIT No. 51-VV

June 7, 1923.

John C. Hill, Lumber Co., St. Paul, Minn.

GENTLEMEN: Replying to your letter of the 5th inst. in regard to prices on 2¼" Face Maple Flooring,—and we are aware that most of the Wisconsin companies are quoting $5.00 over the list, which would be $110.50 for Clear, $100.50 for #1 delivered Minnesota points.

* * * * * * *

Yours very truly, J. W. Wells Lumber Company.

CHL:MK.

[fol. 2927] GOVERNMENT'S EXHIBIT No. 51-WW

[Omitted in printing]

[fol. 2928] GOVERNMENT'S EXHIBIT No. 52

October 20th, 1916.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: Replying to yours of the 19th, we are sending you a supply of the daily report blanks, but if it would be more convenient to you to make a report of your shipments at the end of the

month instead of making daily reports, it will be just as satisfactory to us.

As your reports are not audited any more, it is not necessary for us to have daily reports, so a report at the end of the month, giving the total number of feet shipped of Maple, Beech and Birch Flooring separately, would answer our purpose just as well.

You need not make the report of Current Net Values obtained each month, unless you wish to do so for your own records, because your shipments are altogether local and do not become a part of our average prices F. O. B. car shipments. It means a good deal of work for you, and unless you want the information for your own records, we do not really need it ourselves, because we have no other member in Milwaukee to compare your prices with. It is different in Minneapolis and St. Paul, where we have two members who like to keep track of the relative prices they are getting in their local trade.

However make your reports the way you would like to, as I am simply making these suggestions to save you office work which you may be doing more on our account than for your own records.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 2929] GOVERNMENT'S EXHIBIT No. 52-A

Maple Flooring Manufacturers' Association, Chicago

February Twenty-ninth, 1916.

January Statistics

To members.

GENTLEMEN: The regular meeting of the Market Conditions Committee was not held this month because Mr. Thomas and Mr. Whedon are away on vacations, Mr. Kerry is very ill with pneumonia, and Dr. Earle could not leave Hermansville, and consequently a sufficient representation of the Committee was not available to make it seem desirable to call a meeting.

The flooring situation, as reflected in our January reports, is more than favorable in every particular. It is a case of "Where every prospect pleases".

Compared with January 1915, the statistics of corresponding membership are as follows:

Stocks February 1 are 5,174 M (12.5%) less than a year ago.
Unfilled Orders are 9,644 M (75.2%) more than a year ago.
Shipments are 3,823 (53.7%) more than last January.
Production is 1,896 M (20.4%) more than last January.
New Business Booked is 3,090 M (36.2%) more than last January.

Stocks decreased this January 520 M, as against an increase last January of 2,185 M.

Maple 2¼" Face

Clear 2¼" face Maple is 230% sold, the highest point on record on February 1st in the history of the Association. The following table compares the percentages sold of each grade on February 1st of each year with the net values obtained by Group E mills during the month of January of the same year:

	Clear		No. 1		Factory		All three
Feb. 1	% sold	Values	% sold	Values	% sold	Values	grades
1916	230%	$41.35	86%	$34.87	74%	$19.37	126%
1915	74	40.01	46	35.34	42	20.41	57
1914	145	42.39	148	37.81	53	22.19	123
1913	164	40.22	136	33.68	86	19.43	133
1912	121	36.79	69	31.83	21	17.49	70

On January 1st Clear 2¼" face was 266% sold, and were it not for the fact that Maple Flooring seems to be immune from the natural laws of supply and demand and cause and effect, January prices should have been at least $2.00 to $3.00 higher.

[fol. 2930] Current Net Values

Current Net Values in January show advances over December (using Group E mills as the basis of comparison) of $1,58 on Clear, 50 cents on No. 1 and 35 cents on Factory. According to Exchanges of Quotations that are coming in we look to see February prices show a further improvement.

From information derived from February Exchanges of Quotations, January reports of Current Net Values, and the strength of our statistical position, it would seem that no greater concession should be made in order to make sales than $3.00 off on Clear, $3.00 off on No. 1 and $5.00 off on Factory, Table of Delivered Values May 21, 1913, Cadillac basis.

The members who are sending in carbon copies of their quotations consider this method of exchanging information in regard to the market as of great assistance and value to them in handling their sales. May we not ask your cooperation in this feature of the Association work? You will find it of equal benefit to you. Information and records of quotations and sales are considered indispensable by Stock Exchanges and Boards of Trades.

Babson's has this to say about mercantile conditions and the March outlook:

"Commodity prices which now stand at the highest level ever known are perhaps the best measure of the enormous demand for goods. * * *

Certain commodities, including building materials, are quite likely to advance further. New construction continues to bear out our expectations for a great building boom this spring. The value of permits issued in January was the greatest for the month since the memorable boom in 1909. Lumber shipments are half again as large as they were a year ago, and growing activity in all lines of building

material should continue. A large volume of new building is one of the greatest stimulants to general business activity." * * *

* * * * * * *

At the next meeting of the Market Conditions Committee a new Table of Values will be compiled, based on the present market value of maple lumber, plus the cost of manufacturing and selling flooring, plus a profit of 10% on sales. This calculation will undoubtedly show that full list prices must be obtained if the manufacturers are to get an average net profit of 10% or 12% on sales of flooring.

Respectfully, George W. Keehn, Secretary.

Maple Flooring Manufacturers Association, Chicago

June Twenty-second, 1916.

Market Conditions Committee Report, May Statistics

To Members.

GENTLEMEN: The meeting of your Market Conditions Committee held in Chicago yesterday was well attended, all but two members being present, and after going over the May statistics which were mailed you a few days ago, the Committee wishes to report as follows:

A comparison of the statistics of corresponding membership with May 1915 shows that:

Stocks on June 1st are 2,705 M (7.3%) less than a year ago.

Unfilled Orders are 11,538 M more than a year ago.

A wonderful gain of 85.5%.

Shipments are 1,385 M (11.5%) more than last May.

Production is 473 M (4.2%) less than last May.

New Business Booked is 2,272 M (21%) more than last May.

Stocks on Hand on June 1st, 34,267 M, are at the low point of the year and show a decrease of 4,331 M from the high point 38,598 M on April 1st.

Unfilled Orders continue of good volume and are within 609 M of the hight point of the year, 25,643 M on May 1st.

The May Shipments, 13,418 M, are the best month's business, and the May Production, 10,909 M, is the lowest of any month so far in 1916; New Business Booked, 13,071 M, is within 793 M of the month of March, which holds the record so far in 1916.

May 1916 compares with April 1916 and May 1915 compares with April 1915 as follows:

	May-April, 1916		May-April, 1915	
Stocks	Decrease	3,091 M	Decrease	1,602 M
Unfilled Orders	"	609 "	"	928 "
Shipments	Increase	811 "	"	144 "
Production	Decrease	68 "	Increase	607 "
New Business Booked	Increase	142 "	Decrease	1,329 "

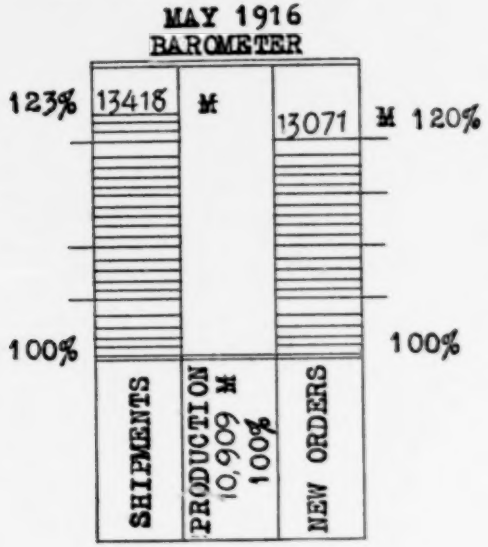
* * * * * * *

[fol. 2932] Surpluses

Compared with a year ago surpluses are 9 less in Clear, 11 less in No. 1 and 11 less in Factory, making 31 less in all three grades, while compared with a month ago there are 2 less surpluses in Clear, 2 less in No. 1 and no change in Factory, making 4 less in all three grades. As all the members have not yet reported the ordinary and maximum capacity of their warehouses at this date, we are enclosing you another blank form which we trust you will fill out and return promptly to the Secretary so this data can be completed.

Production

The relations of Production with Shipments and New Business Booked were exceedingly favorable last month, and calling Production the base or 100%, we find the Shipments represent 122% and the New Orders 120% of the Production, compared with 115% and 118% respectively in April.



[fol. 2933] Current Net Values

The 19 members who reported their Current Net Values for the month of May show average gains of 59 cents in Clear, 17 cents in No. 1, but strange to say Factory is down 39 cents in spite of the improvement in stock conditions of that grade. This comparison is with values realized in April by Group E Mills. Compared with May 1915 we find Clear is up $3.90, No. 1 is up $1.20, and Factory is up 81 cents, making a gain of $2.49 on the entire product on the basis of 50% Clear, 35% No. 1 and 15% Factory.

Based upon the reports referred to of Current Net Values obtained last month, the Committee finds the Net Values represented concessions (including commissions) of $4.00 on Clear, $4.00 on No. 1, and $6.00 on Factory from the Table of Delivered Values of May 15, 1916.

Minimum Price Plan

The Special Committee is indeed happy to report that Mr. I. N. Bushong of the Northwestern Cooperage & Lumber Company attended the meeting, and signed the Minimum Price Plan Agreement in behalf of his company. The Minimum Price Plan Agreement is, therefore, consummated, and will take effect July 1st, 1916, as telegraphed yesterday. The duration of the agreement is from July 1, 1916, to November 1, 1917. As the time between now and July 1st is quite short, and as members may have quotations out which they may not hear from before July 1st, it is understood that any bona fide outstanding quotations may be protected up to July 10th.

The Minimum Price Plan Agreement will be printed for filing with the Federal Trade Commission, and enough copies will be printed to send one to each party to the agreement, with an explanatory letter giving complete information in detail in order to avoid any misunderstandings as to the exact meaning of the agreement.

The adoption of the Minimum Price Plan is a great step forward in the work of our Association, and the method of basing selling prices, as outlined in our petition to the Federal Trade Commission, and in the agreement itself, will place the Maple Flooring industry in a position to be fair to itself and at the same time fair to the public.

Respectfully submitted, Morris E. Thomas, Chairman; Dr. George W. Earle, George C. Wilce, B. P. Whedon, W. E. Cox, George Strable, A. C. Wells, I. N. Bushong, of Market Conditions Committee.

Maple Flooring Manufacturers' Association, Chicago

September 14th, 1916.

To members.

GENTLEMEN: We give below copy of letter from No. 24, and of the letter from Bigelow-Cooper Co., to which No. 24 refers.

If you quoted on the business mentioned by Bigelow-Cooper Co., will you please send me a copy of your quotation.

Yours very truly, George W. Keehn, Secretary.

Copy of Letter from No. 24 to us, dated September 12th:

Enclosed please find copy of letter received from Bigelow-Cooper Co. this morning, which explains itself. Would like very much for you to send out to all members of the Association, and find out whether any of them have quoted on this inquiry If so, to please send you copy of their quotation.

Copy of Bigelow-Cooper Co. letter to Mr. Kerry, dated September 9th:

We received the following letter from our New England salesman, which we thought would interest you:

"I was very much surprised this morning in trying to secure an order from Blacker & Shepard Co. for a carload of 13/16 x 2¼" No. 1 Maple flooring, that I was the only one quoting on new basis of prices. He had six quotations, four of which were received this morning, and two yesterday. The highest quotation other than mine was $41.00, and the lowest was $40.00 and from a Canadian concern with whom he had previously done business, and to whom he has sent the order. I did not get the names of any of the concerns bidding, but it surprised me to think that not one of them was over $41.00, whereas our quotation was $42.50."

The writer does not know of six concerns quoting in Boston Territory who are outside of the Association. It would look as though all your good members are not sticking. We are continuing, however, to ask the prices.

Yours very truly, (Signed) Bigelow-Cooper Co. R. Cooper.

War Tax of 3% on Freight Charges

To members.

GENTLEMEN: At the last meeting of the Market Conditions Committee the question was discussed as to who should pay the war tax on freight charges when delivered prices are quoted by the shipper without any provision being made in his quotation that any advance in freight rates or any government war taxes are to be paid by the purchaser in addition to the delivered price.

At the suggestion of the Committee, the question was referred to our attorneys, Newman, Poppenhusen & Stern, who rendered the following written opinion under date of the 6th:

"We have your inquiry for an opinion on the question whether consignor or consignee is liable for the tax imposed on freight shipments by Section 500 of the War Revenue Act, approved by the President October 3, 1917.

Section 501 of the Act provides:

"That the taxes imposed by Section 500 shall be paid by the person, corporation, partnership or association paying for the services or facilities rendered."

In the absence of any other provision in the Act, we take this to mean that the tax payment is a burden imposed upon whoever is liable for the payment of freight charges, either consignor or consignee, and does not mean that the tax is imposed upon the party who may, for convenience, actually pay the freight, whether shipped prepaid or collect. If the price quoted for the sale of lumber products to Indianapolis firms is F. O. B. Chicago, the consignee is obligated for freight charges and must pay the tax; if the price quoted includes delivery charges to Indianapolis, the consignor is obligated for the freight charges and must pay the tax. If quotations and contracts are stamped as indicated:

(1) "Our prices are based on and subject to freight allowance of — cents per one hundred pounds, which is the present rate to point of delivery, any additional charges, duties and taxes to be paid by consignee in addition."

or are stamped:

(2) "This quotation is based on our current price list F. O. B. cars —— (here insert place from which shipment is made), to which, for your convenience and information, has been added the

estimated freight to point named at freight rate existing at this date, you pay in addition and we do not assume as a part of this proposal:

(a) Any advance in the freight rate over present existing rate as estimated herein;

(b) Any government tax which may be assessed on freight charges."

[fol. 2937] If the sale is made F. O. B. the place of shipment, the consignee must pay the tax, regardless of whether, as a matter of convenience, the shipper prepays at the request or for the convenience of the consignee, and likewise if the sale is F. O. B. the consignee's place of business or delivery point, the consignor must pay the tax, regardless of whether, as a matter of convenience, the shipper sends the lumber products collect and the freight charges are actually paid by the consignee."

It is desirable that the custom of the members of the Association be uniform in respect to this war tax and unless some better method is suggested of getting uniformity, suppose we have rubber stamps made for the use of the members to stamp on their quotations and invoices. It seems to me the stamp could read something like this:

"Our prices are based upon and subject to the present rate of freight to point of delivery;
Any advance in the freight rate, or any additional charges, duties or taxes to be paid by consignee."

As our delivered prices are based upon Cadillac, it would not work out to mention the rate of freight in cents per 100 pounds, because the local rate of freight from points other than Cadillac, to the point of delivery would not be according to our basis used in arriving at delivered prices.

Yours very truly, George W. Keehn, Secretary.

[fol. 2938] GOVERNMENT'S EXHIBIT No. 52-F

Maple Flooring Manufacturers' Association, Chicago

Memorandum of Semi-annual Meeting, July 20, 1917

To members.

GENTLEMEN: The Semi-Annual Meeting of the Maple Flooring Manufacturers' Association was held in Suite 209, Hotel La Salle, Chicago, on Friday, July 20, 1917, at 10:00 A. M.

In the absence of the President, Dr. Earle, the meeting was called to order by the Vice-President, Mr. Mitchell, who acted as Chairman.

The following members of the Association were present:

No. 1, 2, 3, 4, 5, 6, 12, 22, 29, 30, 33, 38, 43, 44, 46 and 48—Total 16

The following members were absent:

No. 14, 15, 24, 26, 34, 37 and 42—Total 7

" 23

* * * * * * *

The report of the Market Conditions Committee was submitted in substance as follows:

At the meeting yesterday of the Market Conditions Committee all but three members of the Committee were present, namely, Dr. Earle, who is absent on a trip to the Pacific Coast, and Mr. Kerry and Mr. Gillouly, who were unable to attend.

While June was a dull month in the flooring industry, as indicated by the Barometer, there are many bright spots compared with June 1916, among them Stocks on Hand with a decrease of 22½%, Unfilled Orders with an increase of 26%, Production with a decrease of nearly 8% and Average Values, with an increase of 29%. Shipments, however, show a decrease of 15%, and New Business Booked shows the large decrease of 54½%, which is attributable to the heavy falling off in building operations requiring our Flooring, particularly in the Clear grade.

Stock conditions, as a whole, compared with July 1, 1916, make a splendid showing with Clear up 17 Points, No. 1 up 190 Points, Factory up 422 Points and all three grades up 126 Points in the Maple 2-¼" Face.

Compared with a month ago, Maple 2-¼" Face is down 39 Points in Clear, up 8 Points in No. 1, down 39 Points in Factory, and down 24 Points in all three grades. The recession of 39 Points in Factory has no real significance as with 577% sold on July 1 its position is as strong from a practical standpoint as with 616 Points sold on June 1. The position of all grades has strengthened materially since the beginning of the second quarter of 1917, as Clear has moved up from 194% to 218%, No. 1 from 224% to 319%, Factory from 213% to 577%, and all three grades from 208% to 285%, representing [fol. 2939] gains respectively of 24 Points, 95 Points, 364 Points and 77 Points, since April 1st, the beginning of the Second quarter.

In the following table May and June 1917 are Compared:

	Stocks	Orders	Shpmts.	Prodn.	N. B. B.	Members.
June 1.....	22,489 M	33,419 M	12,391 M	9,591 M	9,551 M	May, 23
July 1.....	22,195 "	29,527 "	10,507 "	9,978 "	6,123 "	June, 23
Incr.	.....	.....	.....	387 M	.....	
Decrs. ...	294 M	3,892 M	1,884 M	.....	3,428 M	

The Spreads recommended by the Market Conditions Committee in its last report were adopted by a vote almost unanimous, only one

member voting in the negative on the recommendation of Differential on Birch Flooring in the Clear and No. 1 grades.

The revision of the Rate Book has been completed and the fillers are being reprinted on stronger paper and will be supplied to the members for their Rate Books within a few days. Provision has been made for the listing of new towns so that members can keep their Rate Books up to date.

Test Run.—The Committee is deeply indebted to one of the members of the Association for the results of a Test Run which was completed early this month and an analysis of which is attached.

The rough lumber used was Lower Michigan Maple about 200 M feet, consisting of 71% No. 1 Common and 29% No. 2 Common, and we have applied as the market value of this stock the prices obtained on two recent sales of similar stock, namely, 1,100 M feet at $30.00 and $25.00, and 400 M feet at $33.00 and $28.00. These sales were made on the open market and we learn from reliable sources that the prices mentioned are authentic.

In arriving at the value of the flooring product we have applied the present M. P. P. basis, and the results are far from satisfactory if we assume that the flooring manufacturer is entitled to any profit at all. Aside from any question of profit it shows an actual loss of 19¢ in one case and $3.97 in the other case.

Our Survey of Costs is largely composed of data covering the year 1916, and as labor and other manufacturing costs have greatly increased during 1917, it was suggested that hereafter quarterly Surveys of Costs be obtained, so that more reliable conclusions can be formed regarding current conditions. The Committee, therefore, recommends that the Secretary obtain from as many members as possible a quarterly Survey of Manufacturing and Marketing Costs, beginning July 1, and that similar information, embracing the first and second quarters of 1917, also be obtained, if possible.

While the advance in flooring values since last year looks good on paper, the manufacturers of flooring should not be mislead, but should remember that as a matter of fact the advances in flooring have by no means kept pace with the advances in the raw material and in the costs of production. If rough Maple lumber advanced $10.00 it calls for an advance of $12.50 on flooring, and if the advance is considered $12.00 it calls for an advance of $15.00 on flooring, assuming that the average waste in the manufacture of flooring is 20%.

[fol. 2941] GOVERNMENT'S EXHIBIT No. 52-G

A Semi-Annual review of the first half of 1917, prepared by Mr. Thomas, as Chairman of the Committee, was then read by the Secretary and on motion was received, and it was ordered that a copy be sent to each member of the Association.

As new business the Committee recommends the consideration at this meeting of the extension of the duration of the Minimum Price Plan from November 1, 1917 to January 1, 1919, to run concurrent with the duration of the Allotment Articles.

It was explained that in order to extend the duration of the Minimum Price Plan, that the affirmative vote of every member of the Association would be necessary.

The following resolution was thereupon offered:

Resolved that the Minimum Price Plan be, and is hereby extended from November 1, 1917 to January 1, 1919.

The following twelve members voted in favor of the adoption of the resolution: Nos. 1, 2, 6, 12, 22, 29, 30, 33, 43, 44, 46, and 48.

As seven members were absent, and as four of the members present wished further time for consideration, the Secretary was instructed to communicate with them (the eleven members) and get by mail their formal votes on the resolution by August 10th to 15th.

* * * * * * *

Five numbers of MFMA Service (our Monthly Bulletin) have been issued, and the August number is now in preparation. It will deal with a timely topic—the building of new factories and similar buildings needed to take care of the expansion in business resulting from the war, and the use of No. 1 as well as Factory will be recommended because of the oversold condition in Factory, and the difficulty of obtaining it if the demand continues to increase.

[fol. 2942] It has been thought for some time that the Association should publish a booklet in which should be incorporated complete information pertaining to Maple, Beech and Birch Flooring, so that architects, contractors, lumber dealers and the public generally, can find in one book everything in the way of information that is now contained in the six booklets we have published together with such additional information as the Committee may decide should be embodied in the book. A booklet of this kind with the contents properly arranged, classified and indexed, for ready reference, and with illustrations of the many types of buildings in all sections of the country in which our flooring is in use, would be of great value to everyone interested in any way in the use of our product.

The Committee wishes to obtain from the members as much material as possible to use in the new book and will appreciate it if you will send to the Secretary copies of any flooring literature of your own which you have recently published. The Committee would also like photographs of buildings of all kinds for which you have furnished flooring and which have been erected during the past year. If you have no photographs of such buildings, will you please obtain them for us through your selling representatives or customers, and the Committee will be glad to pay all expenses incurred whether or not the photographs are used in making cuts for te booklet. It is very desirable to have many different types of buildings in widely scattered localities, to show that the use of Maple, Beech and Birch Flooring is country wide. "Do Your Bit."

The Secretary stated that Mr. Robertson had prepared at the request of the Committee, a report on his work as Field Representative. Mr. Robertson then presented and read his report and on motion it was accepted and the Secretary was instructed to send copies to the membership. The members present expressed their hearty approval of Mr. Robertson's work.

The Committee further reported that arrangements had been made with Mr. Robertson to continue his work as Field Representative

in the territory not already covered, so that all the members of the Association would share in the benefits of his work.

* * * * * * *

[fol. 2943] After luncheon was served trade conditions were discussed, and the opinion was expressed that the volume of flooring business during the Second half of 1917 is likely to be far below the Second half of 1916, and that in view of the outlook that the continuance of the M. P. P. and radical curtailment as individual manufacturers, in the production of flooring offer the only solution—

* * * * * * *

[fol. 2944] GOVERNMENT'S EXHIBIT No. 52-H

Maple Flooring Manufacturers' Association, Chicago

Semi-annual Report Market Conditions Committee, July 20, 1917

To members:

GENTLEMEN: The statistical reports prepared by Mr. Keehn for the first half of the year give all the available data of that character. Whether such reports are regarded as merely a comprehensive review and record of a past period or whether they have an additional value as a guide for the future, depends largely upon the method of their analysis and interpretation. When the significance of each of the various factors of the statistical data is determined and the influence of other factors, such as outside competition, building activity, manufacturing costs, buying seasons and the character of the demand, is properly estimated, we have acquired the Eyes of Business, can see ahead with greater clearness and can plan for the future with greater confidence of success.

As an aid in the analysis of statistics a barometer has appeared in our monthly reports during the past year to show a graphic comparison of conditions with the corresponding month of the previous year. The barometer gives a birdseye view of conditions but does not estimate the comparative value of its various factors. However, before discussing this feature, an explanation of the construction of the barometer, how and why it is thus made, may be informative and increase its value.

During January and February we had 25 members, during March, 24 and during April, May and June, 23. The barometer is adjusted to these changing conditions in the following manner.

The first shaft is the Measure and you may have noted that it is always the same height. It is an arbitrary yardstick.

The relative heights of the other shafts are determined by the percentage of increase or decrease of the various factors based on the reports of the same members for corresponding periods. Consequently the June, 1916 business of the two members who have

dropped out since the first of this year was not considered in making the barometer for June 1917.

The barometer each month reflects a comparison under like statistical conditions with the same month of the previous year.

[fol. 2945] Returning now to the comparative values of the various factors of the barometer:

The factors are:

Stocks on Hand.
Unfilled Orders.
Shipments.
Production.
New Business.
Average Values.

Inasmuch as the value of any factor may change with the changes in surrounding conditions, it is impossible to formulate any arbitrary or fixed rules for determining market conditions. The monthly combination of factors is kaleidoscopic, never twice the same. Consequently the significance of the various factors of the barometer must be estimated by judgment based on experience.

This may be illustrated by the barometer for June. Based on the half year it shows slightly less than the average "Stocks on Hand", the lowest "Production" and the highest "Average Values" of the period. These are important factors and if considered by themselves would seem to fore-shadow good results for July. But the other statistical factors show that relatively "Unfilled Orders" fell 26 points in June and that "New Business" and "Shipments" are the lowest in six months. This gives us comparative results based on corresponding periods last year.

To show the trend of current conditions a comparison of May and June this year indicates that during June:

Stocks on Hand decreased 1 Point.
Unfilled Orders " 11 "
Shipments " 15 "
Production increased 4 "
New Business decreased 36 "
Average Values increased 3 "

The reduced volume of New Business in June may be due to earlier booking in anticipation of advancing prices but the falling off in Shipments should be seriously considered. And it should also be noted that the first of this month records the smallest volume of Unfilled Orders shown this year.

It is obvious that right here the non-statistical factors demand attention. These are:

1. Building Activity.
2. Character of Demand.
3. Manufacturing Costs.
4. Outside Competition.
5. Buying Seasons.

We know (1) that there is a material decrease in building activity that requires hardwood flooring, (2) that the demand for Clear is relatively less than for No. 1 and Factory, (3) that the manufactur-

ing cost of flooring was never before so high as it is now and that costs are increasing, (4) that outside competition is active and aggressive and (5) that July is normally a quiet month for new business and is more likely to be so under present conditions.

[fol. 2946] The foregoing brief analysis of conditions the first of this month affords a basis for the conclusion that the volume of Shipments and New Business for July will be less than normal, but that the special demand for No. 1 and Factory may support some advance in prices of those grades. It is also evident that at present the demand cannot be increased by price concessions. Also that prices are not likely to be reduced on account of high manufacturing costs and easy warehouse conditions. The present manufacturing plan should be to reduce the output of Clear flooring and increase the output of No. 1 and Factory.

This is not a Semi-Annual Report in conventional form. It is rather a report and explanation of methods and your committee has taken the liberty of offering it with the hope that it may suggest ways of analyzing our statistical reports from month to month so that they may be more valuable to you as a basis for estimating future conditions.

Respectfully submitted, Morris E. Thomas, Chairman; E. Harvey Wilce, B. P. Whedon, William E. Cox, George Strable, C. H. Law, J. D. Staple, of Market Conditions Committee.

[fol. 2947] GOVERNMENT'S EXHIBIT No. 52-I

January 19, 1918.

John Schroeder Lumber Co., Milwaukee, Wisconsin.

GENTLEMEN: The annual meeting of the Association held yesterday was well attended in spite of weather conditions, eighteen members being represented. We are very sorry you could not be here to have heard and taken part in the discussion of the subjects considered at the meeting.

A full account of the proceedings of the meeting will be sent you early next week, probably Tuesday or Wednessday, as Monday is a "Garfield Holiday" on account of being a heatless day in office buildings; in the meantime, we are sending you the Annual Statistics and the Barometer for the year 1917.

Each member of the Market Conditions Committee who attended their meeting on the 17th made an estimate of the probable volume of flooring shipments during the year 1917, and the average of all the estimates was 69,375 M. If this proves to be the case, it is only too evident what the curtailment in Production must be as a matter of individual policy, if the manufacturers of flooring wish to harmonize supply with demand. If the present rate of Production is continued in spite of the diminishing demand for flooring, the total Stocks on Hand by April 1st will be a painful surprise to the Association.

Yours very truly, George W. Keehn, Secretary.

Mr. Geo. W. Keehn, Rector Bldg., Chicago, Ill.

DEAR SIR: In renewing our membership, beginning March 1st, in the Maple flooring bureau, we will continue in same under the condition that it is to be continued along the lines as heretofore, namely, for the purpose of regulation in grading and classification of Maple Flooring, statistics and other general information, and al-o promotion of the sale of Maple flooring, and that it is not to be a combination, conspiracy, trust, pool, agreement or contract intended to restrain or prevent competition in the supply or price of Maple flooring, or which shall in any manner control the price of same, fix the price thereof, limit or fix the amount or quantity thereof to be manufactured, or fix any standard or figure by which its price to the public shall be in any manner controlled or established. In other words that the rule and method of said bureau are not to conflict with the National laws or State laws of Wisconsin.

Yours truly, John Schroeder Lumber Co.

[fol. 2951] GOVERNMENT'S EXHIBIT No. 52-L

Maple Flooring Manufacturers Association, Chicago

October 14, 1918.

To our members.

GENTLEMEN: The Allotment Contract and the MPP both expire by limitation on December 31st and as the question of their renewal will no doubt be discussed at the next general meeting, to be held on the 24th, we are submitting to you for your consideration in the meantime the following outline as offering a fair and equitable basis or foundation for the renewal of the two contracts, in case it is the desire of the members of the Association to renew them:

1. Duration of Allotment Articles

Three years from January 1, 1919, to January 1, 1922.

The present Allotment Contract and previous Allotment Contracts were for three years and it would seem desirable to follow this precedent.

2. Basis of New Allotments

60% of Allotments plus 40% of Shipments during the calendar years 1916, 1917 and 1918, reduced to annual averages and then reduced to a percentage basis. (A separate mathematical calculation will be required in the case of The Bigelow-Cooper Co. (No. 49) who joined the Association on November 1, 1917; also in respect to

Strable Lumber & Salt Co. (No. 33) to whom was transferred, on January 1, 1918, 30% of the Allotted Percentage of Bliss & Van Auken Lumber Co. (No. 12). These calculations can be easily worked out in a fair and equitable way.)

Members who reduced their output of flooring during the past three years benefited the industry as a whole. This fact is properly recognized by taking 60% of Allotments and 40% of Shipments, thereby giving the old Allotments a 50% higher value as a factor in the new Allotments than is given the Shipments. This should be considered a fair and just equalization of all conditions and circumstances existing during the three year period ending with this year.

3. General Fund

The payment into the General Fund to be $4.00 per M feet instead of $3.00 per M feet.

The maximum margin of profit sought under the Allotment Articles and the MPP in the manufacture and sale of flooring is 10% on selling values FOB mills. When the present Allotment Contract was renewed, as at January 1, 1916, the average value of the product of 13/16" x 2¼" face Maple Flooring FOB Group E Mills was $34.77 and consequently the $3.00 payment into the General Fund represented about 8½%. The average selling value in August of this year was $53.59 and flooring conditions will be much better protected if the General Fund payment is made $4.00, or 7½% of average selling values, instead of $3.00 which is only about 5½% of present selling values.

With a $4.00 payment on Under-Shipments members will be encouraged to operate on a lower basis of production than if they received only $3.00 on Under-Shipments; and on the other hand over-production will be discouraged if members pay in $4.00 instead [fol. 2952] of $3.00 on Over-Shipments and the joint effect under a $4.00 payment working in both directions must result in greater benefit to the industry than under a $3.00 payment.

4. Sales and purchases of flooring among members of the Association to be reported one-half by the Seller and one-half by the Buyer. This would result in a more liberal exchange of business among members of the Association and the Seller would be in a position to make more favorable prices to his fellow member than if the entire amount of the shipment is reported by the Seller. Members whose conditions may compel them to manufacture more flooring than is readily absorbed by their own trade, will be glad to find an outlet by selling to other members of the Association, reporting one-half of the quantity and paying in an equivalent of only $2.00 on the entire shipment instead of $4.00; on the other hand, members whose conditions are different will not need to force their manufacturing operations in order to supply their normal trade if they can purchase from other members on a basis which will leave them a margin after reporting one-half of the quantity and paying in an equivalent of $2.00 on the entire quantity so purchased instead of manufacturing the flooring themselves.

Any system that wlil tend to promote a liberal exchange of business among the members should be fostered because it will result in greatly reducing the aggregate stocks carried and avoid the many needless and excessive duplications of the same items in every flooring warehouse; in other words, members would freely draw upon each others stocks, individual stocks carried could be reduced to a minimum and the total Stocks on Hand would soon work down to a level consistent with the demand.

In this connection uniform shape, matching, etc., would be very desirable.

Inasmuch as the Seller and the Buyer would each report one-half of the quantity so sold and purchased, our statistics would be kept accurate and in balance and would always show the total actual consumption of flooring.

5. The 75% clause and all other essential features of the present Allotment Articles to be retained.

6. The MPP to be rewritten to include all modifications adopted to date and its duration to run concurrent with the Allotment Articles.

It would be my thought not to incorporate the Allotment Articles and the MPP in one document, but to have the MPP supplemental to the Allotment Contract as at present, so in case the Federal Trade Commission should advise the cancellation of the MPP it can be done without disturbing the Allotment Contract or vice versa.

I wish to say that the proposed basis of the new Allotments is laid down as a broad principle without regard to or knowing how it may work out in any individual case.

Respectfully submitted, George W. Keehn, Secretary.

Next quarterly meetings: Committees, Wednesday, October 23d; Association, Thursday, October 24th.

[fols. 2953 & 2954] GOVERNMENT'S EXHIBIT No. 52-M

May 19, 1919.

John Schroeder Lumber Co., Milwaukee, Wis.

GENTLEMEN: Replying to yours of the 14th requesting us to cancel your membership in the Association:

If it will be agreeable to you, we would like to have you continue your membership until Just 1st at least, in order that our statistics for the semi-annual period ending June 30th, will include your statistics and, therefore, be complete for the first half of 1919.

I should have explained to you more fully the other day that because the Association's volume of flooring shipments was so small during the first quarter of 1919, amounting to only 3½ millions in January, 4½ millions in February and about 9 millions in March with the new members in, 10c per M on the shipments would not, of

course, provide sufficient revenue to cover the expenses in connection with the statistical reports, Rate Book, etc. However, April shipments show a considerable improvement, and we hope that times are going to be better for the flooring industry and that we shall soon be back to our normal volume of business and normal rate of dues.

When the Articles of Association expired on December 31st, their duration was extended to July 1st, and as all memberships will expire on July 1st, we will appreciate it very much indeed if you will continue with us until then, and if the work of the Association goes on, you could decide then whether or not to continue your membership after July 1st.

It also seems to me that it would be an advantage to you to continue your membership in the Association because if you wish to purchase any flooring, our members will be in a position to make you more favorable prices if you are a member of the Association than if you are not a member.

Awaiting your reply and with best regards and good wishes, I am,

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 2955] GOVERNMENT'S EXHIBIT No. 52-N

We have found the use of the stamp and sticker described very productive of favorable results and the annoying correspondence over violations of discount terms has been almost eliminated thereby.

What is needed most and that which is the incentive of our letter to you is, co-operation of other shippers and we believe that this subject is worthy of much more than just your casual consideration.

Do you know what the cash discounts on your accounts amount- to last year and the proportion of which were not valid, the latter representing what you carelessly gave away and which in realty was an actual loss with no resulting compensation?

The excuse for violation of discount terms is almost invariably, "The other manufacturers allow it?" Are you one of the other fellows?

Ask your auditor about this subject and if our statements are true.

Yours truly, Wisconsin Land & Lumber Co.

WBE. EJ.

This stamp is placed on all quotations:

Terms of sale.—60 days net, or subject to discount if paid as follows:

2% if paid within 15 days from date of invoice.

1% if paid after 15 days and within 30 days from date of invoice.

If delivered prices are quoted freight charges must be deducted before computing discount.

Delivered prices are based upon and subject to present rate of freight to point of delivery; the freight at the existing rate being included for your convenience; any advance in freight rate, and all other charges, duties and taxes to be paid, in addition, by consignee.

This sticker is attached on all invoices:

Terms of Sale

60 days net, or subject to discount, if paid as follows:
2% if paid within 15 days from date of invoice.
1% if paid after 15 days and within 30 days from date of invoice.
No discount will be allowed which does not conform with these terms.
On delivered invoices freight must be deducted before computing discount. War tax to be paid by consignee.

NOTE.—Discount is equivalent to a liberal interest allowance for unexpired time and above terms must be observed if the discount privilege is to be utilized. If a delivered shipment and car has not arrived within the desired discount period, remittance should be made after deducting estimated freight. Discount will be allowed only on such amount as may be remitted within the respective discount periods. Any unpaid balance remitted after 30 days must be net cash and will not be subject to discount.

Few realize that 2% discount at 30 days amounts to 24% interest and other violations in ratio, all being unthinkable in astute business practice.

[fol. 2956] Hermansville, Mich., March 5, 1920.

To members of Northern Hemlock and Hardwood Association and Maple Flooring Manufacturers Association.

GENTLEMEN: The discount privilege has been a flagrantly abused one and we know of no other industry that has been passive under the glaring monetary losses incurred and the vexatious correspondence resulting, then the lumber trade.

Discount in interest for prepayment on unexpired free time and is purely a banking proposition. Why then should violations be permitted any more than a bank might be expected to waive interest on a loan? It is unthinkable in astute business practice.

2% discount shiftlessly allowed after lapse of discount period, for instance on 1,000 ft. of FAS Birch means that the customer has been permitted of his own free will to cut the price $4.00 per M feet, and on Hemlock lumber about $1,000 per M feet.

For a long period we have been persuing a firm policy in an endeavor to correct this great evil of our industry, as far as our own interests are involved.

Find attached hereto a sticker also a stamp impression as to terms of sale. The stamp we use on all quotations and this is followed

consistently and diligently with the sticker placed on all invoices.

The stamps may be obtained of any rubber stamp manufacturer and the sticker was turned out for us by the H. G. Razall Mfg. Co. of Milwaukee, Wis.

[fol. 2957] GOVERNMENT'S EXHIBIT No. 52-O

Feb. 25th, 1920.

G. W. Keehn, Sec'y, Chicago, Ill.

DEAR SIR: The sales report of Feb. 24th is acknowledged and is interesting.

In analyzing prices, we have always considered basicly the f. o. b. loading point price as the best guide for comparison in market value digest.

As applying to our desire, we would prefer that all prices to be reduced to loading point basis and each item grouped to show readily the varying prices of each item.

Find enclosed our sketch made today in deduction from your report of such items as we are interested in as covered by the report and which will make clear our explanation.

Please believe we are not criticizing your method of report, which is consistent with the group reports of the past.

However, so many members do not analyze much of thier own accord and the closer to a kindergarten method a report can be made the more efficient it is on the average.

There may be much better methods of form than we have suggested, and ours is merely an off hand sketch to obtain the desire explained.

Yours truly, Wisconsin Land & Lumber Co., Sales Dept.

WBE. EJ.

[Omitted in printing]

[fol. 2959] GOVERNMENT'S EXHIBIT No. 52-Q

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Telephone Franklin 3960

April 26, 1920.

To the Board of Trustees.

GENTLEMEN: At the meeting of the Market Conditions Committee held on the 22nd, the case of the Government against the so called Open Competition Plan of the American Hardwood Manufacturers Association, and also known as the Memphis case, was dis-

cussed and Dr. Earle and the writer were appointed a committee to consult with Attorney Jacob Newman regarding what course our Association should pursue in view of the decision of the Federal Judge at Memphis.

We enclose copies of a letter from Mr. Newman and of my letter to the members of the Market Conditions Committee who attended their meeting on the 22nd, and as these letters outline the situation fully we need not go into further details in this letter to you.

We are writing to Dr. Earle as President of the Association, asking him whether or not he deems it advisable to have a meeting of the Board of Trustees and will advise you promptly upon receipt of his reply.

Would it be your thought to send copies of Mr. Newman's letter to the other members of the Association or wait until a meeting is held of the Board of Trustees in case Dr. Earle considers it best to call a meeting?

Yours very truly, George W. Keehn, Secretary.

Enc.

[fol. 2960] GOVERNMENT'S EXHIBIT No. 52-R

April 26, 1920.

George W. Keehn, Esq., Secretary Maple Flooring Manufacturers' Association, Chicago, Illinois.

MY DEAR SIR:

Subject: Maple Flooring Manufacturers' Association

You have asked us for our opinion with respect to what is the proper course for the Association to pursue in view of the injunction recently obtained by the Government in the Federal Court at Memphis, Tennessee, against the so-called Open Competition Plan of the American Hardwood Manufacturers Association, and in reply we beg to say:

1. We have examined the position taken by the Government in the Memphis litigation and after carefully considering the matter we have reached the conclusion that inasmuch as an injunction has been issued and is now in force, all things considered, it would be the proper thing for your Association to obey the spirit of the injunction until the Supreme Court of the United States has settled the fundamental question involved.

2. We believe the Supreme Court of the United States will hold that Associations like your have the right to gather and distribute among their members the history of past and completed transactions such as Shipments, Production, New Business Booked, Stocks and Unfilled Orders on Hand and the prices actually obtained in bona fide sales.

3. The injunction in the Memphis case ordered the parties in that litigation—

"Not to take any further steps whatsoever in compiling or distributing thru the said F. R. Gadd, 'manager of statitsics' or otherwise, at Memphis, in this district, or elsewhere, the next issue of the monthly stock reports, monthly production reports and weekly sales reports of the said so-called Open Competition Plan, or any other issues of any such or similar reports."

The foregoing injunction prohibits the doing of many of the very things which you have been doing and which we believe are lawful, because you are simply making known to the members of your Association the history of past and completed transactions, and not what the members intend to do or may do in the future. All this is merely historical and involves no agreement respecting production prices or sales.

Furnishing such historical data to the members of the Association will undoubtedly give them an intelligent conception of the state of the market and the conditions of the trade, but they have the legal right, in our judgment, to such knowledge and information. If such knowledge and information tends to intelligent competition and a reasonable steadying of prices, that fact in itself does not, in our judgment, violate the Federal Anti-Trust laws. The supreme Court of the United States has repeatedly said that a reasonable restraint of trade does not violate the Federal law.

In giving such historical data to its members, the Association is only doing what hundreds of other Associations, like stock exchanges, boards of trade and similar institutions, have been doing for many years, and in truth is doing simply what the Government itself has been doing for farmers, cotton planters and others.

4. In view of the foregoing situation, our judgment is that your Association should suspend such of its activities as might be construed as coming within the prohibition of the Memphis injunction until the Supreme Court of the United States has decided the questions involved. Our information is that the Memphis case is to be prosecuted with vigor and will have an early hearing.

Very truly yours, Newman, Poppenhusen, Stern & Johnston,
(Signed) by Newman.

JN:MEB.

Weekly Sales Reports

To members.

GENTLEMEN: In order that all the members may be fully posted regarding the state of the market as reflected by current sales, and in accordance with the action taken at the meeting yesterday, all the members of the Association are to make Weekly Reports of all their sales of Maple, Beech and Birch Flooring. In case you have made no sales during the week, be sure and send in your report just the same with the notation "No Sales."

We enclose blank form for your report for the week ending January 8th.

If possible, please always make out these reports and mail them to us at the close of business Saturday of each week, so you will always receive our report on Tuesday or Wednesday of the following week.

Yours very truly, George W. Keehn, Secretary.

[fol. 2963] GOVERNMENT'S EXHIBIT No. 52-U

February 26, 1921.

To members.

GENTLEMEN: In accordance with the action taken at yesterday's meeting our weekly reports of sales commencing this week will show under each group the number of each member belonging to that group who has not reported, if any, the same as our weekly reports now indicate in the case of members reporting "No Sales," so if there is any week in which you make no sales please be sure to send in your report with the notation "No Sales."

Our report for the week ending today will not be compiled until Wednesday or possibly Thursday in order to give every member an opportunity to send in his report to us. We enclose another supply of blank forms.

Very truly yours, George W. Keehn, Secretary.

ECS:L.

[fol. 2964] GOVERNMENT'S EXHIBIT No. 52-V

March 2, 1921.

To members.

GENTLEMEN: Your Market Conditions Committee expects to hold a meeting the day before the next general meeting sometime after the middle of March and they would like to have more complete information on manufacturing and marketing costs, as only a few of the members have sent us their Survey of Costs for the last quarter of 1920.

You can appreciate the importance of our Survey of Costs being kept up-to-date and that the more reports we receive from the members the better will our compilation of average cost prove representative of conditions in the industry as a whole. We are enclosing blank forms to those members who have not yet sent in their Survey of Costs.

The Committee would like to receive from the members information on any recent sales of Maple, Beech or Birch flooring lumber to be used in connection with our compilation of flooring costs. They would also like to have the results of some test runs as the test run figures which we have been using are those which have been made a number of years ago and we should have something more recent. If you have made any test runs recently or during 1920, we would be glad to have the details and will, of course, hold same strictly confidential. We would like to have the quantity in feet of each grade of rough lumber used and the quantity in feet of each grade, thickness, and face of flooring produced. We can reduce these quantities to percentages unless you wish to do so for your own information.

We would like to have any information or figures you can give us not later than about the 18th of March if possible. Thanking you in advance for the favor,

Very truly yours, George W. Keehn, Secretary.

ECS:L.

Sorry not able to give on Mfg. Costs for past 3 mo. as we have not been operating during that time.

[fol. 2965] GOVERNMENT'S EXHIBIT No. 52-W

May 26, 1921.

Weekly Sales Reports

To members.

GENTLEMEN: Only three of the members who attended the general meeting on the 20th and who promised then to make the weekly reports of sales did not make their reports for the week ending May

21st. No doubt they are under the impression that the new Plan under which these reports are to be made by every member of the Association would begin with the week ending May 28th, instead of with the week ending May 21st.

While the East Jordan Lumber Company was not represented at the meeting on the 20th, we wrote them on this subject on the 21st. They have been making their reports regularly so we think their report for last week is probably delayed in the mail. If we receive it later we will include it in next week's report.

Very truly yours, George W. Keehn, Secretary.

[fol. 2966] GOVERNMENT'S EXHIBIT No. 52-X

Chicago, July 1, 1921.

General Meeting, July 8, 1921

To members.

GENTLEMEN: In accordance with instructions received this morning from Dr. Earle as President of the Association, a general meeting of the Maple Flooring Manufacturers Association is hereby called to be held at Hotel La Salle (Suite 209) Chicago, Friday, July 8th at 11:00 A. M., Chicago Time.

It is earnestly hoped that every member of the Association will be represented at this meeting as business of much interest and of great importance is to come before the meeting.

* * * * * * *

Please remember to bring with you to the meeting a complete set of *our* Weekly Sales Reports beginning with the week ending May 28th, so you will have them to refer to when market conditions as reflected in the Weekly Sales Reports are discussed.

Our compilation of the Weekly Sales Reports for the week ending July 2nd will be held here until the meeting on the 8th instead of being mailed out on Tuesday the 5th as if we mail them to you on the 5th some of you might not receive them in time to bring them with you to the meeting.

If possible please mail us your reports for the month of June including Stocks and Unfilled Orders on Hand July 1st so we shall receive them on the 7th and so we can prepare a reasonably close estimate of the outcome of the June business.

Other matters of interest will be presented in reports of:

The Market Conditions Committee.
The Grades Committee.
The Advertising Committee.

The Trade Relations Committee may also have a report to make regarding our list of Wholesalers and Commission Men.

Very truly yours, George W. Keehn, Secretary.

October 11, 1921.

Audit of Weekly Sales Reports

To members.

GENTLEMEN: Statements have been compiled showing the changes resulting from the audits of the members' Weekly Sales Reports, and while these changes may not now be of any material consequence, we thought we would send you our report of the changes to show that this work has been done in accordance with the instructions of the Association at the General Meeting held in May.

We are inclined to the opinion that the mistakes found in the members' reports were simply clerical errors, as mistakes were made both ways; that is, some sales were reported at lower prices than were actually obtained, and vice versa, so we feel that the mistakes that occurred were not made with intent to deceive or misrepresent the facts, but were simply due to clerical errors, misunderstandings, selecting the wrong index letters or looking at the wrong frames in the Rate Book.

The Weekly Sales Reports of the following members have not yet been audited and consequently their reports are not referred to in these statements:

Wilce Flooring Company.
Osgood & Blodgett Mfg. Co.
North Branch Flooring Co.
Oval Wood Dish Corporation.

We have been somewhat in doubt about sending this report to the members but we feel that the members whose reports have been audited are entitled to know the results of the audit and to know that the work has been done as instructed by the Association.

Yours very truly, George W. Keehn, Secretary.

[fol. 2970] GOVERNMENT'S EXHIBIT No. 52-BB

October 17, 1921.

J. W. Wells Lbr. Co., Menominee, Michigan.

GENTLEMEN: Since the general meeting on September 23rd we have had some correspondence with the Northwestern Cooperage & Lumber Co., and also saw Mr. Bushong when he was in Chicago a few days ago, and they have authorized us to say that they will join with the other members who signed the proposed revised Articles of Association on September 23rd, on the same basis as the other signatures were given.

This automatically carries with it the signature of the Wisconsin Land & Lumber Co., and as Mr. Ralston was in Chicago on Septem-

ber 30th and signed up for William Horner, we now need the signatures of only four other members, namely Bigelow-Cooper Co., Nichols & Cox Lumber Co., Holt Hardwood Co. and Flanner-Steger Land & Lumber Co.

Upon hearing this morning from the Northwestern Cooperage & Lumber Co. we telegraphed the four members referred to and are to see Nichols & Cox on Wednesday, Bigelow-Cooper on Thursday, and we expect to see the Holt Hardwood Co. Saturday or early next week and hope to see Mr. Flanner a few days later.

Yours very truly, George W. Keehn, Secretary.

[fol. 2971] GOVERNMENT'S EXHIBIT No. 52-CC

Nov. 2, 1921.

Mr. Geo. W. Keehn, Sec'y Maple Flooring Mfrs' Ass'n, Chicago, Ill.

DEAR SIR: We have your letter of Nov. 1 in reference to sending in our sales reports.

Before indicating our willingness to do this we wish you would please let us know what shape the allotment plan is in and whether it is going to be binding.

Yours very truly, J. W. Wells Lumber Company.

ACW:MK.

[fol. 2972] GOVERNMENT EXHIBIT No. 52-DD

November 1, 1921.

J. W. Wells Lumber Co., Menominee, Michigan.

GENTLEMEN: We hope you will send us your missing Weekly Sales Reports within a few days so we can include them in our report for the week ending November 5th. The other members who have not been reporting lately have promised to turn over a new leaf and we trust you will join with them and do the same.

We feel confident that the information contained in the Weekly Sales Reports will be useful and beneficial to you as well as to the other members in handling sales, as it is far better to know what the market actually is than to be working in the dark.

Very truly yours, Geo. W. Keehn, Secretary.

[fol. 2973] GOVERNMENT'S EXHIBIT No. 52-EE

[Omitted in printing]

[fol. 2974] GOVERNMENT'S EXHIBIT No. 52-FF

November 4, 1921.

J. W. Wells Lumber Company, Menominee, Michigan.

GENTLEMEN: Replying to yours of the 2nd it is hard to tell just now what shape the allotment plan is in, as it was generally understood that unless all the members mentioned in the schedule in our letter of September 16th would sign up without making any changes in the allotted ratios, that the signatures of the members who signed up would not be binding upon them.

It is, of course, a question whether or not the members who expressed their willingness to reinstate the allotment plan would go on without Nichols & Cox Lumber Company, Holt Hardwood Company, and Flanner-Steger Land & Lumber Company, who are still on the fence. Some of them said they would and others said they would not, so I presume the matter will have to rest until the next general meeting of the Association.

Now in regard to sending your Weekly Sales Reports: We think you are depriving yourselves of much valuable information regarding prices obtained and the volume of sales each week, etc. The New Business Booked during the week ending October 29th amounted to about 3,500,000, although four other members besides yourselves did not report.

Very truly yours, Geo. W. Keehn, Secretary.

"Memphis Case"

To members.

GENTLEMEN: You will be interested in reading the following copy of a Bulletin regarding the Supreme Court's Decision in the so-called Memphis Case which was recently issued by the National Lumber Manufacturers Association and which was sent to us by the National Retail Lumber Dealers Association:

"The Attorney General is reported to have made the statement contained in the following quoted from the Federal Trade Information Service.

Continued investigation by the Government into the apparent discrepancy between producing and consuming costs of clothing, fuel and similar articles of necessity was announced by Attorney General Daugherty on Tuesday. Arrangements have been made, the Attorney General said, for meetings between the Department of Justice and representatives of trade associations to discuss the Government's plans for the enforcement of the Sherman law against open price methods. These conferences are to begin soon.

No Fear of Prosecution.—Legitimate business, the Attorney General said, need have no fear of Government prosecution or other action as a result of a national investigation into prices and trade practices.

The Department of Justice holds the view that it is not unlawful per se for open associations or similar organizations to gather statistics or other data. It only is unlawful to collect and compile essential trade and industrial information, he said, when it is used for unlawful purposes. In the collection and interchange of important trade information, he said, business organizations must keep within the four points enumerated by the Department of Justice for the guidance of business interests. Otherwise, a plain violation of the Anti-Trust laws results and Government prosecution is warranted.

Practices Prohibited.—What the trade associations cannot do under the law, according to the Attorney General, may be summed up as follows:

They cannot fix prices.
They cannot apportion territory for sales purposes.
They cannot limit production.
They cannot control competition.

The Attorney General refused to discuss the inquiry into retail prices. He declared that the investigation is being pushed in all parts of the country, that satisfactory progress is being made and that a report might be expected within the next two weeks. He refused to divulge any facts ascertained by the Government agents as to profiteering or the likelihood of legal action."

Information from Another Source

Another report from Washington has the following to say: "The Attorney General is inclined to view the decision in the Memphis case as a sweeping edict against trade associations, while Hoover is convinced that such associations have a real economic function to perform and should be encouraged. Meantime, the Dept. of Justice has put out questionnaires and is making investigation all over the country. The impasse between Daugherty and Hoover may be broken, but we look for ultimate permissive legislation by congress."

You will note that Attorney General Daugherty's opinion and interpretation of the Supreme Court's Decision is practically the same in all essential details as Mr. Newman's opinion and interpretation of the decision in his written opinion, copy of which was sent you a few days ago.

Very truly yours, George W. Keehn, Secretary.

To members.

GENTLEMEN: This is to remind you of the general meeting of the Association to be held at the Congress Hotel (Rooms 1124-1128

on the second floor) Chicago, Friday, February 24th at 10:30 a. m. sharp.

We mailed you the December Reports on the 15th and mailed you yesterday the Annual Reports for the calendar year 1921. Please remember to bring them with you to the meeting so you will have them to refer to.

Five of the members have not yet sent in their reports for January, but we hope to receive them by the 20th and if so we will have our reports for January made out in time for the meeting.

Please bring with you the flooring data as outlined in the blank form below so we can see how the business is running this month.

Hoping to see you at the meeting, we are

Very truly yours, George W. Keehn, Secretary.

General Meeting March 9th

To members.

GENTLEMEN: Referring to our letter of February 25th please be sure and come to the general meeting of the Association to be held at the Congress Hotel, (Rooms 1124-1128 Second Floor), on Thursday, March 9th, at 10:30 a. m. sharp.

The business to come before the meeting is to take definite action regarding the adoption of the proposed new Articles of Association, and also to take action on the other matters mentioned in the call of February 8th for the general meeting of February 24th, which meeting could not be held on account of the storm and which was adjourned to March 9th by the ten members who managed to get to Chicago.

If you have not already done so we hope you will send us, by return mail, your statistical reports for the month of February so that we can compile and submit to the meeting as much data as possible regarding the February business. It will also be of interest to know how March business is running, so kindly bring with you to the meeting the flooring data as per blank form below.

It is imperative that every member of the Association be represented at this meeting and if any of you find that it will be impossible for you to be here, please send a written proxy to some other member of the Association to act for you so that definite results can be accomplished at the meeting.

Very truly yours, George W. Keehn, Secretary.

Reminder

To members.

GENTLEMEN: This is to remind you of the general meeting of the Association to be held at the Congress Hotel, Rooms 1124-1128 (Second Floor) Wednesday, March 29th, at 10:30 a. m. sharp.

It is earnestly hoped that every member of the Association will be represented at this meeting so that definite action can be taken regarding the proposed new Articles of Association.

We have word from Mr. Ralston that the Receiver for William Horner has decided to continue their membership in the Association so I have arranged to be in Grand Rapids Saturday morning the 25th to get their signature to the new Articles of Association conditional, of course, upon getting the signatures of the other members who have not yet signed up.

It will be interesting to know how the flooring business has been going in March so please fill out and bring with you to the meeting the data as outlined in the blank form below.

Very truly yours, George W. Keehn, Secretary.

To members.

GENTLEMEN: Referring to the New Articles of Association, please let us know the number of matchers you have installed for the manufacture of Maple, Beech and Birch Flooring so we can make a record of same opposite your signature to the new Articles of Association.

We have considerable data regarding the number of matchers in each plant, but most of the data is old and we wish to have our record accurate and up to date.

Very truly yours, George W. Keehn, Secretary.

[fol. 2983] GOVERNMENT'S EXHIBIT No. 52-OO

April 10, 1922.

To members.

GENTLEMEN: We are pleased to inform you that the East Jordan Lumber Company have signed the new Articles of Association.

This completes the list with the exception of the John Schroeder Lumber Company who have decided to discontinue the manufacture of flooring. And also with the exception of the Wilce Flooring Company and the Wisconsin Land & Lumber Company, regarding whom we have nothing new to report since the last meeting.

However, we expect both of them to attend the general meeting on the 20th or that we shall hear more definitely from them by that time.

Yours very truly, George W. Keehn, Secretary.

GENTLEMEN: Referring to the Weekly Sales Reports for the week ending the 17th:

If you will make out and mail us this report at the close of business on Saturday the 17th we will receive it Monday the 19th and we will make out our report for that week and have it ready for you at the general meeting on the 21st.

Hoping you will do this, we are

Very truly yours, George W. Keehn, Secretary.

[fol. 2985] GOVERNMENT'S EXHIBIT No. 52-II

June 24, 1922.

To members.

GENTLEMEN: 1. For the information of the members of the Association the Committee on Cost Surveys has made a careful analysis and survey of the Average Cost of Manufacturing and Marketing Maple, Beech and Birch Flooring.

2. The Survey was made in accordance with Article XIV, "Determining Average Cost", of the Articles of Association and the results of the Survey are given in the enclosed schedules, which, for brevity, are called "Average Cost Chart" and Differentials."

3. For the further information of the members, so-called "Delivered Cost Charts" have been compiled. These Charts include the Average Cost of Freight to destination of shipment; in other words, the Average Cost of Freight is added to the Average Cost of the

flooring FOB cars at flooring mills to illustrate what the Delivered Cost would be at destination.

4. Copies of the foregoing under date of May 31, 1922, are enclosed herewith.

5. We are also enclosing statement "Survey of Costs" for first quarter of 1922 and an analysis of the "Three Test Runs of 1921" which are also dated as of May 31, 1922.

6. Under the new Articles of Association the new Rate Book will be made up as follows, and will contain only the following matter when completed:

(a) Title page.
As per enclosed copy.
(b) Key to Freight Rates and Index Letters.
As per enclosed copy.
(c) Average Freight Rates and Index of Towns.
Being the equivalent approximately of the freight rates from Cadillac, Michigan.
Remarks: The freight rates are all being revised to give effect to the reduction ordered by the Interstate Commerce Commission to take effect July 1st.
(d) Average Cost Chart.
Showing approximate relative Average Cost of the different grades and faces of 13/16" Maple Flooring F. O. B. cars at flooring mills.
(e) Differentials from Average Cost of 13/16" Maple Flooring.
(f) Delivered Cost Charts—13/16" Maple Flooring.
(g) Average Cost Chart 3/8" Maple, Beech and Birch Flooring.
(h) Delivered Cost Charts 3/8" Maple, Beech and Birch Flooring.

Very truly yours, George W. Keehn, Secretary.

[fol. 2989] GOVERNMENT'S EXHIBIT No. 52-UU

September 30, 1922.

To members.

GENTLEMEN: Referring to our Reports of Sales made during the weeks ending September 16th and 23rd:

No. 44 advises that they made a mistake in reporting the sale of 17 M feet No. 1 Beech at $64.25 and that it should have read in their report $84.25.

No. 2 advises us that the 10 M feet Clear and 10 M feet No. 1 Maple was a shipping order and should not have been reported as a sale made during that week, as the sale was made in January.

Please make these corrections on your copies of our reports.

Yours very truly, George W. Keehn, Secretary.

[fol. 2990] GOVERNMENT'S EXHIBIT No. 52-VV

July 28, 1922.

To members.

GENTLEMEN: At the last general meeting of the Association, it was suggested that if the quantities of Stocks of, and Unfilled Orders for, regular standard grades and lengths were entered separately on the report covering the different grades, thicknesses and faces, and if the odds and ends like surplus shorts, extra shorts, etc., were entered in the column "Other Kinds", that we would have an accurate showing of the actual conditions existing at the end of each month, respecting Stocks of, and Unfilled Orders for, standard grades and lengths.

For example and as an illustration, the reports of Stocks of 13/16 x 2¼" face Clear Maple Flooring would include only the Stocks of regular standard lengths of that grade and face and the Unfilled Orders for that item would include only the Unfilled Orders for regular standard lengths of that grade and face. Then under "Other Kinds" in next to the last columns, the Stocks of, and Unfilled Orders for, surplus shorts, extra shorts, etc., would be entered. The same method to be followed of course, in reference to all other items of Stocks and Unfilled Orders, so that in all cases and Stocks of, and Unfilled Orders for, regular standard grades and lengths would be comparable.

Will you please make up your reports for July 31st in accordance with the above suggestion?

Yours very truly, George W. Keehn, Secretary.

[fol. 2991] GOVERNMENT'S EXHIBIT No. 52-WW

August 4, 1922.

Survey of Costs

To members.

GENTLEMEN: At the last general meeting of the Association, I was instructed to write to the Members who have not yet sent in their Survey of Manufacturing and Marketing Costs during the second quarter of 1922 and to request and urge them to send in their Surveys as soon as possible, so that our averages will portray typical conditions in the industry.

Several of the Members who were present at the last meeting said they had already compiled their Surveys, but did not feel that it is incumbent upon six or seven Members to do all this work for the benefit and information of the other Members and that they were of the opinion that the other Members should do their part and make this report, as provided for in the new Articles of Association.

You will also recall that our attorney, Mr. Newman has strongly

urged at several of our meetings that all the Members should make this report and that if some of them could not make it with exact accuracy, that they should do the best they could in computing their Manufacturing and Marketing Costs.

The following Members made this report some time ago—three of the reports were received early in July and the other one since the meeting was held:

Holt Hardwood Company, Oconto, Wisconsin.
East Jordan Lumber Company, East Jordan, Michigan.
Northwestern Cooperage & Lumber Co., Galdstone, Michigan.
North Branch Flooring Company, Chicago, Illinois.

Hoping to hear from you early next week, so we can have the Surveys tabulated and the averages compiled in time for the general meeting on the 16th, we are

Yours very truly, George W. Keehn, Secretary.

[fol. 2992] GOVERNMENT'S EXHIBIT No. 52-XX

October 17, 1922.

General Meeting October 24, 1922

To members:

GENTLEMEN: The next general meeting of the Maple Flooring Manufacturers' Association will be held at the Congress Hotel, Chicago, (Rooms 1120-1124) Tuesday, October 24th, at 10:30 A. M. Sharp.

At the last meeting held on August 16th, the question of the Average Cost to the manufacturer of furnishing small quantities of Maple, Beech and Birch flooring for L. C. L. shipment was discussed and was referred to the Committee on Cost Surveys for such recommendations as the Committee may wish to make, so this matter will be open for discussion at this meeting, as unfinished business.

At this writing, only a few members have sent in their reports of their Manufacturing and Marketing Costs during the third quarter of 1922, but it is hoped that other members who can do so will make this report by the end of this week so that the Committee on Cost Surveys will have sufficient information upon which to base a report that will represent average conditions in the industry during the past three months. If you know of any recent sales of rough Maple flooring lumber, please let us have the information as it will be useful to the Committee in computing the average cost of Maple flooring F. O. B. flooring plants.

The Advertising Committee will also have a report to make regarding its work which has been carried on diligently and along the lines reported by the Committee at previous meetings of the Association.

It has now been two months since there has been a "gathering of the clan" and it is hoped that every member of the Association will be represented at the meeting so that trade conditions and the relations of supply and demand for flooring can be discussed and considered.

Will you please mail us on Friday the 20th, your flooring data as per blank form below so we can compile same on Monday the 23rd, and have it ready when the meeting convenes on the 24th?

We expect to have our statistical reports for the month of September made out and in the mail for you on the 19th or 20th, so that you will have an opportunity to look them over in advance of the meeting, and see how the September business turned out.

Kindly let us know whether or not you will be present and how many from your company will attend the meeting and luncheon.

Yours very truly, George W. Keehn, Secretary.

"Do It Now"

To members.

GENTLEMEN: We hope all of you will make special efforts to send us this week all of your reports for the month of October, so we can make out our reports and mail them to you by the middle of next week. This will give you time to look over our reports and be fully posted on the flooring situation in advance of the next general meeting which is to be held on November 15th.

The earlier in the month you get the information contained in our statistical reports for the previous month, the more valuable the informaton is to you.

It would be a grand and glorious thing if every member will do this and send us all his reports on or before the 5th of the month, in accord with Article XV of the Articles of Association.

Yours very truly, George W. Keehn, Secretary.

[fol. 2994] GOVERNMENT'S EXHIBIT No. 52-ZZ

November 23, 1922.

November Business

To members.

GENTLEMEN: In response to our letter of the 10th, 15 members have sent in their flooring data for the first 11 or 13 days of November, and we find the data compare with their October statistics as follows:

November Shipments about 9% more than in October
" Production " 1% " " " "
" New Orleans " 1% " " " "

The 15 members reporting represent of the entire membership:

74% of the October Shipments.
72% " " " Production.
71% " " " New Orders.

Statistics of 15 members regarding Stock Conditions of 13/16 x 2¼" face Maple Flooring on November 11th or 13th show up as follows:

	Stocks on hand	Unfilled orders	Oversold	% sold	% sold Nov. 1st, all members
Clear	2,084 M	4,667 M	2,583 M	224%	308%

Tariff—Canadian Flooring

To members.

GENTLEMEN: We received the following telegram from the Tariff Commission Washington, D. C.:

"Please wire commission number of plants in your association and latest total figures on capital investment number of Employes Annual output and value stop what percent of aggregate output of country represented in your association stop what percent aggregate output is shipped to Canada."

to which we replied as follows:

"Number of plants in our association twenty three stop output this year about one hundred fifty Million feet not including exports stop have no statistics regarding total value but estimate it at approximately ten and one half or eleven million dollars not including exports stop our membership represents about seventy percent or aggregate output of country stop other data you request not at hand but will obtain same soon as possible."

December 28, 1922.

Test Runs

To members.

GENTLEMEN: At the general meeting of the Association on the 19th, it was suggested that new data be obtained based upon recent Test Runs in order that the Average Cost of Maple, Beech and Birch flooring under existing conditions can be ascertained. Conditions are constantly changing and it is important that our Cost data be strictly up to date.

Eight of the members who attended the meeting kindly offered to supply such data and give use the results of any late Test Runs or of their recent flooring operations, and said that if such data was not now available, they would make Test Runs as soon as possible and give us the results of same or of their flooring operations.

In order that our Average Costs will reflect typical conditions, only Test Runs which were made or are to be made from commercially sawed lumber are to be reported and the data which the members are requested to supply are to embrace only the following:

1. The exact quantity in feet of each grade of rough lumber used in the Test Run.
2. The exact quantity in feet of each grade, thickness and face of flooring produced from this lumber.

We will figure out all the percentages and will consolidate all the Test Runs and flooring operations as one Run or operation and thus have a composite picture for you to look at.

It is just as incumbent upon all the members to supply the data as it is upon the eight volunteers, so we sincerely hope that all of you who can possibly do so, will cooperate in this important feature of Association work. We are enclosing blank forms in duplicate for your convenient use. All information furnished will be held strictly confidential in respect to the individual Test Runs or operations and the identity of the member reporting will not be divulged and only the total quantities and average percentages of the grades of rough lumber used and flooring produced after all the Test Runs and floor-

ing operations have been consolidated and considered as one will be made known to the membership.

Thanking you in behalf of the Committee on Cost Surveys and wishing you a Happy New Year, I am

Sincerely yours, George W. Keehn, Secretary.

Annual meeting January 24, 1923, Congress Hotel, Chicago.

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

February 19, 1923.

February Business

To members.

GENTLEMEN: We have received flooring data from 14 members of the Association covering the first 13 days of February, from which it is estimated that if the business during the remainder of February averages about the same as the first 13 days and if the trade experiences of the other 8 members are about the same, that the February business will turn out about as follows:

Shipments about 26% less than in January.
Production about 21% less than in January.
New Orders about 41% less than in January.

The stock conditions of 13/16 x 2¼" face Maple flooring on February 13th of the same 14 members indicate as follows:

On Feb. 13	Stocks on hand	Unfilled orders	Oversold	% sold, 14 members	% sold February 1, all members
Clear	2,158 M	8,502 M	6,344 M	394%	411%
No. 1	1,424	6,812	5,388	478	407
Fcty.	1,099	3,118	2,019	284	389
	4,681	18,432	13,751	394	405

Yours very truly, George W. Keehn, Secretary.

[fol. 3001] GOVERNMENT'S EXHIBIT No. 52-FFF

February 21, 1923.

Test Runs

Committee on cost surveys.

GENTLEMEN: Referring to the attached letter to members regarding Test Runs:

In the five new Test Runs sent us, the following quantities of rough lumber were used—all commercially sawed stock:

No. 1 Common	704 M	52%
No. 2 Common	410 "	30 "
No. 3 Common A	55 "	4 "
No. 3 Common	181 "	14 "
	1350 M	100%

What would you consider the cost of the No. 3 Common delivered F. O. B. flooring mills, based upon recent sales of that grade on the open market?

Flooring produced was as follows:

Clear	385 M	39%
No. 1	423 "	43 "
Factory	171 "	18 "
	979 "	100%
Waste	371 "	27.5 "

We are hoping to receive more Test Runs or statements of flooring operations so we can include same with these five Test Runs and get a larger volume of output to use in connection with our Average Cost Surveys. It is also our thought to add to all the new Test Runs the three Test Runs of 1921, made by the North Branch Flooring Company, Chicago, in which 1539 M feet of rough lumber was used. If we add these three Test Runs to the five new Test Runs already received and also include any other new Test Runs we may receive from now on, it will give us quite a volume of output to use as the basis in compiling our Average Costs.

Yours very truly, George W. Keehn, Secretary.

[fol. 3002] GOVERNMENT'S EXHIBIT No. 52-GGG

February 21, 1923.

Test Runs

To members.

GENTLEMEN: Referring to our letter of December 28th about Test Runs, we are sorry to say that we have not received as many Test

Runs as we should have in order to indicate average results and typical flooring operations.

At this writing, the following members have sent in Test Runs, all of which were made from commercially sawed lumber:

Member	Quantity of rough lumber used
Kerry & Hanson Flooring Co.	601 M
East Jordan Lumber Co.	47 "
Flanner-Steger Land & Lumber Co.	505 "
Grand Rapids Trust Company, Receiver for Wm. Horner, Newberry Plant	111 "
Kneeland-Bigelow Company	86
	1350 M

I. Stephenson Company, Trustees, also sent in a Test Run in which 1219 M feet of rough lumber was used, but as the stock was unedged, the Test Run is not available to merge with the other Test Runs.

Foster-Latimer Lumber Company wrote that they were running only Maple of their own manufacture and as it is not edged or trimmed, they would not be able to show the exact quantity in feet of each grade of rough lumber used.

The Northwestern Cooperage & Lumber Company wrote that they cannot furnish a Test Run because the way they cut and pile their lumber, it is not possible for them to get at the facts closely enough to be of service to us.

We have been hoping that we would get more data either from Test Runs or flooring perations so that we would get more representative results and so that our Average Cost Chart would represent a larger volume of output.

The Committee on Cost Surveys will be grateful to any other members who can and will supply the following data as stated in our letter of December 28th:

1. The exact quantity in feet of each grade of rough lumber used in the Test Run.

2. The exact quantity in feet of each grade, thickness and face of flooring produced from this lumber.

After we hear from more of the members, it is the intention to consolidate all the Test Runs of flooring operations as one Test Run and see how the results compare with the three Test Runs of 1921 which we are now using as the basis of our Average Cost compilations.

Yours very truly, George W. Keelin, Secretary.

[Omitted in printing]

Here follows GOVERNMENT'S EXHIBIT No. 57, marked side folio page 3449.)

[fol. 3450] The total amount of Maple lumber used by factories in the State of Michigan during the year 1920 was 286,363,000 feet, of which 232,425,000 was grown within the State. Of the amount so used 178,477,000 feet was consumed in Planing Mills Products; 63,339,000 feet in Motor Vehicles; 9,756,000 feet in furniture; 133,000 feet in Sash, Doors and Blinds and General Millwork; 2,486,000 feet in Musical Instruments; 5,075,000 feet in handles; approximately 2,000,000 feet in Sporting and Athletic goods; 1,324,000 feet in Agricultural Implements; approximately 5,000,000 feet in Carriages and Wagons; 2,000,000 feet in Professional and Scientific Instruments; the balance being scattered among various industries in small amounts.

From the above figures it can be seen that Planing Mill Products consume approximately 66% of the Maple lumber used in the State of Michigan in 1920. Mr. Brush stated in his Deposition taken in Washington, D. C. that 90% is a very conservative estimate of the percentage of Planing Mill Products represented by flooring. This being true, it will be seen that of the 178,477,000 feet of Maple lumber used in Planing Mill Products in the State of Michigan during 1920, 160,630,000 feet was converted into flooring. Allowing 20% for waste and this figure of 20% appears to be a fair average attained in the various test runs made by the Association, 128,504,000 feet of finished flooring was produced in Michigan during 1920.

The Association Annual Barometer Report for 1920 shows a total Association production for the year 1920 of 131,894,000 feet including Beech and Birch flooring. The report above referred to shows the production for the year of each individual member whose figures are shown in the report. Taking these individual figures it discloses that the Michigan members of the Association produced 116,680,000 feet or 88% of the total Association production approximately.

In the Deposition of George W. Keehn taken at Chicago, Ill., October 22, 1923, appears a statement that 10% represents the amount of Beech and Birch flooring produced by the Association. Therefore reducing the Association production for 1920 of 131,894,000 feet by 10% gives the Maple flooring produced by the Association in 1920 at 118,705,000 feet of which the Michigan members produced 105,012,000 feet.

[fol. 3451] It will be seen, therefore, from the above figures that the percentage relation of the Michigan members of the Association to the total Maple flooring produced in the State of Michigan during 1920 of 128,504,000 feet, is approximately 80%. In arriving at the total Maple Flooring produced by the Michigan members during 1920, their total of 116,680,000 feet has been reduced to take care of Birch and Beech flooring manufactured.

From the Association 1920 Barometer Report it is learned that four Wisconsin members produced in 1920 11,114,000 feet all classes of flooring. Deducting 10% for Beech and Birch flooring would leave approximately 10,003,000 feet of Maple flooring pro-

duced by these four members. No report of production is shown for the Holt Hardwood Company, a member.

Planing Mill Products are classified by the Forestry Service as follows: Ceiling; Finish; Flooring; Mouldings; Partitions; Sheathing; Shiplap; Siding; Weather Boarding; Decking.

I have made a study of the production figures appearing in the various Annual Barometer Reports issued by the Association for the years 1915 to 1922 inclusive with reference to the members production in the States of Michigan and Wisconsin and outside those two States.

The Annual Barometer Report for 1915 gives the total Association production as 134,869,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured during that year leaves a Maple flooring production of 121,382,000 feet.

Twenty Michigan members produced a total during 1915 of 115,002,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 103,502,000 feet or approximately 85% of the total Association production of Maple flooring.

Three Wisconsin members produced a total during 1915 of 9,287,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 8,358,000 feet or approximately .07% of the total Association production of Maple flooring.

Three members of the Association outside the States of Michigan and Wisconsin produced a total during 1915 of 10,880,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 9,792,000 feet by these three members or approximately .08% of the total Association production of Maple flooring.

[fol. 3452] The Annual Barometer Report for 1916 gives the Association production as 139,785,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 125,806,000 feet.

Twenty Michigan members produced during 1916 a total of 117,549,000 feet. Reducing this amount 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 105,794,000 feet or approximately 84% of the total Association production of Maple flooring.

Three Wisconsin members produced during 1916 a total of 9,330,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 8,397,000 feet or approximately .07% of the total Association production of Maple flooring.

Three members of the Association outside of the States of Michigan and Wisconsin produced during 1916 a total of 11,508,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 10,357,000 feet or approximately .09% of the total Association production of Maple flooring.

The Association Annual Barometer for 1917 gives a total production as 123,488,000 feet. Reducing this amount 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 111,039,000 feet.

Twenty Michigan members during 1917 produced a total of 105,734,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 95,160,000 feet or approximately 86% of the total Association production of Maple flooring.

Three Wisconsin members produced during 1917 a total of 7,806,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 7,025,000 feet or approximately .07% of the total Association production of Maple flooring. One Wisconsin Member did not report his production.

Four members of the Association outside the States of Michigan and Wisconsin produced during 1917 a total of 8,251,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 7,426,000 feet or approximately .07% of the total Association production of Maple flooring.

The Association Annual Barometer Report for 1918 gives the total production as 71,453,000 feet. Reducing this amount by 10% [fol. 3453] for Beech and Birch flooring manufactured leaves a Maple flooring production of 64,308,000 feet.

Seventeen Michigan members produced a total of 65,344,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 58,810,000 feet or approximately 91% of the total Association production of Maple flooring.

Three Wisconsin members produced during 1918 a total of 3,897,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 3,507,000 feet or approximately .06% of the total Association production of Maple flooring.

Four members outside the States of Michigan and Wisconsin produced during 1918 a total of 2,212,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 1,991,000 feet or aproximately .03% of the total Association production of Maple flooring.

The Association Annual Barometer Report for 1919 gives a total production as 128,276,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 115,448,000 feet.

Seventeen Michigan members during 1919 produced a total of 104,552,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 94,097,000 feet or approximately 82% of the total Association production of Maple flooring.

Seven Wisconsin members during 1919 produced a total of 19,918,000 feet. Reducing this amount by 10% for Beech and Birch

flooring manufactured leaves a Maple flooring production of 17,926,000 feet or approximately 15% of the total Association production of Maple flooring.

Four members outside of the States of Michigan and Wisconsin produced during 1919 a total of 3,806,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 3,425,000 feet or approximately .03% of the total Association production of Maple flooring.

The Asscian Annual Barometer Report for 1920 gives a total production of 131,894,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 118,705,000 feet.

Sixteen Michigan members produced during 1920 a total of 116,680,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 105,012,000 feet or approximately 89% of the total Association production of Maple flooring.

[fol. 3454] Four Wisconsin members during 1920 produced a total of 8,443,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 7,599,000 feet or approximately .07% of the total Association production of Maple flooring.

Four members outside the States of Michigan and Wisconsin produced during 1920 a total of 5,749,000 feet. Reducing this amount by 10% leaves a Maple flooring production of 5,174,000 feet or approximately .04% of the total Association production of Maple flooring.

The Association Annual Barometer Report for 1921 gives a total production of 101,861,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 91,675,000 feet.

Fifteen Michigan members produced during 1921 a total of 91,265,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 82,139,000 feet or approximately 90% of the total Association of Maple flooring.

Four Wisconsin members produced during 1921 a total of 7,515,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 6,764,000 feet or approximately .07% of the total Association production of Maple flooring.

Three members outside the States of Michigan and Wisconsin produced during 1921 a total of 3,081,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 2,773,000 feet or approximately .03% of the total Association production of Maple flooring.

The Association Annual Barometer Report for 1922 gives a total production of 148,313,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 133,482,000 feet.

Fifteen Michigan members produced in 1922 a total of 125,697,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 113,127,000 feet or approximately 85% of the total Association production of, Maple flooring.

Four Wisconsin members produced during 1922 a total of 16,618,-000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 14,956,000 feet or approximately 11% of the total Association production of Maple flooring.

Three members outside the States of Michigan and Wisconsin pro-[fol. 3455] duced during 1922 a total of 5,998,000 feet. Reducing this amount by 10% for Beech and Birch flooring manufactured leaves a Maple flooring production of 5,399,000 feet or approximately .04% of the total Association of Maple flooring.

From the above study it can be readily seen that approximatly 86% of the total Association production of Maple flooring is centered in the State of Michigan. The Maple Lumber production statistics gathered by the Bureau of the Census and the U. S. Forestry Service shows that Michigan produces most feetage of that commodity. The Association production figures would tend to support a theory that the Maple Flooring Industry naturally centers near its greatest source of available supply, which is the State of Michigan.

[fols. 3456 & 3457] GOVERNMENT'S EXHIBIT No. 58

Bay City, Mich., Feb. 4, 1922.

Kerry & Hanson Flooring Co., Grayling, Mich.

GENTLEMEN: We would like to ask confidentially if Sam E. Barr still represents you in New York. I remember your Mr. Welsh and the writer had a talk about his representing you there. We have an inquiry covering almost all items in Maple Flooring from him, and we don't wish to quote him if he is representing you, and we thought it might be a tip to you. Please advise us by return mail.

Yours very truly, W. D. Young & Co. Whedon.

BPW/KAW.

[fol. 3458] GOVERNMENT'S EXHIBIT No. 58-A

Feb. 7, 1922.

W. D. Young & Co., Bay City, Mich.

Attention Mr. Whedon

GENTLEMEN: We are in receipt of yours of the 4th and in reply to same would advise that Mr. Sam E. Barr still represents us in New York City, in fact has exclusive agency at that point.

Apparently the New York market is too unsettled for us to do much, if any, business there, as our prices never seem to be in line. Also some of the flooring mills apparently figure that this is a good dumping ground and whenever business is transacted, figure to take from $3.00 to $10.00 less than they can get elsewhere. We do not feel like doing this.

We thank you for having taken the matter up with us and it will be perfectly satisfactory for you to quote Mr. Barr, if you so desire.

Yours very truly, Kerry & Hanson Flg. Co.

FRW/G.

[fol. 3459] GOVERNMENT'S EXHIBIT No. 59

January 31, 1923.

Flanner Steger Land & Lumber Co., Blackwell, Wisconsin.

GENTLEMEN: As stated to your Mr. Flanner in Chicago last week, we are purchasing flooring from time to time. We are anticipating a purchase of some 2¼" Clear Maple Flooring and 2¼" Factory Maple Flooring. If you would care to quote us on these items f. o. b. Chicago in any quantity up to 100,000 feet, we would be very glad to go into the matter.

The writer was very glad to see Mr. Flanner at the meeting last week and wishes to take this opportunity to encourage your regular representation at these meetings. We can say from actual experience, that the personal contact and association with the other members has become very valuable to us and we have been able to capitalize this to a remarkable degree.

With best wishes, we remain,

Yours truly, North Branch Flooring Company. —— ——,
Sec'y & Treas.

CB/AO.

[fol. 3460] GOVERNMENT'S EXHIBIT No. 59-A

Contracts and agreements are not binding when circumstances and conditions arise that are beyond the control of this company.

Blackwell, Forest County, Wis., Feb. 5, 1923.

North Branch Flooring Co., 2415 Barry Ave., Chicago, Ill.

Attention of Chas. S. Brand

GENTLEMEN: We wish to acknowledge your letter of January 31. On returning from the flooring meeting, the writer found that a number of orders for Clear flooring had been booked and since this we have had several others coming in which take care of our product

for the time being. Consequently, we are not in a position to quote at this time on the stock you inquire for. We certainly appreciate your writing, however, and trust that we may yet fill some of your requirements.

We are quite in accord with what you have to say regarding the value of attending the Flooring Association meetings. It is the expectation of Mr. Frank Flanner and myself that someone from this company will be at these meetings.

You may be interested to know that we have purchased recently, 300 M' of flooring stock at $55.00 and $35.00, delivered Blackwell, and another half million at the same prices f. o. b. manufacturing point.

With kindest regards, we are

Very truly yours, Flanner Steger Land & Lumber Co., by P. D. Flanner, Sec'y & Treas.

PDF:LH.

[fol. 3461] GOVERNMENT'S EXHIBIT No. 60

March 19, 1921.

Geo. W. Keehn, Sec., Chicago, Ill.

DEAR SIR: What is the matter with the Maple Flooring situation? We find the last two weeks' report, cuts made by No. 3 and No. 5 of $10.00 per M and over, and the quotations reaching our market we found yesterday lists from Wisconsin Land & Lumber Company, Stephenson and Naill & McClurg in this market quoting—

For Clear Maple			$98.00
1½ # 1	"		73.00
2¼ # 1	"		81.00
1½ Fac.	"		35.00
2¼ "	"		46.00

If there has been a new list established it would seem to us that we all ought to be advised, as our quotations at the standard price are being turned down daily

Yours truly, Osgood & Blodgett Mfg. Co.

FSB/B.

[fol. 3462] GOVERNMENT'S EXHIBIT No. 60-A

August 23, 1921.

Oval Wood Dish Corporation, Mr. Frank M. Hodges, Manager Department Lumber Sales, Tupper Lake, New York.

GENTLEMEN: We have recorded in our minutes of the general meeting of the Association held on the 19th, that you were admitted to membership in the Association. We will date your membership

as at August 1st, so that you will have the benefit of the July Statistics and also the exchange of the information contained in the Weekly Sales Reports beginning with the report ending August 27th.

We are enclosing the following:

1. Minutes of Meeting of August 19, 1921.
2. Copy of letter to members dated August 20th, regarding the consensus of opinion as to the current market value of flooring.
3. Rate Book containing Tables of Values Based Upon Average Cost and index to towns showing the delivered values based upon the rate of freight from Cadillac, Mich. Cadillac is our basing point as it is practically the geographical center of the production and distribution of flooring and the rates of freight in a general way from Cadillac would be about the average rate of freight from all the Association flooring mills.
4. Statistical reports for the month of July, including Stocks and Unfilled Orders on Hand on August 1st.
5. Blank forms for the Weekly Sales Reports, so you can report to us any sales you made during the week ending August 27th. These reports are reciprocal and are exchanged only among the members who made this report. These reports are audited from time to time to verify their accuracy and completeness.

We are writing today to Mr. M. H. Robertson of East Jordan, Mich., who is our Official Inspector and Field Representative, requesting him to visit your plant as soon as possible and assist you in standardizing your flooring product in accordance with Associa-
[fol. 3463] tion standards and grades.

In this connection we wish to state that sometime ago uniform matching was adopted by the Association so that flooring from all Association mills will fit together. Steel gauges were made and one gauge sent to each mill, so we are sending you, by parcel post, one of the gauges, also a blue-print. The 13/16″ flooring is 1/32″ scant of 13/16″, but the 1/32″ scant is taken from the under side of the flooring, leaving the wearing surface the same as formerly.

We are very glad to have your cooperation as a member of the Association, and should you desire any further explanation, please write us.

For convenience in keeping our records we assign a number to each member of the Association, so we have assigned No. 51 to you as your Association number.

Yours very truly, —— ——, Secretary.

[fol. 3464] GOVERNMENT'S EXHIBIT No. 60-B

September 26, 1921.

Oval Wood Dish Corporation, Mr. Frank M. Hodges, Manager Lumber Sales, Tupper Lake, New York.

GENTLEMEN: In view of the unsatisfactory results of the general meeting on the 23rd, I presume you are wondering what kind of

an Association you have joined, but we feel hopeful that things will soon work themselves out.

Now in regard to the allotted percentages of the other members of the Association: we think we should explain to you that their allotted percentages were based upon their shipments of Maple, Beech and Birch flooring during the 3½ year period, from January 1, 1916, to July 1, 1916, and all the members were, of course, treated exactly alike, and, as a matter of fact, each member automatically fixed his own allotment by the volume of his shipments during the 3½ years, and for that reason we feel that any claims that the members may make that their allotted percentages are not fair, are not well founded, inasmuch as the same basis was used for all of them. The shipments during the 3½ years were reduced to annual averages and are shown in our circular letter addressed to members and dated September 16th.

At the first meeting Mr. Hodges attended he spoke of wishing to pay the expenses of Mr. Robertson on his trip to your plant to look over your grading and to assist you in standardizing your product, so I thought I would let you know that we paid Mr. Robertson $171.94 for that trip. He paid his travelling expenses and $15.00 per day for his time and services while on his trips.

It is the custom of the Association to pay the travelling expenses of members attending general meetings and Committee meetings, so we wrote you a few days ago asking what your expenses were attending the meeting on the 23rd, so kindly let us know and we will forward check.

We have no way at the present time of knowing what your share of the Association expenses should be because you have no allotted percentage or volume of shipments upon which to base your share of the expenses, but that can be arrived at sometime later on. In the past when no allotted percentages were in effect and when no Special Fund was provided for in former Articles of Association, [fol. 3465] each member paid into the Association an initiation fee based upon the number of matchers installed for the manufacture of Maple, Beech and Birch flooring, so we would suggest that, if it will be entirely agreeable to you to do so, you could send us a check for $200.00, or at the rate of $100.00 per matcher, as you have two matchers. We are not making this as a request because the old form of initiation fee is not provided for in our present or proposed revised Articles of Association, but thought we would mention it as a way of handling the present situation and leave it to you to do as you please.

With best regards,

Yours very truly, —— ——, Secretary.

[fol. 3466] GOVERNMENT'S EXHIBIT No. 60-C

September 9, 1921.

The Oval Wood Dish Corp., Mr. Frank M. Hodges, Manager Lumber Sales, Tupper Lake, N. Y.

GENTLEMEN: We have your flooring reports for the month of August, but before entering them in our statistical records we thought we would inquire if the 24,214 feet Clear sold at $65.00, delivered on $5.00 freight, was the regular standard grade and lengths of 13/16 x 2¼" face Clear Maple flooring.

The average value based upon average cost of $90.00 F. O. B. Cadillac, Mich., and the delivered value at $5.00 for freight, would take the index letters BE, as you will note by referring to the Rate Book we sent you.

Whatever price you obtained is all right, of course, so our only object in writing you is to find out whether the grade, etc., are correct, as stated in your report, namely 13/16 x 2¼" Clear Maple flooring, standard grade and lengths.

Yours very truly, —— ——, Secretary.

[fol. 3467] GOVERNMENT'S EXHIBIT No. 60-D

All quotations are for immediate acceptance and subject to prior sale. All agreements as to deliveries are contingent upon delays caused by strikes, fires, accidents, delays of carriers or other causes beyond our control. All quotations made and all orders accepted on basis of present freight rates. Federal tax on freight bills to be paid by purchaser.

Tupper Lake, N. Y., September 12, 1921.

Mr. George W. Keehn, Sec'y, 1045 Stock Exchange Bldg., Chicago, Ill.

DEAR SIR:

Your letter of September 9th is received.

The item of 24,214′ of Flooring reported as Clear at $65.00 should be No. 1, and the price was figured as $60.00 f. o. b. mill and $5.00 freight.

We are enclosing weekly report for September 3rd; and also one for September 10th. The former should have been sent you a week ago, but was overlooked.

Please send us some more of the weekly report blanks and we will try and get them out promptly.

With kindest regard, we are,

Very truly yours, Oval Wood Dish Corporation.

MCC.
Encls. (2).

[fol. 3468] GOVERNMENT'S EXHIBIT No. 60-E

December 3, 1921.

Strable Lumber & Salt Co., Saginaw, Mich.

GENTLEMEN: One of the members of your Market Conditions Committee, writing about our latest weekly Record of Completed Transactions, states that it is very gratifying to note the number of members who are now reporting regularly. They feel confident that the members who do not report, evidently discontinuing their reports because other members neglected to report, now fail to realize the importance of the valuable information contained in our weekly reports and that all but three of our members are reporting.

We believe our weekly Sales Reports to the members have a number of good features. Aside from their indication of the current trend of the market, the demand for each grade, face and thickness in each wood, the total volume alone of weekly bookings in each group and the total of all groups, is enlightening.

You probably had an unusually large volume of flooring orders for the week ended November 16th, and assumed that the experiences of the other members were similar, but could any member have known (or estimated) without the existence of our Weekly Sales Reports that the total New Business Booked of 19 members for the week ended Nov. 19th was very close to five millions? Without these reports they could have knowledge only of an increased demand for Maple, Beech and Birch Flooring, but the real extent of this demand as affecting the different grades and sizes for the entire industry, would not be known until weeks later upon the compilation of our November statistical reports.

It has occurred to us that you would feel that you could not afford to be without this reciprocal exchange of information when you learn that all but three of our members have indicated that they want this information by taking a minute or two of their time to daily record all sales as made on the blank forms provided and mailing them to us at the close of each week. And we would like to have our reports show our member's sales 100% reported, and we can do this if you and the other two missing members we are writing today will kindly send us your report of sales for week ended today. May we count on your cooperation?

Yours very truly, George W. Keehn, Secretary.

ECS.

April 26, 1922.

Oval Wood Dish Corp., Mr. F. M. Hodges, Lumber Sales Dept., Tupper Lake, N. Y.

GENTLEMEN: In accordance with Article XIII of the new Articles of Association there is due from you as your payment into the Mem-

bership Fee Fund the sum of $400.00 on the 2 matchers you have installed for the manufacture of Maple, Beech and Birch Flooring being at the rate of $200.00 per matcher.

Inasmuch as you paid into the old Association on October 10, 1921, the sum of $200.00 as a Membership Fee, we are applying that payment on the $400.00 so please send us a check for $200.00 to cover the balance due and make the check payable to Maple Flooring Manufacturers Association.

Very truly yours, —— ——, Secretary.

April 27, 1922.

Dr. Geo. W. Earle, Hermansville, Mich.

DEAR DR. EARLE: In accordance with the new Articles of Association we are sending out bills today for the Expense Fund and Advertising Fund Assessments for the first quarter of 1922, and although you have not yet signed the new Articles, all the members are hopeful that you will continue your membership in the Association because your cooperation has been of such great benefit to the industry during the past thirty years or more and is needed more than ever at this time.

It is my thought to make up a Financial Statement about May 1st and to consider the business of the old Association terminated as at that date. What do you think about it as President of the old Association so-called? The old Articles themselves do not expire until July 1, 1922, and it has taken some time to get the so-called new Association under way.

January 12, 1923.

Dr. George W. Earle, Hermansville, Michigan.

DEAR DR. EARLE: At the last meeting of the Association the Trustees who were present expressed the earnest wish and hope that you would attend the Annual Meeting of the Association to be held on the 24th, so that they could discuss with you the status of the membership in the Association of your Company. Will it be possible for you to be here on the 24th? If not, the Trustees suggested that I call upon you before then and go over the situation in a general way and report back to the Trustees and to the Association at the Annual Meeting.

In your letter of September 2nd you spoke about the Assessment as Rated, from which we infer that you mean the Membership Fee Fund. If you mean your share of the Horner obligation, you will note by the Financial Report of July 15th, that your share of the Reserve to carry the Horner unpaid notes and accounts is figured in exactly the same way as the shares of the other members in the Reserve; namely, in the proportions that the Old Special Fund Deposits bear to the total amount of the Old Special Fund Deposits, which is the only way this Reserve could be figured and handled. But if you refer to the Membership Fee Fund in which you are rated as having 7 matchers, if you think that 7 matchers do not accurately represent your manufacturing capacity in proportion to the number of matchers of the other members, we shall be glad to adjust same by reducing the number of your matchers to 6 or even 5.

We take it for granted that it is your wish to pay your share of the expenses of the Association the same as the other members are doing, inasmuch as you have been and are receiving the same benefits as the other members in the exchange of statistical information, Rate Book work and in the Advertising, etc. Your Expense and Advertising Assessments for the first quarter of 1922 were paid, but we never heard from you in reference to the assessment for the second quarter of 1922, amounting to $915.81, bill for which was rendered you in July. Other bills since then were made out but have been held in abeyance, as we hoped and expected that you would be at some of our recent meetings, but we have now concluded to send them to you as a matter of form so that everything can be threshed out

at one time with the Trustees if, as we hope, you can attend the meeting on the 24th.

If in the meantime you think it would be worth while to discuss these various matters with me, I shall be glad to make a trip to Hermansville to see you, if agreeable to you, at any time convenient to you.

With best regards, and hoping you are in good health, I am,

Very truly yours, —— ——, Secretary.

Encl.

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

January 27, 1923.

January Business

To members.

GENTLEMEN: At the annual meeting on the 24th, we had flooring data from 14 members of the Association, covering the first 22 days of January from which it was estimated that if the business during the remainder of January averages about the same as the first 22 days and if the trade experiences of the other members were about the same, that the January business would turn out about as follows:

Shipments about 8% less
Production about 9% less } than in December.
Now Orders about 35% more

Their stock conditions of 13/16 x 2-¼" face Maple flooring on January 22nd indicated as follows:

On Jan. 22	Stocks	Unfilled orders	Oversold	% sold 14 members	% sold January 1, all members
Clear	2,358 M	6,490 M	4,132 M	275%	259%
No. 1	1,746	5,097	3,351	292	321
Fcty.	944	2,718	1,774	288	270
	5,048	14,305	9,257	283	280

Since the meeting, we have received these data from two other members and on the basis of the 16 members reporting, it looks as if the January Shipments will be about 4% less than in December, Production about 7% less than in December and new orders about 44% more than in December.

The Stock Conditions of 13/16 x 2-¼" face Maple flooring on January 22nd of the 16 members indicate as follows:

On Jan. 22	Stocks	Unfilled orders	Oversold	% sold 16 members	% sold January 1, all members
Clear	3,132 M	8,032 M	4,900 M	256%	259%

February Business

To members.

GENTLEMEN: We have received flooring data from 14 members of the Association covering the first 13 days of February, from which it is estimated that if the business during the remainder of February averages about the same as the first 13 days and if the trade experiences of the other 8 members are about the same, that the February business will turn out about as follows:

Shipments about 26% less
Production about 21% less } than in January.
New Orders about 41% less

The stock conditions of 13/16 x 2-¼" face Maple flooring on February 13th of the same 14 members indicate as follows:

On Feb. 13	Stocks	Unfilled orders	Oversold	% sold 14 members	% sold February 1, all members
Clear	2,158 M	8,502 M	6,344 M	394%	411%

Chicago, Ill., July 1, 1921.

The Bigelow Cooper Company, Mr. C. A. Bigelow, President, Bay City, Michigan.

GENTLEMEN: Yours of the 16th was received during the writer's absence from Chicago.

We are very sorry indeed that you have advised Mr. Dewey not to attend any further meetings of our Association. We are issuing a call today for a general meeting to be held on the 8th and we respectfully request and earnestly urge that you change your instructions to Mr. Dewey and have him attend this meeting. Mr. Dewey's participation in the work of the Association has always been very helpful and while it is difficult in view of present conditions, legal and otherwise, to obtain as good results as we would like to obtain, at the same time the best way to improve conditions in a cooperative way is to work together to the fullest possible extent. If first one member and then another decides not to attend meetings the affairs of the industry will drift from bad to worse and conditions will become more deplorable than they are now. There never was a time in the history of the flooring business when cooperation was more needed than at the present time.

By-the-way, I read with much interest in "Lumber" and in the "American Lumberman" your views on the lumber tariff. We think your arguments are logical and sound, particularly in respect to Hardwood flooring and we can see no reason why our Government should not impose the same rate of duty on Canadian Hardwood flooring as the Canadian Government imposes on our flooring.

Yours very truly, (Signed) Geo. W. Keehn, Secretary.

I. Stephenson Company, Trustees, Wells, Michigan.

Attention of Mr. P. S. Clark

GENTLEMEN: Replying to yours of the 25th:

We are glad to send you the details of the "Three Test Runs of 1921" referred to at the general meeting of the Association on the 17th.

The actual waste was 19.2%, but it was spoken of as 20% for greater convenience in figuring. The average manufacturing and

marketing costs during the first quarter of 1922 were $17.99 per 1 M feet of flooring produced.

We are going to make up a new statement, using the pencil figures in the enclosed memorandum and send it to the Members with the Average Cost Charts, etc., when we receive them from the printer. If the 14.7% of 2¼" Factory is figured at $25.00 instead of $30.00, F. O. B. Flooring Mill, it would show an even break.

The North Branch Flooring Company was very particular in keeping track of the rough lumber used and the flooring produced, and we feel certain that the details as reported to us are accurate in every particular.

The next time I am at Wells, I shall be very glad indeed to see your Factory Statements. I am wondering if it would be agreeable to you to let us have the forms, omitting all figures pertaining to your own results with the view of suggesting to the Committee on Cost Surveys, that the Committee recommend the form to the other Members of the Association to use in keeping their records of Costs. If this were done, it would give us a standard uniform system of ascertaining manufacturing and marketing costs and the results of our Surveys would be more reliable and would afford more accurate comparisons.

Thanking you for your letter, we are

Yours very truly, George W. Keehn, Secretary.

Test Runs

Committee on Cost Surveys.

GENTLEMEN: Referring to the attached letter to members regarding Test Runs:

In the five new Test Runs sent us, the following quantities of rough lumber were used—all commercially sawed stock:

No. 1 Common	704 M	52%
No. 2 Common	410 "	30 "
No. 3 Common A	55 "	4 "
No. 3 Common	181 "	14 "
	1,350 M	100%

What would you consider the cost of the No. 3 Common delivered F. O. B. flooring mills, based upon recent sales of that grade on the open market?

Flooring produced was as follows:

Clear	385 M	39%
No. 1	423 "	43 "
Factory	171 "	18 "
	979 M	100%
Waste	371 "	27.5 "

We are hoping to receive more Test Runs or statements of flooring operations so we can include same with these five Test Runs and get a larger volume of output to use in connection with our Average Cost Surveys. It is also our thought to add to all the New Test Runs the three Test Runs of 1921, made by the North Branch Flooring Company, Chicago, in which 1539 M feet of rough lumber was used. If we add these three Test Runs to the five new Test Runs already received and also include any other new Test Runs we may receive from now on, it will give us quite a volume of output to use as the basis in compiling our Average Costs.

Yours very truly, George W. Keehn, Secretary.

[fol. 3499] GOVERNMENT'S EXHIBIT No. 63-A

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

February 21, 1923.

Test Runs

To members.

GENTLEMEN: Referring to our letter of December 28th about Test Runs, we are sorry to say that we have not received as many Test Runs as we should have in order to indicate average results and typical flooring operations.

At this writing, the following members have sent in Test Runs, all of which were made from commercially sawed lumber:

Member	Quantity of rough lumber used
Kerry & Hanson Flooring Co.	601 M
East Jordan Lumber Co.	47 "
Flanner-Steger Land & Lumber Co.	505 "
Grand Rapids Trust Company, Receiver for Wm. Horner, Newberry Plant	111 "
Kneeland-Bigelow Company	86
	1,350 M

I. Stephenson Company, Trustees, also sent in a Test Run in which 1219 M feet of rough lumber was used, but as the stock was unedged, the Test Run is not available to merge with the other Test Runs.

Foster-Latimer Lumber Company wrote that they were running only Maple of their own manufacture and as it is not edged or trimmed, they would not be able to show the exact quantity in feet of each grade of rough lumber used.

The Northwestern Cooperage & Lumber Company wrote that they cannot furnish a Test Run because the way they cut and pile their lumber, it is not possible for them to get at the facts closely enough to be of service to us.

We have been hoping that we would get more data either from Test Runs or flooring operations so that we would get more representative results and so that our Average Cost Chart would represent a larger volume of output.

The Committee on Cost Surveys will be grateful to any other members who can and will supply the following data as stated in our letter of December 28th:

1. The exact quantity in feet of each grade of rough lumber used in the Test Run.

2. The exact quantity in feet of each grade, thickness and face of flooring produced from this lumber.

After we hear from more of the members, it is the intention to consolidate all the Test Runs of flooring operations as one Test Run and see how the results compare with the three Test Runs of 1921 which we are now using as the basis of our Average Cost compilations.

Yours very truly, George W. Keehn, Secretary.

[fol. 3500] GOVERNMENT'S EXHIBIT No. 63-B

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Test Runs and Survey of Costs

To members. March 10, 1923.

GENTLEMEN: Referring to our letter of December 28th and more particularly to our letter of February 21st, we wish to inform you that since writing you on February 21st, we have received another Test Run, namely: from Mitchell Brothers Company, making in all, six new Test Runs.

As stated in the last paragraph of our letter of February 21st, we have consolidated these six Test Runs with the three Test Runs of 1921, made by the North Branch Flooring Company, so we now have as a basis of our Average Cost compilations, nine Test Runs,

which considered as one Test Run, we believe, represent and typify average flooring operations, as the rough lumber used consisted of Lower Michigan, Upper Michigan and Wisconsin stock.

For your further information, we have made a new compilation of Average Costs and are enclosing statement of same, entitled: "Average Cost Based Upon Composite Result of Nine Test Runs", in which you will find the details of the compilation.

Yours very truly, George W. Keehn, Secretary.

[fol. 3503] GOVERNMENT'S EXHIBIT No. 63-E

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

August 2, 1923.

To members.

GENTLEMEN: In accordance with the action taken by the Association at the general meeting on July 19, the following changes have been made in the statistical reports and other activities of the Association. These changes have been made upon the advice of the Association's Counsel in order to eliminate certain features which are specially objected to by the Department of Justice in its Petition asking for the dissolution of our Association.

1. The following data which have heretofore been furnished to the members of the Association for their information, have been eliminated from the Rate Book and the compilation, distribution and use for any purpose whatever, of the said data described below are wholly abandoned and discontinued.

(a) The so-called Delivered Cost Charts.

(b) All matters relating to so-called Differentials.

(c) All matters relating to Terms of Sale and Cash Discounts.

It is understood that the members will comply with the action taken and will eliminate all of said data from their Rate Book.

2. The Association membership numbers which identify the individual members of the Association have been eliminated from all our reports issued since July 19 and are to be eliminated from all reports issued hereafter by the Association so that the information which is consolidated and transmitted to the members from time to time will not disclose to any member or members any of the particulars or intimate details of any other member's business respecting his Stock on Hand, Unfilled Orders, Shipments, Production and New Orders Booked or which will identify the average prices he realizes or identify as his prices the prices at which he sells any Maple, Beech or Birch Flooring.

Yours very truly, George W. Keehn, Secretary.

Test Runs

To members.

GENTLEMEN: Since the general meeting of the Association on July 19 we have made a new calculation of Average Cost and have based

same upon the results of five test runs which were made since January 1, 1922.

These five test runs were made as follows:

Mitchell Brothers Company—January-February 1922.
Kerry & Hanson Flooring Co.—December 1922.
East Jordan Lumber Company—January 1923.
Grand Rapids Trust Company, Receiver for Wm. Horner—January 1923.
Kneeland-Bigelow Company—January 1923.

We enclose for your information a statement in detail analyzing the results of the five test runs consolidated and considered as one test run. You will note that the 5% allowance for unforeseen hazards, etc. mentioned in Paragraph (f), Section 3 of Article XIV has been eliminated from the calculation in accordance with the action taken at the general meeting on July 19 annulling said paragraph and eliminating same from our Articles of Association.

Very truly yours, George W. Keehn, Secretary.

[fol. 3506] GOVERNMENT'S EXHIBIT No. 64

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Minutes of Meeting March 22, 1923

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Thursday, March 22, 1923.

The meeting was called to order by the Chairman, and sixteen members of the Association were present. The following were absent: Cummer-Diggins Company, Strable Lumber & Salt Company, Foster-Latimer Lumber Company, Grand Rapids Trust Company Receivers for William Horner, and the Oval Wood Dish Corporation. The Wisconsin Land & Lumber Company were not represented at the meeting.

* * * * * * *

Canadian Flooring.—The Secretary reported that, after further correspondence with Charles A. Bigelow, Chairman of the Committee appointed to prepare the Petition to President Harding, relative to Canadian Flooring, the Petition had been drafted with the assistance of Jacob Newman, the Association's counsel, and had been signed in the name of the Association by its President and Secretary and was mailed to President Harding on March 13th.

The Petition was thereupon read to the meeting and is as follows.

March 13, 1923.

To the President:

The Maple Floorng Manufacturers Association is composed of twenty-two manufacturers located in the States of Michigan, Wisconsin, Minnesota, Illinois and New York. They operate twenty-three flooring plants and have a total capital investment of about $9,675,000, and employ over 2,135 men. The value of their total annual output is approximately $11,000,000 exclusive of exports to foreign countries. They produce about seventy per cent of all Maple, Beech and Birch flooring manufactured in the United States.

Under the tariff laws of Canada, a duty of twenty-five per cent ad valorem is levied against all Maple, Beech and Birch flooring shipped by our manufacturers into Canada. On the other hand, no duty is levied against similar products manufactured in Canada and shipped into the United States.

Owing to the high duty levied by Canada, the members of our Association are unable to sell Maple, Beech or Birch flooring in Canada in competition with the Canadian manufacturer. On the other hand, the Canadian manufacturer is free to ship his flooring into the United States in active and aggressive competition with our manufacturers, and has the further advantage of a "draw back" on flooring shipped into the United States manufactured from rough lumber im-

ported into Canada from the United States. This enables Canadian manufacturers to undersell us in our home markets in New England and the East.

We respectfully submit that this situation is unjust to the flooring manufacturers in the United States, who, by reason of this Canadian [fol. 3507] tariff, are unable to compete with the manufacturers in Canada and are shut out of the Canadian market.

In view of the premises the members of the Maple Flooring Manufacturers Association earnestly protest against the continuance of this state of things. If, upon request, the Canadian Government refuses to admit our flooring into that country free of the duty which it levies against our product, then we respectfully request and urge you to impose a like tax of twenty-five per cent ad valorem upon all Canadian Maple, Beech and Birch Flooring coming into the United States. We understand that Congress has invested you with full authority to exercise this power and thus protect our manufacturers against unjust and unreasonable discrimination on the part of the Canadian Government.

Competition in the United States with Canadian Flooring is such that the interests of the manufacturers of Maple, Beech and Birch flooring in the United States are seriously injured, and, therefore, the members of the Association respectfully ask you to give this matter your earliest possible attention, so that the rights and interests of American manufacturers may be promptly and justly protected.

Respectfully submitted, Maple Flooring Manufacturers Association, by B. P. Whedon, President. Geo. W. Keehn, Secretary.

* * * * * * *

[fol. 3508] February Statistics.—The Secretary reported that our February statistics showing basic conditions in the industry had been mailed on March 20th to the Department of Commerce, Bureau of the Census, Washington, D. C., to the Federal Reserve Bank, Chicago, and to the Lumber Trade Papers. Copies of the February reports were then distributed at the meeting among the members present.

Cost Surveys.—The Chairman then asked the members of the Committee on Cost Surveys if they had any information regarding current market costs of rough Maple flooring stock as established by recent sales on the open market, and it was the consensus of opinion of the members of the Committee that the Average Costs at the present time, on the open market, of the different grades of rough Maple flooring lumber delivered F. O. B. cars at flooring mills, are as follows:

No. 1 Common	$64.00
No. 2 Common	44.00
No. 3 Common A	32.00
No. 3 Common	24.00

Commissions

A Commission not exceeding $2.00 may be allowed to your own Registered Special Representative, or a Commission not exceeding $1.50 may be allowed to Registered Wholesalers and Commission Men.

Your Registered Special Representative may allow the Wholesaler's Commission of $1.50 when selling Registered Wholesalers and Commission Men, but the Commission to be paid to your Registered Special Representative on his sales to Registered Wholesalers and Commission Men to whom he allows the $1.50 Wholesaler's Commission shall not exceed $1.00. In no event shall the total Commissions allowed exceed $2.50.

Terms of Sale

Sixty days net or 2% discount for cash in 15 days, or 1% discount for cash in 30 days from date of invoice after deducting freight. War tax to be paid by consignee.

If the car has not arrived, the discount may be deducted on 90% of the invoice less estimated freight, for cash within proper discount period, the balance with original paid freight bill to be remitted net within 5 days after arrival of car. No cash discount will be allowed after 30 days from date of shipment.

[fol. 3711] Pending the printing of the New Table of Values Based Upon Average Cost dated January 6, 1921, the Minimum Price Basis effective during the first quarter of 1921, is represented by the following Concessions, Additions and Differentials, using the Maple 13/16" D. & M. as the base:

13/16" Table of Values of November 19, 1920

Maple, Clear 1½" face.....Concession $27.00
Maple, all other items of 13/16".....Concession $25.00

Differentials as per Table of Differentials Below

Beech—$10.00 less than Maple.
Birch—Clear $5.00 more than Maple.
Birch—No. 1 and Factory same as Maple.

M. B. & B. Thick D. & M.—

1-1/16"	All	Grades—	$5.00	more	than	Maple	13/16".

1-11/16"	"	"	11.00	"	"	"	"	"

The 2½" face, same as 2¼" face of same grade, thickness and wood.

The 3", 3½" and 4" faces, same as 3¼" face of same grade, thickness and wood.

Differentials on Special Grades 13/16"

White Clear Maple, $20.00 more than Clear Maple.
Red Clear Beech, $20.00 more than Clear Beech.
Red Clear Birch, $20.00 more than Clear Birch.

Differentials on Extra Shorts 13/16"

Clear Maple, Beech or Birch 2" or 2¼" face under 22", $25.00 less than standard lengths of Clear, same wood and face.

Clear Maple, Beech or Birch 1½" face under 22", $35.00 less than standard lengths of Clear, same wood and face.

No. 1 Maple, Beech or Birch 2" or 2¼" face under 16", $20.00 less than standard lengths of No. 1, same wood and face.

No. 1 Maple, Beech or Birch 1½" face under 16", $30.00 less than standard lengths of No. 1, same wood and face.

⅜" Table of Values of November 19, 1920—

Maple or Beech, Clear and No. 1, Concession $25.00.
Birch Clear $5.00 more than Maple or Beech.
Birch No. 1—Same as Maple or Beech.
White Clear Maple—Add $15.00 to Clear Maple.
Red Clear Beech—Add $15.00 to Clear Beech.
Red Clear Birch—Add $15.00 to Clear Birch.

Commissions

A Commission not exceeding $2.00 may be allowed to your own Registered Special Representative, or a Commission not exceeding $1.50 may be allowed to Registered Wholesalers and Commission Men.

Your Registered Special Representative may allow the Wholesaler's Commission of $1.50 when selling Registered Wholesalers and Commission Men, but the Commission to be paid to your Registered Special Representative on his sales to Registered Wholesalers and Commission Men to whom he allows the $1.50 Wholesaler's Commission shall not exceed $1.00.

In no event shall the total Commissions allowed exceed $2.50.

Effective During First Quarter of 1921.

December Sixteenth, 1916.

Market Conditions Committee Report, November Statistics

To members.

GENTLEMEN: There is nothing your Committee can say that will tell the story better of the splendid showing in the November reports than is told by the reports themselves.

Stocks on Hand on December 1st are at the lowest point on record, and the New Business Booked, 18,519 M, is the largest amount booked during any one month in the history of the Association. It surpasses by nearly one million feet the previous high mark in May 1912 when 29 members booked 17,624 M of new orders.

The new orders taken in November brought the Unfilled Orders on December 1st up to the handsome total of 29,081 M. This is probably the largest volume of Unfilled Orders on the books of the same number of members at any one time.

There was a marked improvement in stock conditions during the month, and a phenomenal improvement compared with a year ago. The average condition sold of all grades of Maple 2¼" face has never been exceeded. Each grade is oversold to about the same extent, and the average sold of all three grades is practically 300%.

* * * * * * *

[fols. 4467 & 4468] Current Net Values, November compared with October, Group E mills, show gains of $1.13 on Clear, 76 cents on No. 1 and 73 cents on Factory, averaging 94 cents on the product, but as the M. P. P. basis did not take effect until November 1-15, the full average of the advances would not be reflected in the November sales.

Spreads, Survey of Costs, and Test Runs

The data in regard to Spreads has not yet been received from all the members, so the Committee decided to postpone making recommendations regarding Spreads until the Annual Meeting of the Association, as the Committee desires to get an expression from every member before making its recommendations.

Reports from members covering the new Survey of Costs are beginning to come in, and the Committee earnestly urges every member to make this report so that our new Table of Values will have a good foundation to stand upon, and so that it will reflect average conditions in the industry. Your report should cover as much of 1916 as possible, because all costs have been higher this year than during 1915, and we should construct our basis to as great an extent as possible upon present conditions. If your fiscal year ends with the calendar year, we hope you will send your report to the Secretary very early in the month of January, so the work of compiling and tabulating the Survey can be completed before the Annual Meeting.

If you are in a position to make any Test Runs between now and January 10th will you plase do so, and send the results to the Secretary, giving full information in regard to the quantity of each grade of rough lumber used, and the quantities and kinds of flooring produced.

All data regarding Costs and Test Runs will be held strictly confidential by the Secretary, and no information will be given to any one that will disclose the identity of the member who contributes the data.

Respectfully urging your prompt cooperation, so that all details regarding the new Table of Values can be worked out in ample time before the Annual Meeting in January, and wishing you a Merry Christmas and a Happy and Prosperous Nineteen Seventeen, we are

Sincerely yours, Morris E. Thomas, Chairman; Dr. George W. Earle, George W. Wilce, B. P. Whedon, E. J. Gillouly, A. C. Wells, J. D. Staple, of Market Conditions Committee.

[fol. 4469] Maple Flooring Manufacturers Association, Chicago

February 13, 1920.

Minutes of Annual Meeting, February 12, 1920

The annual meeting of the Maple Flooring Manufacturers Association was held on Thursday, February 12, 1920, at the Hotel La Salle, Chicago.

In the absence of Dr. Earle, the President, the meeting was called to order by Mr. Whedon, Vice-President, who outlined the business to come before the meeting.

Sixteen members of the Association were present, namely, Nos. 2, 3, 5, 22, 23, 24, 26, 34, 37, 44, 45, 46, 47, 48, 50 and 33, who was represented by proxy to Mr. Kerry.

Eleven members were absent, namely, Nos. 1, 4, 6, 7, 14, 29, 30, 38, 39, 42 and 49.

* * * * * * *

Market Conditions Committee Report.—Mr. Thomas, Chairman of the Market Conditions Committee, made a verbal report regarding the work of his Committee during the past year, and without going into details, stated briefly that the statistical position of the Association could not be more satisfactory than it is at the present time, the demand being so far in excess of the supply that surplus stocks were unknown, and that only in a very few cases since last Spring did any members of the Association have surplus stocks of any kind.

Advertising Committee Report.—Mr. Whedon, Chairman of the Advertising Committee, reviewed the work of his Committee since the last report was made in August, and stated that since then the new booklet "How to Lay and Finish Maple, Beech and Birch Floors," has been gotten out. The edition consisted of 62,000 copies, of which 35,000 were sent out according to our advertising mailing list, and a copy of the new Grading Rules was enclosed with the booklet; 8,600 of the booklets were divided among the members of the Association, 1,000 copies were sent to the Northern Hemlock & Hardwood Mfrs. Assn., to be used in connection with the distribution of their Birch literature, and 2,400 copies had been mailed from our office in response to requests, leaving 15,000 copies on hand.

* * * * * * *

Grades Committee Report.—Mr. Kerry, Chairman of the Grades Committee, reported that in accordance with the action taken at the

September meeting of the Association, templets and blue-prints had been made and sent to the members to be used in connection with the adoption of the uniform thickness of 25/32", effective on January 1st.

Mr. Kerry also reported that a new edition of the Grading Rules, consisting of 56,000 copies, had been printed, covering the revisions in the Grading Rules adopted at the September meeting, and that 35,000 copies had been assigned to the Advertising Committee to [fol. 4470] send out with its new booklet "How to Lay and Finish Maple, Beech and Birch Floors," 12,000 copies of the Rules had been divided among the members of the Association, 2,500 copies had been sent out by the Secretary in response to requests, leaving 6,500 copies on hand.

Mr. Kerry further stated that Mr. Robertson, as Official Inspector, had made a trip among all the mills of the Association during the Summer to oversee the grading, and had made a report to each member regarding his findings at the member's own plant, and that copies of Mr. Robertson's general report, summing up grading conditions as a whole, would be mailed by the Secretary to all the members for their information.

Secretary's Report.—The annual report of the Secretary was then read, and on motion, was accepted, ordered placed on file and copies sent to the members of the Association.

* * * * * * *

After luncheon was served the meeting was called to order by the Chairman and general trade conditions were briefly discussed.

Weekly Sales Reports.—In view of the extraordinary business conditions now existing, it was the sense of the meeting that weekly reports of sales should be made in order that the members of the Association may have as much information as possible regarding current market conditions.

On motion, the following resolution was adopted by unanimous vote:

Resolved, 1. That the members make reports to the Secretary on Saturday of each week, giving a complete record of all sales made during that week of one carload or more of Maple, Beech or Birch Flooring; the reports to give date of sale, quantity sold (if one carload or more), the thickness, face, grade and wood, the delivered prices sold at, and the Rate Book index letters to indicate destination, but the names of towns to be omitted.

2. The information contained in the reports to be tabulated by the Secretary and exchanged by him among the members only, who make the reports.

New Table of Values.—On motion, the Secretary was instructed to compile for the information of the members a Table of Values showing what the selling prices of flooring should be if based scientifically upon actual average cost and if a profit is included of 10% reckoned upon selling prices F. O. B. the flooring mill.

It was the sense of the meeting that the following fundamental elements constitute the basis of cost in ascertaining what the selling prices of flooring should be:

(a) The actual market value of the raw material.
(b) The average cost and expense of manufacturing and selling flooring.
(c) Interest on the capital actually invested in the flooring business at the rate of five (5) per centum per annum.
(d) Annual depreciation of Plant; and
(e) The usual overhead charges incurred in carrying on the flooring business.

[fol. 4471] M. P. P. Vacated.—On motion, the following resolution was adopted by unanimous vote:

Whereas the Minimum Price Plan was submitted to the Federal Trade Commission for its approval on June 27, 1916, and the Commission has taken no action with respect to the same, neither approving nor disapproving the Plan; and
Whereas said Plan has never been enforced by the Association,
Therefore be it resolved, That said Minimum Price Plan and all resolutions relating to the same, be and they are hereby vacated.

Election of Officers and Trustees.—The meeting then proceeded to the election of President, two Vice-Presidents, Treasurer, and five other members of the Board of Trustees, to serve until the next annual meeting, as provided in Article V and Article VII of the Articles of Association.
On motion, a Nominating Committee, consisting of Mr. Gillouly, Mr. Greene and Mr. McLurg, was appointed to nominate candidates for the respective offices. The Committee made its report, and on motion, the rules were suspended and the Secretary was instructed to cast the unanimous ballot of the meeting for the candidates nominated by the Committee, who were thereupon declared duly elected to their respective offices.
Dr. George W. Earle, President.
Charles T. Mitchell, B. P. Whedon, Vice-Presidents.
A. C. Wells, Treasurer.

Board of Trustees

President, Vice-Presidents, Treasurer, ex-officio members.
The other five Trustees elected: Chas. T. Kerry, George Strable, I. N. Bushong, R. E. MacLean, Sam Horner.

Committees for 1920.—The Chairman then stated that the members of the Board of Trustees and the Members of the Association who were present would act as a meeting of the whole, and he thereupon announced the appointment of the following Committees to serve until the next annual meeting:

Market Conditions Committee

Morris E. Thomas, Chairman.
W. D. Young & Co.
Kerry & Hanson Flooring Co.
Nichols & Cox Lumber Co.
Bigelow-Cooper Co.
Strable Lumber & Salt Co.
J. W. Wells Lumber Co.
Northwestern Cooperage & Lbr. Co.
Foster-Latimer Lumber Co.
William Horner.

Grades Committee

Chas. T. Kerry, Chairman.
W. L. Saunders.
Harry F. Brand, Jr.
W. L. De Witt.
W. H. Greene.

Advertising Committee

B. P. Whedon, Chairman.
Morris E. Thomas.
William E. Cox.
W. B. Earle.
John J. Porter.

The appointment of the Traffic Committee and Trade Relations Committee was deferred for the present.

There being no further business, the meeting, on motion, adjourned subject to the call of the President.

George W. Keehn, Secretary.

[fol. 4472] Grades Committee Work—Report of M. H. Robertson, Official Inspector

To the Members of the Maple Flooring Mfrs. Assn.

GENTLEMEN: My last trip of inspection at your mills reveals a very satisfactory condition.

If at any time any of you might be disposed to relax or exercise less vigilance in maintaining a uniform standard, it would surely be in such a period as the past few months. With an intense demand for all grades and especially the unusual demand for the Factory, it is indeed gratifying to find that in this period of extreme test you have proven your interest and confidence in the standardization proposition.

I am fully convinced that the members are universally aiming at our exact standard and that the slight variations noted in the individual reports are errors and not a part of the regular system. The fact that at this inspection all the members, save one, are at or within

one point of standard in the Clear grade and 17 members are at or within one point of standard in the No 1, I think clearly indicates that you are not only becoming more familiar with the standard, but you are zealously endeavoring to maintain it.

By comparing with former reports you will not the gradual tendency toward uniformity. In strata grade Clear and No. 1 each average one point nearer the uniform than ever before, the extreme difference in the Clear being but four (4) points and as above noted, with one exception, but two (2) points of difference. The No. 1 shows an extreme of five (5) points, but with a large majority but two (2) points. True, the Factory still shows eight (8) points extreme, but this is quite an improvement over the past report, which was thirteen (13) points difference, and much of this remaining eight (8) points rests with a minority and I am quite hopeful will be reduced to at most four or five points by the time of the next inspection.

The best I have expected we would attain would be two (2) points of difference in the strata grade, one above and one below the standard. With the rapidity and the varied mill conditions under which the workmen operate, together with the frequent changes necessitating the use of unskilled help, this will probably be as uniform as we can reasonably expect.

In the matter of offgrade, which is of vital importance and to which I give due attention in my visitation and individual reports, I may only say in this connection that the average maintains very low in all the grades. Many of the members have practically no offgrade and in all cases where it occurs in any excess above the average, the fact is discussed with the administration, the source of the difficulty found out and all reported in the individual report.

In former reports I have mentioned some of the advantages observed in the standardization feature of Association work, and since the date of those reports there has been offered me an opportunity to observe this from the viewpoint of my work as Field Representative. I may here only remind you of what is to come to be generally understood with the trade as well as the Association. That the Maple Flooring Manufacturers Association has formulated and copyrighted a plain, explicit set of rules, that they have standardized their product in accordance with these rules and trademarked it, thus placing it in the distinctive commodity rank to which it belongs and which is not difficult to recognize, but which conveys at all times the guaranty of quality and service.

Respectfully submitted, M. H. Robertson, Official Inspector.

[fol. 4473] Secretary's Report for Calendar Year 1919

February 12, 1920.

To the President and Members of the Maple Flooring Manufacturers Assn.

GENTLEMEN: The year 1919 will always be remembered as a most eventful one in the annals of the Maple flooring industry and in the

history of our Association. It brought problems, conditions and difficulties never before encountered in business experience.

Because of governmental restrictions of building operations and other conditions brought about by the world war, our industry was at its lowest ebb during the last quarter of 1918 and the first quarter of 1919. Shipments and Production were running acout 40% of normal and the outlook for the future was so discouraging that the new business booked averaged less than 30% of normal. The small quantity of flooring that found its way upon a reluctant market was sold at an actual loss owing to the heavy cost of manufacturing operations, resulting from the small volume of output.

Conditions commenced to improve in April and since then the nation-wide resumption of building operations on a tremendous scale has created an enormous demand for flooring, which is far beyond the ability of the mills to supply for some time to come. It begins to look like a famine in flooring in spite of the fact that the flooring mills are making every effort to speed up production and increase output so that building operations will not be retarded or substitutes used for our product.

The story of last year is told in detail in our Statistical Reports and Barometer for 1919.

During the dark days in February and March, when the situation seemed worse than hopeless, the Association secured the cooperation of the I. Stephenson Co., Trustees, Holt Hardwood Co., Mason-Donaldson Lumber Co., Flanner-Steger Land & Lumber Co., William Horner and Kneeland-McLurg Lumber Co.

They joined as at March 1st and thru their affiliation it has been possible for the industry to place itself upon a more stable basis and to unify grades and manufacture, and to advertise our product more vigorously and extensively and thus promote the common welfare.

Surveys of Manufacturing and Marketing Costs were made from time to time during the year, but owing to the difficulty experienced by many of our members of separating their flooring costs from the costs connected with their other business, our Surveys have not been as complete as to membership as could be desired. However, the data obtained has been fairly typical of flooring operations.

Flooring values were stationary from July 1918 to May 1919, and while they have advanced considerably since then, it must be remembered that they were abnormally low all during the war compared with other commodities, and lumber and flooring did not share in the tremendous wartime advances in prices enjoyed by other products of shop and farm. The level of flooring values during 1916, 1917 and 1918 should have been at least $15.00 to $20.00 higher than it was, in view of the increasing value of the raw material, caused by the rapid depletion of Maple stumpage, the steadily mounting cost of labor and mill supplies and the intrinsic value of our product. Its intrinsic value has always deserved greater recognition than it has received.

[fols. 4474–4476] Information now available indicates that rough flooring stock has advanced since May 1919 from $33.00 to $85.00 or $90.00 for No. 1 Common, from $28.00 to $70.00 or

$75.00 for No. 2 Common, and from $23.00 to $60.00 or $65.00 for No. 3 Common A, F. O. B. flooring mill. This represents an increase of approximately $60.00 to $65.00 in the average cost or market value of the raw material required to produce 1,000 ft. of flooring and would be expressed by Frame A Table of Values as $134.00 or $141.00 for Clear, $129.00 or $136.00 for No. 1 and $117.00 or 124.00 for Factory 13/16 x 2¼" face Maple, or $40.00 or $47.00 above our last Table of Values dated 9-19-19, depending upon whether the lower or higher range of rough lumber prices is considered to reflect actual market values at this date.

The thought must suggest itself to all of you that the time is rapidly approaching, if it has not already arrived, when concerted action should be taken by this Association to stabilize the price of flooring so that architects, lumber dealers and builders may know what to depend upon in estimating their costs. Maximum prices could be established from time to time, good for say 30 or 60 days, at which the members of this Association would undertake to furnish flooring, conditional upon their ability to produce it and subject to the prior filling of old orders now on their books which they are obligated to fill; the maximum prices to be determined upon a basis which takes into account all elements of cost and to include a margin of profit consistent with the capital employed, the value of the service rendered and the hazards and vicissitudes of the business.

* * * * * * *

The prestige that Maple, Beech and Birch flooring now enjoys has been built up and established by many years of individual and co-operative effort and it would be detrimental to the future of your product if substitutes are used to supply the demand you have all helped to create.

The members of the Market Conditions Committee, the Advertising Committee and the Grades Committee have given unsparing devotion to the work committed to them. They have attended meetings many times when it meant a personal sacrifice and the Association is deeply indebted to them for their efficient and valuable services, without which the work of the Association could not have been carried on successfully.

The Thomas Forman Company has discontinued the manufacture of Maple, Beech and Birch flooring and at the request of Mr. Forman their membership terminates as at January 1st with the understanding that, if they again resume the manufacture of Maple, Beech or Birch flooring, it will be their wish to be reinstated to membership in the Association.

It is with the greatest reluctance and regret that we part company with the Thomas Forman Company, who have been consistent members of the Association ever since it was organized. Mr. Forman has given unselfishly of his time and thought to the work of the Association, having served for several years as its President, and he has been a member of the Board of Trustees ever since the present organization was formed in 1905. We shall miss his friendly pres-

ence at our meetings. His constructive counsel and whole-hearted co-operation in the work of the Association have been of distinct benefit to the industry.

Respectfully submitted, George W. Keehn, Secretary.

[fols. 4477-4479] Survey of Costs

July 31, 1920.

To members.

GENTLEMEN: We enclose blank form for Survey of Costs for the Second Quarter of 1920, which please fill out and return to us as soon as possible. We are sending you two blank forms so you can retain a copy of your report for your files.

In order that the results of the survey may show a dependable average representative of conditions in the entire industry it is very important that we get as many reports as possible, especially from the mills whose manufacturing operations were interferred with by strike conditions during the period under review.

Yours very truly, George W. Keehn, Secretary.

[fol. 4480] August 18, 1920.

Flanner-Steger Land & Lumber Co., Blackwell, Forest Co., Wisconsin.

GENTLEMEN: We did not receive the Sales Report for the week ending the 14th, from you until this noon—too late to include in our report which was mailed yesterday.

We are enclosing you a copy of our report covering last week and will include your report for last week in our report for the week ending the 21st.

Very truly yours, Geo. W. Keehn, Secretary.

[fol. 4481] April 30, 1921.

Dr. George W. Earle, Mr. M. E. Thomas, Mr. B. P. Whedon.

GENTLEMEN: We have prepared a rough draft of new Articles of Association, effective from May 1, 1921, to July 1, 1922, and are sending each of you a copy for such suggestions in the way of revision as you may wish to make.

Several new features have been incorporated as the result of experience, etc., since the old Articles were formulated. You will note that in Article II—"Objects" we have included some of our creed as it appears in our advertising literature, and that we have inserted a clause regarding actually completed and closed business transactions, which, of course, refers to our Weekly Sales Reports; we have also declared our intention regarding Surveys of Cost and what we consider the fundamental elements to be used in arriving at the basis of ascertaining cost to the manufacturer of producing and placing on the market Maple, Beech and Birch flooring.

It is my thought, when we prepare an Average Cost Chart, that Frame A will represent the average cost FOB cars at flooring plants

and subsequent frames will show the cost of delivering to destination, which would mean Frame A plus average cost of freight, and this average cost of freight would be based upon the freight rate from Cadillac, Mich., which we consider represents the average freight rate from all the flooring mills to all the destinations. I thought it unnecessary to mention delivered values in the Articles of Association, as whatever Average Cost Charts are compiled to show the delivered prices would be simply mathematical and a supplemental detail, which would not in any way be contrary to the principles outlined in Article XIV.

We are waiting to hear from Mr. Thomas before proceeding further with the other plan discussed at the meeting, and in this connection, perhaps, it would not be out of place for me to say that, in view of the representations made by Dr. Earle as President of the Association, in his last letter to Mr. Nebeker (a copy of which you have), and also in view of the resolution adopted at the general meeting held on February 25, and approved at the meeting held on April 27, we should carefully consider any new plan, the adoption of which might raise a doubt in the mind of Mr. Nebeker as to the sincerity of the representations in Dr. Earle's letter, evidence of which sincerity the Department of Justice may call upon us for at any time, and also as to the sincerity of the resolution adopted February 25, and approved April 27.

By the way, I see by the newspapers this morning that the Federal Trade Commission has again attacked the Pittsburgh base used by the steel industry and that the Commission is also going into the question of fixing prices by all the steel manufacturers by using the Pittsburgh base. It seems the Commission is divided on the question, three of the members opposing the Pittsburgh base and two of them not opposing it.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4482] December 3, 1921.

Holt Hardwood Company, Oconto, Wisconsin.

GENTLEMEN: One of the members of your Market Conditions Committee, writing about our latest weekly Record of Completed Transactions, states that it is very gratifying to note the number of members who are now reporting regularly. They feel confident that the members who do not report, evidently having discontinued their reports because other members had neglected to report, now fail to realize the importance of the valuable information contained in our weekly reports and that all but three of the members are reporting.

We believe our Weekly Sales Reports to the members have a number of very good features. Aside from their indication of the current trend of the market, the demand for each grade, face and thickness in each wood, the total volume alone of weekly bookings in each group and the total of all groups, is enlightening.

You probably had an unusually large volume of flooring orders for the week ended November 16th, and assumed that the experiences of the other members were similar, but could any member have

known (or estimated) without the existence of our Weekly Sales Reports that the total New Business Booked of 19 members for the week ended November 19th was very close to five millions? Without these reports they could have knowledge only of an increased demand for Maple, Beech and Birch Flooring, but the real extent of this demand as affecting the different grades and sizes of our flooring in combined volume would not be known until weeks later, upon the compilation of our November statistical reports.

It has occurred to us that you may feel that you can not afford to be without this exchange of information when you learn that all but three of our members have indicated they want this information by taking a minute or two of their time to daily record all sales on the blank forms provided and mailing them to us at the close of each week. And we and the reporting members would like to have our weekly reports show our members' sales 100% reported. We can do this if you, and the other two missing members we are writing today, will kindly send us the report of sales for week ended today. May we count on your cooperation?

Yours very truly, George W. Keehn, Secretary.

ECS.

Extra copy—Similar letter to No. 33 & 42.

[fol. 4483] April 28, 1922.

Geo. W. Keehn, Sec'y Maple Flg. Mfg. Ass'n, Chicago, Illinois.

DEAR SIR: The Michigan Hardwood Manufacturers' Association weekly sales report this week reports a sale of flooring stock as follows f. o. b. cars, Grayling, Michigan rate.

FAS	SEL&#2 1C	#2 com.	#3 com.
$67.00	$37.00	$26.00	$15.00

This is for stock to be put up to July 1, 1922.

Yours very truly, The Bigelow Cooper Company. —— ——, Secretary.

Maple Flooring Manufacturers' Association, Chicago

July Reports

August 26th, 1913.

To members.

GENTLEMEN: Our July statistics show up well, and measured from the proper standpoint of an average normal July, the flooring business is in excellent shape and conditions should be considered satisfactory, as an analysis of the principal features in our reports will bear out.

[fol. 4501] GOVERNMENT'S EXHIBIT No. 76-A

August 19, 1922.

R. C. Witbeck, 1209 First Nat'l Bank Bldg., San Francisco, Cal.

DEAR SIR: Your favor of August 14th with enclosures received.

We are sorry that we lost the Maple order of the Western Hardwood Lumber Company but do not believe that they can buy the same grades that we ship at any less money we quoted for our stock.

The price of 3½" No. 1 & Btr. Jointed Maple Flooring is arrived at by averaging the difference between Clear and No. 1 as the stock will run at least 50% or better Clear, then adding $3.00 on account of it being jointed. This is the Association method of arriving at costs. Some manufacturer evidently made a very low price or else furnished No. 1 without any Better included.

Regarding the Factory and Better Air Dried Flooring. The letters "C. M." stand for "center matched," and "E. B." for "End Butted, or in other words, "square ends, not matched." The only item of square edge flooring which we manufacture is 3½" No. 1 Common & Btr. and what Factory develops.

We have discontinued the manufacture of 13/16 x 4" and can only supply the items listed in this width.

1 1/16 stock, tongued and grooved, is measured 1 ¼" thick and ¾" added to each width, or for Jointed ½" is added to each width.

[fol. 4502] We are sending you, under separate cover, advertising literature which we furnish. If there is any other information or assistance that we can render, do not fail to advise us.

Very truly yours, The Bigelow Cooper Company. —— ——, Treasurer.

WNW. W.

[fol. 4503] August 14th, 1922.

The Bigelow-Cooper Co., Bay City, Michigan.

GENTLEMEN: I have Mr. Dewey's letter of the 9th showing the surplus items which you have on hand, and I wish to call attention to the items of 13/16 x 3½" #1 and Better jointed which your list shows at a price of $99.25 delivered here.

The American Trading Company Company offered me an order for a car of this stock, and I quoted them $2.00 less than your list, namely $97.25, and they stated they could sell me two or three cars of this material and make a good profit for themselves at this price.

As I had given them my rock bottom price without any comeback for further negotiations, it finally developed that this order was placed by wire with some Michigan manufacturer at a price of $92.50, and I would like to know how this price corresponds with what the Association is now quoting for this particular item.

I would like to have Mr. Dewey advise me by return mail the

meaning of the letters in reference to your 13/16 x 2¼ and 3¼ Factory and Better Air Dried flooring. I have your samples of this stock and know that it is S2S and can be laid, as I understand it, either side up, but I would like to know what the letters "C. M." & "E. B." represent.

From my understanding of your price and stock list the only items of Square Edged Flooring which you manufacture is 13/16 x 3½ #1 and Better and 13/16 x 4 #1 and Better.

And another thing I would like to be absolutely correct on is the measurement as to thicknesses and widths and how tallied for your 1 1/16" stock. That is, if the stock is tallied actual surface measurement as per 13/16 flooring or whether this is called 1¼ in thickness, and the correct widths at which you measure the stock.

If you have any literature which you get out yourselves or is published by the Maple Flooring Manufacturers Association would be pleased to receive this, and any new pamp-let which comes out would be pleased to receive these whenever issued.

Regarding your new grade of #2 on your next list which you send me I wish you would embody this price in the space which is not used for Clear White.

Thanking you to give me all of this information fully by return mail, I am,

Yours very truly, —— ——.

RCW/M.

[fol. 4504] Aug. 12, 1922.

Mr. R. C. Witbeck, 1209 1st National Bank Bldg., San Francisco, Cal.

DEAR SIR: Referring to your letter of the 10th regarding prices quoted on Maple.

We regret to advise that your mill's prices were a little out of line, and we were obliged to place our orders elsewhere, which we regret very much.

We hope for better luck next time, however.

Yours very truly, Western Hardwood Lumber Co. D. J. Cahill.

DJC:BAM.

[fol. 4505] August 14th, 1922.

The Western Hardwood Lumber Co., P. O. Box 303, Station C, Los Angeles, California.

GENTLEMEN: I have your favor of the 12th in reference to the two cars of Maple, which I thought you would surely place with me for the account of the Bigelow-Cooper Company, as I stated in my previous letter that I know that some of the Michigan manufacturers of Maple have increased their prices $10.00 per M on this wood, and the Bigelow-Cooper Company have seen fit to retain their old prices

and for that reason thought that you would surely be able to place this business with me for the account of this shipper.

Yours very truly, R. C. Witbeck.

RCW/M.
c/o Bigelow-Cooper.

I am enclosing you copy of Western Hardwood Lumber Company's letter of August 12th, showing that this business has passed us and hope that we can secure this firm's order for their next requirement.

[fol. 4506] August 24, 1922.

R. C. Witbeck, 1209 1st National Bank Bldg., San Francisco, Calif.

GENTLEMEN: We beg to advise that present orders for 13/16 x 2¼" Face will take our entire production up to the following dates:

Clear, September 27th.
No. 1, September 20th.
Factory, November 15th.

It will, therefore, be necessary for you to observe these dates in specifying shipment on your orders.

We have about 30,000′ of the No. 2 Grade on hand unsold and, as our production of this grade is very limited, we do not care to accept orders for any large amount in excess of the stock on hand.

We desire to again call your attention to the surplus items of stock on our list, and urge you to make a more earnest effort to secure orders for this stock. We are especially anxious to move some of the shorts.

If you find that our prices on this item are not in line with our competitors, it will be satisfactory for you to meet the market price. Our weekly sales reports show that other manufacturers are selling the short lengths and we see no reason why it should not be possible for you to secure a portion of this business.

Yours very truly, The Bigelow-Cooper Company. —— ——;
Secretary.

JED. R.

[fol. 4507] GOVERNMENT'S EXHIBIT No. 77

Sept. 1, 1916.

Mr. George W. Keehn, Secretary Maple Flooring Manufacturers' Assn., Chicago, Ill.

DEAR SIR: Our attorneys to whom we submitted the Minimum Price Plan Amendment to the Articles of Association have just advised us that, in their opinion, this is in direct violation of the Fed-

eral Statutes and also of the Michigan Statutes which, they say, are much more stringent than the Federal Laws.

Under the circumstances we do not feel that we can be a party to or be bound by this agreement.

Yours very truly, East Jordan Lumber Co.

JJP/NCH.

[fol. 4508] September 7th, 1916.

East Jordan Lumber Company, East Jordan, Michigan.

GENTLEMEN: Replying to your letter of the 1st, the submission of the Minimum Price Plan to the Federal Trade Commission takes care of all legal questions pending the reply of the Commission, and if the Commission decides that the Plan is not legal, they will, no doubt, tell us to discontinue its operation.

The most important part of the work of the Federal Trade Commission, as I understand it, is to pass upon trade agreements such as ours, so business men will know what they can do in working out co-operative plans like the Minimum Plan Agreement.

When the Plan was under consideration the Association requested its attorney, Mr. Newman, to handle the legal details, and it was understood that the members of the Association would leave it to him instead of each member consulting his own attorney. If all the members submitted all Association questions to their attorneys we would have such a diversity of opinion that nothing could be accomplished, and for that reason it has been an advantage to the Association to have an able attorney like Mr. Newman to advise us.

Inasmuch as the Minimum Price Plan is an amendment to the Articles of Association, and is consequently now a part of that contract, all I can do, it seems to me, is to send a copy of your letter to the Board of Trustees. The Market Conditions Committee will hold a meeting next week, or the week following, and as several members of that Committee are also Trustees, I will call a meeting of the Trustees to be held on the same day if your Mr. W. P. Porter will attend the meeting.

[fol. 4509] We are enclosing you, herewith, blank which Wisconsin corporations have to fill out and file with the Secretary of State. We wish to call your attention particularly to paragraph 9 in this blank, and ask you to advise us, on advice from your attorney, if we can sign the same on account of the Minimum Price Plan. We understand that you have been advised by your attorney that the Minimum Price Plan does not conflict with the laws of the State or Federal government.

[fol. 4510] January 17th, 1917.

Foster-Latimer Lumber Co., Mellen, Wisconsin.

GENTLEMEN: Referring again to Mr. Latimer's letters of the 1st and 12th, Mr. Newman says he does not see how you can sign the affidavit paragraph nine while you are parties to the M. P. P., and his suggestion is that you postpone the filing of the affidavit for the

present, and he will look up the laws of the various states in which our members are located, and let us know at the Annual Meeting the best method of handling it.

I concluded to write to the other members today, suggesting that they also postpone the filing of their affidavits with their Secretary of State until after the Annual Meeting, which will give them plenty of time to file the affidavit before March 1st, as we do not wish anyone to place himself in an inconsistent position.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4511] January 17th, 1917.

To members.

GENTLEMEN: One of our members raises the question as to whether or not it would be consistent to sign the annual report to be filed with the Secretary of State, inasmuch as they are parties to the Minimum Price Plan.

In talking about it with our attorney, Mr. Newman, he suggests that the filing of the report be postponed until he has had an opportunity to go carefully over the laws of the different states in which our members are located, to see to what extent, if any, the M. P. P. might be considered to be in conflict with the Anti-Trust Laws of those states, in view of the fact that the Plan has been submitted to the Federal Trade Commission and the Department of Justice at Washington, and is still under consideration by the Commission.

We shall have the matter in shape by the time the Annual Meeting convenes, but in the meantime we thought we would drop you a line on the subject.

Yours very truly, George W. Keehn, Secretary.

[fol. 4512] February 7th, 1917.

Mr. H. I. Latimer, Secretary Foster-Latimer Lumber Company, Mellen, Wisconsin.

DEAR SIR: Replying to your letter of January 1st, inasmuch as the Association has never received the approval of the Federal Trade Commission to the Minimum Price Plan, submitted to the Commission on June 27th, 1916, and as the matter is still pending, the Plan has never been consummated and has never been in effect, and consequently you have never been bound by it.

We are returning herewith the blank form "Annual Report Domestic Corporation to the Secretary of State, State of Wisconsin" received with your letter.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4513] February thirteen, nineteen seventeen.

Mr. Geo. W. Keehn, Secy., 801 Stock Exchange Bldg., Chicago, Ill.

DEAR SIR: We are enclosing, herewith, copy of letter dated February 12th, from our attorney, W. F. Shea, regarding the signing of the report to the Secretary of State at Madison.

From this letter, there seems only one of two things to do, either to sign same with the notation that we are members of the Maple Flooring Manufacturers' Association whose Minimum Price Plan has been submitted to the Federal Trade Commission, or else resign from the Association and send in the report without any notation. This report must be filed before March 1st, and we wish you would advise us promptly which way you wish the report to go to the Secretary of State.

If we do not hear from you so that we can make the report in time, we will consider our resignation to the Association accepted and send the report in with no remarks.

Yours truly, Foster-Latimer Lumber Co.

HIL. CEM.
Encl.

[fol. 4514] February 22nd, 1917.

Mr. H. I. Latimer, Secretary Foster-Latimer Lumber Co., Mellen, Wisconsin.

DEAR SIR: Replying to yours of the 13th, we are sending you for your information certain correspondence, which kindly return for our files.

Mr. Newman left for California on the 8th, but I had a long talk with him on the 6th, and his views are outlined in my letter to you of the 7th.

It was my thought when this subject was first broached to add to paragraph nine before making the answer something to this effect "We are members of associations which classify grades and values of lumber and kindred products," but Mr. Newman said that in his opinion it was not necessary to do so.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4515] February Twenty-seven, Nineteen Seventeen.

Mr. Geo. W. Keehn, Secy., 801 Stock Exchange Bldg., Chicago, Ill.

We are returning the same for your files, and for your information would advise that we have sent in our report to the State, making the following notation thereon: "We are members of Maple Flooring Manufacturers' Association and all matters pertaining to that organization are submitted to Federal Trade Commission."

Yours truly, Foster-Latimer Lumber Co.

EJG. CEM.
Encl.

[fol. 4516] Copy

Quarles, Spence & Quarles

Milwaukee, January 29th, 1917.

Messrs. Newman, Poppenhusen & Stern, Lumber Exchange Building, Chicago, Ill.

GENTLEMEN: We are in receipt of your communication of January 27th, asking whether a corporation organized under the laws of the state of Wisconsin can be compelled by the Secretary of State to answer the following question: "Whether such corporation has entered into any combination, conspiracy, trust, pool, agreement or contract, etc."

Section 1791-J which provides that any corporation organized under the laws of the state of Wisconsin which shall enter into any combination, conspiracy, trust, etc., shall upon proof thereof have its charter cancelled and annulled, provides further: "Every corporation shall upon filing its annual report with the Secretary of State, make and attach thereto the affidavit of its President, secretary or general managing officer, fully stating the facts in regard to the matters specified in this section."

It is, therefore, apparently under the authority of this section that the above question is included in the printed form sent to your client.

We can see no reason why the Legislature cannot give the Secretary of State the right to demand this information.

Very truly yours, (Signed) Quarles, Spence & Quarles.

[fol. 4517] Feb. 9, 1918.

Mitchell Bros. Company, Cadillac, Michigan.

GENTLEMEN: Under date of Jan. 29th Secretary Keehn has forwarded us your third listing on 1½" Maple Flooring at $3.00 per M below the minimum price.

Kindly enter our order for 20,000 feet 13/16 x 1½" face Clear Maple Flooring at $47.50 per M delivered on St. Paul rate, for shipment July 1st, or sooner if required. The chances are we should want this possibly 30 days sooner.

We shall be pleased to receive your acknowledgment of this order at an early date, and remain

Yours truly, Osgood & Blodgett Mfg. Co., per W. M. Erickson.

[fol. 4518] April 29th, 1918.

Mr. George W. Keehn, Secy., 801 Stock Exchange Bldg., Chicago, Ill.

DEAR SIR: We received an inquiry today for prices on flooring for shipment to Winnepeg, Manitoba. We may have an opportunity to get rid of some of our 2¼" clear birch flooring and would like to ask if the minimum prices are in effect on sales outside of the

United States. We are not very familiar with this plan since Mr. Gillouly left, and wish you would kindly let us know regarding this matter.

Yours truly, Foster-Latimer Lumber Co.

[fol. 4519] Received at
6CHK010.

Holt Hardwood Co., Oconto, Wis.:

Meeting at Wells Michigan Postponed until March Sixth or Seventh.

George W. Keehn.

450PM.

[fol. 4520] February 26, 1919.

Holt Hardwood Company, Oconto, Wis.

GENTLEMEN: Confirming telegram, we found it impossible to arrange the meeting to be held this week at Wells, Mich., so the meeting is postponed until March 6th or 7th.

Kindly advise if either date will be convenient to you, and after we receive replies from all the parties interested, we will fix a definite date for the meeting and advise you in ample time by mail or wire.

Thanking you for your reply to our letter of the 22nd, and for your willingness to meet and discuss the subject with the Committee, I am,

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4521] Feb. 27, 1919.

Mr. Geo. W. Keehn, Chicago, Ill.

DEAR SIR: We have your letter of the 26th also referring to your telegram advising that you were unable to arrange the meeting for this week and that you wish to postpone it until March 6th or 7th. Either one of these dates will be conv-ient for us, but we hope that you will be able to arrange the meeting for Menominee instead of Escanaba. Menominee is more central for all concerned. Furthermore, Mr. Holt is very anxious to meet with you and does not feel that he can spare the time to go to Escanaba.

Our present prices on Maple Flooring F. O. B. cars Oconto are for 13/16 x 2¼" Clear $58.00, No. 1 $54.00, and Factory $44.00 with the usual spread for the other widths. If consistent we would appreciate one of your price lists showing the prices delivered on the different rates of freight from Cadillac as we are anxious to keep our prices in line with our competitors.

Very truly yours, Holt Hardwood Company.

[fol. 4522] 11 CHKO. 16.
B Chicago Ills., 2PM., Mar. 3, 1919.

Holt Hardwood Co., Oconto, Wis.:

Meeting arranged to be held at Wells, Michigan, Friday Seventh your attendance will be greatly appreciated.

George W. Keehn.

222PM.

[fol. 4523] March 3, 1919.

Holt Hardwood Co., Oconto, Wis.

GENTLEMEN: Confirming telegram, the meeting has finally been arranged to be held at Wells, Mich., at the office of the I. Stephenson Co. Trustees, on Friday the 7th,

We sincerely hope that it may be possible for Mr. Holt to also attend the meeting. The entire Committee will be there and the other three non-member manufacturers in the Northwest will also be represented.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4524] Mar. 4, 1919.

Geo. W. Keehn, Stock Exchange Bldg., Chicago, Ill.

DEAR SIR: The writer will arrange to be in Escanaba Friday morning Mar. 7th, and will meet you at I. Stephenson Co's. office. Mr. Holt will make an effort to attend this meeting.

Very truly yours, Holt Hardwood Company.

[fol. 4525] March 6, 1919.

Mr. William Horner, Reed City, Mich.

DEAR SIR: At the last meeting of the Association a Committee was appointed to see you and the other flooring manufacturers in lower Michigan who are not members of our Association, with the view of getting you and them to join the Association.

The Committee consists of:

Dr. George W. Earle of Wisconsin Land & Lbr. Co.
C. T. Kerry of Kerry & Hanson Flooring Co.
F. I. Nichols of Nichols & Cox Lumber Co.
George Strable of Strable Lumber & Salt Co.
J. D. Staple of Northwestern Cooperage & Lbr. Co.
R. E. MacLean of I. Stephenson Co. Trustees and the writer as Secretary of the Association.

The Committee wishes to arrange a conference with you to be held at Reed City on the 12th, 13th or 14th, whichever date may be more convenient to you.

These are critical times in the flooring industry and the present selling values of flooring are wholly insufficient to meet the cost or

market value of the rough lumber, at high cost of labor and all supplies entering into the production of flooring and the very high overhead resulting from the small volume of demand, and it was the unanimous sentiment of the meeting that the sincere and hearty cooperation of every manufacturer of flooring is absolutely necessary if a reasonable profit or any profit whatever is to be derived from the business.

The Committee will be very glad to talk the situation over with you, and it is hoped it will be agreeable to you to have the Committee call upon you. Will you kindly let me know as soon as possible if any one of the dates mentioned will be convenient for you, and we will advise the Committee accordingly.

The Committee also intends to call upon Ward Brothers at Big Rapids, and upon A. L. Dennis Salt & Lumber Co. at Grand Rapids, and we are trying to arrange dates which will be convenient for all concerned.

Awaiting your reply, we are,

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4526] March 8, 1919.

Holt Hardwood Company, Oconto, Wis.

GENTLEMEN: Referring to the conference yesterday at Wells, we are enclosing blank forms for your statistics of flooring shipments during the calendar years 1916, 1917 and 1918, and we shall be glad to have you fill them out and return them at your earliest convenience.

We are also enclosing you sample copies of the reports made to the Association, thinking you might be interested in seeing them.

1. Daily Report of Shipments. This is made at the close of business each day.

2. Summary of Shipments. This is made at the end of each month.

3. Reports of Stocks and Orders on Hand. This is made on the first of each month.

4. Production and New Business Booked. This is made at the end of each month.

5. Current Net Values. This is made at the end of each month and covers only new orders booked during that month for flooring for shipment by car. Maple only 13/16 x 2¼" Clear, No. 1 and Factory.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4527] Mar. 17, 1919.

Maple Flooring Manufacturers' Association, Chicago, Ill.

GENTLEMEN: Pardon us for not replying to your letter of March 8th, but we expect to be able to have our 1917 and 1918 shipments

ready for you before this. This report has been delayed by the office force working on our income tax report, and the auditor is now working on oyr books, but we will get this report to you some time this week.

Very truly yours, Holt Hardwood Company.

WLD/IH.

[fol. 4528] March 17, 1919.

Holt Hardwood Co., Oconto, Wis.

GENTLEMEN: We received last week reports from Flanner-Steger Land & Lumber Co., Mason-Donaldson Lumber Co. and Kneeland-McLurg Lumber Co. of their flooring shipments, and we hope it will be convenient for you to send yours within a few days.

Please use the blank forms we sent you as if you do so, it will be more convenient for us in tabulating the reports.

The proposed meeting with Horner to be held last week had to be postponed because Mr. Sam Horner was away from Reed City, but we received a letter from him saying they would be glad to meet with the Committee Friday the 21st, so the meeting has been set for that date.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4529] Copy.

Mar. 18, 1920.

Mr. Geo. W. Keehn, Secy. Maple Flooring Mfgrs. Assn., 1045 Stock Exchange Building, Chicago, Illinois.

DEAR SIR: We herewith resign from our membership in your Association. The decision of the court in the case of the American Hardwood Manufacturers Association at Memphis, Tenn., indicates to us that we cannot continue membership in your Association without violating the law and things which we supposed were permitted and legal, we now find are illegal, and we are not willing to continue our membership under these conditions.

If it should later transpire that the decision of the court was reversed or that certain activities may be permitted, we shall be glad to co-operate with the other maple flooring manufacturers, but under present conditions we do not feel that we can continue to be connected in any way with the activities of your Association.

Regretting that conditions are as they are, and hoping that the court may see fit later on to modify the injunction so that we can continue to carry on such activities as will be helpful to us and at the same time not illegal, we are

Yours truly, Holt Hardwood Company.

WAH/AW.

[fol. 4530] March 19, 1919.

Holt Hardwood Co., Oconto, Wis.

GENTLEMEN: It is planned now to hold a general meeting of the Association at the Hotel La Salle, Chicago (Suite 209) on Thursday, March 27th, at 10:00 A. M.

The Committee for lower Michigan has arranged conferences to be held with the non-member manufacturers in that territory on the 21st and 22nd, but there is some possibility of postponement because some of the members of our Committee may not be able to attend this week. We are hopeful, however, that the conferences can be held so that their outcome can be reported to the general meeting of the Association.

All the members of the Association and especially your neighbors in the Northwest, will be glad to see you at this meeting so that all details respecting your basis of membership in the Association can be arranged with the Committee for the Northwest.

A luncheon is always served in the meeting rooms and the travelling expenses of members attending meetings are paid out of the general funds of the Association. We are mentioning this not because it is of much importance, but simply to tell you what the custom of the Association is in this respect.

We are writing you today about the meeting so in case I leave for Reed City tomorrow you will receive this notice in ample time to make your plans to attend the meeting. Should it become necessary for any reason to postpone the meeting, we will advise you.

Awaiting your reply and hoping we shall have the pleasure of seeing you here on the 27th if the meeting is held on that date, I am,

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4531] Mar. 20, 1919.

Maple Flooring Manufacturers' Assn., Chicago, Ill.

GENTLEMEN: We have your letter of March 19 and note that there will be a general meeting of the Association in Chicago on March 27th. The writer will arrange to attend this meeting.

To show you what we are up against, we received a letter this morning from our Minneapolis representative advising that the Nashville Hardwood Flooring Company have quoted them 13/16 x 1½" Fc. Clear at $51.50. and 2¼" Clear at $56.50 delivered Minneapolis. You understand of course, that the Nashville Hardwood Flooring Company is Horners Chicago representative, and that there will be a dollar or more commission deducted from these prices, and three dollars or more freight which makes about $46.00 for the 1½" and $57.00 for the 2¼" F. O. B. cars Milwaukee, and we all know that the stock cannot be produced at these prices under existing conditions.

Very truly yours, Holt Hardwood Company.

WLD/IH.

[fols. 4532 & 4533] April 10, 1919.

To members.

GENTLEMEN: For your more convenient use, we have had printed to go in the Rate Book a list of Registered Wholesalers and Commission Men to whom a commission can be allowed as set forth in the last Concession Sheet.

The list has been printed allowing spaces between the letters of the alphabet to add additional registrations. We are sending you two lists and should you need additional lists, please let us know how many more you want, and we will forward them to you.

Yours very truly, George W. Keehn, Secretary.

[fol. 4534] May 1, 1919.

Maple Flooring Manufacturers Assn., Chicago, Ill.

GENTLEMEN: Beg to advise that we have a large number of wholesalers and commission men that have been handling our stock for a good many years. Some of them are special representatives. We have been so busy with our new construction that up to the present time we have been unable to make a list of these wholesalers and commission men, but we will get this list out in a few days and submit them for registration.

Very truly yours, Holt Hardwood Company.

[fol. 4535] May 2, 1919.

To Members.

GENTLEMEN: Referring to our statement of March 25th "Memorandum of Shipments and Allotted Ratios',, the audit of the old statistics of the new members has been completed and the following is the result of the audit in annual averages of shipments and allotted ratios:

No. 23, Holt Hardwood Co.	4,080	M
" 39, Mason-Donaldson Lumber Co.	2,443	"
" 45, Flanner-Steger Land & Lbr. Co.	4,224	"
" 50, Kneeland-McLurg Lumber Co.	814	"

But, as noted in our statement of March 25th, some equalization will be made by the Committee for the Northwest in arriving at the allotted ratio of No. 50 because their plant was closed down 15 months out of the 36 months, and consequently, No. 50 had very little flooring stock to ship from during 1917 and 1918. As their allotted ratio does not take effect until they resume the manufacture of flooring, the Committee and No. 50 will no doubt get together and arrive at a mutually satisfactory basis of membership at the next general meeting of the Association.

The following is the result of the audit of the shipments of William Horner-Reed City and Newberry shipments combined:

1916	32,958	M
1917	36,230	"
1918	27,762	"
Total	96,950	"
Annual Average	32,317	"

The following is a statement of the

Allotted Ratios and Percentages as at March 1, 1919

No.		Allotted ratios M feet	Allotted ratios %

		145,295	100%

The Allotment Statement for the month of March is enclosed.
Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4536] November 26, 1919.

Holt Hardwood Co., Oconto, Wis.

Attention of Mr. W. L. De Witt

GENTLEMEN: Replying to yours of the 22d, I spoke to the Trustees at their meeting on the 21st, and read to them our correspondence regarding your suggestion that the allotment feature in the work of the Association be suspended for the present.

The Trustees were of the unanimous opinion that it would be detrimental to the welfare of the industry to do so, and also that they, the Trustees, have not the power to suspend the Allotment Contract. The Trustees suggest that, if you wish to do so, you can bring it up at the next general meeting of the Association, but the Trustees hold the opinion that it would be necessary to have the unanimous consent of all parties to the contract in order to make such a radical change as you suggest.

Replying to the other question raised in your letter of the 22d regarding labor conditions as affecting production, we think the revision of Article XVIII "Discontinuance of Manufacture" which was adopted at the general meeting held on June 19th, covers that point. Article XVIII as amended reads as follows:

* * * * * * *

[fol. 4537] December 10, 1919.

Boring

To Members.

GENTLEMEN: You will be interested to know that Mitchell Brothers Co. and Cobbs & Mitchell, Inc., have discontinued boring flooring and have sent notices to their trade to that effect.

The following is a copy of the notice which we think is happily worded, particularly the reference to labor conditions:

"We Have Discontinued Boring Flooring

Because of modern methods of laying hardwood floors, and the improved nail now used, the boring of dressed and matched flooring is no longer of practical value. Although convinced long ago that boring is not an essential feature we have not discontinued it heretofore because some of our customers have objected to our doing so. But under the labor conditions of today we find that the waste in flooring destroyed by the process is too serious to disregard. Consequently our practice of boring will be discontinued."

According to our records, more than half of our members do not now bore their flooring, so the custom of boring seems to be more honor-in the breach than in the observance. If other members who now bore their flooring decide to discontinue the practice, we shall be glad to hear from them and will notify the membership accordingly.

Would it not be appropriate if all the members of the Association discontinue boring on January 1st, the date the new standard thickness of 25/32" takes effect?

Yours very truly, George W. Keehn, Secretary.

[fol. 4538 & 4539] January 19th, 1920.

George W. Keehn, Sec., Stock Exchange, Chicago, Ill.

DEAR SIR: In reply to yours of January 17th, while ordinarily, we think the Committee meetings are of great deal more value where the complete statistics are available for consideration, since it would appear from the wire you have from Flanner-Steger Land & Lumber Co. that there may be considerable delay in getting their complete report, it strikes us that in view of present unsettled conditions the earlier our Committee meeting is held the better it would be for all concerned. Therefore, in our opinion it would be advisable to hold the meeting the latter part of this week, even though we do not have the complete statistics at hand. We have just learned that one of our members is now quoting the following basis on flooring. Minneapolis and common points:

2¼" Clear	$170.00
" #1	150.00
" Factory	115.00

There has never been a time in our experience when the flooring business was in greater need of reliable information as to stocks and prices than we are at the present time.

Yours truly, Foster Latimer Lumber Co.

[fol. 4540] Feb. 28, 1920.

Geo. W. Keehn, Chicago, Ill.

DEAR SIR: Wish you would please send us one of the rubber stamps giving the terms of sale adopted by the Association.

Very truly yours, Holt Hardwood Company.

[fol. 4541 & 4542] March 5, 1920.

To members.

GENTLEMEN: As instructed at the annual meeting of the Association held on February 12th, we have compiled a new "Table of Values Based Upon Average Cost."

The enclosed chart "Results of Seven Test Runs Consolidated" explains the basis used and how it works out.

The new "Table of Values Based Upon Average Cost" will be dated March 1st and will be a reprint of the 13/16" Table of Values of 9-19-19 plus $60.00, and of the ⅜" Table of Values of 12-22-19 plus $50.00.

The differentials on Birch 13/16" Clear and No. 1 and on Maple, Beech and Birch Thick flooring and Jointed flooring will be shown

in a supplemental sheet. The copy is in the hands of the printer and as soon as we receive the printed sheets from him we will send each member four sets for the Rate Books.

Yours very truly, George W. Keehn, Secretary.

[fol. 4543] June 14, 1920.

To members.

GENTLEMEN: The appeal for modifications of the injunction in the Memphis case was argued before the U. S. Supreme Court at Washington, on June 1st, and in the decision handed down by the court on June 7th, the appeal was denied and the case was set for hearing on October 11th. References to the decision appear in the American Lumber of the 12th, on pages 51 and 67.

In correspondence with Dr. Earle as President of the Association, it has been suggested that the question of what course the Association should now pursue would properly come before the Association as a whole and could be discussed at the semi-annual meeting to be held in July.

* * * * * * *

[fol. 4544] November 22, 1920.

Holt Hardwood Co., Oconto, Wis.

Attention of Mr. W. L. De Witt

GENTLEMEN: Referring to conversation with your Mr. W. L. De Witt when he was in Chicago on the 19th, the following is a statement of the amount you owe the Association according to our records and as per our letter of May 13th:

Allotment Account

December	Debit	$8.72	
January	"	202.15	
February	"	509.50	
			$720.37

Expense Fund

Assessments called February 16, 1920	160.00
	$880.37

We shall be very glad indeed to have you renew your cooperation and resume your membership in the Association, and after we hear from you we shall be pleased to send you, if you would like to have them, copies of our statistical reports for the month of October, including Stocks and Unfilled Orders on Hand on November 1st, also a copy of the Minutes of the meeting held on the 19th, which Mr. De

Witt attended but which he was obliged to leave before the business of the meeting was discussed.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4545] Nov. 22, 1920.

Geo. W. Keehn, Chicago, Ill.

DEAR Mr. KEEHN: We are inclosing check for $880.37 to clean up our old account with the Association. The writer is having a hard time convincing Mr. Holt that everything is all right to go back into the Association, and I may need some help from some of the other members. Mr. Holt will be in Chicago the latter part of this week and I will try and persuade him to call on you.

Very truly yours, Holt Hardwood Company.

[fol. 4546] Nov. 22, 1920.

Mr. Geo. W. Keehn, Chicago, Ill.

DEAR SIR: We note by your report of the General meeting that you do not mention the resolution regarding the allotment plan at all. Please advise us by early mail, if you intend to put the allotment plan into force immediately or if this is to be held in abeyance for the present.

Yours very truly, William Horner.

[fol. 4547 & 4548] November 29, 1920.

William Horner, Reed City, Mich.

GENTLEMEN: Replying to yours of the 22nd, which was received while I was away from the city.

The question of resuming the allotment payments, which have been held in abeyance since March 31st, will be taken up by correspondence with the Trustees and the entire membership in time so that some definite action can be taken at the next general meeting to be held on December 22nd.

Please let us know when you resumed your manufacturing operations at Reed City, that is, the date you consider your plant was in operation to an extent sufficient to entitle you to the restoration of your allotted ratio for your Reed City plant.

Very truly yours, Geo. W. Keehn, Secretary.

[fol. 4549] December 31, 1920.

William Horner, Reed City, Michigan.

GENTLEMEN: Replying to yours of the 27th, I hope Mr. Sam Horner and Mr. Ralston will both attend the special meeting on January 6th, and in case Mr. Ralston cannot be here at the meeting of the Special Committee on January 5th, I hope Mr. Sam Horner will attend that meeting and act in place of Mr. Ralston.

The general meeting on the 22nd, was a mixed-up mess before it

was finished and considerable discussion and another vote took place after Mr. Ralston left the meeting.

However, all these things can be more fully explained to you the next time we see you than by correspondence, so in the meantime, kindly hold in abeyance your opinion of what happened and what should have happened at the meeting.

Wishing you a Happy New Year,

Very truly yours Geo. W. Keehn, Secretary.

[fol. 4550] January 7, 1921.

Weekly Sales Reports

To members:

GENTLEMEN: In order that all of the members may be fully posted regarding the state of the market as reflected by current sales, and in accordance with the action taken at the meeting yesterday, all of the members of the Association are to make Weekly Reports of all their sales of Maple, Beech and Birch Flooring. In case you have made no sales during the week, be sure and send in your report just the same with the notation "No Sales."

We enclose blank form for your report for the week ending January 8th.

If possible, please always make out these reports and mail them to us at the close of business Saturday of each week, so you will always receive our report on Tuesday or Wednesday of the following week.

Yours very truly, George W. Keehn, Secretary.

[fols. 4551 & 4552] January 18, 1921.

To members:

GENTLEMEN: We enclose blank form for Survey of Costs for the last quarter of 1920, which kindly make up if your records enable you to do so and return one copy of the report to us as soon as possible, keeping the other copy for your files.

You will note that in question 5 the interest is to be figured at 6%, which is more in harmony as an average than the old rate of 5%, which is too low an average in view of financial conditions.

You will also note in question 8 that the annual depreciation on the flooring plant is to be figured at the rate allowed by the Government instead of at an arbitrary rate of 10% as in previous Surveys.

These changes were made by the Special Committee in formulating Article II of the Minimum Price Basis, so we are applying them to the last quarter of 1920.

Very truly yours, George W. Keehn, Secretary.

[fol. 4553] January 24, 1921.

Registered Wholesalers & Commission Men

To members.

GENTLEMEN: The following is Bulletin No. 1 giving the nominations so far submitted for registration of Wholesalers and Commission Men.

If any of you have any objections to any of these nominations, please advise at once, so we can submit your objections to the Trade Relations Committee,—otherwise, registration will automatically take effect within ten days from this date and the Secretary will then notify the members that the registration has been made; but no commission is to be paid to any wholesaler or commission man nominated for registration until notification of registration is received from the Secretary.

Dr. Earle has appointed the following to serve as the Trade Relations Committee:

B. P. Whedon, Chairman and J. E. Dewey as representing eastern lower Mchigan.

M. E. Thomas and T. M. Ralston as representing western lower Michigan.

A. C. Wells and Dr. Earle as representing the northwest.

Yours very truly, George W. Keehn, Secretary.

* * * * * * *

[fols. 4554 & 4555] Jan. 27, 1921.

Mr. George W. Keehn, Secy. Maple Flg. Mfg. Association, Chicago, Ill.

DEAR SIR: Replying to your circular of the 24th, containing nominations for registration of wholesalers and commission men, we desire to offer objections to the following concerns:

Baxter Sash & Door Co., Duluth, Minn.
Duluth Lumber Co., " "
Lake Shore Saw Mill & Lbr. Co., Cleveland, Ohio.
Morrison, Merrill & Co., Salt Lake City, Utah.

We consider these concerns to be classed as retail dealers and are not entitled to be considered as wholesale or commission dealers.

Yours very truly, The Bigelow-Cooper Company, Secretary.

[fols. 4556 & 4557] February 26, 1921.

To members.

GENTLEMEN: In accordance with the action taken at yesterday's meeting our weekly reports of sales commencing this week will show under each group the number of each member belonging to that group who has not reported, if any, the same as our weekly reports now indicate in the case of members reporting "No Sales," so if

there is any week in which you make no sales please be sure to send in your report with the notation "No Sales."

Our report for the week ending today will not be compiled until Wednesday or possibly Thursday in order to give every member an opportunity to send in his report to us. We enclose another supply of blank forms.

Very truly yours, George W. Keehn, Secretary.

[fol. 4558] April 21, 1921.

To members:

GENTLEMEN: In accordance with following telegram from Dr. Earle "make call for flooring meeting Wednesday 27th," a general meeting of the Association is hereby called, to be held at the Hotel La Salle (Suite 209), Chicago, Wednesday, April 27th, at 11:00 A. M., Chicago time.

Conditions in the flooring industry are in a deplorable state and it is of the utmost importance that every member of the Association be represented at this meeting, so please be sure and attend.

Kindly let us know, by return mail, whether or not you will be present so we can make all necessary arrangements for the meeting and luncheon.

Yours very truly, George W. Keehn, Secretary.

[fol. 4559] April 22, 1921.

Geo. W. Keehn, Sec., Chicago, Ill.

DEAR SIR: Answering yours of the 21st, the writer will attend the flooring meeting on Wednesday, April 27th.

Yours truly, Osgood & Blodgett Mfg. Co.

[fol. 4560] April 23, 1921.

Holt Hardwood Co., Oconto, Wis.

GENTLEMEN: Complying with your request of the 22nd, we enclose duplicate of last assessment notice.

We are glad you will be represented at the meeting on the 27th, and note what you say about not furnishing any more reports until there is something done to make more cooperation. I hope some new plan can be worked out that will improve conditions.

Very truly yours, Geo. W. Keehn, Secretary.

[fol. 4561] May 16, 1921.

To members.

GENTLEMEN: A general meeting of the Association will be held at the Hotel La Salle, Chicago (Suite 209), Friday, May 20th, at 12:30 P. M., Chicago time.

Luncheon will be served at 1:00 P. M. sharp, so please be punctual. The business meeting will be held immediately following the lunch-

eon and as subjects of great importance to the welfare of the industry are to be discussed every member of the Association is earnest-urged to be present at the meeting.

By order of the President.

Very truly yours, George W. Keehn, Secretary.

[fol. 4562] May 27, 1921.

Mr. J. E. Dewey, Secretary the Bigelow-Cooper Company, Bay City, Michigan.

DEAR MR. DEWEY: We are glad to have your letter of the 24th, and as I know the other members of the Association will be interested in it we are sending them a copy.

All of the members who were present at the last meeting expressed regret at not seeing you there, because you have been very regular in your attendance and also because your views on conditions in the flooring business are always interesting and beneficial.

Very truly yours, Geo. W. Keehn, Secretary.

[fol. 4563] May 28, 1921.

To members.

GENTLEMEN: We have the following letter from East Jordan Lumber Company dated the 26th:

"We have your favor of the 21st and are exceedingly sorry that the minimum price plan did not go through, as we feel this is the only plan which has ever worked out satisfactorily, and that it would be especially valuable to us at this time.

The writer was away until Tuesday of this week and neglected to report that we had made no sales of flooring last week. We will try to see that all of our sales are reported promptly on Saturday of each week hereafter.

Very truly yours, East Jordan Lumber Company. (Signed) John J. Porter."

Very truly yours, George W. Keehn, Secretary.

[fol. 4564] June 3, 1921.

To members.

GENTLEMEN: We sent you by mail yesterday new fillers for your Rate Books as follows:

1. Table of Values for 13/16" Flooring dated May 21, 1921.
2. Table of Values for 3/8" " " " " "
3. Concession Sheet dated May 21, 1921.

We have revised and are having reprinted our list of Wholesalers and Commission Men and will send you copies in a few days as soon as received from the printer. In the meantime, it was sort of under-

stood at the last meeting that the Red Book would serve as a guide in classifying Wholesalers and Commission Men until such time as our own printed list is made more complete by such additions to our list as may be made from time to time. It would seem to me that any lumber dealer who is classified in the Red Book as a Wholesaler or Commission Man should automatically go on our list to avoid any unjust discrimination. The names of other dealers who are not classified in the Red Book as Wholesalers and Commission Men should be passed upon by the Committee the same as heretofore before we list them. This commission question has always been a complicated one and always will be.

Very truly yours, George W. Keehn, Secretary.

[fol. 4565] June 4, 1921.

To members.

GENTLEMEN: We have the following from Nichols & Cox Lumber Company which we are passing on to you for your information:

"We have found the demand for 13/16" x 2¼" face Clear Maple Flooring to be very strong, and we are oversold for about thirty days. We are now quoting this stock at $93.00 per thousand f. o. b. Cadillac, and from present indications do not believe there will be any trouble in getting this for our Flooring.

It is really worth it, considering present manufacturing and market conditions."

Very truly yours, George W. Keehn, Secretary.

[fol. 4566] June 15, 1921.

To members.

GENTLEMEN: The last general meeting of the Association adjourned subject to the call of the President and in correspondence with Dr. Earle about holding a meeting this month he writes us as follows:

"Regarding the holding of meeting, I feel quite sure from my view point that sometime in July will be as advantageous, when the audit will have been completed and general matters have to a degree adjusted themselves."

Mr. Singler has just completed the audit of the weekly sales reports of the lower Michigan mills and as soon as our statistical reports for the month of May shall have been compiled and issued he will start on a trip among the mills in the northwest to audit their weekly sales reports.

We now have the May reports from all the members of the Association excepting two and we hope to get their reports within a few days so that our reports can be made out and mailed to you early next week.

It seems to us that conditions in the flooring industry have im-

proved considerably, as there has been quite an increase in the volume of new business booked. It also seems to us that the members are in a better position now than ever before to be fully and promptly informed regarding the current state of the market as reflected in the weekly sales reports, because practically all of the members are now making these reports regularly and promptly.

We will advise you as soon as Dr. Earle fixes the date of the next general meeting so that you can make your plans to attend as every member should be represented at the meeting.

Very truly yours, George W. Keehn, Secretary.

[fol. 4567] June 15, 1921.

Holt Hardwood Co., Oconto, Wis.

GENTLEMEN: We have been expecting you to resume making your monthly statistical reports the same as the other members are doing but as we have not yet received your reports for the month of May including Stocks and Unfilled Orders on Hand June 1st we are writing you to find out whether or not you intend to make these reports.

We hope you will send us your May reports by return mail so we can include them with the reports of the other members which will, of course, make our statistics more complete.

Kindly let us hear from you and oblige

Very truly yours, Geo. W. Keehn, Secretary.

[fol. 4568] July 14, 1921.

Mr. Geo. W. Keehn, Secretary Maple Flooring Mfgrs. Association, Chicago, Ill.

DEAR SIR: We thank you very much for yours of the 12th with enclosures which we have gone over carefully and herewith return.

If the letters we wrote you were in any way conducive to bringing the members to realize that they must report fully and promptly their sales and endeavor to work together instead of slipping something over on ach other, they were well worth the effort.

Very truly yours, The Bigelow-Cooper Company.

[fol. 4569] George W. Keehn, Stock Exchange Bldg., Chicago, Ill.:

Members from Bay City Saginaw Grayling and Reed City meeting here tonight consider it imperative Market Conditions Committee meeting be called immediately by wire suggest Friday as date.

J. E. Dewey.

[fol. 4570] August 11, 1921.

To members.

GENTLEMEN: We have a letter from Dr. Earle recommending that a general meeting of the Association be called to be held Friday, August 19th, at 10:30 A. M., Chicago time, so the meeting is hereby called to be held on that date in Suite 1809, Hotel La Salle.

Several members have not yet sent in their July reports, but we hope to receive them before the end of this week so that our July statistics, including Stocks and Unfilled Orders on Hand on August 1st, will be ready in time for the meeting, in order that the members may be fully informed regarding present trade conditions as reflected by our statistics.

Our Weekly Sales Reports indicate considerable demoralization in the flooring situation and it seems absolutely necessary that every member should be represented at the meeting so that greater cooperation can be assured and conditions in the industry, which are now much disturbed, can be stabilized.

The Oval Wood Dish Corporation of Tupper Lake, N. Y., who have recently commenced the manufacture of flooring, have applied for membership in the Association, and an invitation has been extended to them to attend the meeting on th 19th. Their application for membership was referred to the Board of Trustees, and the Board is heartily in favor of their admission to membership.

Will you please let us know by return mail whether or not you will be represented at the meeting and how many from your company will attend?

Yours very truly, George W. Keehn, Secretary.

[fol. 4571] August 11, 1921.

Market Conditions Committee.

GENTLEMEN: In accordance with instructions from Dr. Earle, we are issuing call today for a general meeting of the Association to be held on the 19th.

If any of you know of any recent sales of rough Maple Flooring stock on the open market we would be glad to have the information by Monday, or Tuesday of next week so we can compile some data which may be of use at the general meeting.

Very truly yours, George W. Keehn, Secretary.

[fol. 4572] September 17, 1921.

Special Committee

Mr. M. E. Thomas, Chairman; Dr. George W. Earle, Mr. B. P. Whedon, Mr. George C. Wilce.

GENTLEMEN: There will be a meeting of your Committee in the rooms of the Association Thursday, Sept. 22nd, at 10:30 A. M., Chicago time, for the purpose of formulating a report to submit to the general meeting of the Association, to be held on the 23rd.

For further details regarding this subject, please be referred to my letters of August 26th.

Yours very truly, George W. Keehn, Secretary.

[fol. 4573] Rough Drafts

Form 1

Declaration of Our Business Policy

Believing that the sale of any commodity below the cost of production is unfair competition and is certain to bring ruin and disaster to any industry and consequently is detrimental in the long run to public welfare, we hereby voluntarily agree to pay into the Treasury of the Maple Flooring Manufacturers Association, Ten per cent (10%) on any and all sales which we may make of Maple, Beech and Birch flooring 13/16" and thicker of standard grades and lengths, below the average cost of production, plus the average cost of delivery to destination, as determined from time to time by the Association's Survey of Costs and Tables of Delivered Values Based Upon Average Cost.

John Smith Flooring Company, By —— ——.

Form 2

Declaration of Our Business Policy

Believing that the sale of any commodity below the cost of production is unfair competition and is certain to be ruinous and destructive to any industry and consequently is detrimental in the long run to public welfare, we hereby voluntarily agree, regardless of what other manufacturers of flooring may do, to pay into the Treasury of the Maple Flooring Manufacturers Association, Ten per cent (10%) on any and all sales we may make of Maple, Beech and Birch flooring, 13/16" and thicker, of standard grades and lengths at values below the average cost of production, plus the average cost of freight to destination, as ascertained from time to time by the Maple Flooring Manufacturers Association's Survey of Costs and Tables of Values Based Upon Average Cost, after allowing for commissions not exceeding $2.00 per M feet to Wholesalers and Commission Men and to our own Special Representatives. And the said Ten per cent (10%) shall be reckoned upon the average cost of said flooring delivered at destination as indicated by the Maple Flooring Manufacturers Association's Rate Book.

John Smith Flooring Company, By —— ——.

[fol. 4574] September 16, 1921.

To members.

GENTLEMEN: In accordance with your instructions at the last general meeting of the Association, the proposed revision of the Articles of Association has been drafted and in order that you may have an opportunity to study them before the next meeting is held, we are enclosing a copy which, for your greater convenience, is in printed form. The printer is holding the type set up so that further revisions can be made, if desired.

Several changes are suggested in this proposed revision, namely:

Article II, "Objects" have been made more general and include "the exchange of information concerning the character and nature of actually completed and closed business transactions of its members". This refers to the Weekly Sales Reports, etc.

Article XIV, "Determining average cost" is entirely new.

Article XIX is modified so that a member would not be compelled to manufacture at least 50% of his allotment during consecutive periods of four months in order to retain his allotment. This modification is in accord with all of our previous Articles of Association, excepting the present one, which was adopted to run from July 1, 1919 to July 1, 1922.

It would seem that the allotments as agreed upon in our present Articles of Association, which allotments were to be in force from July 1, 1919 to July 1, 1922, should govern from October 1, 1921 to July 1, 1922, because each member has already agreed to his allotment to run to July 1, 1922, and if we begin changing allotments, there will be no end to it. Inasmuch as the allotments were suspended from April 1, 1920 to October 1, 1921, a period of 18 months or one-half of the three year period originally agreed upon, there should be no particular hardship on any member to reinstate his allotment from October 1, 1921 to July 1, 1922, being the nine months remaining of the three years originally agreed upon.

The following is a schedule of the allotted ratios in M feet and in percentages as agreed upon as at July 1, 1919 to run for three years:

No.	Member	Ratio in M feet	Per cent
2	Young	8,802	6.58
3	Mitchell	8,020	5.99
4	Wis. L. & L. Co.	9,115	6.81
5	Cobbs & Mitchell	9,952	7.44
7	Stephenson	6,786	5.07
14	Cummer-Diggins	2,451	1.83
22	Osgood & Blodgett	644	.48
23	Holt Hardwood	4,281	3.20
24	Kerry & Hanson	5,744	4.29
26	East Jordan	3,911	2.92
30	Nichols & Cox	4,312	3.22
33	Strable	6,559	4.90
34	Foster-Latimer	2,517	1.88
37	West Michigan	3,713	2.77
42	J. W. Wells L. Co.	4,387	3.28
44	Cooperage	7,290	5.45
45	Flanner-Steger	4,319	3.23
47	Wm. Horner	31,189	23.31
48	North Branch	2,843	2.12
49	Bigelow-Cooper	5,726	4.28
50	Kneeland-McLurg	1,269	.95
		133,830	100.%

[fol. 4575] If it is thought desirable that the form of membership should be the same for all members, allotments would have to be arranged for the Wilce Flooring Company, John Schroeder Lumber Company and the Oval Wood Dish Corporation. This would be a simple matter and if allotments are arranged for them, it would not disturb the ratios in M feet but would, of course, change the allotted percentages, but the allotted percentages would be of the same relative value, practically speaking, because, while the percentages themselves would be smaller, they would apply to a larger volume of shipments.

It is now expected that a general meeting of the Association will be held on Friday, the 23rd, and that a meeting of the Special Committee will be held on Thursday, the 22nd, in order to draft some simple memorandum along the lines suggested at the last meeting and submit same to the general meeting on the 23rd.

Conditions in the industry as reflected in the Weekly Sales Reports are greatly demoralized, as all of you, of course, know, and if any progress whatever is to be made in the work of the Association, it is absolutely necessary that every member be represented at the next meeting, with full power to act, so that definite conclusions can be arrived at then and there.

As soon as Dr. Earle as President of the Association, fixes the date of the next general meeting, we will advise you promptly and we will also request the Special Committee to hold a meeting on the day previous.

Yours very truly, George W. Keehn, Secretary.

[fol. 4576] October 1, 1921.

Declaration of Our Business Policy

Believing that the sale of any commodity below the cost of production is unfair competition and is certain to be ruinous and destructive to any industry and consequently is detrimental in the long run to public welfare, we hereby voluntarily agree, regardless of what other manufacturers of flooring may do, to pay into the Treasury of the Maple Flooring Manufacturers Association, Ten Per cent (10%) on any and all sales we may make of Maple, Beech and Birch flooring, 13/16" and thicker, of standard grades and lengths, at values below the average cost of production, plus the average cost of freight to destination, as ascertained from time to time by the Maple Flooring Manufacturers Association's Survey of Costs and Tables of Values Based Upon Average Cost, after allowing for commissions not exceeding $2.00 per M feet to Wholesalers and Commission Men and to our own Special Representatives. And the said Ten Per cent (10%) shall be reckoned upon the average cost of said flooring delivered at destination as indicated by the Maple Flooring Manufacturers Association's Rate Book.

[fol. 4577-4579] April 29, 1922.

To members.

GENTLEMEN: If possible please be sure to mail us all your flooring reports for the month of April on or before the 5th of May as provided in the new Articles of Association. Article XV.

If all the members will do this we can have our reports made out complete and in the mail by Tuesday, May 9th or Wednesday the 10th at the latest.

This will give you an opportunity to study the statistics in advance of the next general meeting on May 17th, and the information contained in our April reports will be of much greater value to you if you receive it early in May instead of late in the month.

Yours very truly, George W. Keehn, Secretary.

[fol. 4580] Report of Association Inspection at Plant No. 49, Twelfth Trip, May 23, 1922

Your grades today all range a little high. You were making the fourth grade of which is called No. 2 Common, but still your factory was one point high and the No. 1 two points, so that both grades are affected, but not materially. Your intention, I presume is to affect only the Factory, this is still above the standard. I think, however, that we succeeded in checking the graders, so that they will get these two grades reduced to correct standing. You will naturally have to expect the Factory to become reduced in quality, below the Association standard, if you make the fourth grade. Your machine work, is as usual, very good.

	Clear			No. 1				Factory			
Twelfth trip	High	Low	No. 1	High	Low	Clear	Facty.	High	Low	No. 1	No. 2

[fols. 4581 & 4582] Aug. 5, 1922.

George W. Keehn, Maple Flooring Mfg. Association, Chicago, Illinois.

DEAR SIR: In reply to your circular of the 4th instant with reference to survey of costs, our plant was closed down all during this period until the latter part of May, and consequently we conceded that a survey from us would not fairly represent the actual cost. We are always very willing to make this report, and if you wish us to do so, regardless of the above fact, we will gladly comply.

Yours very truly, Bigelow-Cooper Company. —— ——, Secretary.

[fol. 4583] August 11, 1922.

Mr. George W. Keehn, Secy. Maple Flooring Manufacturers' Assn., Chicago, Illinois.

DEAR SIR: I believe it would be advisable to notify members of the Cost Survey Committee, requesting a meeting prior to the general meeting on the 16th. I assume that you will have some valuable information from the members regarding their costs of operation during the last quarter.

If you have no reports of sales on Flooring stock made recently, it would be well also to get out a letter to the members, requesting that they advise immediately of any sales they may know of. I have heard of some sales made in the Upper Peninsula during the past two weeks, but have been unable to learn the prices in these transactions.

Yours very truly, The Bigelow-Cooper Co. —— ——, Secretary.

[fol. 4584] Sept. 7, 1922.

Mr. Geo. W. Keehn, Secy. Maple Flooring Manufacturers' Assn., Chicago, Illinois.

DEAR SIR: Will you kindly advise me when the next general meeting of the Association will be held this month.

It is necessary for me to make an extended Eastern trip and I desire to plan this so that it will not conflict with the meeting.

Yours very truly, The Bigelow-Cooper Company. ——, Secretary.

[fols. 4585 & 4586] Received at 317 Center Ave., Bay City, Mich.
93DE × 9.
B Chicago Ill. 1101A Oct. 12 1922.

Bigelow Cooper Co., Bay City, Mich.:

If possible please mail today your September flooring reports.

George W. Keehn.

1123A.

[fol. 4587] July 16, 1923.

Grand Rapids Trust Company, Receiver for Wm. Horner, Reed City, Michigan.

GENTLEMEN: We received your report of Average Prices Realized for the month of June with your letter of the 11th, too late to include in our compilation, as we had already made up our Report. On a number of occasions we have made up a Report for you from your weekly sales reports, at your request, but this does not exactly represent your F. O. B. Mill basis, as your actual freight deductions on delivered Flooring would differ some from the freight rates given

on your weekly sales Reports, because those are the Rate Book's freight rates.

* * * * * * *

Yours very truly, George W. Keehn, Secretary.

[fols. 4588 & 4589] GOVERNMENT'S EXHIBIT No. 78

April 4, 1918—p. m.

Wisconsin Land & Lumber Co., Hermansville, Michigan.

Attention Mr. W. B. Earle

GENTLEMEN: We are advised that Frank-Robinson & Co. of Salt Lake City are quoting 13/16 x 2¼" Clear "I. X. L." Maple flooring at $61.50 per M delivered American Fork, Lehi and Pleasant Grove, Utah. This in response to quotations on "Electric" at $64.00 per M.

As $61.50 is below minimum, we assume that it cannot be for "I. X. L."? Would you be willing to confirm our assumption? We do not want to reduce our prices unless necessary but at present we cannot defend them successfully in the face of such a report.

Very truly yours, Cobbs & Mitchell, Inc., Sales Department.

[fol. 4590] April Eighteen, Nineteen Nineteen.

Cobbs & Mitchell, Inc., Cadillac, Mich.

GENTLEMEN: We are now entirely out of 13/16 x 2¼" face clear maple flooring, while we have a good stock of the other sizes. Our flooring factory has been shut down for some time, and we do not want to start up again until we can cut down our surplus of some of the other items, and it may be that we will want to put in a carload of clear to ship out in mixed carload lots with our other stock.

Will you kindly quote us your best delivered price, on a carload of 13/16 x 2¼" clear maple flooring F. O. B. cars Mellen?

Yours truly, Foster-Latimer Lumber Co. Pearson.

[fol. 4591] April 21, 1919—p. m.

Foster-Latimer Lumber Co., Mellen, Wisconsin.

GENTLEMEN: Answering your valued inquiry of April 18th, we quote you a car of 13/16 x 2¼" face 2 to 16 ft. Clear "Electric" Maple flooring @ $55.00 per M f. o. b. cars here. This is $2.00 per thousand less than current frame A basis.

The freight rate from Cadillac to Mellen is 22½¢ per 100 lbs. We will make our proposition good until April 28th and shall be glad to serve you if you can afford to ship our stock into your plant.

Very truly yours, Cobbs & Mitchell, Inc., Sales Department.

[fol. 4592] April 19, 1919.

Flanner-Steger Land & Lbr. Co., Blackwell, Wis.

GENTLEMEN: Replying to your letter of April 17th, we kept a careful record of our flooring costs during the six months ending January 1st, and the cost of manufacture was $15.28 per M feet. This included everything that goes in to the manufacture of flooring that should be added to the manufacturing costs, namely, labor, supervision, supplies, taxes, insurance, interest on investments, and depreciation in the plant. These costs have increased since the first of the year, and we think that at present, it is costing near $16.50 than $15.28. We cannot at this time, analyze the number of men per M feet, but we believe that inside of the plant including the engineer, fireman, night watchman, superintendent, and filer, and the men in the ware house, that it takes two men to produce 1,000 ft. of flooring. This of course, does not include the cost of loading the lumber into dry kiln cars. It takes five men to supply the lumber to the kilns for our two machines which average 16,000 ft. per day. We use a lot of select No. 3 Maple for flooring purposes, although there should not be any No. 3 used at the present time, as the price of the No. 3 is too near that of the No. 2 Common, and about all you can get out of No. 3 is Factory flooring.

Very truly yours, Holt Hardwood Company.

[fol. 4593] Contracts and agreements are not binding when circumstances and conditions arise that are beyond the control of this company.

Blackwell, Forest County, Wis., April 17, 1919.

Holt Hardwood Company, Oconto, Wis.

GENTLEMEN: Of late we have been digging thoroughly into the cost of the manufacture of hardwood flooring, and are anxious to know something about the experience of others. We should like to ask you to give us your experience as to how much flooring you are turning out per man per day. Of course, we realize that this depends a great deal upon the way the mill is laid out, the kind of machinery that is installed, the class of rough lumber used, efficiency of management, etc.

We also should like to know if you put any selected No. 3 Common Maple into your kilns for flooring purposes.

Any information you can give us will be appreciated.

Yours very truly, Flanner-Steger Land & Lumber Co., by G. C. Flanner.

[fol. 4594] Blackwell, Wis., May 13, 19—.

MY DEAR MR. DEWITT: Am very sorry to report that I can not send you the order for 1½ clear about which I talked to you yesterday as a telegram this A. M. has held up the proposition.

Yours Frank Flanner.

P. S.—I'm strong for the raise in prices as per wire this P. M. from Keehn. We are oversold on everything.

[fol. 4595] Contracts and agreements are not binding when circumstances and conditions arise that are beyond the control of this company.

Blackwell, Forest County, Wis., May 20, 1919.

Cobbs & Mitchell, Inc., Cadillac, Mich.

GENTLEMEN: One of our commission men has sent us in an order calling for 15 M' of 13/16" x 2" Clear Maple Flooring to be shipped July 1st or sooner, as notified, and makes a special notation that the order is not subject to cancellation, and that it goes into a school building where they have no place at present to store the stock. We do not manufacture any 13/16" x 2", and we note from the March surplus sheet that you are long on this item, and we are asking you to quote us your lowest price F. O. B. cars Pratt, Kans.

We had this order on our books prior to the recent rise in prices, and we ask that you please bear this in mind in quoting us.

Yours very truly, Flanner Steger Land & Lumber Co., by Frank Flanner, Ass't Gen. Mgr.

[fol. 4596] May 24, 1919—a. m.

Flanner-Steger Land & Lumber Co., Blackwell, Forest County, Wis.

GENTLEMEN: We thank you for remembering us with your inquiry of May 20th we advanced our prices of hardwood flooring before the general advance was made by the Association and have booked business for the particular item in question accordingly. We should like to take care of you, however, under the circumstances, and for shipment not later than July 1st, we quote you 15,000 ft. which is not enough to make a carload, that is a minimum load from this locality of 13/16 x 2" face Clear "Electric" Maple Flooring 2 to 16 ft. at $65.50 per thousand, net, for shipment to Pratt, Kansas.

Our prices are based upon and subject to present rate of freight to point of delivery, the freight at the existing rate being included for your convenience: any advance in freight rate, and all other charges, duties and taxes to be paid in addition by consignee.

The flood of orders exceeds anything we have experienced in a long, long time, in fact, we already have a considerable volume of business upon our books on the basis of the New Association list. In fact, a little slightly in advance of the list. Consequently our proposition must be made subject to prior sale but the price is good until May 30th.

Very truly yours, Cobbs & Mitchell, Inc., Sales Department.

[fol. 4597] February 25, 1920.

Foster-Latimer Lumber Co., Mellen, Wis.

GENTLEMEN: Reply to yours of the 19th was delayed because we have been in the throes of moving.

We did not get a report from you of Sales for the week ending the 21st, and it occurs to us that you could not have received the blank

forms which explain how the reports are to be made. We are enclosing several of the blank forms so you can make your report for last week and we will then send you a copy of the report we made to the members yesterday. You are the only member in Group D who did not send us a report and only one member was missing in Group A. All the members reported in Group B, also in Group F. Some of them, however, reported "no Sales", which constitutes a report and entitles them to the exchange of information.

The regular monthly report of Current Net Values, which we now call "Record of Average Prices Realized", will be continued the same as heretofore.

Yours very truly, Geo. W. Keehn, Secretary.

[fols. 4598 & 4599] July 8, 1920.

William Horner, Reed City, Mich.

GENTLEMEN: We will appreciate it very much if you will kindly send us your statistical reports for the months of April, May and June, particularly the amount of your shipments for those three months, each month separately.

We wish to get some figures together for our own information to see how the 75% Clause would work out for the year ending July 1, 1920, if the Allotment Statistics had been continued during the months of April, May and June; in other words, to explain more fully, there has been quite an accumulation of 75% Clause funds from July 1, 1919, to March 31, 1920, and it may be the wish of the Association to distribute such funds among the members who are entitled to receive them had the Allotment year ending July 1, 1920, been completed.

Yours very truly, Geo. W. Keehn, Secretary.

[fol. 4600] February 3, 1921—p. m.

Mr. W. E. Cox, c/o Nichols & Cox Lumber Co., Grand Rapids, Michigan.

DEAR MR. COX: Mr. Keehn informs us that your company has decided not to cooperate with the other members in the minimum price basis. We hope that this is not your final decision as it seems to us very essential to have all the membership included to insure the success of the plan. We hope you will reconsider the matter and join in on the plan for the general good. We do not feel that we can continue unless you are with us and we have so advised Mr. Keehn. It looks to us as though prices will go much below replacement costs unless they can be stabilized by teamwork.

I would appreciate your writing me how you feel about the proposition.

With best wishes.

Very truly yours, M. E. Thomas.

[fol. 4601] February 10, 1921.

Holt Hardwood Company, Oconto, Wis.

GENTLEMEN: We wired you this noon that we were waiting for your January reports. We cannot compile our reports until the reports from all the members are received, and as it usually takes about three days to get out our reports, we hope to receive yours by return mail; otherwise we will not be able to have our statistics ready for the 17th which we expect will be the date set for the Market Conditions Committee meeting.

We are enclosing extra blank forms in case you have mislaid the ones mailed you before the first of the month. Please note that in order to have our statistics complete we will require your Stocks and Ufilled Orders on Hand on January 1st as well as February 1st.

Thanking you for your early attention,

Yours very truly, George W. Keehn, Secretary.

[fol. 4602] May 13, 1921.—p. m.

Kerry & Hanson Flooring Co., Grayling, Michigan.

GENTLEMEN: Answering your letter dated May 12th we have an abundance of the No. 1 and lower grades of Maple and Beech flooring but only a very moderate stock of the Clear. We think this is the situation with most of the manufacturers and we believe that the demand for the 2¼ Clear Maple is large enough to exhaust the supply and for that reason we are holding our prices relatively higher on that item.

At present we are obtaining $90.00 per thousand for the 2¼" Clear Maple flooring and $83.00 for the 2" face f. o. b. our factory, carload basis. We do not believe it is going to be necessary for us to reduce this price for a while at least and we certainly shall not unless the stock accumulates with us much more rapidily than at present.

We have certain territories like New England and New York outside the metropolitan market as well as a few other sections where we have sales representatives who have the exclusive sale of our flooring in their respective territories. Of course, a considerable portion of the United States is open territory with us, that is, we have no exclusive sales contracts covering.

We could spare you say one car of the 2¼" and two cars of the 2" Clear Maple flooring at prices stated above for shipment to any point you might desire but if your point of destination should be in our [fol. 4603] open territory we would allow you $2.00 per thousand commission on such business. If, however, the flooring goes into our closed territory we could not give you the commission because we would have to pay that to our representative.

We understand that Bay City is making a lower price on 2¼" Clear but do not know how much stock they can supply.

Of course, our stock is offered subject to prior sale.

Very truly yours, Cobbs & Mitchell, Inc., Sales Department.

[fol. 4604] Quotations subject to change without notice and previous sale all contracts contingent upon strikes, fires, accidents or other unavoidable causes beyond our control.

On the Au Sable River, May 12, 1921.

Cobbs & Mitchell, Inc., Cadillac, Mich.

GENTLEMEN: We have shut down our flooring plant for at least 30 days. Find we have only about 15,000′ of 13/16 x 2¼″ Clear and 20,000′ of this grade in 2″ face on hand. Wish you would please make us prices on these two items, also 13/16 x 3¼″ Clear, f. o. b. cars Cadillac.

If you are in the market for any of the above sizes in #1 or Factory grades, please take up the matter with us. Our stock does not appear to be properly balanced.

Thanking you, we remain,

Yours very truly, Kerry & Hanson Flg. Co., per Kerry.

[fol. 4605] Cadillac, Michigan, June 16, 1921.—a. m.

Holt Hardwood Co., Oconto, Wis.

GENTLEMEN: Your inquiry of June 13th is received and we quote ⅜ x 1½″ face Clear "Electric" Maple Flg., 2 to 16 ft., @ $61.75 per M; ⅜ x 2″ face Clear "Electric" Maple Flg., 2 to 16 ft., @ 61.75 per M, less freight to Oconto, Wis. exclusive of the war tax, official terms, carload basis. For a minimum load it requires 34,000 ft. We can ship immediately after an order is received. The material is on hand in our warehouse at this time.

Inasmuch as you are members of the Association we have concluded to say to you that we will allow you a concession on the above prices of $5.00 per thousand. Our proposition is good until June 22d, subject to prior sale of the stock.

Very truly yours, Cobbs & Mitchell, Inc., Sales Department.

Official Terms of Sale Effective October 1, 1918

Terms, 60 days net or 2% discount for cash in 15 days, or 1% discount for cash in 30 days from date of invoice after deducting freight. War tax to be paid by consignee.

If the car has not arrived, the discount may be deducted on 90% of the invoice less estimated freight, for cash within proper discount period, the balance with original paid freight bill to be remitted net within 5 days after arrival of car. No cash discount will be allowed after 30 days from date of shipment.

[fol. 4606] June 18, 1921.

Cobbs & Mitchell, Cadillac, Mich.

GENTLEMEN: We have your quotation of the 16th given in reply to our inquiry of the 13th for ⅜ flooring. Will you please ship to us at once:

20 M ft. 3/8 x 1½" Clear Mpl. Flg. 2'-16' at $56.75 per M, net to us.

10 M ft. 3/8 x 2" Clear Mpl. Flg. 2'-16' at $56.75 per M net, f. o. b. Oconto.

If this amount will not make car load weight, we will stand the excess freight and you may bill it as a carload. We hope that you will get this car forward at once.

Very truly yours, Holt Hardwood Company.

[fol. 4607] August 26, 1921.

Cobbs & Mitchell, Inc., Cadillac, Michigan.

GENTLEMEN: We have your quotation of August 24th on 3/8 x 2" Clr. maple flooring.

We owe one of our Chicago customers 20 M ft. of this stock on an old order at $45.00 per M. We were willing to buy a full car load to ship direct to Oconto, and we shipped the 20 M ft. to our customer with other stock. But, on account of the crowded condition of our warehouse, we have no place to store the 3/8. We are going to let you ship the 20 M ft. 3/8 Clr. direct to our customer, and you may charge us for the addition freight on account of not being minimun freight.

You will therefore, please ship to the North Side Lumber & Timber Co., Cuiler Station, Chicago, Ill., C. & N. W. Ry., 20 M ft. 3/8 x 2" Clr. maple flooring, invoicing the same to us at Oconto.

Yours truly, Holt Hardwood Company.

[fol. 4608] Cadillas, Michigan, August 24, 1921—A. M.

Holt Hardwood Company, Oconto, Wisconsin, Mr. W. L. Dewitt, Vice President and General Manager.

DEAR SIR: Answering your inquiry dated August 20th we quote you a car of 3/8 x 2" face 2 to 16 ft. Clear "Electric" Maple flooring for immediate shipment at $56.75 per M, freight allowed to Oconto exclusive of the war tax, official terms. It requires 34,000 ft. of the flooring to make the minimum car weight.

You will note that the price named is $5.00 per M less than the current basis, but we are making this special price to you as a member of the association.

We have the flooring on hand and can ship quick if desired.

Hoping to be favored with the order.

Very truly yours, Cobbs & Mitchell, Inc., Sales Department.

[fol. 4609] September 12, 1921.

East Jordon Lumber Company, East Jordon, Mich.

GENTLEMEN: We believe that you were Members of the Michigan Maple Association, and would like to ask your opinion as to how their plan worked out, and if the general plan could be applied to the Maple Flooring Business. There certainly should be something done to *stapleize* the business and put it on a paying basis.

Yours truly, Holt Hardwood Company.

[fols. 4610–4614] October 21, 1921.

Mr. Sam Horner, Reed City, Mich.

DEAR SAM: Confirming my telephone conversation with you today, we have arranged for a meeting at Saginaw on Monday night, and if it is possible for Mr. Rolston or yourself to attend, wish that you would call me the first thing Monday morning, so that I can complete the necessary arrangements.

Yours very truly, —— ——.

[fol. 4615] November 11, 1921—A. M.

Mr. Staple, c/o The Northwestern Cooperage & Lbr. Co., Gladstone, Michigan.

DEAR MR. STAPLE: The statistical condition of 13/16 x 2¼" face Clear and No. 1 Maple flooring indicates better prices for these items. Owing to the volume of business we have been getting we have been obtaining better than October prices for both items and my present view is that $90 and $65 Frame A basis is fully justified.

We have been considering this subject the last few days and have concluded that we should go to this latter basis if competitive conditions will permit us to do so. Both of our companies are considerably oversold on both items and while we realize that December and January are light months it looks to us now as though our present supply of orders will bridge us over this period and that we can maintain the advanced basis if our competition permits us to do so.

We have already made a move with our representatives to establish the $90 and $65 basis, and we are quite confident that it will succeed.

Very truly yours, M. E. Thomas.

[fol. 4616] December 30, 1921.

Kerry & Hanson Flg. Co., Grayling, Mich.

Att'n Fred R. Welch

GENTLEMEN: We are in receipt of a letter this morning from the Lindsley Lumber Co. of Newark, N. J. whom we recently quoted on Maple Flooring, in which they make the following statement: "We lost this order to Samuel Barr of New York City. In some way or other this concern undersells every one else. We used your price and would have given you the business had we secured the order."

We of course quoted the list price and you can see the result. We give you this information in strict confidence and hope it will be of some value to you.

Yours very truly, The Bigelow-Cooper Company. —— ——, Secretary.

[fol. 4617] Grayling, Michigan,
"On the Au Sable River," Dec. 31, 1921.

The Bigelow-Cooper Co., Bay City, Mich.

GENTLEMEN: Answering your letter of Dec. 30th, regarding quotation you made the Lindsley Lbr. Co. of Newark, N. J. We know that Mr. Barr has been working on this inquiry, but up to the present writing the order has not been received by us and we are inclined to believe that the Lindsley Lbr. Co. is mistaken in this matter. Mr. Barr has our price list and instructions to adhere to same and we know of no instance in the past several months where he has taken orders at other than our list prices.

We are, however, taking this matter up with Mr. Barr to learn what he has to say about it.

Yours very truly, Kerry & Hanson Flg. Co., per Emil Fiegling.

[fol. 4618] No. 1-1/6" Maple Flooring sales during week ending January 28th.

J. W. Wells Lumber Company.

[fol. 4619] Grayling, Michigan,
"On the Au Sable River," Feb. 25, 1922.

The Bigelow-Cooper Co., Bay City, Mich.

GENTLEMEN: Your letter of the 18th was not answered before owing to the fact that we were unable to get our reply to you before the General Meeting, at which time we figured you would see our Mr. Kerry and get the information which we have on this matter.

We might say, however, that we are doing our best to hold prices up; in fact all of our quotations have been based on the regular list, $85.00 at seaboard, etc. However, we have given our represen-

tative to understand that he can meet certain competition, up to $5.00 per M reduction without cabling us. Should competition be lower than this, they are to cable the facts.

Trusting this is the information you request, we remain

Yours very truly, Kerry & Hanson Flg. Co., F. R. Welsh.

[fol. 4620-4622] August 20, 1922.

Mr. William Horner, Reed City, Mich.

Attention Mr. Ralston

DEAR SIR: This letter is to acknowledge receipt of your letter of the 18th, inclosing the price list showing the code which you use, and we wish to thank you for the same.

We instructed the Holt Lumber Company to furnish you with their price list on surfacing, resawing, etc. for transit cars, as per your request at the meeting.

Thanking you, we remain,

Yours truly, Holt Hardwood Company.

AVERAGE COST FOR THE FOURTH QUARTER OF 1921.

13/16 x 2¼ CLEAR MAPLE FLOORING

Was $90.00 F.O.B. CARS AT FLOORING MILL, as shown by AVERAGE COSTS published by the ASSOCIATION and dated 11-17-21.

[fol. 5141] DEFENDANTS' EXHIBIT A

Chicago, April 26, 1920.

George W. Keehn, Esq., Secretary Maple Flooring Manufacturers' Association, Chicago, Illinois.

MY DEAR SIR:

Subject: Maple Flooring Manufacturers' Association

You have asked us for our opinion with respect to what is the proper course for the Association to pursue in view of the injunction recently obtained by the Government in the Federal Court at Memphis, Tennessee, against the so-called Open Competition Plan of the American Hardwood Manufacturers' Association, and in reply we beg to say:

1. We have examined the position taken by the Government in the Memphis litigation and after carefully considering the matter we have reached the conclusion that inasmuch as an injunction has been issued and is now in force, all things considered, it would be the proper thing for your Association to obey the spirit of the injunction until the Supreme Court of the United States has settled the fundamental question involved.

2. We believe the Supreme Court of the United States will hold that associations like yours have the right to gather and distribute among their members the history of past and completed transactions such as Shipments, Production, New Business Booked, Stocks and Unfilled Orders on Hand and the Prices actually obtained in bona fide sales.

3. The injunction in the Memphis case ordered the parties in that litigation—

"Not to take any further steps whatsoever in compiling or distributing thru the said F. R. Gadd, 'manager of statistics' or otherwise, at Memphis, in this district, or elsewhere, the next issue of the monthly stock reports, monthly production reports and weekly sales reports of the said so called Open Competition Plan, or any other issues of any such or similar reports."

[fol. 5142] The foregoing injunction prohibits the doing of many of the very things which you have been doing and which we believe are lawful, because you are simply making known to the members of your Association the history of past and completed transactions, and not what the members intend to do or may do in the future. All this is merely historical and involves no agreement respecting production, prices or sales.

Furnishing such historical data to the members of the Association will undoubtedly give them an intelligent conception of the state of the market and the conditions of the trade, but they have the legal right, in our judgment, to such knowledge and information. If

such knowledge and information tends to intelligent competition and a reasonable steadying of prices, that fact in itself does not, in our judgment, violate the Federal Anti-Trust laws. The Supreme Court of the United States has repeatedly said that a reasonable restraint of trade does not violate the Federal law.

In giving such historical data to its members, the Association is only doing what hundreds of other associations, like stock exchanges, boards of trade and similar institutions, have been doing for many years, and in truth is doing simply what the Government itself has been doing for farmers, cotton planters and others.

4. In view of the foregoing situation, our judgment is that your Association should suspend such of its activities as might be construed as coming within the prohibition of the Memphis injunction until the Supreme Court of the United States has decided the questions involved. Our information is that the Memphis case is to be prosecuted with vigor and will have an early hearing.

Very truly yours, Newman, Poppenhusen, Stern & Johnston, by Newman.

[fol. 5143] DEFENDANT'S EXHIBIT B

Maple Flooring Manufacturers' Association, 801 Stock Exchange Building, Chicago

Telephone Franklin 3217

June 27th, 1916.

Federal Trade Commission, Washington, D. C.

GENTLEMEN: The Maple Flooring Manufacturers' Association begs to submit to you for your consideration and approval a Minimum Price Plan, signed by the members of the Association, five printed copies of which are enclosed herewith.

This Minimum Price Plan is an amendment to our Articles of Association which were transmitted to the Department of Justice on December 31st, 1912, and to you on September 7th, 1915. The duration of these Articles has been extended to January 1st, 1919.

The object of this Plan is to place the important industry of manufacturing and selling Maple, Beech and Birch Flooring upon a substantial footing through standardizing the product and stabilizing its value by basing selling prices upon costs, as set forth in the Plan itself and also in the petition on this subject addressed and transmitted to you in the summer of 1915.

A copy of this Minimum Price Plan has this day been transmitted to the Department of Justice at Washington, D. C. A copy of our letter to the Attorney General is enclosed herewith.

Awaiting your reply we beg to remain

Yours very truly, Maple Flooring Manufacturers' Association, by George W. Earle, President; George W. Keehn, Secretary.

A complete copy of the Association Rate Book, Index of Towns and Table of Values, referred to in the Minimum Price Plan, is also enclosed herewith.

[fol. 5144] DEFENDANT'S EXHIBIT B-1

Federal Trade Commission, Washington

July 6, 1916.

Mr. George W. Earle, President Maple Flooring Manufacturers' Ass'n, 801 Stock Exchange Bldg., Chicago, Ill.

DEAR SIR: By direction of the Commission, I wish to acknowledge receipt of your letter of the 27th ult., submitting, for the consideration of this office, copies of a "Minimum Price Plan," together with copy of letter to the Attorney General of the United States and an Association Rate Book.

This plan will be considered in connection with your previous request for ruling filed with the Commission in September, 1915.

Very truly yours, Federal Trade Commission, by L. L. Bracken, Secretary.

[fol. 5145] DEFENDANT'S EXHIBIT C

Maple Flooring Manufacturers Association

Minutes of General Meeting, February 25, 1921

General meeting of the Maple Flooring Manufacturers' Association held at the Hotel La Salle, Chicago, February 25, 1921, pursuant to the call of the President, Dr. George W. Earle.

The meeting was called to order by the President and all the members of the Association were present excepting Nichols & Cox Lumber Co.

In the absence of the Secretary on a vacation, Edward C. Singler acted as secretary of the meeting.

The reading of the Minutes of the meeting held on January 6, 1921, was dispensed with as one copy of the Minutes of said meeting was mailed to each member.

The report of the Market Conditions Committee was submitted to the meeting by M. E. Thomas as Chairman of the Committee. This report covered a comparison of our statistics for January 1921 and December 1920, and a review of our general statistics for the past four months. The report also included the Committee's forecast of February Shipments, Production and New Business, which, based upon data received from fifteen members, indicated an increase of over 30% in Shipments compared with January, Production slightly under that of January, and bookings of new orders about equal to the January new business booked.

All of the correspondence with the Department of Justice and the Federal Trade Commission, Washington, D. C., regarding the Minimum Price Basis submitted to them on January 29, 1921, was fully discussed, and ordered to be spread upon the records of this meeting and is as follows:

January 29, 1921.

Federal Trade Commission, Washington, D. C.

GENTLEMEN: The members of the Maple flooring Manufacturers Association wish to submit to you for your consideration and approval a Minimum Price Basis, five printed copies of which are enclosed herewith.

The purpose of the Minimum Price Basis is to inform the members of the Association what the actual average cost is of manufacturing and placing on the market Maple, Beech and Birch Flooring and the prices at which such flooring should be sold if the manufacturers wish to realize an average profit of five per cent reckoned upon such average cost.

A copy of the Association Rate Book containing the Table of Values Based Upon Average Cost dated January 6, 1921, the Index of Towns, and the Concessions From And Additions to the Basic Delivered Values, referred to in Article IV of the Minimum Price Basis is enclosed herewith.

In this connection we wish to state that the so called Minimum Price Plan which was submitted to you in 1916 was never enforced and was never consummated.

[fol. 5146] We have not heard anything further from you either approving or disapproving the said Minimum Price Plan since we received your letter of July 6, 1916, in which you stated that the said Plan would be considered by you in connection with our previous request for ruling on the Petition filed with the Commission in September 1915.

As citizens and taxpayers the members of the Association feel that they are entitled to be advised by you whether in your judgment the foregoing Minimum Price Basis is lawful, as the members of the Association believe it to be.

Respectfully yours, Maple Flooring Manufacturers Association. (Signed) George W. Earle, President. (Signed) George W. Keehn, Secretary.

P. S.—We have written a similar letter to the Attorney General of the United States, Department of Justice, Washington, D. C.

Federal Trade Commission,

Washington

Office of the Chairman

7 February, 1921.

Maple Flooring Mfrs. Assn., 1045 Stock Exchange Building, Chicago, Ill.

GENTLEMEN: At the request of the Chairman I am writing in reply to your letter of January 29, transmitting a Minimum Price Basis, and Rate Book compiled and published by you, which you state is submitted for the consideration and approval of this Commission.

You are referred to a copy of the act creating the Federal Trade Commission, which is enclosed to you herewith, which fails to contain any warrant for the expression of the approval which you seek. It is true that the message of the President submitting to Congress his proposal for the creation of this Commission, and some of the debates in Congress seem to contemplate action by the Commission upon plans of operation as submitted by business organizations throughout the country, but this power was definitely excluded from the act by Congress and the Commission has never assumed to approve or disapprove plans of corporate or associate action, in advance. It has received from time to time such plans and has placed them on file, but has reserved action with reference to such plans until as a result of operations thereunder complaint arose that there existed a resulting hinderance to competition or restraint of trade.

Your communication has, therefore, been filed but the Commission refrains now from expressing either approval or disapproval either of the plan of operation or its details. Such a plan of operations must be judged by its results in actual operation and if it brings about a hinderance of competition or a restraint of trade it [fol. 5147] falls within the prohibition of the anti-trust laws and, as well, those of the Federal Trade Commission.

Very truly yours, (Signed) Nelson B. Gaskill, Vice Chairman.

January 29, 1921.

To the Attorney General of the United States, Department of Justice, Washington, D. C.

DEAR SIR: The members of the Maple Flooring Manufacturers Association wish to submit to you for your consideration and approval a Minimun Price Basis, a printed copy of which is enclosed herewith.

The purpose of the Minimun Price Basis is to inform the Members of the Association what the actual average cost is of manufacturing and placing on the market Maple, Beech and Birch Flooring and the prices at which such flooring should be sold if the manufacturers wish to realize an average profit of five per cent reckoned upon such average cost.

A copy of the Association Rate Book containing the Table of Values Based Upon Average Cost dated January 6, 1921, the Index of Towns, and the Concessions From And Additions to the Basic Delivered Values, referred to in Article IV of the Minimum Price Basis is enclosed herewith.

In this connection we wish to state that the so-called Minimum Price Plan which was submitted to you in 1916 was never enforced and was never consummated.

We have not heard anything further from you either approving or disapproving the said Minimum Price Plan since we received your letter of July 6, 1916, in which you stated that you could not comply with our request to give us an official opinion on the subject.

However, as citizens and taxpayers, the members of the Association feel that they are entitled to be advised by you whether in your judgment the foregoing Minimum Price Basis is lawful, as the members of the Association believe it to be.

Respectfully yours, Maple Flooring Manufacturers Association. (Signed) George W. Earle, President. (Signed) George W. Keehn, Secretary.

P. S.—We have written a similar letter to the Federal Trade Commission, Washington, D. C.

[fol. 5148] Department of Justice,

Washington

February 4, 1921.

Mr. G. W. Earle, Pres. Maple Flooring Manufacturers Assn., 1045 Stock Exchange Building, Chicago, Illinois.

SIR: The Department is in receipt of your letter of January 29 wherein you seek the approval of the Department for a so-called "minimum price basis" and rate book transmitted with your letter and consisting essentially in an agreement of January 6, 1921, among the members of your association to observe minimum prices subsequently published in the rate book.

In reply to the statement in your letter that the members of your association feel that they are entitled to be advised by the Attorney General whether in his judgment the foregoing arrangement is lawful, permit me to assure you that they are not entitled to the advice of the Attorney General, as is explained in the enclosed circular letter.

I venture to suggest, however, that the papers which you transmitted to this Department indicate a flagrant violation of the penal provisions of the Act of Congress of July 2, 1890 (26 Stat. 209), commonly known as the Sherman Anti-Trust Act, through a price-fixing agreement. If you desire to submit anything further in this matter before the Department determines its course in the premises, a reasonable time will be given you for that purpose.

Respectfully, (Signed) Frank L. Nebeker, Assistant to the Attorney General.

Incl. 24928.

Inclosure 24928, from Department of Justice

The law prescribing the duties of the Attorney General does not permit him to give advice or official opinions to others than the President and the heads of the several Executive Departments of the United States. This principle, repeatedly declared by my predecessors, was in 1878 well expressed by former Attorney General Devens, as follows:

The authority of the Attorney General to render his official opinion is limited by the laws which create and define his office and does not permit him to give advice at the call of either House of Congress or of Congress itself, but only to the President or the head of an Executive Department of the Government. The absence of authority to respond to calls for legal opinions coming from sources other than those prescribed by law was early in the history of the Government suggested * * * by the then Attorney General, Mr. Wirt * * * and no change in this respect has been made by the law creating the Department of Justice. The view thus taken has been invariably observed by my predecessors, including Attorneys General Taney, Crittenden, Bates, Evarts and Williams (15 Ops. A. C., 475, 476).

The rule thus stated as a rule of law may also be regarded as a rule of necessity. So many are the requests coming to the Department for advice on difficult legal questions that, were all to be prop- [fol. 5149] erly examined into and answered, the efficiency of the Department in the performance of its regular legal duties would be seriously affected.

I regret that for these reasons I cannot comply with your request.

February 11, 1921.

Department of Justice, Frank L. Nebeker, Assistant to the Attorney General, Washington, D. C.

GENTLEMEN:

Subject: Minimum Price Basis Submitted by Maple Flooring Manufacturers Association

Your favor of February 4th carefully noted.

We assure the Department it is not the intention or the desire of the Maple Flooring Manufacturers Association to violate the law.

This plan was worked out with a view to educating the industry to the actual average cost of the marketed product and to obtaining an average profit of five per cent reckoned upon such average cost; thus tending to stabilize conditions in our industry and avoiding that destructive competition which is not a benefit to consumer or manufacturer.

It is our desire to be honest and frank with the Department of Justice, and in view of your suggestion that the plan is a "violation of the law," the writer does not hesitate to assure the Department

that the members of the Association will not proceed with the plan. They have been notified of the attitude of the Department.

Any further evidence required of our sincerity will be submitted if you desire. If you will appoint a time for a conference, will be glad to attend it to satisfy you that the plan will not be proceeded with.

Respectfully yours, Maple Flooring Manufacturers Association. (Signed) George W. Earle, President.

Department of Justice,

Office of the Assistant to the Attorney General,

Washington

February 17, 1921.

Mr. G. W. Earle, President Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago, Ill.

SIR: The Department is in receipt of your letter of February 11 [fol. 5150] wherein you state that the members of the Maple Flooring Manufacturers Association will abandon the agreement of January 6, 1921, to observe certain minimum prices in selling their product.

If the Department desires you to submit further evidence of the sincerity of the members in abandoning the plan, as you offer in your letter to do, you will receive a request to that effect from the Department.

Respectfully, for the Attorney General, (Signed) Frank L. Nebeker, Assistant to the Attorney General.

Copies of Mr. Nebeker's letter of February 4th and the Association's reply of February 11th and the Federal Trade Commission's letter of February 7th having been sent to the members on February 12th, and as the last paragraph of Mr. Nebeker's letter suggested that the Minimum Price Basis indicated a flagrant violation of the Sherman Anti-Trust Act, the Minimum Price Basis thereupon automatically became null and void in accordance with the last paragraph of the Minimum Price Basis which provided that in the event of the Government's disapproval the Minimum Price Basis shall be null and void.

After further discussion of the subject, the following resolution was unanimously adopted by roll call vote, all of the 23 members who had signed the Minimum Price Basis were present and voted for and in favor of said resolution which is as follows:

Resolved, That the Minimum Price Basis which this Association on the 29th day of January, 1921, submitted to the Department of Justice and to the Federal Trade Commission at Washington, D. C. for their approval and which was not approved by the Department of Justice, be and the same is hereby declared null and void: And be it further

Resolved, That neither this Association nor its members shall operate under said Minimum Price Basis.

On motion, the meeting adjourned subject to the call of the President.

Edward C. Singler, Secretary of the Meeting.

[fol. 5151] Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

February 11, 1921.

To members.

GENTLEMEN: We give below for your information copies of a letter and inclosure which were received at this office on February 7th from the Department of Justice in reply to our communication of January 29th in regard to the Minimum Price Basis. The letter was addressed to G. W. Earle as President of the Association and we forwarded it to him at Hermansville, Michigan.

We have just received a letter from Dr. Earle stating that it is his conclusion that a prompt reply should be made to the Department of Justice. In view of the attitude of the department, Dr. Earle states that he is unwilling to proceed with the plan, and he takes it for granted that the balance of the members will feel likewise. Copy of his reply to the Department follows the Department's inclosure referred to above.

Very truly yours, George W. Keehn, Secretary.

Dict. ECS.

Your favor of February 4th carefully noted.

We assure the Department it is not the intention or the desire of the Maple Flooring Manufacturers Association to violate the law.

This plan was worked out with a view to educating the industry to the actual average cost of the marketed product and to obtaining an average profit of five per cent reckoned upon such average cost; thus tending to stabilize conditions in our industry and avoiding that destructive competition which is not a benefit to consumer or manufacturer.

It is our desire to be honest and frank with the Department of Justice, and in view of your suggestion that the plan is a "violation of the law", the writer does not hesitate to assure the Department that the members of the Association will not proceed with the plan. They have been notified of the attitude of the Department.

Any further evidence required of our sincerity will be submitted if you desire. If you will appoint a time for a conference will be glad to attend it to satisfy you that the plan will not be proceeded with.

Respectfully yours, Maple Flooring Manufacturers Association, by G. W. Earle, President.

[fol. 5153] Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

February 12, 1921.

To members.

GENTLEMEN: We submit herewith for your information copy of a letter received today from the Vice Chairman of the Federal Trade Commission in reply to our letter of January 29th in regard to the Minimum Price Basis.

Yours very truly, George W. Keehn, Secretary.

Dict. E. C. S.

(Copy)

Federal Trade Commission,

Washington

Office of the Chairman

7 February, 1921.

Maple Flooring Mfrs. Assn., 1045 Stock Exchange Building, Chicago, Ill.

GENTLEMEN: At the request of the Chairman I am writing in reply to your letter of January 29, transmitting a Minimum Price Basis, and Rate Book compiled and published by you, which you state is submitted for the consideration and approval of this Commission.

You are referred to a copy of the act creating the Federal Trade Commission, which is enclosed to you herewith, which fails to contain any warrant for the expression of the approval which you seek. It is true that the message of The President submitting to Congress his proposal for the creation of this Commission, and some of the debates in Congress seem to contemplate action by the Commission upon plans of operation as submitted by business organizations throughout the country, but this power was definitely excluded from the act by Congress and the Commission has never assumed to approve or disapprove plans of corporate or associate action, in advance. It has received from time to time such plans and has placed them on file, but has reserved action with reference to such plans until as a result of operations thereunder complaint arose that there existed a resulting hinderance to competion or restraint of trade.

Your communication has, therefore, been filed but the Commission refrains now from expressing either approval or disapproval either of the plan of operation or its details. Such a plan of operations must be judged by its results in actual operation and if it brings about a hinderance of competion or a restraint of trade it falls within the prohibition of the anti-trust laws and, as well, those of the Federal Trade Commission.

Very truly yours, (Signed) Nelson B. Gaskill, Vice Chairman.

Enc.

[fol. 5154] Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

January 31, 1921.

To members.

GENTLEMEN: After several conferences with Mr. Newman our Counsel at which all conditions were fully discussed and considered, letters (copies of which are enclosed) have been drafted and

will go froward today or tomorrow to the Federal Trade Commission and to the Department of Justice, Washington, D. C.

The printed documents accompanied by the Rate Book with contents stated in paragraph three of the letters will be sent by registered mail, return receipt requested, so that we shall know that the same have been duly received by the authorities at Washington.

Nichols & Cox Lumber Company decided not to enter into the Minimum Price Basis, so their signature does not appear in that part of the printed document, but it does appear in the reprint of the petition dated July 14, 1915. Their signature also appears in the old so-called Minimum Price Plan, which was dated June 21, 1916, and which was filed with the Federal Trade Commission and the Department of Justice about June 30, 1916, but which was never enforced and which is referred to in our letters today, dated January 29, 1921.

Very truly yours, George W. Keehn, Secretary.

[fol. 5155] Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Copy

January 29, 1921.

Federal Trade Commission, Washington, D. C.

GENTLEMEN: The members of the Maple Flooring Manufacturers Association wish to submit to you for your consideration and approval a Minimum Price Basis, five printed copies of which are enclosed herewith.

The purpose of the Minimum Price Basis is to inform the members of the Association what the actual average cost is of manufacturing and placing on the market Maple, Beech and Birch Flooring and the prices at which such flooring should be sold if the manufacturers wish to realize an average profit of five per cent reckoned upon such average cost.

A copy of the Association Rate Book containing the Table of Values Based Upon Average Cost dated January 6, 1921, the Index of Towns, and the Concessions From And Additions To the Basic Delivered Values, referred to in Article IV of the Minimum Price Basis is enclosed herewith.

In this connection we wish to state that the so called Minimum Price Plan which was submitted to you in 1916 was never enforced and was never consummated.

We have not heard anything further from you either approving or disapproving the said Minimum Price Plan since we received your letter of July 6, 1916, in which you stated that the said Plan would be considered by you in connection with our previous request for ruling on the Petition filed with the Commission in September 1915.

As citizens and taxpayers the members of the Association feel that

they are entitled to be advised by you whether in your judgment the foregoing Minimum Price Basis is lawful, as the members of the Association believe it to be.

Respectfully yours, Maple Flooring Manufacturers Association, by George W. Earle, President. George W. Keehn, Secretary.

P. S.—We have written a similar letter to the Attorney General of the United States, Department of Justice, Washington, D. C.

[fol. 5156] Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Copy

January 29, 1921.

To the Attorney General of the United States, Department of Justice, Washington, D. C.

Dear Sir: The members of the Maple Flooring Manufacturers Association wish to submit to you for your consideration and approval a Minimum Price Basis, a printed copy of which is enclosed herewith.

The purpose of the Minimum Price Basis is to inform the Members of the Association what the actual average cost is of manufacturing and placing on the market Maple, Beech and Birch Flooring and the prices at which such flooring should be sold if the manufacturers wish to realize an average profit of five per cent reckoned upon such average cost.

A copy of the Association Rate Book containing the Table of Values Based Upon Average Cost dated January 6, 1921, the Index of Towns, and the Concessions From And Additions To the Basic Delivered Values, referred to in Article IV of the Minimum Price Basis is enclosed herewith.

In this connection we wish to state that the so called Minimum Price Plan which was submitted to you in 1916 was never enforced and was never consummated.

We have not heard anything further from you either approving or disapproving the said Minimum Price Plan since we received your letter of July 6, 1916, in which you stated that you could not comply with our request to give us an official opinion on the subject.

However, as citizens and taxpayers, the members of the Association feel that they are entitled to be advised by you whether in your judgment the foregoing Minimum Price Basis is lawful, as the members of the Association believe it to be.

Respectfully yours, Maple Flooring Manufacturers Association, by George W. Earle, President. George W. Keehn, Secretary.

P. S.—We have written a similar letter to the Federal Trade Commission, Washington, D. C.

Maple Flooring Manufacturers Association, 1045 Stock Exchange Bldg., Chicago

Minutes of Meeting July 19, 1923

A general meeting of the Maple Flooring Manufacturers Association was held at the Congress Hotel, Chicago, Thursday, July 19, 1923, pursuant to the call of the President of the Association.

The meeting was called to order by the Chairman. Eighteen members of the Association were present and three members were absent, namely: Osgood & Blodgett Manufacturing Co., East Jordan Lumber Company and Kneeland-Bigelow Company.

The Wisconsin Land & Lumber Company, as parties to the Government's Dissolution Suit but not as members of the Association, was represented at the meeting by Stewart Earle.

The reading of the Minutes of Meeting held on May 17 was dispensed with, a copy of same having been transmitted to each member soon after the meeting was held.

Mr. Newman and Mr. Darby of the Association's counsel were present and discussed further with the members the defense to the Government's Dissolution suit; Grant Keehn and Edward B. Gordon of the Harvard Graduate School of Business Administration were also present and briefly outlined the work they had done in the preparation of charts, statistical data, etc. in connection with the economic defense of the Association.

Mr. Newman and Mr. Darby gave an account to the members of the hearing in the Federal Court at Grand Rapids, Michigan on June 25 on our motion to dismiss the Government's Petition, which was denied by Judge Sessions. Messrs. Newman and Darby strongly urged that in view of the special objections in the Government's Petition to certain features of our statistical reports and other activities of the Association that the modifications be made in compilation and distribution to our members of statistical data and that Sections of Article XIV be amended by eliminating Paragraph (f) of said Section 3, Article XIV.

On motion, duly seconded, the following resolutions were adopted by unanimous vote:

1. Resolved, That the provision in the last sentence of Article XXII requiring ten days notice to be given of any proposed amendment to the Articles of Association, be and is hereby waived.

2. Resolved, That the Articles of Association be and are hereby amended by annulling Paragraph (f) of Section 3, Article XIV, which reads as follows:

"A reasonable allowance to provide for contingencies and unforeseen hazards incident to manufacturing operations. This allowance is estimated at five per cent of the average total cost of Maple,

Beech and Birch flooring when delivered F. O. B. cars at the flooring plant".

and be it further Resolved, That said Paragraph (f) of Section 3, Article XIV, shall no longer be considered or used in endeavoring to arrive at the cost of manufacture of Maple, Beech and Birch flooring.

3. Resolved, That in order to meet the special objections of the Department of Justice, the Association's Counsel in conjunction with the Secretary be and are hereby authorized and directed to make such changes and modifications as they may decide upon in the compilation and distribution of statistical data to the membership of the Association.

[fol. 5158] Advertising Committee.—Mr. Thomas reported as Chairman of the Advertising Committee that the Sales Manual is now ready to go to press; that the specimens of Maple, Beech and Birch Flooring lumber had been delivered to the Forest Products Laboratory, Madison, Wis., for the purpose of making certain Laboratory tests as previously reported to the Association; that the demand from lumber dealers for our advertising folders has been so great that the Committee found it necessary to have extra editions printed, and that the following number of copies of the various folders had been printed in order to satisfy the demand:

Folder	First edition	Second edition	Third edition	Fourth edition	Totals
A Floor of Captive Sunlight	25 M	20 M	20 M	20 M	85 M
New Floors for Old	25 "	20 "	20 "	20 "	85 "
Roller Skates and Service Floors	25 "	20 "	30 "	..	75 "
Why & Where to Use 1½ inch Face	25 "	25 "	..	..	50 "
The Floor Which the Years will make Precious	25 "	25 "	..	..	50 "
	125 "	110 "	70 "	40 "	345 "

Statistical data covering the first 17 days of July reported by thirteen members indicate as follows:

July Shipments about 9% more than June shipments.

July Production about 13% less than June production.

July New Orders about 24% more than June New Orders.

Stock conditions of 13/16" x 2¼" face Maple flooring on July 17 based upon data from thirteen members were as follows:

July 17	Stocks on hand	Unfilled orders	Oversold	July 17, % sold 13 mbrs.	June 30, % sold all mbrs.
Clear....	1035 M	4050 M	3015 M	391%	546%
No. 1....	1017 "	2666 "	1649 "	262 "	324 "
Factory..	243 "	1567 "	1324 "	645 "	659 "
	2295 "	8283 "	5988 "	361 "	453 "

After a brief discussion of business conditions in general and trade conditions in the Maple Flooring industry, the meeting, on motion, adjourned to Thursday, August 16, 1923.

George W. Keehn, Secretary.

[fol. 5159] Maple Flooring Manufacturers' Association, 1045 Stock Exchange Bldg., Chicago

August 2, 1923.

To members.

GENTLEMEN: In accordance with the action taken by the Association at the general meeting on July 19, the following changes have been made in the statistical reports and other activities of the Association. The changes have been made upon the advice of the Association's Counsel in order to eliminate certain features which are specially objected to by the Department of Justice in its Petition asking for the dissolution of our Association.

1. The following data which have heretofore been furnished to the members of the Association for their information, have been eliminated from the Rate Book and the compilation, distribution and use for any purpose whatever, of the said data described below are wholly abandoned and discontinued.

(a) The so-called Delivered Cost Charts.

(b) All matters relating to so-called Differentials.

(c) All matters relating to Terms of Sale and Cash Discounts.

It is understood that the members will comply with the action taken and will eliminate all of said data from their Rate Book.

2. The Association membership numbers which identify the individual members of the Association have been eliminated from all our reports issued since July 19 and are to be eliminated from all reports issued hereafter by the Association so that the information which is consolidated and transmitted to the members from time to time will not disclose to any member or members any of the particulars or intimate details of any other member's business respecting his Stock on Hand, Unfilled Orders, Shipments, Production and New Orders Booked or which will identify the average prices he

realizes or identify as his prices the prices at which he sells any Maple, Beech or Birch Flooring.

Yours very truly, George W. Keehn, Secretary.

[fol. 5160] Maple Flooring Manufacturers' Association, 1045 Stock Exchange Bldg., Chicago

August 2, 1923.

Test Runs

To members.

GENTLEMEN: Since the general meeting of the Association on July 19 we have made a new calculation of Average Cost and have based same upon the results of five test runs which were made since January 1, 1922.

These five test runs were made as follows:

Mitchell Brothers Company, January-February 1922.
Kerry & Hanson Flooring Co., December 1922.
East Jordan Lumber Company, January 1923.
Grand Rapids Trust Company, Receiver for Wm. Horner, January 1923.
Kneeland-Bigelow Company, January 1923.

We enclose for your information a statement in detail analyzing the results of the five test runs consolidated and considered as one test run. You will note that the 5% allowance for unforeseen hazards, etc. mentioned in Paragraph (f), Section 3 of Article XIV has been eliminated from the calculation in accordance with the action taken at the general meeting on July 19 annulling said paragraph and eliminating same from our Articles of Association.

Very truly yours, George W. Keehn, Secretary.

[fol. 5161] Average Cost Based upon Composite Result of Five Test Runs

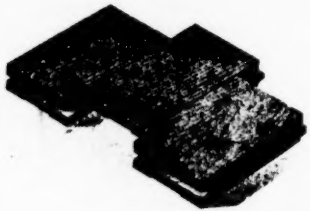
5327–5328

GRADING RULES

For Maple, Beech *and* Birch Flooring



Adopted July 29, 1920
and Copyrighted by

Maple Flooring Manufacturers Association
Stock Exchange Building
Chicago Illinois

5329

MFMA
TRADEMARK

To establish and enforce uniform grades and standard of products; to constantly improve methods of manufacture; to make the Association trade mark the symbol of excellence in methods and materials; to provide architect, dealer, and builder with an organized and always available guaranty of quality; to protect the integrity of the product and to stimulate its more intelligent and economical use; and to stabilize and improve the industry in all its activities—these are the essential purposes of the Maple Flooring Manufacturers Association.

5330

Grading Rules

The Clear Grade

CLEAR—$\frac{13}{16}$-inch and thicker, shall have one face practically free of all defects, but the question of color shall not be considered. Standard lengths in all widths in this grade shall be trimmed 2 to 16 feet; the proportion of lengths 2 to 3½ feet inclusive shall be what the stock will produce up to 20 percent.

This grade combines appearance and durability and has a face free of defects that will materially mar the appearance of the finished floor or impair its durability. It will be noted that the standard of appearance is that of a finished floor, not the top of a piano. A practical application of this rule will admit an occasional small sound pin knot not over ¼-inch in diameter, dark green or black spots or streaks not over ¼ inch wide and 3 inches long or its equivalent, birdseyes and small burls, a slightly torn grain or similar defect which can be readily removed by the ordinary method of smoothing the floor when it is laid, a slightly shallow place not over 12 inches long on under side of flooring if it does not extend to either end of the piece, an otherwise perfect tongue which is one-half short for 25% of length of piece is admissible, but the face must be free of checks or shake and the wood must be live and sound.

5331

The No. 1 Grade

No. 1—$\frac{13}{16}$-inch and thicker, will admit of tight, sound knots and slight imperfections in dressing, but must lay without waste. Standard lengths in all widths in this grade shall be trimmed 1½ to 16 feet; the proportion of lengths 1½ to 3½ feet inclusive shall be what the stock will produce up to 40 percent.

This grade is made for service rather than appearance. It admits of tight, sound knots prominent discolorations, numerous dark green or black spots or streaks, slight checks not exceeding three inches in length and running parallel with and well inside of the edges of the strip, dark spots or streaks with slight checks in center, small rough spots which cannot be wholly removed by the ordinary method of smoothing the floor when it is laid, slightly torn edges, short tongue if sufficient to hold properly in the floor, shallow or waney back if piece has sufficient bearings of full thickness to support it in floor, and slight variation in angle of end matching. While these and similar features are admissible, sufficient attention is given to appearance to make this grade desirable and satisfactory for use in stores, school houses and similar places where a waxed or varnished floor is not required.

5332

The Factory Grade

FACTORY—$\frac{13}{16}$-inch and thicker, must be of such character as will lay and give a good serviceable floor, with some cutting. Standard lengths in all widths in this grade shall be trimmed 1 to 16 feet; the proportion of lengths 1 to 3½ feet inclusive shall be what the stock will produce up to 60 percent.

This grade is suitable for factory, warehouse and kindred uses, and where a low priced floor is wanted for *wear* nothing better or cheaper can be obtained than the Factory grade.

Special Grades

WHITE CLEAR is special stock manufactured from White Clear Maple lumber from the outside of the log, winter-sawed and end-piled in sheds to prevent staining, is almost ivory white, and is the finest grade of Maple flooring it is possible to produce.

RED CLEAR Beech and Red Clear Birch are manufactured from all-red face stock, especially selected for color and are free from all defects. The color is a rich warm tint peculiar to no other wood.

Standard Measurement

Flooring $\frac{5}{8}$-inch and thicker, all faces, is measured ¾-inch waste for matching.

Flooring ½-inch and thinner, all faces, is measured ½-inch waste for matching.

Jointed flooring, all thicknesses and faces, is measured ½-inch waste.

All flooring shall be end-matched unless otherwise specified.

The actual thickness of $\frac{13}{16}$-inch and thicker flooring is $\frac{1}{32}$-inch scant of the thickness used as the trade name. The $\frac{1}{32}$-inch scant is taken from the under side of the flooring, leaving the thickness of the wearing surface unchanged.

Custom Governing Re-Inspection

In the manufacture and grading of Maple, Beech and Birch flooring, the highest type of machinery and workmen are employed, but years of experience have shown that the most efficient inspectors will occasionally let some pieces slip into the wrong grade. Consequently if a re-inspection which shall be made by an Official Inspector of the

Maple Flooring Manufacturers Association, does not result in a difference in favor of the party complaining of more than 5 percent in feet, of grade below the original inspection, the party demanding the re-inspection shall accept the flooring as originally graded and pay all expenses connected with the re-inspection.

The quality of the flooring in the condition in which it leaves the manufacturer is held to govern the grade, as subsequent lack of care and improper treatment in laying, scraping or finishing are not chargeable to the manufacturer.

Because of modern methods of laying hardwood floors, and the improved nail now used, the boring of dressed and matched flooring is no longer of practical value; consequently the practice of boring is being discontinued by the manufacturers and as it is not an essential feature in the manufacture and grading of flooring the absence of it will not be considered a basis for any reclamation.

Advantages of Standard Lengths

It will be found more advantageous to specify and use the Standard run of lengths in the different

5335

grades instead of special long lengths because lengths selected 4 feet or 6 feet and longer are much more expensive without compensating benefits.

Modern perfected methods of manufacturing hardwood flooring produce a larger proportion of shorter lengths than the old-time methods, because the defects are cut out closer, thus improving the average quality of the flooring, and experience has demonstrated that shorter lengths combined with longer lengths cost no more to lay and make as good or better floor at a material saving in cost than all long lengths. The shorter lengths can also be used to advantage in closets and other small spaces.

The stand of Maple, Beech and Birch stumpage is limited and is becoming rapidly depleted, and the sentiment in favor of conservation of forest resources is strongly in favor of the utilization to the greatest extent of these valuable woods, especially when the result attained in the finished floor is in nowise depreciated.

5336

Maple Flooring Manufacturers Association

Minutes of Meeting January 12, 1922

A general meeting of the Maple Flooring Manufacturers Association was held at the Hotel La Salle, Chicago, Thursday, January 12, 1922.

In the absence of Dr. Earle, President of the Association, Mr. Whedon, the Vice-President, acted as Chairman of the meeting.

Seventeen members of the Association were present and six members were absent, the absent members being Nos. 1, 4, 7, 26, 30 and 37.

The reading of the Minutes of the meeting held on December 22, 1921 was waived; copies of the Minutes of that meeting having been mailed to the membership soon after the meeting was held.

The Chairman stated that in accordance with the wishes expressed by the members at the previous meeting, the Secretary had requested Mr. Jacob Newman, as counsel of the Association, to give his written opinion regarding the decision of the U. S. Supreme Court in the so-called "Memphis Case or Open Competition Plan." The Secretary reported that Mr. Newman's written opinion had been obtained and it was thereupon read to the meeting and it is attached hereto and made a part of these Minutes. The Secretary was instructed to send a copy to each member of the Association.

After discussing the opinion, it was suggested that Mr. Newman be invited to attend the meeting to answer any questions the members might wish to ask regarding the Court's decision.

After further discussion of the whole subject with Mr. Newman, it was the sense of the meeting, that in view of his legal opinion and his analysis and interpretation of the spirit and meaning of the Supreme Court's decision, that the statistical work of the Association, which was immediately suspended when the decision of the Court became known, be resumed and proceeded with in accordance with Mr. Newman's legal advice in his written opinion.

On motion, it was ordered by unanimous vote that new Articles of Association be prepared and the Secretary was instructed to confer with Mr. Newman in drafting new Articles of Association and have them ready in time to submit to the next general meeting of the Association.

There being no further business, the meeting, on motion adjourned, subject to the call of the President.

George W. Keehn, Secretary.

Statement of Mr. Kerry Concerning Standardization of Grades and Sizes

I have been intrested in the manufacture of maple flooring since about 1901. For a great number of years maple was left standing in the forests by white pine operators. Maple lumber or maple wood was not then a commercial product and white pine operators did not consider it worth while to fell maple timber. C. J. L. Meyer of Hermansville invented machinery to manufacture maple flooring in the late nineties. This was necessary as the ordinary soft wood machines would not stand the hardships encountered in milling maple lumber, which is one of the hardest woods. The Meyer machine required three oprations before the flooring was finished; that is, they sized it, surfaced it and tongued and grooved. Later on the W. E. Wood Company put out a heavy duty machine that would perform these three functions at one time, but it had to be operated at a very low rate of speed and the very best grades of lumber had to be used, as there was no sale for short lengths. The W. E. Wood Company got up a machine for end matches in order to make the shorter lengths more desirable. In the late nineties the W. E. Wood Company sued the various users of end matching machines and in litigation was defeated, the court holding that flooring was

end matched before Wilce's machine was gotten up. Final decision was rendered some time in the early 1900's, probably in 1901 or 1902.

After this decision the manufacture of maple flooring became more general. At that time the grades were given different names in different parts of the United States. I have seen a maple flooring list from Minneapolis where the grades are designated as No. 1, No. 2 and No. 3 or factory flooring. This list is dated June 20th, 1901. I believe there was a maple flooring manufacturers' association as early as 1897. According to trade papers the members of the Asso-[fol. 5413] ciation in 1898 represented about 90 per cent of the supply of maple flooring. At that time there were three grades—namely, Clear, 1st Common and Factory. The grading rules were as follows:

Clear.—Shall have one face free of all defects, but the question of color shall not be considered, except that black streaks which would materially injure the appearance of the piece shall be excluded. Standard lengths in this grade shall be 6 feet and up for square butted ends and 4 feet and up for matched ends, and be trimmed to feet and half feet. The proportion of lengths 4 to 5½ ft. inclusive shall be what the stock will produce up to 5 per cent. Flooring 1⅛″ or thicker shall be 4 to 16 ft. in length for both matched and butted ends. In all cases in jointed flooring ½″ shall be added to face measurement for working.

First Common.—Will admit of tight sound knots and slight imperfections in dressing, but must lay without waste. Standard lengths in this grade shall be from 4 to 16 feet inclusive, trimmed to feet and half feet for butted ends; matched ends, 2 to 16 feet inclusive.

Factory Flooring.—Must be of such a character as will lay and give a good serviceable floor with some cutting.

The rules for grading flooring in 1901 were as follows:

Clear.—Shall have one face free of all defects, but the question of color shall not be considered. Standard length in this grade shall be 4 ft. and up and be trimmed to feet and half feet. The proportion of lengths 4 to 5½ ft. inclusive shall be what the stock will produce up to 10 per cent.

[fol. 5414] First Common.—Will admit of tight sound knots and slight imperfections in dressing, but must lay without waste. Standard lengths in this grade shall be from 2 to 16 feet inclusive, trimmed to feet and half feet.

Factory Flooring.—Must be of such a character as will lay and give a good serviceable floor with some cutting. Lengths 2 to 16 ft.

The rules for grading in 1903 were as follows:

Clear.—Shall have one face free of all defects, but the question of color shall not be considered. Standard lengths in this grade shall be trimmed from 4 to 16 ft. inclusive. The proportion of lengths 4 to 5½ ft. inclusive shall be what the stock will produce up to 10 per cent.

Number 1.—Will admit of tight sound knots and slight imper-

fections in dressing, but must lay without waste. Standard lengths in this grade shall be trimmed from 2 to 16 ft. inclusive.

Factory Flooring.—Must be of such a character as will lay and give a good serviceable floor with some cutting. Lengths 2 to 16 ft.

The grading rules in 1905 were as follows:

Clear.—Shall have one face free of all defects, but the question of color shall not be considered. Standard lengths in this grade shall be trimmed from 4 to 15 ft. inclusive.

Number 1.—Will admit of tight sound knots and slight imperfections in dressing, but must lay without waste. Standard lengths in this grade shall be trimmed from 2 to 16 ft. inclusive.

Factory Flooring.—Must be of such a character as will lay and give a good serviceable floor with some cuting. Lengths 2 to 16 ft.

[fol. 5415] After June 1st, 1905, the rules for clear maple flooring were as follows:

Clear—Shall have one face free of all defects, but the question of color shall not be considered. Standard lengths in all widths in this grade shall be 2 to 16 ft. inclusive. The proportion of lengths 2 to 3½ ft. shall be what the stock will produce up to 5 per cent to 10 per cent.

The rules were the same in September, 1905, except that with respect to clear it was provided that the proportion of lengths 2 to 3½ ft. should be what the stock would produce up to 7 per cent.

In 1906 the rules were as last stated, except that the standard lengths in No. 1 were 1½ to 16 ft. inclusive and the lengths in factory flooring were from 1 to 16 ft.

In October, 1909, the clear was 2 to 16 ft. inclusive proportion of lengths 2 to 3½ ft. shall be what the stock will produce up to 10 per cent.

In the No. 1 the proportion of lengths 1½ ft. to 3½ ft. shall be what the stock will produce up to 25 per cent.

The factory flooring standard lengths shall be 1 to 16 ft. The proportion of lengths 1 to 3½ ft. shall be what the stock will produce up to 50 per cent.

Later on the proportion of lengths 2 to 3½ ft. in the clear grade was what the stock would produce up to 20 per cent and the proportion of lengths 1½ to 3½ ft. in the No. 1 grade were what the stock would produce up to 60 per cent.

These rules are now in effect.

[fol. 5416] Thicknesses

In the early days of the industry the thickness of the flooring manufactured from 4/4 rough maple lumber was ⅞ of an inch thick. Later on the standard lengths of the finished flooring was 13/16 of an inch instead of ⅞ of an inch.

In 1920 the standard thickness was reduced from 13/16" to 25/32", the 1/32" scant being taken from the underside of the flooring, leaving the wearing surface just the same as before when the standard thickness was 13/16".

These various changes in the thickness of the finished flooring have been made from time to time in order to conserve the raw material and the larger proportions of short lengths admissible in the standard grades was also done for the purpose of conserving the raw material, and this also applies to the lengths in the No. 1 and factory grades.

Attached to this statement is a copy of the grading rules now in force. These grading rules were adopted on July 29th, 1920, by the Association then in existence. It will be observed by a comparison of the previous grading rules and those now in force that the grades are much more fully defined. Modern perfected methods of manufacturing hardwood flooring produced a larger proportion of shorter lengths than the old time methods, because the defects are cut out closer, thus improving the average quality of the flooring, and experience has demonstrated that shorter lengths combined with longer lengths cost no more to lay and make as good or better floors at a material saving in cost, than all long lengths. Shorter lengths can always be used to advantage in closets and other small spaces.

[fol. 5417] The stand of maple, beech and birch stumpage is limited and is becoming rapidly depleted, and the sentiment in favor of conservation of forest resources is strongly in favor of the utilization to the greatest extent of these valuable woods, especially when the result obtained in a finished floor is in no wise depreciated. In the extravagant process of earlier times the shorter lengths now used were burned as offal. Were it not for the utilization of these shorter lengths the cost of the longer lengths to the consumer would be greatly increased. In other words, if these shorter lengths were thrown away as was done in the early days of the industry, the cost to the consumer per thousand feet of the other product composed of longer lengths would be greatly increased.

For many years I took an active interest in standardization, both as a manufacturer of maple flooring and subsequently as a member and chairman of the Grades Committee. I found that some manufacturers were center matching, also using a large round tongue, which left a lesser wearing surface, and others were using a smaller tongue, and some of them a wedge shaped tongue. We finally in our own factory established the use of the smaller wedge-shaped tongue. By having a smaller tongue and putting it below the center gives a better wearing surface. We also had letters of comment from some of our users, advising that they could lay floors where the wedge shaped tongue was in use for at least $1.00 per thousand less than where the round shaped tongue was used. Taking those things into consideration, our Committee thought it advisable to establish uniformity of matches and selected the smaller wedge-shaped tongue as preferable. Some of the manufacturers insisted on staying by their present methods of matching, thinking [fol. 5418] it gave them a preference over the other manufacturers regarding their individual customers, thinking that their customers would not want to change if the new matching was different from theirs as this would necessitate their carrying two manufacturers

of flooring. However, we finally got them all to agree to use the same size tongue and groove and put it in the same location as to distance from top and bottom. This gives purchasers of maple flooring an opportunity to purchase their flooring whenever they could do so to the best advantage as to price. In order to establish this uniformity in matching it was necessary to get the committee together at various times. After it was agreed upon I looked after the manufacturing of these steel templets to be furnished to every member of the Association; also blue prints covering this uniformity of matching. Some of these templets were sent direct to the manufacturers by me and some of them were sent to Chicago and distributed by the Association.

(The grading rules now in force were detached from this statement, because they had theretofore been introduced in evidence.)

[fol. 5423] DEFENDANTS' EXHIBIT CC-½

History of the Lumber Market from January 1, 1918, to June 1, 1923

The period covered by the dates above enumerated mark one of the most interesting eras in entire lumber annals, beginning with a period when this Nation was a participant with European Allied countries in the World War, going thru the last year of that war and proceeding thru the subsequent scarcity of all products of civilized life with its riot of prices at a height which had never been conceived, when all factories and workmen were pushed harder than during the fever of war-times until wants were fairly well satisfied and the expected realized, which, although somewhat anticipated, acted as a restraining force to further enlargements of industry and increase of values.

We see lumber advancing from the beginning of this period, especially lumber used in the manufacture of Maple Flooring and similar products, from a base of $30.00 per M for 4/4 #1 Common, $25.00 for #2 and $23.00 for #3 to $122.00 per M for the #1 Common, $82.00 for the #2 and $37.00 for the #3 in June 1920, and to recede from this pinnacle by the end of 1921 to $75.00 per M for the #1 Common, $45.00 for the #2 and $38.00 for the #3, and by October 1921, $40.00 per M for the #1 Common, $24.00 for the #2 and $17.00 for the #3; to advance slightly in June of the following year to $52.00 for the #1 Common, $32.00 for the #2 and $22.00 for the #3 and to gradually advance from these prices to $60.00 per M for the #1 Common, $40.00 for the #2 and $25.00 for the #3 of this year.

[fol. 5424] During the above period it is very interesting to note the cost of production of Maple Flooring lumber and we have taken as a basis of this cost the minimum wage paid in both the mill and woods departments of representative sawmills in the district of the Northern Peninsula of Michigan. At the beginning of this period, Jan. 1, 1918, common labor at the sawmill was receiving $2.50 per day and woods labor was receiving an average of $40.00 per month and keep. However, in the case of the mill labor no keep is included.

We note that sawmill labor advanced April 1, 1918 to $2.75 and August 1st to $2.90; woods labor showed no advance until August 1st and was advanced to $45.00 and again on Oct. 1st, to $50.00 per month, this rate being held until February 1st, 1919, at which time the sawmill labor had reached $3.00 per day. In June 1919 the sawmill labor was getting $3.25 per day and the woods labor $45.00 per month. At the end of this year, 1919, however, woods labor had reached $55.00 per month and sawmill labor $3.75 per day. We see a steady advance from this point, in both sawmill and woods labor, until Dec. 1, 1920, when sawmill labor had reached the hitherto unheard-of rate of $5.00 per day for common labor and woods labor $75.00 per month, which is the peak and highest wages ever paid in this district for labor. From this point a decline is noticed somewhat gradual and Jan. 1, 1922 sees sawmill labor at $2.50 per day and woods labor $26.00 per month and keep. It advanced, however,

[fol. 5425] until by the end of the year, on account of shortage of men, woods labor was receiving $40.00 per month and mill labor $3.00 per day, from which point, during 1923, mill labor is advanced to $3.25 per day and woods labor to from $50.00 to $60.00 per month. According to the records kept by the J. W. Wells Lumber Co. the peak seems to have been reached both insofar as net returns on lumber are concerned and the highest wages paid for men both at mill and in the woods department, in Sept. 1920. This has special reference also to the net rates for Maple Flooring values, following very closely the cost of production and the law of supply and demand.

(Here follows reproduction of a portion of Defendants' Exhibit CC½, marked side folio pages 5426, 5427, 5428, and 5429.)
